CONTENTS
NUMBER 1, JULY 1968

IMMUNOCHEMISTRY

Immunologic Studies of a Partially Purified Sheep Erythropoietin. Ernest Rioux and Allan J. Erslev .............................................................. 6
Properties of Erythrocytes Stabilized with Sulfosalicylic Acid and Their Use in an Indirect Hemagglutination Test with Influenza Virus RNP-Antigen. H. Becht .............................................................. 18
Induction of Erythema-Wheel Reactions by Soluble Antigen-γE Antibody Complexes in Humans. Kimishige Ishizaka and Teruko Ishizaka .............................................................. 68
Heterogeneity in Antibodies Specific for Aggregated Human γG-Globulin. Christopher S. Henney and Kimishige Ishizaka .............................................................. 79

CELLULAR IMMUNOLOGY

The Use of Catfish, Ictalurus nebulosus (Le Sueur), as Experimental Animals for Immunization with Human Secretor Saliva and Other Antigenic Materials. Joseph V. Chuba, William J. Kuhs and Ross F. Nigrelli .............................................................. 1
The Factors Affecting the Strength of “One-Way” Stimulation with Irradiated Leukocytes in Mixed Leukocyte Cultures. Shinpei Kasakura and Louis Lowenstein .............................................................. 12
Further Studies on the Effect of Specific Antiserum on Induction, Maintenance and Termination of Immunologic Tolerance. Herman Friedman .............................................................. 23
Immunologic Unresponsiveness, Immunity and Enhancement in Experimental Allergic Encephalomyelitis. S. B. Salvin and H. L. Liauw .............................................................. 33
A Correlate of Human Delayed Hypersensitivity: Specific Inhibition of Capillary Tube Migration of Sensitized Human Lymph Node Cells by Tuberculin and Histoplasmin. Daniel E. Thor and Sheldon Dray .............................................................. 51
Lymphocyte in Vitro Cytotoxicity: Mechanisms of Immune and Non-Immune Small Lymphocyte Mediated Target L Cell Destruction. Gale A. Granger and William P. Kolb ...................... 111
Phagocytosis and Intracellular Fate of Mycobacterium tuberculosis: In Vitro Studies with Guinea Pig Peritoneal and Alveolar Mononuclear Phagocytes. Kameron W. Maxwell and Stanley Marcus .............................................................. 176

IMMUNOPATHOLOGY

Antimuscle Factor and Antinuclear Factor in Patients with Myasthenia Gravis. I. Heavy Chain Determinants. D. E. McFarlin, J. S. Johnson and W. F. K. Seymour .............................................................. 104
The Reactivity of Long-Lived Lymphocytes to Typhoid Vaccine in Situ in Rat Popliteal Lymph Nodes. John J. Miller, III and Leonard J. Cole .............................................................. 133
Experimental Allergic Uveitis. I. Production in the Guinea Pig and Rabbit by Immunization with Retina in Adjuvant. W. B. Wacker and M. M. Lipton .............................................................. 151
Experimental Allergic Uveitis. II. Serologic and Hypersensitive Responses of the Guinea Pig following Immunization with Homologous Retina. W. B. Wacker and M. M. Lipton .............................................................. 157

MICROBIAL AND VIRAL IMMUNOLOGY

Latency in Human Infections with TRIC Agents. Lavelle Hanna, Chandler R. Dawson, Odeon Briones, Phillips Thygeson and Ernest Jawetz .............................................................. 43
Antibody Response in Humans to Deoxycholate-Treated Influenza Virus Vaccine. A. E. Duxbury, A. W. Hampson and J. G. M. Sievers .............................................................. 62
Difference in the Immunoglobulin Class of Poliambitody in the Serum of Men and Women. Eugene Ainsbender, Ruth Berger Weisinger, Magda Hevizy and Horace L. Hodes .............................................................. 92
Induction of Tuberculin Hypersensitivity and Serologic Unresponsiveness to Tubercle Bacilli in Newborn and Young Guinea Pigs. Bernard W. Janieki and Stephen A. Aron .............................................................. 121
Human Serum Interactions with Candida albicans. Richard A. Chilgren, Richard Hong and Paul G. Quie .............................................................. 128

### MICROBIAL AND VIRAL IMMUNOLOGY

- **Virulence of Skin Strains of Nephritogenic Group A Streptococci: New M Protein Serotypes.** Jennifer C. Johnson, Reed C. Baskin, Edwin H. Beachey and Gene H. Stollerman ........................................ 187
- **Neutralization of Poliovirus by IgA Coproantibodies.** Robert Keller and Julia E. Dwyer ............. 192
- **Immunodiffusion Reactions with Rubella Antigens.** Nathalie J. Schmidt and Bohumil Styk .......... 210
- **Heterogeneity in the Ability of Rabbit 7 S and 19 S Neutralizing Antibodies to Differentiate between Intratypic Antigenic Variants of Herpes Simplex Virus.** Berge Hampar, Michael G. Mage and Mary Alice Keehn ............................................................ 256
- **Potentiation of Serum Bactericidal Activity by Lysozyme.** Starkey D. Davis, Diethard Gemsa, Antoinette Iannetta and Ralph J. Wedgwood .............................................. 277
- **The Role of Serum Lipase in the Degradation of *Salmonella enteritidis* Endotoxin.** Jiban D. Gupta and Charles E. Reed ................................................................ 308

### COMMUNICATIONS

- **Immunologically Induced Aspermatogenesis in the White House.** Betty Jean Hargis, Saul Malkiel and Jane Berkelhammer ................................................................... 374
- **The Production of Antisera to Human γG Subclasses in Rabbits Using Immunologic Unresponsiveness.** H. L. Spiegelberg and W. O. Weigle ................................................. 377

### NUMBER 3, SEPTEMBER 1968

### IMMUNOCHEMISTRY

- **Purification of Two Fragments of M Protein From a Strain of Group A, Type 12 Streptococcus.** Rudolph H. Johnson and Kenneth L. Vosti ................................................ 381
- **The C'Ia Fixation and Transfer Test: Examples of its Applicability to the Detection and Enumeration of Antigens and Antibodies of Cell Surfaces.** Tibor Borsos, Harvey R. Colten, Joel S. Spalter, Nicholas Rogentine and Herbert J. Rapp ........................................... 392
- **An Antigen-Binding Capacity Test for Human Immunoglobulin G (IgG) Fragments.** Jean-Charles Cerottini ....................................................................... 433
- **Antigenicity of Guanidinated and Amidinated Bovine Serum Albumin.** A. F. S. A. Habeeb ...... 505
- **Is Delayed Sensitivity a Preparation for Antibody Synthesis?** Sidney Leskowitz .......................... 528
- **The Immunologic Response of Rabbits to Carrageenans, Sulfated Galactans Extracted from Marine Algae.** K. H. Johnston and E. L. McCandless .............................................. 556

### CELLULAR IMMUNOLOGY

- **Synthesis of Specific RNA Molecules during Immune Response in the Mouse Spleen.** R. B. Church, U. Storb, B. J. McCarthy and R. S. Weiser ................................................ 399
- **Studies of Human C-Reactive Protein in an *In Vitro* Phagocytic System.** Ralph C. Williams, Jr. and Paul G. Quie ........................................................................ 426
- **Studies on the Ontogeny of the Mouse Immune System. II. Immunoglobulin-Producing Cells.** Marvin L. Tyan and Leonard A. Herzenberg ................................................ 446
- **Studies on Human Peripheral Blood Lymphocytes *In Vitro*. V. Biosynthesis of Immunoglobulins.** L. N. Chessin, P. R. Glade, R. Asofskey, P. D. Baker, R. Reifsfeld and W. Terry .......... 458
- **Significance of the Mast Cell Response to a Lysosomal Protein.** Junius M. Clark and R. D. Higginbotham ........................................................................ 488
- **Relationship of Germinal Centers in Lymphoid Tissue to Immunologic Memory. III. Proliferative Response of Primed Cells from Splenic White and Red Pulp following Reexposure to Antigen *In Vitro*.** E. B. Jacobson and G. J. Thorbecke .......... 515
- **Detection of γ4 Antibody-Releasing Cells to Erythrocyte and Lipopolysaccharide Antigens.** Carla S. Walters and Anne L. Jackson .............................................. 541

Staphylococcal Delayed Hypersensitivity in Mice. II. In Vitro Demonstration and Specificity of Delayed Hypersensitivity. James H. Taubler and Stuart Mudd ............................ 550

The Role of Proliferation in Delayed Hypersensitivity. Joseph D. Feldman ............................. 563

Immunologic Tolerance Induced in the Adult Rabbit with Modified BSA. P. C. Frei, S. Crucqaud, L. Arnaudo and A. Vannotti .............................................................. 605

IMMUNOPATHOLOGY

Transplantation Antibody Associated with First-Set Renal Homografts. Frederick W. Spong, Joseph D. Feldman and Sun Lee ...................................................... 418

Rabbit Blocking and Binding Antibodies to Human Intrinsic Factor and Intrinsic Factor-Ba Complex. I. Michael Samloff and Michael D. Turner .......................................... 578

Antibody Production Stimulated in Vitro in Burkitt Lymphoma Cells. Hideo Kamei and George E. Moore ................................................................................. 587

MICROBIAL AND VIRAL IMMUNOLOGY

An Immuno-Cytopathogenic Interaction between Sensitized Leukocytes and Epithelial Cells Carrying a Persistent Noncytocidal Myxovirus Infection. Lawrence F. Speel, June E. Osborn and Duward L. Walker ...................................................................... 409

Antigenic Variants of Arboviruses. IV. The Distinctive Antigenic Properties of Virus Clones Propagated in Different Hosts. J. R. Henderson ........................................ 451

Experimental Pleural Effusion as a Manifestation of Delayed Hypersensitivity to Tuberculin PPD. James C. Allen and Michael A. Apicella .................................................... 481

Neutralisation and Sensitization of Herpes Simplex Virus with Antibody Fragments from Rabbits of Different Allotypes. Warren K. Ashe, Michael Mage, Rose Mage and Abner Louis Notkins ................................................................. 500

Formation and Transfer of Antibodies in Congenital Murine Infections with A Type 2 Reovirus. Mary M. Carruthers and A. Martin Lerner ........................................ 523

Observations Concerning the Pathogenesis of E. Coli Infections in Mice. Donald N. Medearis, Jr. and Jean F. Kenny .............................................................. 534

Neutralizing Activity in Nasal Secretions and Serum in Resistance of Volunteers to Parainfluenza Virus Type 2. Lawrence P. Tremonti, Juay-Shin L. Lin and George Gee Jackson .................................................. 572

Immunosuppression by Leukemia Viruses. I. Effect of Friend Disease Virus on Cellular and Humoral Hemolysin Responses of Mice to a Primary Immunization with Sheep Erythrocytes. Walter S. Cegowskii and Herman Friedman .................................................. 594

Application of Passive Hemagglutination Methods for Detection of Antibody to Viral Antigen in Hamsters Bearing Adenovirus Type 12 Tumors. Stanley S. Lefkowitz ........................................ 611

COMMUNICATION

The Association of the C7 Allotype of Rabbits with Some Light Polypeptide Chains Which Lack b Locus Allotype. Rose G. Mage, Glendowlyn O. Young and Ralph A. Reisfeld ........................................ 617

NUMBER 4, OCTOBER 1968

IMMUNOCHEMISTRY

Hypersensitivity to Ascaris Antigens. IV. Production of Homocytotropic Antibodies in the Rat. Gill Strejan and Dan H. Campbell .................................................. 628

Studies of Blood Group Substances. IV. Caprine IgG and IgM Antibodies to Human H Substance. Donald M. Marcus and Louise E. Cass ........................................ 669

Catabolism of Human γG Immunoglobulins of Different Heavy Chain Subclasses. II. Catabolism of γG Myeloma Proteins in Heretologous Species. Hans L. Spiegelberg and Howard M. Grey ........................................ 711

Iso-Antibodies to a β Globulin that Detects Spontaneous Delayed Iso-Hypersensitivity in Guinea Pigs. D. A. Follett and J. R. Battisto ........................................ 753
IMMUNOGENETICS

Types of Canine Serum Immunoglobulins. Roy Patterson, Mary Roberts and Jacob J. Pruzansky ........................................................................................................ 687

Studies on Synthetic Polypeptide Antigens. XX. Genetic Control of the Antibody Response in the Rat to Structurally Different Synthetic Polypeptide Antigens. S. J. Simonian, T. J. Gill, III and S. N. Gershoff ........................................................................ 730

CELLULAR IMMUNOLOGY

Ferritin-Antibody Localization of Erythrocyte Antigenic Sites in Immunohemolytic Anemias. William C. Davis, Steven D. Douglas, Lawrence D. Pets and H. Hugh Fudenberg ................................................................. 621

The Application of the Irradiated Hamster Test to the Study of Experimental Allergic Encephalomyelitis. Joan Kornblum ..................................................................................................................... 702

Spontaneous Delayed Iso-Hypersensitivity in Guinea Pigs. Jack R. Battisto ................................................................................................................................. 743

The Specificity of Antigen-Induced Thymidine-2-14C Incorporation into Lymph Node Cells from Sensitized Animals. Michael Stulbarg and Stuart F. Schlossman ............................................ 784

Nonspecific Stimulation of Antibody Production in Surgically Bursectomized Chickens by Bursa-Containing Diffusion Chambers. Peter B. Dent, Daniel Y. E. Perey, Max D. Cooper and Robert A. Good ..................................................................................... 799

IMMUNOPATHOLOGY

Delayed Hypersensitivity to Myelin Basic Protein in the Passive Transfer of Experimental Allergic Encephalomyelitis. George A. Falk, Marian W. Kies and Ellsworth C. Alvord, Jr .......................................................... 638

Biologic Properties of Rat Antibodies. I. Antigen-Binding by Four Classes of Anti-DNP Antibodies. Kurt J. Bloch, Herbert C. Morse, III and K. Frank Austen ................................................................................. 650

Biologic Properties of Rat Antibodies. II. Time-Course of Appearance of Antibodies Involved in Antigen-Induced Release of Slow Reacting Substance of Anaphylaxis (SRS-A™); Association of This Activity with Rat IgG. Herbert C. Morse, III, Kurt J. Bloch and K. Frank Austen ........................................................................................................... 658

Calcium Requirements for Complement Dependent Hemolytic Reactions. Richard E. Bryant and David E. Jenkins, Jr ................................................................................................................................. 694

Anti-Nuclear Antibodies in Mice. I. Influence of Age and Possible Genetic Factors on Spontaneous and Induced Responses. Perry O. Teague, George J. Friou and Lynn L. Myers ........................................................................... 791

MICROBIAL AND VIRAL IMMUNOLOGY

Evidence of SV40-Specific Transplantation and Surface Antigens in Cells Transformed by Paradenovirus 12. Robert N. Lausch, Satvir S. TeVethia and Fred Rapp .................................................................................. 645

Toxicity of Combined Histamine and Serotonin in Normal, Pertussis-Sensitized, and β Adrenergically Blocked Mice. Charles W. Fishel, Kenneth F. Keller and Brenda S. O'Bryan ........................................................................................................... 679

The Immunodepressive Action of Lymphocytic Choriomeningitis Virus in Mice. C. A. Mims and Sally Wainwright ............................................................................................................................ 717

Immunoglobulins Produced in Response to Japanese Encephalitis Virus Infections of Man. Keizo Ishii, Yasuko Matsunaga and Reisaku Kono .............................................................................................. 770

Suckling Mouse Cataract Agent (SMCA) in Mice. I. Factors Affecting the Incidence of Catarracts and Growth of Virus in Several Strains of Mice. H. Fred Clark and David T. Karzon ...................................................................... 776

Suckling Mouse Cataract Agent (SMCA) in Mice. II. Transfer of Protection to Progeny of SMCA-Infected Dams. H. Fred Clark and David T. Karzon ...................................................................................... 782

The Biologic Role of Host Antigens in Newcastle Disease Virus. V. M. Zhdanov and G.-K. S. Chepulis .................................................................................................................................................. 788

COMMUNICATIONS

Adenovirus Type 12 Oncogenicity in Newborn Hamsters: The Effect of Pokeweed Mitogen. Ashley T. Hasse, J. A. Kasel and L. N. Chessin .................................................................................................................. 806

Modification of Meningococcal Polysaccharide Antigens for Use in Passive Hemagglutination Tests. Bruce W. Hammond, David T. Kingsbury and Emilio Weiss ......................................................................................... 808

SPECIAL ARTICLE

Abstracts of Papers Presented at the Third International Complement Workshop, Harvard Medical School, Boston, Massachusetts, June 3-5, 1968 ........................................................................................................... 810
