This information is current as of January 20, 2018.

Why The JI?

- **Rapid Reviews! 30 days** from submission to initial decision
- **No Triage!** Every submission reviewed by practicing scientists
- **Speedy Publication!** 4 weeks from acceptance to publication

*average

**Subscription**

Information about subscribing to *The Journal of Immunology* is online at:

Print ISSN: 0022-1767 Online ISSN: 1550-6606.
CONTENTS

NUMBER 1, JANUARY 1968

IMMUNOCHEMISTRY

Properties of 19S Antibodies in Complement Fixation. I. Temperature Dependence and Role of Antigen Structure. Ruth V. Cunniff and B. David Stollar ................................... 7

A New Serum Factor in Normal Rabbits. IV. Occurrence in Neonatal Rabbit Sera. William J. Mandy, Marion E. Woolsey and F. B. Lewis .................................. 15

Immune Lytic Transformation: A State of Irreversible Damage Generated as a Result of the Reaction of the Eighth Component in the Guinea Pig Complement System. Robert L. Stolfi ....... 46

The Inhibition by Normal γG-Globulins of Antibodies Specific for Individual γG Myeloma Proteins. Daniel Hurez, Gilbert Meshaka, Constantin Mihaesco and Maxime Seligmann ......... 69

A Cellulose Mercurial: Preparation, Properties and Use in Antibody Purification. John R. Shainoff .................................................................................. 187

The Antigenic Determinants of the Variable Half of a Bence-Jones Protein of Type L. A. Ruffilli... 201

Reactivity of Human Immunoglobulins in Amoebiasis. Shirley E. Maddison, Irving G. Kagan and Lois Norman .............................................................................. 217

IMMUNOGENETICS

Blood Group Specific Agglutinins in Invertebrates. Rebecca Brown, Luis R. Almodovar, H. M. Bhatia and William C. Boyd .................................................. 214

CELLULAR IMMUNOLOGY

Differentiation of Antibody-Forming Cells. I. Ratio of Precursor Cells to Antibody-Forming Cells in the Mouse Spleen. Phyllis Kind and Priscilla A. Campbell ............................. 55

IMMUNOPATHOLOGY

Immunologic Specificity of the Localized Shwartzman Phenomenon Induced in Guinea Pigs by Simple Chemical Haptens. A. L. DeWeck, J. R. Frey and H. Geleick .................................................. 1

Nephrototoxic Serum Nephritis in Mice with a Genetic Deficiency in Complement. Lois H. Lindberg and Leon T. Rosenberg ......................................................... 34

The Pathogenicity in Mice of Aerosols of Encephalomyocarditis Group Viruses or Their Infectious Nucleic Acids. T. G. Akers, S. H. Madin and F. L. Shaffer .......................... 120

Histology of PCA Reactions in Guinea Pigs. A Comparison of Reactions Produced by Guinea Pig γGI and Rabbit Antibodies. Moses K. Lieberman and Zoltan Ovary .............................. 159

γG-Antibody to Human Anti-Hemophilic Globulin (Factor VIII). Burton R. Anderson and Stanley B. Troup ................................................................. 175

MICROBIAL AND VIRAL IMMUNOLOGY

Hemagglutinin of Type 4 Adeno-Associated Satellite Virus. Michio Ito and Heather D. Mayor ................................. 61

Influenza Virus Neutralizing Antibody in Human Respiratory Secretions. Robert H. Waldman, John J. Mann and Julius A. Kael .............. 80

Contents

Application of Immunodiffusion Methods to the Antigenic Analysis of Dengue Viruses. II. Immunoelectrophoresis. Adly N. Ibrahim and W. McD. Hammon ........................................... 93
Rhinoviruses: Basis for a Numbering System. II. Serologic Characterization of Prototype Strains. Robert M. Conant and Vincent V. Hamparian ........................................... 114
Evidence for the IgG Nature of Complement-Fixing (CF) Antibodies to Adenovirus Type 12 Hamster Tumor Neoantigens. G. L. Van Hoosier, Jr., Carolyn Cupp, Dee Boren and J. J. Trentin ........................................... 128
Studies on Live Attenuated Japanese Encephalitis Vaccine to the Swine. K. Kodama, N. Sasaki and Y. Kanda Inoue .................................................................................. 194
A Sandwich Technique for the Detection of Myxovirus-Infected Cells Using a Fluorescein-Conjugated Antibody Directed against a Glycoprotein Substrate (Fetuin). Herbert A. Blough, Mark Ballow and John W. Kreider ........................................... 209

Communications

Interactions of the Complement System with Endotoxins from a Salmonella minnesota Mutant Deficient in O-Polysaccharide and Heptose ................................................................ 227

Number 2, February 1968

Immunochemistry

Fc-Like Fragments in Peptic Digests of Human Immunoglobulin G. Ralph Heimer and Sidney H. Schnoll ........................................................................................................ 231
Structure of Human Immunoglobulin M. II. Isolation of a High Molecular Weight Fc Fragment of IgM Composed of Several Fc Subunits. Kaoru Onoue, Tadamitsu Kishimoto and Yuichi Yamamura ........................................................................................................ 238
A New Basic Protein in Rabbit Serum Unrelated to Immunoglobulin. Donald R. Nash and John H. Schwab ........................................................................................................ 252
Cold-Reacting Antibodies: The Enhancement of Antibody Fixation by the First Component of Complement (C'1a). Wendell F. Rosse, Tibor Borsos and Herbert J. Rapp ........................................... 259
Urinary Fc and F'e Fragments. John Bienenstock ................................................................................................................................. 280
Cross-Reactions of Calf Thymus Histones with Polyllysine Antiserum. Ann L. Sandberg and B. David Stollar ........................................................................................................ 286
The Effect of Carbamylation and Amidination of Rabbit γG-Antibody on Its Ability to Fix Complement. Stanley Cohen and Elmer L. Becker ........................................................................................................ 395
The Effect of Benzylation or Sequential Amidination and Benzylation on the Ability of Rabbit γG-Antibody to Fix Complement. Stanley Cohen and Elmer L. Becker ........................................... 403
The Requirement for the Association of Two Adjacent Rabbit γG-Antibody Molecules in the Fixation of Complement by Immune Complexes. Stanley Cohen ........................................................................................................ 407

Immunogenetics

Cellular Immunology

Antigenic Properties of Mouse Lymphoma Cells. Esther Fincher Hays ................................................................................................................................. 245
Detection of Immune Response against Synthetic Polymers of Amino Acids Employing the Plaque-Forming Cell System. II. Cross-Reactions of Normal Sheep Erythrocytes with Antibody against Glutamic Acid, Lysine, Alanine and Tyrosine Terpolymers. Patricia Walah, Paul H. Maurer and Marianne Egan ........................................................................................................ 266
Delayed Hypersensitivity. II. Persistence and Conjugate Specificity of the Transfer Reaction. John P. Phair and Fred S. Kantor ........................................................ 302

Fine Structure of Lymphocytes Sensitized to Trichinella spiralis. Mahendra P. Januar, Charles W. Kim and L. D. Hamilton .............................................................. 329

The Effect of Antigen Dose and Time after Immunization on the Amount and Affinity of Anti-Hapten Antibody. Edmond A. Goidl, William E. Paul, Gregory W. Suskind and Baruj Benacerraf .............................................................. 371

The in Vivo Induction of Mouse Lymphocyte Transformation by Phytohemagglutinin. Lois B. Epstein and Charles W. Smith ......................................................... 421

Antibody Production by Isolated Spleen Cells: A Study on the Cluster and the Plaque Techniques. O. B. Zaalberg, V. A. van der Meul and M. J. van Twisk ......................................................... 451

IMMUNOPATHOLOGY

A Proposed Mechanism for Natural Immunity to Enterobacterial Pathogens. Louis Chedid, Monique Parant, Francine Parant and Fernand Boyer .............................................................. 292

Skin-Fixing Antibody in Experimental Allergic Encephalomyelitis. George A. Falk, Robert G. Heinze, Marian W. Kies and Ellsworth C. Alvord, Jr ...... 321

Susceptibility of Different Mouse Strains to Lymphocytic Choriomeningitis Virus. Michael B. A. Oldstone and Frank J. Dixon ......................................................... 355

MICROBIAL AND VIRAL IMMUNOLOGY

Neutralization of Sensitized Lactic Dehydrogenase Virus by Anti-Г-Globulin. Abner Louis Nottins, Michael Mage, Warren K. Ashe and Suellen Mahar .............................................................. 314

Distribution of Antibodies within 19 S and 7 S Immunoglobulins following Infection with Mycoplasma pneumoniae. Gunnel Biferfeld .............................................................. 338

Development in Hamsters of Antibodies against Surface Antigens Present in Cells Transformed by Papovavirus SV40. Satvrik S. Tewetha, Lynda A. Couvillion and Fred Rapp ................................................................................... 358

The Growth of Mumps Virus in Organ Cultures of Rhesus Thyroid Gland. Thomas D. Flanagan, Almen L. Barron and Ernest Witebsky ......................................................... 414

Reaction of Endotoxin and Surfactants. II. Immunologic Properties of Endotoxins Treated with Sodium Deoxycholate. David F. Tarmina, Kelsey C. Milner, Edgar Ribi and Jon A. Rubbach .............................................................. 444

NUMBER 3, MARCH 1968

IMMUNOCHEMISTRY

Serum Complement and the Enzymatic Degradation of Erythrocyte Phospholipid. J. Kelly Smith and Elmer L. Becker .............................................................. 450

Isolation of a Protein Antigen following Extraction of Lipids from Sheep Red Blood Cell Stroma. I. Hemolytic IgM Primary Response and Hemolytic IgG Secondary Response in Rabbits. Charles A. Santos-Buch and J. René Guzmán-Rivero .............................................................. 475

The Immune Response in the Hamster. I. Definition of Two 7 S Globulin Classes: 7 S1 and 7 S4. John E. Coe .............................................................. 507

Production of Fc Fragments of IgM. Vincent Yakulis, John Schmale, Nicolas Costea and Paul Heller .............................................................. 525

Reversed Type Allergic Skin Reactions by Anti-Г-E Globulin Antibodies in Humans and Monkeys. Kimishige Ishizaka and Teruko Ishizaka .............................................................. 554

On the Nature of Cryoglobulins. Horace H. Zinneman, Donald Levi and Ulysses S. Seal .............................................................. 594

Specificity of Antiglobulin Factors in Normal Human Serum Reacting with Enzyme Digested Г-Globulin. Lucy C. Kormeier, Judy T. Ing and William J. Mandy .............................................................. 612
CONTENTS

The Effect of Salt-Induced Aggregation on the Gel Filtration of Chicken 7 S Antibodies. Dianna E. Van Orden and Henry P. Treffers .................................................. 659
A Demonstration of the Coprecipitation of β-Lipoproteins with Specific Precipitates of Chicken Antibodies and Human Serum Albumin. Dianna E. Van Orden and Henry P. Treffers ........................ 664
Studies on Organ Specificity. XIX. Antigenic Specificity of Seminal Plasma and the Formation of Autoantibodies. Sidney Shulman, Clelia Riera and Carlos Yantorno .... 682

IMMUNOGENETICS

Genetic Control of the Antibody Response Response. III. Qualitative and Quantitative Charac-
terization of the Antibody Response to (T, G)-A—L in CBA and C57 Mice. Hugh O. McDevitt .................................................. 485
Direct Demonstration and Quantitation of Aa1, Aa2 and Aa3 Allotypic Specificities on Fd-Frag-
ments of Rabbit Immunoglobulin G. Antoine Micheli, Rose G. Mage and Ralph A. Reisfeld .... 604

CELLULAR IMMUNOLOGY

The Detection of Antibody-Containing Cells in the Blood Stream during the IgM Cellular Anti-
body Response. Raymond N. Hiramoto, N. Marlene Hamlin and Holland L. Harris .... 637

IMMUNOPATHOLOGY

Serum Complement in the Rejection of Sarcoma I Ascites Tumor Grafts. Mildred E. Phillips, Ursula Rother and Klaus Rother .................................................. 493
“Protein A” from Staphylococcus aureus. IV. Production of Anaphylaxis-Like Cutaneous and Systemic Reactions in Non-Immunized Guinea-Pigs. G. T. Gustafson, G. Stålenheim, A. Forsgren and J. Sjöquist .................. 530
Isolation of Cy-Reactive Protein by Gel Filtration and Characterization by Electrophoresis and Immunodiffusion. Hector D. Croxatto, E. T. Nishimura, K. Yamada and Y. Hokama .... 563
Homocytotropic Antibody Response in the Rat Infected with the Nematode, Nippostrongylus bra-
Homocytotropic Antibody Response in the Rat Infected with the Nematode, Nippostrongylus bra-
In Vitro Effects of Phytohemagglutinin and Brain Antigen on Cell Transfer of Experimental Auto-
immune Encephalomyelitis in Lewis Rats. H. D. Flad, P. Y. Paterson and P. A. Miescher .... 647
Wasting Disease Induced with Cortisol Acetate. II. Bacteriologic Studies. John W. Jutila and Normand D. Reed .................. 675

MICROBIAL AND VIAL IMMUNOLOGY

Inhibition by Cardiolipin of the Antibody Response to Bacterial Antigens. H. Y. Whang and E. Neter .................................................. 501
Antigens of Rickettsia prowazeki. I. Activity in Complement Fixation and Mouse Protection Tests. Lewellys F. Barker and Judith K. Patt .................................................. 543
Antigens of Rickettsia prowazeki. II. Activity in Guinea Pigs and Experimental Vaccine Production. Lewellys F. Barker and Judith K. Patt .................................................. 548
Antibody Responses in Rabbits to the Group B Arbovirus Kunjin: Serologic Activity of the Fractionated Immunoglobulins in Homologous and Heterologous Reactions. E. G. Westaway .... 569
The Age Distribution in Humans of Hemagglutinating-Inhibiting Antibodies Reacting with Avian Strains of Influenza A Virus. Fred M. Davenport, Albert V. Hennessy and Elva Minuse .... 581
Announcement .................................................. 689
IMMUNOCHEMISTRY

The Demonstration in Human Serum of "Conglutinogen-Activating Factor" and Its Effect on the Third Component of Complement. Peter J. Lachmann and Hans J. Müller-Eberhard .......................... 691
Localization of 11S External Secretory IgA by Immunofluorescence in Tissues Lining the Oral and Respiratory Passages in Man. Roger D. Rossen, Councilman Morgan, Konrad C. Hsu, William T. Butler and Harry M. Rose .................................................. 706
Antigenic Determinants Specific for Aggregated γG-globulins. Christopher S. Henney and Kimishige Ishizaka ................................................................. 718
The Isolation of Immunoglobulins of the Adult Opossum (Didelphys virginiana). David T. Rowlands, Jr. and Mary A. Dudley ............................................................ 736
Mouse Macroglobulin Antibody to Sheep Erythrocytes: A Non-Complement-Fixing Type. Paul H. Plotz, Harvey Colten and Norman Talal .................................................. 752
Complementarity of Heavy and Light Chains from Antibodies of the Same Specificity Derived from Different Rabbits. Serafino Zappacosta and Alfred Nisonoff .................................................. 781
Reversible Loss of Activity of the First Component of Complement (C1) as a Function of Ionic Strength. Harvey R. Colten, Tibor Borsos and Herbert J. Rapp .................................................. 799
Ultracentrifugation of the First Component of Complement: Effects of Ionic Strength. Harvey R. Colten, Tibor Borsos and Herbert J. Rapp .................................................. 808
The Role of Monobasic Aliphatic Fatty Acids in Immune Agglutination of Sheep Erythrocytes. J. Kelly Smith .............................................................................. 863
Carbodiimide-Induced Bentonite-Antigen Complexes: Readily Prepared Immunoadsorbents. Robert R. Carpenter and Margaret A. Reisberg .................................................. 873
An Aggregating Immunoglobulin in Hyperimmune Equine Anti-Pneumococcal Sera. Suzan Zolla and Joel W. Goodman ................................................................. 880
Separation of New Skin Reactive Antigens from Dwarf Ragweed Pollens. A. R. Goldfarb ................................................................. 902

CELLULAR IMMUNOLOGY

An Effect of Maintenance in Tissue Culture on Spleen Cells Transferred from Antigen-Injected Donors to Syngeneic Mice. Stephanie E. Sher and T. N. Harris .................................................. 699
Assignment of Direct and Facilitated Hemolytic Plaques in Mice to Specific Immunoglobulin Classes. Paul H. Plotz, Norman Talal and Richard Asofsky .................................................. 744
The Enhancing Effect of Bone Marrow Cells on the Immune Response of Irradiated Mice Reconstituted with Spleen Cells from Normal and Immunized Donors. Jevrosima Radovich, Helen Hemingaen and David W. Talmage .................................................. 756
Synthesis of the First Component of Guinea Pig Complement by Columnar Epithelial Cells of the Small Intestine. Harvey R. Colten, James M. Gordon, Herbert J. Rapp and Tibor Borsos .................................................. 788
Sequence of Events in Mice Early in Immunologic Paralysis by Pneumococcal Polysaccharide. Pornchai Matangkasombut and C. V. Seastone .................................................. 845
Transfer of Cutaneous Hypersensitivity to Tuberculin in the Guinea Pig by γG from Immunized Donors. Edgar Pick and Joseph D. Feldman .................................................. 858

MICROBIAL AND VIRAL IMMUNOLOGY

Sex-Related Resistance in Hamsters to Adenovirus-12 Oncogenesis. III. Influence of Immunologic Impairment by Thymectomy or Cortisone. David S. Yohn, Clare A. Funk and James L Grace, Jr. .................................................. 771
Antigenic Characterization of Infectious Bronchitis Virus. Satvir S. Tevethia and Charles H. Cunningham .................................................. 793
Production of Rickettsial Complement-Fixing Antigens in Tissue Culture. Lewellys F. Barker and Judith K. Patt .................................................. 821

**CELLULAR IMMUNOLOGY**

*In Vivo and in Vitro Properties of Intact and Pepsin-Digested Heterologous Antimouse Thymus Antibodies.* Gert Rietthmüller, Doris Rietthmüller, Hans Stein and Peter Hausen. 969

Role of the Thymus in Tolerance. VI. Tolerance to Bovine γ-Globulin in Rats Given a Low Dose.
of Irradiation and Injection of Nonaggregated or Aggregated Antigen into the Shielded Thy-

mus. Atsushi Horiuchi and Byron H. Waksman ........................................... 974

Mediation of Delayed Hypersensitivity by Peripheral Blood Lymphocytes in Vitro and by Their

Harry Bartfeld and Robert Kelly ......................................................... 1000

A New Method for the Enumeration of Single Antibody-Producing Cells. E. Diener .............. 1062

Kinetics of Erythrocyte and Lymphocyte Agglutination by PHA. C. C. Stewart, A. Nakeff and

M. Ingram ................................................................................ 1121

The Response of Cultured Human Thymus Cells to Phytohemagglutinin. Henry N. Claman and

Capt. Frank H. Brunstetter ............................................................... 1127

IMMUNOPATHOLOGY

Passive Anaphylaxis in Mice with γG Antibodies. III. Release of Histamine from Mast Cells by

Homologous Antibodies. Nelson M. Vaz and Zoltan Ovary ................................ 1014

MICROBIAL AND VIRAL IMMUNOLOGY

The Local Nature of Immunity in Tuberculosis, Illustrated Histochemically in Dermal BCG Les-

ions. Arthur M. Dannenberg, Jr., Olivia T. Meyer, John R. Esterly and Takeshi Kambara. . 931

Relative Stabilities of Complexes of Measles Soluble and Viral Hemagglutinins with 19 S and 7 S

Immunoglobulins. Ann Schluederberg ........................................................ 964

The Immunoglobulin Response in Intact and Splenectomized Calves Infected with Anaplasma mar-
ginale. G. G. B. Klaus and E. W. Jones .................................................. 991

Studies on the Mechanism of the Enzymatic Reactivation of Antibody-Neutralized Poliovirus.

Robert Keller . ............................................................ 1071

The Agglutinating and Bactericidal Activity of IgM and IgG Antibodies to the 9 and 12 factors of

Salmonella typhi O 901. Fritz Daguillard and Geoffrey Edsall ................................ 1112

Direct Immunofluorescent Tissue Culture Assay for Lymphocytic Choriomeningitis Virus.

Michael B. A. Oldstone and Frank J. Dixon ............................................... 1135

COMMUNICATIONS

Lack of Adjuvant Effect of AlPO4 on Purified Influenza Virus Hemagglutinins in Man. Fred M.

Davenport, Albert V. Hennessy and Frederic B. Askin ..................................... 1139

Immune Response of Strain 13 Guinea Pigs to Lysine-Containing Polymers of Amino Acids. Paul

H. Maurer and Paul Pinchuck . ............................................................. 1141

Notice. Immunoglobulin E. A New Class of Human Immunoglobulin . ...................... 1143

NUMBER 6, JUNE 1968

IMMUNOCHEMISTRY

Fixation of C' and C'1a by Rabbit γG- and γM-antibodies with Particulate and Soluble Antigens.

Teruko Ishizaka, Tomio Tada and Kimishige Ishizaka ..................................... 1145

The Stoichiometric Measurement of the Serum Inhibitor of the First Component of Complement by

the Inhibition of Immune Hemolysis. Irma Gigli, Shaun Ruddy and K. Frank Austen. . 1154

Quantitative Studies of the Specificity of Anti-pneumococcal Polysaccharide Antibodies, Types III

and VIII. III. Binding of a Labeled Oligosaccharide Derived from S8 by Anti-S8 Antibodies.

A. M. Pappenheimer, Jr., William P. Reed and Robin Brown . ............................. 1237

Skin-Sensitizing Properties of Guinea Pig Antibodies to Keyhole Limpet Hemocyanin. Gill

Strejan and Dan H. Campbell .............................................................. 1245

Mechanism of Cleavage of Rabbit IgG in Two Stages by Soluble Papain and Reducing Agent.

Serafino Zappacosta, Alfred Nisonoff and William J. Mandy . ............................ 1268

Comparison of Certain Properties of Naturally Occurring Low Molecular Weight γM and the γM

Monomer Derived by Reduction and Alkylation of 19 SγM. Harry A. Swedlund, Gerald J.

Gleich and William B. Chodirker . .......................................................... 1296

CELLULAR IMMUNOLOGY

Stability of Human Leukocyte Granules which Contain Histamine. Jacob J. Pruzansky and Roy

Patterson .......................................................... 1165
Preparation of Fluorescent Antibody Reagents Monospecific to Heavy Chains of Human Immunoglobulin. M. Takahashi, Y. Yagi and D. Pressman ................................................ 1169
Macrophage-Lymphocyte Interaction in the Antigen-Induced Blastogenic Response of Human Peripheral Blood Leukocytes. Evan M. Hersh and Jules E. Harris. 1184
Studies of the Chicken Immune Response. II. Biologic Activity of Spleen “Immunogenic RNA.” Peter Abramoff and Nancy B. Brien 1210
Immunologic Incompetence of Mouse Perinatal Liver Hematopoietic Cells against Transplantation Antigens. Mortimer M. Bortin and Edward C. Saltzstein 1215
An In Vitro Assay for Encephalitogenic Components of Central Nervous Tissue. J. A. Brockman, A. V. Stiffey and W. C. Tesar 1230
Role of Thymus in Adoptive Tolerance. Bertië F. Argyris 1255
Amphibian Plasma Cells. Ronald R. Cowden, Robert F. Dyer, Bryan M. Gebhardt and E. Peter Volpe 1293
Regulation of Antibody Synthesis against Escherichia coli Endotoxin. I. Suppressive Effect of Endogenously Produced and Passively Transferred Antibodies. Sven Britton and Göran Moller 1326

IMMUNOPATHOLOGY
Thermostable Kidney Antigen and Its Excretion into Urine. Hans W. Intorp and Felix Milgrom 1195
Sedimentation Properties of Antibody Cytophilic for Macrophages. Arthur Berken and Baruj Benacerraf 1219
The Induction of Acute Glomerulonephritis in Rabbits with Soluble Antigens Isolated from Normal Homologous and Autologous Urine. R. A. Lerner and F. J. Dixon 1277
Induced Localization of Allergic Adrenalitis and Eencephalomyelitis at Sites of Thermal Injury. Seymour Levine and Eugene M. Hoening 1310

MICROBIAL AND VIRAL IMMUNOLOGY
Enterovirus Immunodiffusion Reactions: A Comparison of Results Obtained in Agarose and Agar Using Two Different Microdiffusion Systems. Bohumil Styk and Nathalie J. Schmidt 1223
Evaluation of an Agar Gel Precipitin Test for the Serodiagnosis of Actinomycosis. Lucille K. Georg, R. Marie Coleman and June M. Brown 1288
Vaccination Response in Rabbits Related to Quantity of Vaccinia Virus Particles and Passage Level. Ruth C. Dunlap, G. J. Galasso and D. G. Sharp 1335

COMMUNICATIONS
Heparin-MnCl₂ Removal of Nonspecific Serum Inhibitor for Measles Virus Hemagglutinin. Harry A. Feldman 1353
