CONTENTS

Fate of H-Thymidine-Labeled Spleen Cells in in Vivo Cultures during Secondary Antibody Responses. Elmo E. Capalbo, T. Makinodan and W. D. Gude............ 1

Sensitization and Desensitization of Mice to Histamine and Serotonin by Neurohumors. Charles W. Fishe1, Andor Szentivanyi and David W. Talmage........ 8

Evaluation of the Complement Method of Fluorescent Antibody Technique with Myxoviruses. Yorio Hinuma, Rei Ohta, Tsutomu Mitamoto and Nakao Ishida................................................................. 19

Studies on the Bacteriophage Neutralizing Activity of Serums. II. Comparison of Normal and Immune Phage Neutralizing Antibodies. Louis H. Muschel and Andre J. Toussaint.............................................. 35

Effect of Cations on Thermal Inactivation of Vaccinia, Herpes Simplex, and Adenoviruses. Craig Wallis, Chau-Siung Yang and Joseph L. Melnick.......... 41

A Study of Passive Sensitization of Guinea Pigs with Antigen-Antibody Complexes. Leon T. Rosenberg and Dora K. Tachibana................................. 47

Specificity of Eencephalitogen-Induced Inhibition of Experimental “Allergic” Eencephalomyelitis in the Guinea Pig. Cheng-Mei Shaw, Ellsworth C. Alvord, Jr., Willson J. Fahlberg and Marian W. Kies........................................... 54

Studies on the Immunologic Unresponsiveness during the Secondary Disease Period of Lethally Irradiated Mice Protected by Homologous Bone Marrow. John S. Thompson, Eric L. Simmons and Diana Hopstra......................... 62
Studies of Induction of Allergic Encephalomyelitis in Rats and Guinea Pigs without the Use of Mycobacteria. Philip W. Paterson and Jennifer Bell .......................... 72

Observations on Incidence and Mechanism of Egg Insusceptibility to Trachoma Viruses. E. Jawetz, S. Chino and L. Hanna ............................................. 80

Gel Double Diffusion Studies with Group B and Group A, Type 9 Coxsackie Viruses. II. Serologic Diagnosis of Coxsackie Virus Infections by the Gel Double Diffusion Technique. Nathalie J. Schmidt and Edwin H. Lennette ..... 96

A Simplified Immunofluorescent Plaque Method. Rex S. Spendlove and Edwin H. Lennette .................................................. 106

Heterogeneity of the Major Fractions of Papain Digests of Rabbit Antibody. Peter Stefls, Oliver Roholt and David Pressman ........................................ 113

Immunological Studies on Bacteriophage Deoxyribonucleic Acid. III. Specificity of the Antibodies. William T. Mubakami, Helen Van Vunakis, Harris Lehrer and Lawrence Levine ..................................... 116

The Staining Properties of Human Serum Proteins Conjugated with Purified Fluorescein Isothiocyanate. Lawrence H. Frommagen and Rex S. Spendlove .......................... 124

Retention of Antigen in Neonatal and Older Chicks. Arthur A. Hirata, Justine S. Garvey and Dan H. Campbell ............................................. 132

Evidence for the Absence of Anaphylactogenic Host Protein in Highly Purified PRS Influenza Virus. Arthur V. Kroeger .................................................. 136

Inhibition with Simple Sugars of Hemagglutination of Red Cells Modified with Salmonella Antigens. Marian Truszczynski and Edgar E. Baker ............... 154

THE JOURNAL OF IMMUNOLOGY

Information for Subscribers

Published monthly, beginning January, 1929. (From 1916–1925, and in 1928 Volumes I-X, inclusive, and Vol. XV published bi-monthly.)

The subscription price is $18.00 per year in U.S.A.; $18.75 in Canada; $19.50 elsewhere. Single copies, when available, are $2.25 in U.S.A.; $2.50 elsewhere. The subscriptions of members of the American Association of Immunologists are included in the membership dues and are handled by the Association's Treasurer, Dr. Byron H. Waksman, Massachusetts General Hospital, Boston 14, Mass. All other subscriptions should be sent to the publishers.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the first volume of the year when subscription is received. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value of such numbers will be refunded to the subscriber.

Subscriptions should be renewed promptly: To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

Correspondence concerning all business matters should be addressed to

THE WILLIAMS & WILKINS COMPANY

Publishers of Scientific Books and Periodicals
