# SER. A. GEN<sup>TM</sup> kits antigen/ antisera FOR

## PLASMA, SERUM AND TISSUE PROTEINS IDENTIFICATION

Requests for small quantities of purified proteins (antigens) as well as antisera to these materials have been numerous. To fill this demand Mann Research is introducing SER-A-GEN KITS which contain both specific antigen and specific antibody that can be used to identify unknowns or to establish where the precipitin lines can be found in immunoelectrophoresis. These materials have been pretested for optimum precipitin lines in agar immunoelectrophoresis and are suitable for all types of antigen-anti-body studies. No dilution is required.

### THE FOLLOWING 15 COMBINATION KITS ARE AVAILABLE IN PURIFIED FORM.

7S Gamma Globulin (Human) •  $\beta_2$  A (Human) (IGA) • Bence Jones Type I (Human) (Gamma GK) • Bence Jones Type II (Human) (Gamma GL) • Human Growth Hormone (STH) • IGM (Human) (19S Gamma,  $\beta_2$  Macroglobulin) • IGM (Human) (19S Gamma,  $\beta_2$  Macroglobulin) • Human Serum (Normal) • Rabbit Serum (Normal) • Goat Serum (Normal) • Guinea Pig Serum (Normal) • Mouse Serum (Normal) • Rat Serum (Normal) • Hamster Serum (Normal) • Monkey (Rhesus) Serum (Normal) •
