INDEX

Abramoff, Peter, 1204
Acid, fatty, monobasic aliphatic, role of, in immune agglutination of sheep erythrocytes, 863
—, infectious nucleic, the pathogenicity in mice of aerosols of encephalomyocarditis group viruses or their, 120
—, levopimaric, maleopimaric acid and other derivatives of, inhibition of guinea pig complement by, 979
—, L-glutamic and L-lysine, the immune response of random-bred Hartley strain guinea pigs to 2,4-dinitrophenyl conjugates of a copolymer of, 1058
—, maleopimaric, and other derivatives of levopimaric acid, inhibition of guinea pig complement by, 979
—, extracts of, of myocardium, identification of antigens with specificity restricted to heart and skeletal muscle in, 1020
Actinomycosis, evaluation of an agar gel precipitin test for the serodiagnosis of, 1288
Adeno-associated satellite virus, hemagglutinin of type 4, 61
Adenoviral immunotypes, of proved and currently unproved oncogenic potential, cross-reactivity between T antigens of, 348
Adenovirus infection, a new serologic test for, 831
—, type 12 hamster tumor neantigens, evidence for the IgG nature of complement-fixing antibodies to, 128
—, oncogenesis, sex-related resistance in hamsters to, 771
Adjuvant, Freund's, complete, mycobacterial substitutes in, 1340
Adrenalitis, allergic, and encephalomyelitis, induced localization of, at sites of thermal injury, 1310
Aerosols, of encephalomyocarditis group viruses or their infectious nucleic acids, pathogenicity in mice of, 120
Agar, agarose and, a comparison of results obtained in, using two different microdiffusion systems, 1223
—, gel precipitin test, for the serodiagnosis of actinomycosis, evaluation of an, 1288
Agarose, and agar, a comparison of results obtained in, using two different microdiffusion systems, 1223
Agglutination, erythrocyte and lymphocyte, by PHA, kinetics of, 1121
—, immune, of sheep erythrocytes, the role of monobasic aliphatic fatty acids in, 863
Agglutinins, blood group specific, in invertebrates, 214
Aggregation, salt-induced, effect of, on the gel filtration of chicken 7 S antibodies, 659
Akers, T. G., 120
Alanine, glutamic acid, lysine and tyrosine terpolymers, cross-reactions of normal sheep erythrocytes with antibody against, 266
Albumin, bovine serum, effect of mycobacterial substitutes in complete Freund's adjuvant on antibody production and delayed hypersensitivity to, 1340
—, human serum, chicken antibodies and, a demonstration of the coprecipitation of β-lipoprotein with specific precipitates of, 664
Aldehydes, erythrocytes stabilized by, passive hemagglutination procedures for protein and polysaccharide antigens using, 641
Allen, Peter Z., 942, 955
Allotypic specificities, direct demonstration and quantitation of Aα1, Aα2 and Aα3, on Fδ-fragments of rabbit immunoglobulin G, 604
Almedovar, Luis R., 214
AlPO4, lack of adjuvant effect of, on purified influenza virus hemagglutinins in man, 1139
Alvord, Ellsworth C., Jr., 321
Amebiasis, reactivity of human immunoglobulins in, 217
Amidination, carbamylation and, of rabbit γG-antibody, effect of, on its ability to fix complement, 395
—, sequential and benzylation, benzylation or, effect of, on the ability of rabbit γG-antibody to fix complement, 403
Amino acids, immune response of strain 13 guinea pigs to lysine-containing polymers of, 1141
—, synthetic polymers of, employing the plague-forming cell system, detection of immune response against, 266
—, groups of, rabbit γG-globulin, modification of, selective effects on Fc function, 1051
—, —, —, the effect of skin sensitizing activity in guinea pig skin, 1041
Anaphylaxis, passive, in mice with γG antibodies, 169, 1014
—, cutaneous, and reverse passive cutaneous anaphylaxis reactions with homologous and heterologous antibodies, 169
—, —, —, reactions in guinea pigs, histology of, 159
—, reverse passive cutaneous, passive cutaneous anaphylaxis and, with homologous and heterologous antibodies, 169
Anaplasma marginale, the immunoglobulin re-
response in intact and splenectomized calves infected with, 991

Andersen, Burton R., 175

Antibody, against glutamic acid, lysine, alanine and tyrosine terpolymers, cross-reactions of normal sheep erythrocytes with, 266

—, surface antigens present in cells transformed by papovavirus SV40, development in hamsters of, 358

—, anti-γE-globulin, in humans and monkeys, reversed type allergic skin reactions by, 554

—, -hapten, amount and affinity of, the effect of antigen dose and time after immunization on, 371

—, pneumooccal polysaccharide, types III and VIII, quantitative studies of the specificity of, 1237

—, chicken, and human serum albumin, a demonstration of the coprecipitation of β-lipoprotein with specific precipitates of, 664

—, 7 S, the effect of salt-induced aggregation on the gel filtration of, 659

—, cold-reacting, the enhancement of antibody fixation by the first component of complement, 250

—, complement-fixing, to adenovirus type 12 hamster tumor neoantigens, evidence for the IgG nature of, 128

—, cytophilic for macrophages, sedimentation properties of, 1219

—, equine, to human γG-globulin, immunochromical behavior and specificity of γ2 and γ1 antibody fractions isolated from equine antisera to human γG-globulin, 955

—, isolation and antigenic analysis of γ2 and γ1-antibody fractions from equine antisera to human γG-globulin, 942

—, fluorescein-conjugated, directed against a glycoprotein substrate (fetuin), a sandwich technique for the detection of myxovirus-infected cells using, 209

—, formed in partially tolerant rabbits, affinity of, 138

—, fragments, derived from rabbit immunoglobulin by pepsin digestion, enhancement of phagocytosis of group A streptococci by, 898

—, γG, passive anaphylaxis in mice with, 169, 1014

—, rabbit effect of carboxymylation and amidination of on its ability to fix complement, 395

—, to human anti-hemophilic globulin (factor VIII), 175

—, guinea pig γG1 and rabbit, a comparison of reactions produced by, 159

—, skin-sensitizing properties of, to keyhole limpet hemocyanin, 1245

—, hemagglutinating-inhibiting, reacting with avian strains of influenza A virus, the age distribution in humans of, 581

—, homologous, and heterologous PCA and RPCA reactions with, 169

—, release of histamine from mast cells by, 1014

—, IgG- and IgM-associated, the role of the antigen in eliciting, 1101

—, IgM and IgG, the agglutinating and bactericidal activity of, to the 9 and 12 factors of Salmonella typhi O 901, 1112

—, influenza virus neutralizing, in human respiratory secretions, 80

—, intact and pepsin-digested heterologous antimouse thymus, in vivo and in vitro properties of, 969

—, molecules, two adjacent rabbit γG-, the requirement for the association of, in the fixation of complement by immune complexes, 407

—, mouse monoclonal, to sheep erythrocytes: a non-complement-fixing type, 752

—, of the same specificity derived from different rabbits, complementarity of heavy and light chains from, 781

—, produced in natural and experimental coxsackievirus infections, characterization of, 99

—, production, by isolated spleen cells, a study of the cluster and plaque techniques, 451

—, effect of mycobacterial substitutes in complete Freund's adjuvant on, and delayed hypersensitivity to bovine serum albumin, 1340

—, purification, a cellulose mercurial: preparation, properties and use in, 187

—, rabbit γG-, ability of, to fix complement, the effect of benzylamine or sequential amidination and benzylolation on, 403

—, and γM-, fixation of C' and C' 1a by, with particulate and soluble antigens, 1145

—, response, homocytotropic, in the rat infected with the nematode, Nippostrongylus brasiliensis, characteristics of antibody, 629

—, immune response, 622

—, IgM cellular, the detection of antibody-containing cells in the blood stream during, 637

—, 7 S and 19 S rabbit-neutralizing, to herpes simplex virus, heterogeneity in the properties of, 586

—, 19 S, in complement fixation, properties of, 7

—, skin-fixing, in experimental allergic encephalomyelitis, 321

—, specific for individual γG myeloma proteins, the inhibition by normal γG-globulins of, 69

—, synthesis, against Escherichia coli endotoxin, 1326
—, within 198 and 78 immunoglobulins, distribution of, following infection with *Mycoplasma pneumoniae*, 338
—, fixation, the enhancement of, by the first component of complement, 259
—, forming cells, differentiation of, 55
—, producing cells, single, a new method for the enumeration of, 1062
—, response, genetic control of the, 485
—, in respiratory secretions of volunteers given live and dead influenza virus, 726
—, in rabbits to the group B arbovirus Kunjin, serologic activity of the fractionated immunoglobulins in homologous and heterologous reactions, 569
Anti-γ-globulin, neutralization of sensitized lactic dehydrogenase virus by, 314
Antigens, bacterial, inhibition of cardiolipin of the antibody response to, 501
—, brain, phytohemagglutinin and, *in vitro* effects of, on cell transfer of experimental autoimmune encephalomyelitis in Lewis rats, 647
—, dose and time, effect of, after immunization on the amount and affinity of anti-hapten antibody, 371
—, injection of, into intact lymphoid organs, suppression of immune responsiveness to bovine γ-globulin after, tolerance *in vitro*, 912
—, new skin reactive, separation of, from dwarf ragweed pollens, 902
—, nonaggregated or aggregated, injection of, into the shielded thymus, tolerance to bovine γ-globulin in rats given a low dose of irradiation and, 974
—, of *Rickettsia prowazeki*, 543, 548
—, particulate and soluble fixation of C’ and C’1a by rabbit γG- and γM-antibodies with, 1145
—, protein, and polysaccharide, passive hemagglutination procedures for, using erythrocytes stabilized by aldehydes, 641
—, —, isolation of, following extraction of lipids from sheep red blood cell stroma, 475
—, —, modification of the hemolytic plaque assay for use with, 133
—, —, relationship between molecular size and intra- and extravascular distribution of, 376
—, rickettsial complement-fixing, in tissue culture, production of, 821
—, rubella, physical and immunologic properties of, 851
—, soluble, isolated from normal homologous and autologous urine, the induction of acute glomerulonephritis in rabbits with, 1277
—, structure, role of, temperature dependence and, 7
—, surface, present in cells transformed by papovavirus SV40, development in hamsters of, 358
—, T of adenoviral immunotypes of proved and currently unproved oncogenic potential, cross-reactivity between, 348
—, thermostable kidney, and its excretion into urine, 1195
—, transplantation, immunologic incompetence of mouse perinatal liver hematopoietic cells against, 1215
—, the role of the, in eliciting IgG- and IgM-associated antibodies, 1101
—, *Trichinella spiralis*, fine structure of lymphocytes sensitized to, 329
—, with specificity restricted to heart and skeletal muscle in acid extracts of myocardium, identification of, 1020
Antigenic analysis, of dengue virus, application of immunodiffusion methods to, 86, 93
—, induced blastogenic response of human peripheral blood leukocytes, macrophage-lymphocyte interaction in the, 1184
Antigenicity of the M proteins of group A hemolytic streptococci, cross-reactivity between serotypes, 39
—, of polypeptides (poly-α-amino acids), 384
Antiglobulin factors, in normal human serum reacting, with enzyme digested γG-globulin, specificity of, 612
Anti-hapten antibody, amount and affinity of, the effect of antigen dose and time after immunization on, 371
Antiserum, polylysine, cross-reactions of calf thymus histones with, 286
—, rabbit streptolocoecal, immune cryoglobulins in, 814
Arbovirus, Kunjin, group B, antibody responses in rabbits to, serologic activity of the fractionated immunoglobulins in homologous and heterologous reactions, 569
Argyris, Bertie F., 1255
Artenstein, Malcolm S., 831
Ascites tumor grafts, sarcoma I, serum complement in the rejection of, 493
Ashe, Warren K., 314
Askin, Frederic B., 1139
Asofsky, Richard, 363, 744, 1259, 1319
Assay, direct immunofluorescent tissue culture, for lymphocytic choriomeningitis virus, 1135
—, graft-vs.-host, the use of a, as a measure of homograft reactivity, 1319
—, hemolytic plaque, modification of, for use with protein antigens, 133
—, in vitro, for encephalitogenic components of central nervous tissue, 1230
Austen, K. Frank, 1154
Autoantibodies, antigenic specificity of seminal plasma and the formation of, 682
Bacterial antigens, inhibition of cardiolipin of the antibody response to, 501
— endotoxin, effect of, on experimental fungal infections, 24
Ballow, Mark, 209
Barker, Lewellys F., 543, 548, 821, 825
Barnett, Eugene V., 1003
Barron, Almen L., 414
Bary, Carolyn B., 1006
Bartfeld, Harry, 1000
Becker, Elmer L., 395, 403, 459, 979
Bencerraf, Baruj, 371, 1058, 1219
Bence-Jones protein, of type L, antigenic determinants of the variable half of a, 201
Benzylation, or sequential amidination and benzylation, effect of, on the ability of rabbit \(\gamma\)-G-antibody to fix complement, 403
Berken, Arthur, 1219
Bhatia, H. M., 214
Biberfeld, Gunnel, 338
Bienenstock, John, 280
\(\beta\)-lactoglobulins, immunochemical comparison of, 307
—-lipoproteins, coprecipitation of, with specific precipitates of chicken antibodies and human serum albumin, a demonstration of, 664
Bladen, H. A., 227
Blaskovec, Andrew A., 835
Bloch, K. J., 622, 629
Blood stream, the detection of antibody-containing cells in the, during the IgM cellular antibody response, 637
Blough, Herbert A., 209
Bone marrow cells, the enhancing effect of, on the immune response of irradiated mice reconstituted with spleen cells from normal and immunized donors, 756
—-forming, differentiation of, 55
—-—, in mouse spleen, ratio of precursor cells to, 55
—-—, bone marrow, the enhancing effect of, on the immune response of irradiated mice reconstituted with spleen cells from normal and immunized donors, 756
—-—, columnar epithelial, of the small intestine, synthesis of the first component of guinea pig complement by, 788
—-—, cultured human thymus, the response of, to phytohemagglutinin, 1127
—-—, immunocompetent, regenerative potential of, 760
—-—, individual, of established human hematopoietic cell lines, presence of two different immunoglobulin heavy chains in, 1176
—-—, isolated spleen, antibody production by, a study of the cluster and plaque techniques, 451
—-—, mast, release of histamine from, by homologous antibodies, 1014
—-—, mouse lymphoma, antigenic properties of, 245
—-—, perinatal liver hematopoietic, immunologic incompetence of, against transplantation antigens, 1215
—-—, myxovirus-infected, using a fluorescein-conjugated antibody directed against a glycoprotein substrate (fetuin), a sandwich technique for the detection of, 209
—-—, precursor, ratio of, to antibody-forming cells in mouse spleen, 55
—-—, single antibody-producing, a new method for the enumeration of, 1062
—-—, spleen, from normal and immunized donors, the enhancing effect of bone marrow cells on the immune response of irradiated mice reconstituted with, 756
—-—, transferred from antigen-injected donors to syngeneic mice, an effect of maintenance in tissue culture on, 699
Campbell, Dan H., 1245
Campbell, Priscilla A., 55
Cantell, K., 1304
Carbamylatinn and amidination of rabbit \(\gamma\)-G-antibody, effect of, on its ability to fix complement, 395
Carbodiimide-induced bentonite-antigen complexes, readily prepared immunoabsorbsents, 873
Cardiolipin, inhibition by, of the antibody response to bacterial antigens, 501
Carpenter, Robert R., 873
Castro-Murillo, E., 1340
Cells, amphibian plasma, 1283
—, antibody-containing, in the blood stream during the IgM cellular antibody response, the detection of, 637
—, —-, differentiation of, 55
—, —-, in mouse spleen, ratio of precursor cells to, 55
—, bone marrow, the enhancing effect of, on the immune response of irradiated mice reconstituted with spleen cells from normal and immunized donors, 756
—, columnar epithelial, of the small intestine, synthesis of the first component of guinea pig complement by, 788
—, cultured human thymus, the response of, to phytohemagglutinin, 1127
—, immunocompetent, regenerative potential of, 760
—, individual, of established human hematopoietic cell lines, presence of two different immunoglobulin heavy chains in, 1176
—, isolated spleen, antibody production by, a study of the cluster and plaque techniques, 451
—, mast, release of histamine from, by homologous antibodies, 1014
—, mouse lymphoma, antigenic properties of, 245
—, perinatal liver hematopoietic, immunologic incompetence of, against transplantation antigens, 1215
—, myxovirus-infected, using a fluorescein-conjugated antibody directed against a glycoprotein substrate (fetuin), a sandwich technique for the detection of, 209
—, precursor, ratio of, to antibody-forming cells in mouse spleen, 55
—, single antibody-producing, a new method for the enumeration of, 1062
—, spleen, from normal and immunized donors, the enhancing effect of bone marrow cells on the immune response of irradiated mice reconstituted with, 756
—, —, transferred from antigen-injected donors to syngeneic mice, an effect of maintenance in tissue culture on, 699
INDEX 1359

—, transfer of experimental autoimmune encephalomyelitis in Lewis rats, in vitro effects of phytohemagglutinin and brain antigen on, 647
—, transformed by papovavirus SV40, development in hamsters of antibodies against surface antigens present in, 358
— bound immunity, 535
— lines, established human hematopoietic, presence of two different immunoglobulin heavy chains in individual cells of, 1176
— populations, in induction of tolerance, selection of, 138
— system, plaque-forming, detection of immune response against synthetic polymers of amino acids employing the, 266
Cellulose mercurial, preparation, properties and use in antibody purification, 187
Central nervous tissue, an in vitro assay for encephalitogenic components of, 1230
Chains, heavy and light from antibodies of the same specificity derived from different rabbits, complementarity of, 781
—, of human immunoglobulins, preparation of fluorescent antibody reagents monospecific to, 1169
—, two different immunoglobulin heavy, presence of, in individual cells of established human hematopoietic cell lines, 1176
Chandler, John W., Jr., 436
Chin, Tom D. Y., 436
Chedid, Louis, 292
Chodirker, William B., 1296
Choriomeningitis virus, lymphocytic, susceptibility of different mouse strains to, 355
Claman, Henry N., 1127
Cleavage of rabbit IgG in two stages by soluble papain and reducing agent, mechanism of, 1268
Cluster and plaque technique, study of, 451
Coe, John E., 507
Cohen, Stanley, 395, 403, 407
Coleman, R. Marie, 1288
Colten, Harvey, 752
Colten, Harvey R., 799, 808
Complement, effect of benzylation or sequential amidination and benzylation on the ability of rabbit γG-antibody to fix, 403
—, — — carboxylation and amidination of rabbit γG-antibody on its ability to fix, 395
—, first component of, reversible loss of activity of, as a function of ionic strength, 799
—, — — enhancement of antibody fixation by, 259
—, — — — stoichiometric measurement of the serum inhibitor of the, by the inhibition of immune hemolysis, 1154
—, fixation of, by immune complexes, the requirement for the association of two adjacent rabbit γG-antibody molecules in, 407
—, — properties of 19 S antibodies in, 7
— system, guinea pig, a state of irreversible damage generated as a result of the reaction of the eighth component in, 46
—, guinea pig, inhibition of, by maleopimaric acid and other derivatives of levopimaric acid, 979
—, — — synthesis of the first component of, by columnar epithelial cells of the small intestine, 788
—, nephrotoxic serum nephritis in mice with a genetic deficiency in, 34
—, serum, and the enzymatic degradation of erythrocyte phospholipid, 459
—, —, in the rejection of sarcoma I ascites tumor grafts, 493
—, demonstration in human serum of "conglutinogen-activating factor" and its effect on the third component of, 691
—, ultracentrifugation of the first component of, effects of ionic strength, 808
— fixation, and mouse protection tests, activity in, 543
— — tests, quantitation of immunoglobulins and L-chains by, 1093
— fixing antibodies, to adenoviruses type 12 hamster tumor neoantigens, evidence for the IgG nature of, 128
— system, interactions of, with endotoxins from a Salmonella minnesota mutant deficient in O-polysaccharide and heptose, 227
Complexes, immune, the requirement for the association of two adjacent rabbit γG-antibody molecules in the fixation of complement by, 407
Conant, Robert M., 107, 114
Conglutinogen-activating factor, the demonstration in human serum of, and its effect on the third component of complement, 691
Conjugate, 2,4-dinitrophenyl, of a copolymer of L-glutamic acid and L-lysine, the immune response of random-bred Hartley strain guinea pigs to, 1058
— specificity, of the transfer reaction, persistence and, 302
Copolymer, homo- and, studies of the ability of, to act as hapten carriers in mice, 384
— of γ-glutamic and L-lysine, the immune response of random-bred Hartley strain guinea pigs to, 2,4-dinitrophenyl conjugates of, 1058
Coprecipitation, of β-lipoproteins with specific precipitates of chicken antibodies and human serum albumin, a demonstration of the, 664
Cortisol acetate, wasting disease induced with, bacteriologic studies, 675
INDEX [Vol. 100

Cortisone, influence of immunologic impairment by thymectomy or, 771
Costea, Nicolas, 525
Coulten, Harvey R., 788
Couvillion, Lynda A., 358
Cowden, Ronald R., 1293
Coxsackie virus infections, natural and experimental, characterization of antibodies produced in, 99
Croxtatto, Hector D., 563
Cryoglobulins, on the nature of, 595
—, immune, in streptolococcal antiserum, 814
Culture, tissue, an effect of maintenance in, on spleen cells transferred from antigen-injected donors to syngeneic mice, 699
—, production of rickettsial complement-fixing antigens in, 821
Cunniff, Ruth V., 7
Cunningham, Charles H., 793
Cupp, Carolyn, 128
Currey, H. L. F., 654
Cytomegalovirus infection, acute murine, immunosuppression during, 835
Cx-reactive protein, isolation of, by gel filtration and characterization by electrophoresis and immunodiffusion, 563

Daguillard, Fritz, 1112
Dandridge, Oliver W., 831
Dannenberg, Arthur M., Jr., 931
Davenport, Fred M., 581, 1139
Davie, Joseph M., 814
Dawkins, A. T., 726
Dehydrogenase virus, sensitized lactic, neutralization of, by anti-γ-globulin, 314
Dengue viruses, application of immunodiffusion methods to the antigenic analysis of, 86, 93
Dennis, J., 851
Dennis, Juanita, 99
De Weck, A. L., 1
Diener, E., 1062
Diffusion, double, precipitin-in-gel, in two dimensions, 86
Digestion, pepsin, enhancement of phagocytosis of group A streptococci by antibody fragments derived from rabbit immunoglobulin by, 898
Digests, peptic, of human immunoglobulin G, FC-like fragments in, 231
2,4-dinitrophenyl conjugates of a copolymer of L-glutamic acid and L-lysine, the immune response of random-bred Hartley strain guinea pigs to, 1058
Dixon, F. J., 1277
Dixon, Frank J., 355, 1135
Dudley, Mary A., 736
Dunlap, Ruth C., 1335
Dutton, Richard W., 133
Dyer, Robert F., 1293
Edsall, Geoffrey, 1112
Egan, Marianne, 266
Electrophoresis, and immunodiffusion, characterization by, isolation of Cx-reactive protein by gel filtration and, 563
Encephalitis, vaccine, live attenuated Japanese, in swine, studies of, 194
Erythrocytes, normal sheep, cross-reactions of, with antibody against glutamic acid, lysine, alanine and tyrosine terpolymers, 266
—, sheep, mouse macroglobulin antibody to, a non-complement-fixing type, 752
—, stabilized by aldehydes, passive hemagglutination procedures for protein and polysaccharide antigens using, 641
—, phospholipid, serum complement and the enzymatic degradation of, 459
Escherichia coli, endotoxin, antibody synthesis against, regulation of, 1326
Espinosa, Enrique, 1020
Esterly, John R., 931

Factor, new serum, in normal rabbits, 15
Falk, George A., 321
Fatty acids, monobasie aliphatic, role of, in im-
mune agglutination of sheep erythrocytes, 863
Fc and Fc' fragments, urinary, 280
--- fragment of IgM composed of several Fc sub-units, high molecular weight, isolation of a, 238
--- like fragments, in peptic digests of human immunoglobulin G, 231
Fd-fragments of rabbit immunoglobulin G, direct demonstration and quantitation of Aa1, Aa2 and Aa3 allotypic specificities on, 604
Feldman, Harry A., 1353
Feldman, Joseph D., 858
Fetuin, a sandwich technique for the detection of myxovirus-infected cells using a fluorescein-conjugated antibody directed against, 209
Filtration, gel, isolation of Cx-reactive protein by, and characterization by electrophoresis and immunodiffusion, 563
---, of chicken 7 S antibodies, effect of salt-induced aggregation on the, 659
Fixation, antibody, the enhancement of, by the first component of complement, 259
---, complement, properties of 19 S antibodies in, 7
Flad, H. D., 647
Flanagan, Thomas D., 414
Fluorescein-conjugated antibody directed against a glycoprotein substrate (fetuin), a sandwich technique for the detection of myxovirus-infected cells using, 209
Forsgren, A., 530
Forsgren, Arne, 921, 927
Fox, Eugene N., 39
Fragment, antibody, derived from rabbit immunoglobulin by pepsin digestion, enhancement of phagocytosis of group A streptococci by, 898
---, Fc, of IgM, production of, 825
---, and Fc', urinary, 280
---, like in peptic digests of human immunoglobulin G, 231
---, Fd-, of rabbit immunoglobulin G, direct demonstration and quantitation of Aa1, Aa2 and Aa3 allotypic specificities on, 604
---, monkey lung, passive sensitization of, with sera of timothy-sensitive patients, spectrofluorometric analysis of histamine release, 915
Fragmentation, pepsin, of IgM, 1032
Freund's adjuvant, complete, mycobacterial substitutes in, 1340
Frey, J. R., 1
Fudenberg, H. H., 274
Fugmann, Ruth A., 1101
Fungal infections, experimental, effect of bacterial endotoxin on, 24
Funk, Clare A., 771
Galasso, G. J., 1335
γE-globulin antibodies, anti-, in humans and monkeys, reversed type allergic skin reactions by, 554
γG antibody, passive anaphylaxis in mice with, 169
---, rabbit, ability of, to fix complement, the effect of benzylaion or sequential amidina- tion and benzylaion on, 403
---, ---, effect of carbasmylation and amidina- tion of, on its ability to fix complement, 395
---, to human anti-hemophilic globulin (factor VIII), 175
---, globulin, aggregated, antigenic determinants specific for, 718
---, enzyme digested, specificity of anti-globulin factors in normal human serum reacting with, 612
---, human, equine antibodies to, immunoch chemical behavior and specificity of γG and γG-antibody fractions isolated from equine antisera to human γG-globulin, 955
---, ---, ---, isolation and antigenic analysis of γG- and γG-antibody fractions from equine antisera to human γG-globulin, 492
---, inhibition by normal, of antibodies specific for individual γG myeloma proteins, 69
---, rabbit, modification of the amino groups of selective effects on Fe function, 1051
---, ---, ---, ---, the effect of skin sensitizing activity in guinea pig skin, 1041
γ-globulin, anti-, neutralization of sensitized lactic dehydrogenase virus by, 314
---, bovine, suppression of immune responsiveness to, after injection of antigen into intact lymphoid organs tolerance in vitro, 912
---, ---, tolerance to, in rats given a low dose of irradiation and injection of nonaggregated or aggregated antigen into the shielded thymus, 974
---, ---, ---, ---, ---, the effect of skin sensitizing activity in guinea pig skin, 1041
γ1- and γ2-globulin, guinea pig, reaction with subunits from, protein A from Staphylococcus aureus, 921
γM, low molecular weight, comparison of certain properties of naturally occurring, and the γM monomer derived by reduction and alkylation of 19 S γM, 1206
Gebbhardt, Bryan M., 1293
Gee, P. S., 851
Geleick, H., 1
Gel filtration, isolation of Cx-reactive protein by, and characterization by electrophoresis and immunodiffusion, 563
— — of chicken 7 S antibodies, effect of salt-induced aggregation on the, 659
Genetic control of the antibody response, 485
Genetic typing, of human immunoglobulins, a new rapid method for, 274
Georg, Lucille K., 1288
Gewurz, H., 227
Gigi, Irma, 1154
Gleich, Gerald J., 1296
Globulin, anti-lymphocyte, immune response to, 654
—, human anti-hemophilic (factor VIII), γG-antibody to, 175
Glomerulonephritis, acute, in rabbits, the induction of, with soluble antigens isolated from normal homologous and autologous urine, 1277
Gloksy, M. Michael, 979
Glutamic acid, lysine, alanine and tyrosine terpolymers, cross-reactions of normal sheep erythrocytes with antibody against, 266
Glycoprotein substrate (fetuin), a sandwich technique for the detection of myxovirus-infected cells using a fluorescein-conjugated antibody directed against, 209
Goidl, Edmond A., 371

HeLa cells for propagation and serologic procedures, 107
Heller, Paul, 525
Hemagglutination procedures, passive, for protein and polysaccharide antigens using erythrocytes stabilized by aldehydes, 641
Hemagglutinin, measles soluble and viral, with 19S and 7S immunoglobulins, relative stabilities of complexes of, 964
—, — virus, heparin-MnCl₂ removal of nonspecific serum inhibitor for, 1233
— of type 4 adeno-associated satellite virus, 61
—, purified influenza virus in man, lack of adjuvant effect of AlPO₄ on, 1139
Hemingsen, Helen, 756
Hemocyanin, keyhole limpet, skin-sensitizing properties of guinea pig antibodies to, 1245
Hemolysis, immune, the stoichiometric measurement of the serum inhibitor of the first component of complement by the inhibition of, 1154
Hemolytic plaque assay, modification of, for use with protein antigens, 133
Hemolytic streptococci, group A, antigenicity of the M proteins of, cross-reactivity between serotypes, 39
Hemophilic globulin, anti-, γG-antibody to, 175
Hennessy, Albert V., 581, 1139
Henney, Christopher S., 718
Heparin-MnCl₂, removal of nonspecific serum inhibitor for measles virus hemagglutinin, 1353
Heptose, O-polysaccharide and, interactions of the complement system with endotoxins from a Salmonella minnesota mutant deficient in, 227
Herpes simplex virus, heterogeneity in the properties of 7 S and 19 S rabbit-neutralizing antibodies to, 588
Hersh, Evan M., 1184
Heterogeneity in the properties of 7 S and 19 S rabbit-neutralizing antibodies to herpes simplex virus, 586
Hinz, Carl F., Jr., 142
Hiramoto, Raymond N., 637
Hirata, Arthur A., 641
Histamine, release of, from mast cells by homologous antibodies, 1014
—, stability of human leukocyte granules which contain, 1165
Histology, of PCA reactions in guinea pigs, a comparison of reactions produced by guinea pig γG1 and rabbit antibodies, 159

Histones, calf thymus, cross-reactions of, with polylysine antisera, 286

Histoplasmosis, chronic, depressed lymphocyte transformation in, 436

Hoenig, Eugene M., 1310

Hokama, Y., 563

Homopolymers and copolymers, studies of the ability of, to act as hapten carriers in mice, 384

Hopps, Hope S., 825

Horichi, Atsushi, 974

Hsu, Konrad C., 706

Hurez, Daniel, 69

Hypersensitivity, cutaneous, transfer of, to tuberculin in the guinea pig by γG2 from immunized donors, 858

—, delayed, mediation of, by peripheral blood lymphocytes in vitro and by their products in vivo and in vitro, morphology of in vitro lymphocyte macrophage interaction, 1000

—, —, persistence and conjugate specificity of the transfer reaction, 302

—, —, to bovine serum albumin, effect of mycobacterial substitutes in complete Freund's adjuvant on antibody production and, 1340

Ibrahim, Adly, N., 86, 93

IgA, 11 S external secretory, localization of, by immunofluorescence in tissues lining the oral and respiratory passages in man, 706

IgG, human, ultracentrifugal studies of the reaction of IgM anti-γ-globulin subunits with, 1006

—, IgM and their subunits, quantitative evaluation of, in suppressing homograft reactions, 1259

—, nature of complement-fixing antibodies to adenovirus type 12 hamster tumor neoantigens, evidence for, 128

—, rabbit, mechanism of cleavage of, in two stages by soluble papain and reducing agent, 1268

IgM and IgG antibodies, the agglutinating and bactericidal activity of, to the 9 and 12 factors of Salmonella typhi O 901, 1112

— composed of several Fc subunits, isolation of a high molecular weight Fc fragment of, 238

—, IgG and their subunits, quantitative evaluation of, in suppressing homograft reactions, 1259

—, pepsin fragmentation of, 1032

—, production of Fc fragments of, 525

Immune hemolysis, the stoichiometric measurement of the serum inhibitor of the first component of complement by the inhibition of, 1154

— response, chicken, studies of, biologic activity of spleen "immunogenic RNA," 1210

—, —, —, correlation of the cellular and humoral immune response, 1204

— in the hamster, 507

— of random-bred Hartley strain guinea pigs to 2,4-dinitrophenyl conjugates of a copolymer of l-glutamic acid and l-lysine, 1058

Immunity, cell-bound, 535

—, in tuberculosis, the local nature of, illustrated histochemically in dermal BCG, lesions, 931

—, natural, to enterobacterial pathogens, a proposed mechanism for, 292

Immunization, the effect of antigen dose and time after, on the amount and affinity of anti-hapten antibody, 371

Immunoadsorbents, readily prepared, carbodi-imide-induced bentonite-antigen complexes, 873

Immunodiffusion, characterization by electrophoresis and, isolation of Cx-reactive protein by gel filtration and, 563

— methods, application of, to antigenic analysis of dengue viruses, 86, 93

— reactions, enterovirus, a comparison of results obtained in agarose and agar using two different microdiffusion systems, 1223

Immunoelectrophoresis, 93

Immunofluorescence, in tissues lining the oral and respiratory passages in man, localization of 11 S external secretory IgA by, 706

Immunoglobulin, a new basic protein in rabbit serum unrelated to, 252

—, an aggregating, in hyperimmune equine antipneumococcal sera, 880

— of the adult opossum (Didelphys virginiana), the isolation of, 736

— and L-chains, quantitation of, by complement fixation tests, 1093

— classes, specific, assignment of direct and facilitated hemolytic plaques in mice to, 744

—, fractionated, in homologous and heterologous reactions, serologic activity of, 569

— G, human, FC-like fragments in peptic digests of, 231

—, human, a new rapid method for genetic typing of, 274

—, —, in amebiasis, reactivity of, 217

—, —, preparation of fluorescent antibody, reagents monospecific to heavy chains of, 1169

— M, human, structure of, 238, 1032

—, 19 S and 7 S, distribution of antibodies within, following infection with Mycoplasma pneumoniae, 338

—, —, —, relative stabilities of complexes of
measles soluble and viral hemagglutinins with, 964
—, rabbit, enhancement of phagocytosis of group A streptococci by antibody fragments derived from, by pepsin digestion, 898
—, rabbit, Fd-fragments of, direct demonstration and quantitation of Aa1, Aa2 and Aa3 allotypic specificities on, 604
—, rabbit, Fd-fragments of, synthesis in vitro, 363
Immunology of the mycoses, 436
Immunosuppression during acute murine cytomegalovirus infection, 835
Immunotypes, adenoviral, of proved and currently unproved oncogenic potential, cross-reactivity between T antigens of, 348
Infection, acute murine cytomegalovirus, immunosuppression during, 835
—, adenovirus, a new serologic test for, 831
—, fungal, experimental, effect of bacterial endotoxin on, 24
—, natural and experimental coxsackievirus, characterization of antibodies produced in, 99
—, with Mycoplasma pneumoniae, distribution of antibodies within 19 S and 7 S immunoglobulins following, 338
Influenza A virus, avian strains of, the age distribution in humans of hemagglutinating-inhibiting antibodies reacting with, 551
—, virus neutralizing antibody in human respiratory secretions, 80
—, virus, live and dead, antibody response in respiratory secretions of volunteers given, 706
Ing, Judy T., 612
Ingram, M., 1121
Inhibition, by normal γ-globulins of antibodies specific for individual γG myeloma proteins, 69
Inhibitor, serum, of the first component of complement by the inhibition of immune hemolysis, the stoichiometric measurement of the, 1154
Injury, thermal, induced localization of allergic adrenitis and encephalomyelitis at sites of, 1310
Inoue, Y. Kanda, 194
Interferon, response of human leukocytes during intrauterine and postnatal life, 1304
Intestine, small, synthesis of the first component of guinea pig complement by columnar epithelial cells of the, 788
Intorp, Hans W., 1195
Ionic strength, effects of, 808
—, reversible loss of activity of the first component of complement (C'1) as a function of ionic strength, 799
Irradiation, low dose of, tolerance to bovine γ-globulin in rats given a, and injection of non-aggregated or aggregated antigen into the shielded thymus, 974
Ishizaka, Kimishige, 554, 718, 1145
Ishizaka, Teruko, 554, 1145
Itó, Michio, 61

Kunjin, group B arbovirus, antibody responses in rabbits to, serologic activity of the fractionated immunoglobulins in homologous and heterologous reactions, 509
Lachmann, Peter J., 691
Lacrimal secretions, studies of the proteins of, 1080
Lactic dehydrogenase virus, sensitized, neutralization of, by anti-γ-globulin, 314
Lactoglobulins, β, immunochemical comparison of, 307
Lamelin, Jean-Pierre, 1058
L-chains, immunoglobulins and quantitation of, by complement fixation tests, 1093
Lennette, Edwin H., 99, 348
Lesions, dermal BCG, the local nature of immunity in tuberculosis illustrated histochemically in, 931
Leukocytes, human, interferon response of, during intrauterine and postnatal life, 1304
Leukocytes, human peripheral blood, macrophage-lymphocyte interaction in the antigen-induced blastogenic response of, 1184
Leukocyte granules, human, which contain histamine, stability of, 1165
Levi, Donald, 594
Levine, Seymour, 1310
Levopimaric acid, maleopimaric acid and other derivatives of, inhibition of guinea pig complement by, 979
Lewis, F. B., 15
L-glutamic acid, and L-lysine, the immune response of random-bred Hartley strain guinea pigs to 2,4-dinitrophenyl conjugates of a copolymer of, 1058
Lieberman, Moses K., 159
Lindberg, Lois H., 34
Lipids, extraction of, from sheep red blood cell stroma, isolation of a protein antigen following, 475
Lipoproteins, α-, coprecipitation of, with specific precipitates of chicken antibodies and human serum albumin, a demonstration of, 604
Ljajevic, J., 1041, 1051
Ljajevic, M., 1041, 1051
L-lysine, L-glutamic acid and, the immune response of random-bred Hartley strain guinea pigs to 2,4-dinitrophenyl conjugates of a copolymer of, 1058
Lourie, Seth H., 654
Lüderitz, O., 227
Lung fragments, monkey, passive sensitization of, with sera of timothy-sensitive patients, spectrofluorometric analysis of histamine release, 915
Lymphocytes, peripheral blood, in vitro, mediation of delayed hypersensitivity by, and by their products in vivo and in vitro, morphology of in vitro lymphocyte-macrophage interaction, 1000
—, sensitized to Trichinella spiralis antigen, fine structure of, 329
—, thoracic duct, of mice, studies of, 303
— transformation, depressed, in chronic histoplasmosis, 436
— transformation, mouse, the in vivo induction of, by phytohemagglutinin, 421
Lymphocytic choriomeningitis virus, susceptibility of different mouse strains to, 335
Lymphomas, cells, mouse, antigenic properties of, 245
Lysine-containing polymers of amino acids, immune response of strain 13 guinea pigs to, 1141
Lysine, glutamic acid, alanine and tyrosine terpolymer, cross-reactions of normal sheep erythrocytes with antibody against, 266
Lytic transformation, immune, a state of irreversible damage generated as a result of the reaction of the eighth component in the guinea pig complement system, 46
M proteins of group A hemolytic streptococci, antigenicity of, cross-reactivity between serotypes, 39
Macrophages, sedimentation properties of antibody cytophilic for, 1219
Macrophage-lymphocyte interaction in the antigen-induced blastogenic response of human peripheral blood leukocytes, 1184

INDEX 1367

Pensky, Jack, 142
Pepsin, digestion of, enhancement of phagocytosis of group A streptococci by antibody fragments derived from rabbit immunoglobulin by, 898
— fragmentation of IgM, 1032
Peptic digests of human immunoglobulin G, FC-like fragments in, 231
Perkins, John C., 898
Phagocytosis of group A streptococci by antibody fragments derived from rabbit immunoglobulin by pepsin digestion, 898
Phair, John P., 302
Phospholipid, erythrocyte, serum complement and the enzymatic degradation of, 459
Phytohemagglutinin and brain antigen, in vitro effects of, on cell transfer of experimental autoimmune encephalomyelitis in Lewis rats, 647
— kinetics of erythrocyte and lymphocyte agglutination by, 1121
—, the in vivo induction of mouse lymphocyte transformation by, 421
—, the response of cultured human thymus cells to, 1127
Phillips, Mildred E., 493
Phillips, Nancy I., 307
Piek, Edgar, 858
Pinchuck, Paul, 384, 1141
Plaque assay, hemolytic, modification of, for use with protein antigens, 133
—, direct and facilitated hemolytic, assignment of, in mice to specific immunoglobulin classes, 744
—, forming cell system, detection of immune response against synthetic polymers of amino acids employing the, 266
— technique and cluster technique, study of, 451
Plasma cells, amphibian, 1293
— seminal, antigenic specificity of, and the formation of autoantibodies, 682
Plotz, Paul H., 744, 752
Poliovirus, antibody-neutralized, studies on the mechanism of the enzymatic reactivation of, 1071
Polens, dwarf ragweed, separation of new skin reactive antigens from, 902
Polylysine antisera, cross-reactions of calf thymus histones with, 286
Polymers of amino acids, immune response of strain 13 guinea pigs to lysine-containing, 1141
—, synthetic, of amino acids employing the plaque-forming cell system, detection of immune response against, 266
Polypeptides (poly-α-amino acids), antigenicity of, 884
Polysaccharide antibodies, anti-pneumococcal, types III and VIII, quantitative studies of the specificity of, 1237
—, antigens, protein and, passive hemagglutination procedures for, using erythrocytes stabilized by aldehydes, 641
—, pneumococcal, sequence of events in mice early in immunologic paralysis by, 845
Precipitates, specific, of chicken antibodies and human serum albumin, a demonstration of the coprecipitation of β-lipoproteins with, 664
Precipitin-in-gel, double diffusion in two dimensions, 86
Pressman, D., 1169, 1176
Pretty, H. M., 274
Propagation and serologic procedures, HeLa cells for, 107
Properdin, highly purified human, properties of, 142
Protein A from Staphylococcus aureus, 530
—, reaction with guinea pig γ-globulins, 921
—, subunits from guinea pig γ1- and γ2-globulin, 927
—and polysaccharide antigens, passive hemagglutination procedures for, using erythrocytes stabilized by aldehydes, 641
—, antigen, isolation of, following extraction of lipids from sheep red blood cell strona, 475
—, modification of the hemolytic plaque assay for use with, 133
—, relationship between molecular size and intra- and extravascular distribution of, 376
—, Bence-Jones, of type L, antigenic determinants of the variable half of α, 201
—, Cx-reactive, isolation of, by gel filtration and characterization by electrophoresis and immunodiffusion, 563
—, individual γG myeloma, inhibition by normal γG-globulins of antibodies specific for, 69
—, M, of group A hemolytic streptococci, antigenicity of, cross-reactivity between serotypes, 39
—, new basic, in rabbit serum, unrelated to immunoglobulin, 252
— of lacrimal secretions, studies of the, 1080
Prototype strains, serologic characterization of, 114
Pruzansky, Jacob J., 1165
Purification, antibody, a cellulose mercurial: preparation, properties and use in, 187
Radovich, Jevrosima, 756
Rapp, Fred, 358
Rapp, Herbert J., 259, 788, 799, 808

Schluederberg, Ann, 964
Schmale, John, 525
Schmidt, N. J., 851
Schmidt, Nathalie J., 99, 1223
Schnoll, Sidney, 231
Scott, David W., 912
Schrohenloher, Ralph E., 1006
Schwab, John H., 252
Seal, Ulysses S., 594
Seastone, C. V., 845
Secretions, human respiratory, influenza virus neutralizing antibody in, 80
— lacrimal, studies of the proteins of, 1080
Sedimentation properties of antibody cytophilic for macrophages, 1219
Seligmann, Maxime, 69
Semenal plasma, antigenic specificity of, and the formation of autoantibodies, 682
Sensitization, passive, of monkey lung fragments with sera of timothy-sensitive patients, spectrofluorometric analysis of histamine release, 915
Serodiagnosis of actinomycosis, evaluation of an agar gel precipitin test for, 1288
Serologic characterization of prototype strains, 114
— procedures, propagation and, HeLa cells for, 107
Sero, John W., 912
Serotypes, cross-reactivity between, 39
Serum albumin, human, chicken antibodies and, a demonstration of the coprecipitation of β-lipoprotein with specific precipitates of, 664
— complement, and the enzymatic degradation of erythrocyte phospholipid, 459
— in the rejection of sarcoma I ascites tumor grafts, 493
— factors, and the reticuloendothelial uptake of *Staphylococcus aureus*, 516
—, new, in normal rabbits, 15
—, heterologous anti-thymocyte, in mice, effects of, 1259, 1319
—, human, demonstration in, of “conglutinogen-activating factor” and its effect on the third component of complement, 691
—, hyperimmune equine anti-pneumococcal, an aggregating immunoglobulin in, 880
— inhibitor, of the first component of complement by the inhibition of immune hemolysis, the stoichiometric measurement of the, 1154
— nephritis, nephrotoxic, in mice with a genetic deficiency in complement, 34
—, normal human reacting with enzyme digested γG-globulin, specificity of antiglobulin factors in, 612
--- of timothy-sensitive patients, passive sensitization of monkey lung fragments with, spectrofluorometric analysis of histamine release, 915
---, rabbit, new basic protein in, unrelated to immunoglobulin, 252
Shainoff, John R., 187
Sharp, D. G., 1335
Sher, Stephanie, 699
Shulman, Sidney, 682
Shwartzman phenomenon, localized, immunologic specificity of, induced in guinea pigs by simple chemical haptens, 1
Sigel, M. Michael, 1101
Siskind, Gregory W., 138, 371
Sjöquist, J., 530
Small intestine, synthesis of the first component of guinea pig complement by columnar epithelial cells of the, 788
Smith, Charles W., 421
Smith, J. Kelly, 459, 863
Sodium deoxycholate, endotoxins treated with, immunologic properties of, 444
Specificity allotypic, direct demonstration and quantitation of Aa1, Aa2 and Aa3, on Fe-fragments of rabbit immunoglobulin G, 604
---, antigenic, of seminal plasma and the formation of autoantibodies, 682
---, conjugate, of the transfer reaction, persistence and, 302
---, immunologic, of the localized Shwartzman phenomenon induced in guinea pigs by simple chemical haptens, 1
---, of antiglobulin factors in normal human serum reacting with enzyme digested γG-globulin, 612
---, organ, studies on, antigenic specificity of seminal plasma and the formation of autoantibodies, 682
Spiegelberg, Hans L., 376
Spleen cells from normal and immunized donors, the enhancing effect of bone marrow cells on the immune response of irradiated mice reconstituted with, 756
---, isolated, antibody production by, a study of the cluster and plaque techniques, 451
--- transferred from antigen-injected donors to syngeneic mice, an effect of maintenance in tissue culture on, 699
Stålenheim, G., 530
Staphylococcus aureus, protein A from, 530
---, ---, reaction with guinea pig γ-globulins, 921
---, ---, --- subunits from guinea pig γ1 and γ2-globulin, 927
---, serum factors and the reticuloendothelial uptake of, 516
Stein, Hans, 969
Stewart, C. C., 1121
Stiffey, A. V., 1230
Stolfi, Robert L., 46
Stollar, B. David, 7, 280
Strains, prototype, serologic characterization of, 114
Strander, H., 1304
Strejan, Gill, 1245
Streptococci, group A, enhancement of phagocytosis of, by antibody fragments derived from rabbit immunoglobulin by pepsin digestion, 898
---, hemolytic, group A, antigenicity of the M proteins of, cross-reactivity between serotypes, 39
Stroma, sheep red blood cell, isolation of a protein antigen following extraction of lipids from, 475
Styk, Bohumil, 1223
Sun Lee, 376
Surfactants, reaction of endotoxin and, 444
Swedlund, Harry A., 1206
Synthesis, immunoglobulin, in vitro, 363
T antigens, of adenoviral immunotypes of proved and currently unproved oncogenic potential, cross-reactivity between, 348
Tada, Tomio, 1145
Takahashi, M., 1169, 1176
Takemori, Nobuyuki, 348
Talal, Norman, 744, 752
Talmage, David W., 756
Tanigaki, N., 1176
Tarmins, David F., 444
Temperature dependence and role of antigen structure, 7
Terpolymers, glutamic acid, lysine, alanine and tyrosine, cross-reactions of normal sheep erythrocytes with antibody against, 266
Tesar, W. C., 1230
Tevethia, Satvir S., 358, 793
Theis, Gail A., 138
Thoracic duct lymphocytes of mice, studies of, 363
Thymectomy or cortisone, influence of immunologic impairment by, 771
Thymus cells, cultured human, the response of, to phytohemagglutinin, 1127
Thymus role of in tolerance, 974, 1255
--- antibodies, intact and pepsin-digested heterologous anti-mouse, in vivo and in vitro properties of, 969
Thyroid gland, rhesus, the growth of mumps virus in organ cultures of, 414
Tissue, central nervous, an in vitro assay for encephalitogenic components of, 1230
---, human heart, antigenic analysis of, 1020
--- culture, an effect of maintenance in, on spleen
cells transferred from antigen-injected donors to syngeneic mice, 699
— —, production of rickettsial complement-fixing antigens in, 821
— —, assay, direct immunofluorescent, for lymphocytic choriomeningitis virus, 1135
— —, lining the series and respiratory passages in man, localization of IgA by immunofluorescence in, 706

Titeration and neutralization of Rickettsia tsutsugamushi in tissue culture, 825

Todd, Earl W., 142

Togo, Y., 726
Tolerance, role of thymus in, 974, 1255
— —, selection of cell populations in induction of, 138
Transfer reaction, persistence and conjugate specificity of, 302
Transformation, depressed lymphocyte, in chronic histoplasmosis, 436
— —, immune lytic, a state of irreversible damage generated as a result of the reaction of the eighth component in the guinea pig complement system, 46
— —, mouse lymphocyte, the in vivo induction of, by phytohemagglutinin, 421
Treffers, Henry P., 659, 664

Trentin, J. J., 128

Trichinella spiralis antigen, fine structure of lymphocytes sensitized to, 329
Troup, Stanley B., 175
Tuberculin, transfer of cutaneous hypersensitivity to, in the guinea pig by γG2 from immunized donors, 868
Tuberculoid, the local nature of immunity in, illustrated histochemically in dermal BCG lesions, 931
Tumor neoantigens, adenovirus type 12 hamster, evidence for the IgG nature of complement-fixing antibodies to, 128
— —, grafts, sarcoma I ascites, serum complement in the rejection of, 493
Tyan, Marvin L., 535
Tyrosine, terpolymers, glutamic acid, lysine, alanine and, cross-reactions of normal sheep erythrocytes with antibody against, 266

Ultra-centrifugation of the first component of complement, effects of ionic strength, 808

Urinary Fe and F'c fragments, 280
Urine, normal homologous and autologous, the induction of acute glomerulonephritis in rabbits with soluble antigens isolated from, 1277
— —, thermostable kidney antigen and its excretion into, 1195

Vaccination, response in rabbits related to quantity of vaccinia virus particles and passage level, 1335
Vaccine, live attenuated Japanese encephalitis, in swine, studies of, 194
— —, production, experimental, activity in guinea pigs and, 548
van der Meul, V. A., 451
Van Hoosier, G. L., Jr., 128
van Orden, Dianna E., 659, 664
van Twisk, M. J., 451
Vax, Nelson M., 109, 1014

Virus, dengue, application of immunodiffusion methods to the antigenic analysis of, 86, 93
— —, encephalomyocarditis group, pathogenicity in mice of aerosols of, 120
— —, hemagglutinin, measles, heparin-MnCl2 removal of nonspecific serum inhibitor for, 1353
— —, herpes simplex, heterogeneity in the properties of 7S and 19 S rabbit-neutralizing antibodies to, 586
— —, infectious bronchitis, antigenic characterization of, 793
— —, influenza A, avian strains of, the age distribution in humans of hemagglutinating-inhibiting antibodies reacting with, 581
— —, live and dead influenza, antibody response in respiratory secretions of volunteers given, 706
— —, lymphocytic choriomeningitis, direct immunofluorescent tissue culture assay for, 1135
— —, susceptibility of different mouse strains to, 355
— —, mumps, growth of, in organ cultures of rhesus thyroid gland, 414
— —, neutralizing antibody, influenza, in human respiratory secretions, 80
— —, particles, vaccinia, and passage level, vaccination response in rabbits related to quantity of, 1335
— —, sensitized lactose dehydrogenase, neutralization of, by anti-γ-globulin, 314
— —, type 4 adeno-associated satellite, hemagglutinin of, 61
