## CONTENTS

**NUMBER 1, JANUARY 1969**

### IMMUNOCHEMISTRY

- Role of Fumaropimaric Acid in Guinea Pig Complement Dependent and Non-Complement Dependent Biologic Reactions. I. Inhibition of Forssman, Reversed Passive Arthus, and PCA Reactions by Fumaropimaric Acid. M. Michael Glovsky, Peter A. Ward, Elmer L. Becker and Noah J. Halbrook .......................................................... 1
- Protein-Carbohydrate Interaction. XVII. The Effect of Polysaccharide Molecular Weight on the Concanavalin A-Polysaccharide Precipitation Reaction. Lucy L. So and I. J. Goldstein .................................................. 53
- Physicochemical Properties of Human Reaginic Antibodies. VIII. Effect of Reduction and Alkylation on \( \gamma E \) Antibodies. Kimishige Ishizaka and Teruko Ishizaka ......................................................... 69
- Purification of Two Protein Antigens by Dissociation from Thiolated Antibody. Benjamin Wolf and Harriet Izenberg .......................................................... 123
- Hereditary Deficiency of the Second Component of Complement in Man: An Immunoocheical Study. Martin R. Klemperer .................................................. 168
- Two Antigenic Subtypes of Human Lambda Immunoglobin Chains. Frank W. Tischendorf and Elliott F. Osserman .................................................. 172
- Studies on the Chemical Structure and the Antigenic Determinant of Type II Antigen of Group F Streptococci. Marc F. Michel, Jeanette van Vorno and Richard M. Krause .................................................. 215
- The Specificity of a Monoclonal Macroglobulin (\( \gamma M \)) Antibody: Reactivity with Primate \( \gamma G \) Immunoglobulins. Marvin J. Stone and Henry Metzger .................................................. 222
- Immunoglobulins of the Rhesus Monkey (Macaca mulatta). II. Properties of Rhesus IgG and IgM Antibody in Hemagglutination, Precipitation and Skin Sensitization. James D. Lakin, Roy Patterson and Jacob J. Puzansky .................................................. 253

### CELLULAR IMMUNOLOGY

- Water Soluble Guinea Pig Transplantation Antigen from Carcinogen-Induced Sarcomas. B. D. Kahan, E. C. Holmes, R. A. Reisfeld and D. L. Morton .................................................. 28
- Delayed Hypersensitivity to Purified Streptococcal M Protein in Guinea Pigs and in Man. Edwin H. Beachey, Humberto Alberti and Gene H. Stollerman .................................................. 42
- Antibody Elicited by Brucella abortus Antigen \textit{in Vitro}: Prolonged Production by Cell Suspensions. Marvis Richardson .................................................. 77
- Reversal of Post-Thymectomy Wasting in Mice with Immunocompetent Cells: Influence of Histocompatibility Differences. O. Stutman, E. J. Yunis and R. A. Good .................................................. 87
- A Neutrophil Chemotactic Factor from Human C5'. Peter A. Ward and Larry J. Newman .................................................. 93
- The Effects of Single Low Antigen Doses on Immunologic Responsiveness in Adult Rabbits. Sumner C. Kraft and Richard M. Rothenberg .................................................. 100
- Mixed Lymphocyte Blastogenesis in Response to Multiple Histocompatibility Antigens. Daniel G. Colley and Charles W. DeWitt .................................................. 107
- A Cytotoxic Antiglobulin Technique for Assay of Antibodies to Histocompatibility Antigens. Leroy Fass and Ronald B. Herberman .................................................. 140
- Effect of Antilymphocytic Serum on Rat Lymphocytes. Ruth W. Tyler, N. B. Everett and M. Roy Schwarz .................................................. 179
- The Effect of Immunologically Induced Lymphopenia on Antibody Formation. John Baum, George Liebermann and Eugene P. Frenkel .................................................. 187
- Immunologic Tolerance to Sulfanilic Acid Assessed by the Hapten-Specific Hemolytic Plaque Technique. Tomáš Hraba and Bruce Merchant .................................................. 229

### IMMUNOPATHOLOGY

Facilitatory and Inhibitory Effects of Phytohemagglutinin on Experimental Allergic Encephalomyelitis in Guinea Pigs. Cheng-Mei Shaw ................................................ 63

Characterization of a Soluble Cytoplasmic Antigen Reactive with Sera from Patients with Systemic Lupus Erythematosus. Geoffrey Clark, Morris Reichlin and Thomas B. Tomasi, Jr. ................................................ 117

Two Mechanisms of Immunologically-Induced Injury to Rabbit Platelets. Roger M. des Prez and Richard E. Bryant ................................................ 241

MICROBIAL AND VIRAL IMMUNOLOGY

Poliovirus Antibody Response in Serum and Nasal Secretions following Intranasal Inoculation with Inactivated Poliovaccine. Pearsay L. Ogra and David T. Karzon ................................................ 15

Effect of DEAE-Dextran on Interferon Production and Protective Effect in Mice Treated with the Double-Stranded Polynucleotide Complex Polyinosinic-Polyrictidyl Acid. F. Dianzani, G. Rita, P. Cantagalli and S. Gagnoni ................................................ 24

Immune Response of Cattle to Different Serotype Antigens in Monovalent and Trivalent Foot-and-Mouth Disease Vaccines. J. H. Graves ................................................ 58

Endotoxin-Induced Modification of Plasmodium berghei Infection in Mice. Rob Roy MacGregor, John N. Sheagren and Sheldon M. Wolff ................................................ 131

Induction of Ocular Resistance to Vaccinia Virus by Typhoid Vaccine: Role of Interferon. Jang O. Oh and Chieko Yoneda ................................................ 145

COMMUNICATIONS

Preparation of Rabbit Immune Serum with Neutralizing Activity against a Simian Cytomegalovirus (SA6). D. V. Ablashi, L. M. Martos, R. V. Gilden and B. Hamburger ................................................ 263

Induction of Tolerance in Immunologically Competent Primates. Richard J. Howard, John C. Landon, Suanne F. Dougherty, Abner L. Notkins and Stephan E. Mergenhagen ................................................ 266

The Fixation of Guinea Pig Complement by γ1 and γ2 Immunoglobulins. Abraham G. Osler, Benedito Oliveira, Hyua S. Shin and Ann L. Sandberg ................................................ 269

IMMUNOCHEMISTRY

Studies on Human Antibodies. VII. Acrylamide Gel Electrophoresis of Purified Human Antibodies and Myeloma Proteins, Their Heavy and Light Chains. Marianne M. Dorner, William J. Yount and Elvin A. Kabat ................................................ 273

The Relationship of the Hemolytic Activity of Active C1s to Its TAME Esterase Action: A New Method of Purification and Assay. K. Nagaki and R. M. Stroud ................................................ 421

A Study of the Antigenicity of Formaldehyde- and Glutaraldehyde-Treated Bovine Serum Albumin and Ovalbumin-Bovine Serum Albumin Conjugate. A. F. S. A. Habeeb ................................................ 457

Comparisons of Reaginic Antibodies from Three Species. Roy Patterson, Mary Roberts and Jacob J. Pruzansky ................................................ 466

Studies on Cryoprecipitation. II. Immunochemical Characterization of a Human Cryoglobulin. Anil Saha, Sheldon Sambury, Kenwyn Smart, Douglas C. Heiner, Austin U. Sargent and Bram Rose ................................................ 476

Cleavage of the Fe Fragment of IgA. Vincent Yakulis, Nicolas Costea and Paul Heller ................................................ 488

Quantitative Estimation of Antibodies in Different Immunoglobulin Classes. Giorgio Torrigiani and Ivan M. Roitt ................................................ 492

Molecular Heterogeneity of Immunoglobulin-M (γM-Globulin). Alan Solomon ................................................ 496

CELLULAR IMMUNOLOGY

Isoantigens Available to Circulating Antibodies. Isaac Witz, Nathan Kaliss and David Pressman ................................................ 283

The Immunologic Memory of LAF Mice following a Single Injection of Sheep Red Cells. Jevrosima Radovich, Helen Hemingsen and David W. Talmage ................................................ 288
Stimulation of Immunoglobulin and Anamnestic Antibody in Vitro. Diane J. Yashphe and Albert H. Coons ........................................................................ 306
Biologic Properties of Rat Antibodies. III. Histamine Release Mediated by Two Classes of Antibodies. Herbert C. Morse, III, K. Frank Austen and Kurt J. Bloch ........................................ 327
Mechanism of Immunologic Tolerance. I. Induction of Tolerance to Bovine γ-Globulin by Injection of Antigen into Intact Organs in Vitro. David W. Scott and Byron H. Waksman .......... 347
Ontogeny of Circulating Immunoglobulins in Normal, Bursectomized and Irradiated Chickens. Renee van Meter, R. A. Good and M. D. Cooper ........................................ 370
A Refractory Period in Adoptive Immunization following Secondary Stimulation of Mice. Frank J. Twarog and Noel R. Rose ........................................ 375
Studies on the Induction of Immunologic Unresponsiveness. III. Antigen Form and Mouse Strain Variation. Edward S. Golub and William O. Weigle ........................................ 389
Inhibition of Capillary Migration by Antigen-Antibody Complexes. Lynn Spitzer, Heinzi Huber and H. Hugh Fudenberg ................................................ 404
The in Vitro Release of Leukocyte Histamine by Staphylococcal Antigens. R. Russell Martin and Arthur White .................................................. 437
In Vitro Antibody Synthesis by Diffusion Chamber Cultures of Spleen Cells. I. Methods and Effect of 10,000 r on Antibody Synthesis. Douglas C. Vann and T. Makinodan ................. 442
In Vitro Antibody Synthesis by Diffusion Chamber Cultures of Spleen Cells. II. Effect of Increased Levels of Free Antibody. Douglas C. Vann ........................................ 451
Enhancing Antibody. I. Biosassay for Normal Skin Grafts. Barry Zimmerman and Joseph D. Feldman .................................................. 507
Chromatographic Studies on Spleen and Lymph Node Extracts with Antibody Activity. Frederick I. Tsuji, David L. Davis and David H. Donald .................................................. 519

IMMUNOPATHOLOGY
Immunoglobulin and Specific Antibody Synthesis in a Chronic Inflammatory Focus: Antigen-Induced Synovitis. Hugo E. Jasin and Morris Ziff ........................................ 355
Immunologic Response to Altered Encephalitogenic Protein in Guinea Pigs. Robert H. Swanborg .................................................. 381

MICROBIAL AND VIRAL IMMUNOLOGY
Humoral Immunity in Rodent Malaria. I. Estimation of Parasitemia by Electronic Particle Counting. Carter L. Diggs and Abraham G. Osler ........................................ 292
Humoral Immunity in Rodent Malaria. II. Inhibition of Parasitemia by Serum Antibody. Carter L. Diggs and Abraham G. Osler ........................................ 298
Immunosuppression by Leukemia Viruses. II. Cytokinetics of Appearance of Hemolysin-forming Cells in Infected Mice during the Anamnestic Response to Sheep Erythrocytes. Walter S. Ceglowski and Herman Friedman ........................................ 338
Correlation between the Neutralizing Activity of Human Serum against Herpes Simplex Virus and a Simian Herpesvirus (SA8). B. Hampar, D. A. Stevens, L. M. Martos, D. V. Ablashi, M. A. K. Burroughs and G. A. Wells ........................................ 397
Anti-Dengue Immunoglobulins and Serum β1 γ/δ Globulin Levels in Dengue Shock Syndrome. Philip K. Russell, Anong Intavivat and Sopana Kanchanapilant ........................................ 412
Immunofluorescence Assay for Antigen and Antibody in Lactic Dehydrogenase Virus Infection of Mice. David D. Porter, Helen G. Porter and Beverly B. Deerhake ........................................ 431

COMMUNICATIONS
Antigenic Relationship between the Equine and the Hong Kong Human Variant of Influenza Type A2 Virus. Julius A. Kasel, Robert V. Fulk and Robert B. Couch ........................................ 530

NUMBER 3, MARCH 1969

IMMUNOCHEMISTRY
C3 Inactivator of Man. I. Hemolytic Measurement by the Inactivation of Cell-Bound C3. Shaun Ruddy and K. Frank Austen ........................................ 533

Inhibition of the Lytic Effect of Guinea Pig Complement by Rabbit Complement. Raymond A. Kempf, Irma Gigli and K. Frank Austen .......................................................... 795

Passive Immune Lysis with Chronic Chloride-Treated Erythrocytes. Philip J. Perucca, W. Page Faulk and H. H. Fudenberg .......................................................... 812

A Comparative Antigenic Study of γE-Globulin and Myeloma-IgND. Hans Bennich, Kimishige Ishizaka, Teruko Ishizaka and S. Gunnar Johansson .......................................................... 826

A Comparison of Seven Procedures to Detect the Primary Binding of Antigen by Antibody. Percy Minden, Bascom F. Anthony and Richard S. Farr .......................................................... 832

Presence of L-L Interchain Disulfide Bonds in Reconstituted γG Molecules. Howard M. Grey .......................................................... 848

Studies on Brain Antigens. II. Water Soluble Antigenic Proteins of Bovine Brain. Victor B. Hatcher and Catherine F. C. MacPherson .......................................................... 877

Histamine Release from Human Leukocytes by Anti-γE Antibodies. Teruko Ishizaka, Kimishige Ishizaka, S. Gunnar O. Johansson and Hans Bennich .......................................................... 884

Some Characteristics of the Antigenic Moiety of Calfskin Collagen. E. Carwile LeRoy .......................................................... 919

Factors Influencing the Production of Early, Heat Labile, Rabbit Anaphylactic Antibody. Nathan J. Zvaifler and Jennifer O. Robinson .......................................................... 947

Immunoglobulins of the Rhesus Monkey (Macaca mulatta). III. Structure and Activity of Rhesus IgG and IgM Antibodies Synthesized in the Primary Response and in the Hyperimmune State. James D. Lakin, Roy Patterson and Jacob J. Pruzansky .......................................................... 975

Immune Hemolysis: Serial Studies on the Dissociability of IgG and IgM Anti-Forssman Antibodies Using the C1a Fixation and Transfer Technique. William D. Linscott .......................................................... 986

The Effects of Ionic Strength, Temperature, and Antibody Class and Avidity on Fixation and Transfer of the First Component of Complement. William D. Linscott .......................................................... 993

Structural Analysis of a Slowly Sedimenting Proteolytic Fragment of Human Immunoglobulin M. Anne Goodman and F. P. Inman .......................................................... 1032

Downloaded from http://www.jimmunol.org/ by guest on April 20, 2017
Biologic Activity and Morphology of Three Types of Rabbit IgM Antibody Subunits. Bruce Chesebro and Sven-Eric Svehag ........................................................... 1064

CELLULAR IMMUNOLOGY

An Isotopic Antiglobulin Technique for Measuring Antibodies to Cell-Surface Antigens. F. C. Sparks, C. C. Ting, W. G. Hammond and R. B. Herberman .................................................. 842

The Immune Response of Mice to Keyhole Limpet Hemocyanin Bound to Macrophages. Emil R. Unanue ................................................................................ 893

A Method for the Immunoadsorption of Cells to an Antibody-Coated Polyurethane Foam. Warren H. Evans, Michael G. Mage and Elbert A. Peterson .................................................. 899

Enrichment of Antibody Plaque-Forming Cells by Immunoadsorption to an Antigen-Coated Polyurethane Foam. Michael G. Mage, Warren H. Evans and Elbert A. Peterson .................................................. 908

Use of Thymectomized, Irradiated Rats to Study Immunogenicity of Bovine γ Globulin. R. Michael Williams and Byron H. Waksman .................................................................................. 925

Studies on Heterologous Antilymphocyte and Antithymocyte Sera. III. Differential Effects of Rabbit Anti-Mouse Sera on Splenic Lymphocytes and Macrophages. Rolf F. Barth, Robert L. Hunter, Joanne Southworth and Alan S. Rabson .................................................. 932

Do Antibody-Forming Cells Circulate in the Blood? Jeffrey M. Roseman, Lee D. Leserman, Frank W. Fitch and Donald A. Rowley .................................................. 1002

The Immunosuppressive Effect of Passively Administered Antibody IgG Fragments. Jean-Charles Cerottini, Patricia J. McConahey and Frank J. Dixon .................. 1008

Graft Versus Host Inhibition. I. Incubated Parental Strain Spleen and Liver Cells Administered to F1 Mice. Mortimer M. Bortin, Alfred A. Rimm and Edward C. Saltzstein .................................................. 1042

Studies of the Chicken Immune Response. III. Cellular and Humoral Antibody Production in the Splenectomized Chicken. Sister Danile Keily and Peter Abramoff .................................................. 1058

Delayed Hypersensitivity. III. Effect of Pre-exposure to Antigen upon Macrophage Migration: Eleanor A. Lipsmeyer and Fred S. Kantor ........................................................................ 1074

Antigen-Induced Cell Proliferation in Cultures from Antibody-Deficient Chickens. H. J. Meuwissen, P. J. Van Alten and R. A. Good .................................................. 1079

Differentiation of Antibody-Forming Cells. II. Effect of Antigen Dose on Proliferation of Precursor Cells and Plaque-Forming Cells. Priscilla A. Campbell and Phyllis Kind ........................................................................ 1084

IMMUNOPATHOLOGY

The Effect of Intravenous Antigen on Circulating Monocytes in Animals with Delayed Hypersensitivity. Takeshi Yoshida, Baruj Benacerraf, Robert T. McCluskey and Pierre Vassalli .................................................. 804

Lymphocyte in Vitro Cytotoxicity: Mechanism of Lymphotoxin-Induced Target Cell Destruction. Terry W. Williams and Gale A. Granger ........................................................................ 911

Wasting Disease Induced with Cortisol Acetate. III. Immunologic Studies. John W. Jutila .................................................. 963

MICROBIAL AND VIRAL IMMUNOLOGY

Extracellular Esterases of Streptococci and the Distribution of Specific Antibodies in Human Sera of Various Age Groups. Aaron H. Stock and Raymond J. Lynn .................................................. 859

Development of Humoral and Cell-Mediated Immunity to Lymphocytic Choriomeningitis Virus in the Mouse. Jørgen Hannover Larsen ........................................................................ 941

Antibodies to Herpesvirus hominis Types 1 and 2 in the Rabbit. André J. Nahmias, Walter R. Dowdle, Joel H. Kramer, Carolyn F. Luce and S. Cleo Mansour .................................................. 956

Physical Characteristics of Rubella Virus. Kendall O. Smith and Thomas E. Hobbs .................................................. 1016

Development of an Attenuated Mumps Virus Vaccine. II. Immune Response of Animals to Vaccination with Inactivated and Live Attenuated Mumps Viruses. Grace Shramek and Friedrich Deinhardt ................................................................. 1093

COMMUNICATIONS

Distribution of Keto-Deoxyoctonic Acid and Sialic Acid in N. meningitidis. Eberhard Hackenthal ................................................................. 1099
Antibody Responses in Children and Elderly Persons following Local or Parenteral Administration of an Inactivated Influenza Virus Vaccine, A/ Hong Kong/68 Variant. Robert V. Fulk, David S. Fedson, Margret A. Huber, James R. Fitzpatrick, Bruce F. Howar and Julius A. Kasel ................................................................. 1102

NUMBER 6, JUNE 1969

IMMUNOCHEMISTRY

DECREASED RATE OF SYNTHESIS OF IMMUNOGLOBULIN (IgG) IN RATS INFECTED WITH MOLONEY LEUKEMIA VIRUS. Susan F. Cure and Natalie E. Cremer ............................................ 1345

IMMUNOCHEMICAL STUDIES ON BLOOD GROUPS. XLIII. THE INTERACTION OF BLOOD GROUP SUBSTANCES FROM VARIOUS SOURCES WITH A PLANT LECTIN, CONCANAVALIN A. Kenneth O. Lloyd, Elvin A. Kabat and Sherman Beychok ........................................... 1354

IMMUNOCHEMICAL STUDIES ON BLOOD GROUPS. XLIV. HUMAN ANTIBODIES AGAINST A NEW DETERMINANT PRESENT IN BLOOD GROUP SUBSTANCES FROM HOG GASTRIC MUCOSA. Carlos Moreno and Elvin A. Kabat .......................................................... 1363

ANTIGEN-ANTIBODY REACTIONS IN AGAR. VII. A MICRO-MODIFICATION OF THE OUDIN AGAR GEL PRECIPITIN METHOD FOR THE DETERMINATION OF ANTIBODY CONCENTRATIONS IN ABSOLUTE WEIGHT UNITS. Alonza R. Hayden .......................... 1394
Antigen-Antibody Reactions in Agar. VIII. Treatment of Antisera and Optical Densities of Precipitin Reactions. Alonza R. Hayden and Elmer L. Becket .................................................. 1398
The Enhancement of Antibody Formation by *Escherichia coli* Lipopolysaccharide and Detoxified Derivatives. Jay R. Schenck, Martha P. Hargie, Mickey S. Brown, Donna S. Ebert, Agnes L. Yoo and Floyd C. McIntire ............................................................ 1411
Immunochemical Studies in Cobrotoxin. C. C. Chang and C. C. Yang .................................................. 1437
Studies on Thyroglobulin Immunity. VI. Thyroid Hormones and Thyroglobulin Specificity. S. S. Margherita and B. N. Premachandra .................................................. 1511

**IMMUNOGENETICS**
Comparison of AA1 Allotypic Specificity Carried by Rabbit IgG and IgM. Mariangela Segre, Diego Segre and F. P. Inman ............................................................ 1368
Availability of Transplantation Alloantigens to Circulating Antibodies: Studies with Alloantibodies of Known Specificity. Isaac Witz, Gustavo Cudkowicz and David Pressman .................................................. 1373
Individual Patterns of Ram Seminal Antigens. Abraham C. Kulangara .................................................. 1445
Immunoglobulin Synthesis by Cultured Mouse Myeloma Cells. Yuziro Namba and Masao Hanaoka .................................................. 1486
The Influence of Heredity and Environment on Human Immunoglobulin Levels. M. Allansmith, B. McClellan and M. Butterworth .................................................. 1504

**CELLULAR IMMUNOLOGY**
Inhibition of *in Vitro* Cell Migration in Experimental Allergic Encephalomyelitis. Helene C. Rauch, R. W. Ferraresi, S. Raffel and Elizabeth Roboz Einstein .................................................. 1431
Inhibition of Macrophage Migration by a Skin-Reactive Polysaccharide from BCG Culture Filtrates. H. P. Godfrey, Harold Baer and S. D. Chaparas .................................................. 1466

**IMMUNOPATHOLOGY**
Antigens of Normal and Atherosclerotic Intima. Hans W. Intorp, Felix Milgrom and Ernest Witebsky .................................................. 1404
The Effect of Antilymphocytic Serum (ALS) on the Reticuloendothelial System (RES) of Mice. Villis R. Marshall and Peter R. Knight .................................................. 1498

**MICROBIAL AND VIRAL IMMUNOLOGY**
The Serum Bactericidal Reaction. III. Antibody and Complement Requirements for Killing a Rough *Escherichia coli*. John N. Goldman, Shaun Ruddy, K. Frank Austen and David S. Feingold .................................................. 1379
Distribution of Poliovirus Antibody in Serum, Nasopharynx and Alimentary Tract following Segmental Immunization of Lower Alimentary Tract with Poliovaccine. Pearay L. Ogra and David T. Karzon .................................................. 1423
Immobilizing Antibodies in Pyelonephritis. George J. Pazin and A. I. Braude .................................................. 1454

**COMMUNICATIONS**
Unusual Conditions for Crystallization of the Fc Fragment of Chicken IgG. Ralph T. Kubo and Albert A. Benedict .................................................. 1523
Reactivity of Human Lymphocytes to Autologous and Homologous Serum. Allen B. Breit and Michael R. Mardiney, Jr. .................................................. 1526
