CONTENTS

NUMBER 1, JANUARY 1969

IMMUNOCHEMISTRY

Role of Fumaropimaric Acid in Guinea Pig Complement Dependent and Non-Complement Dependent Biologic Reactions. I. Inhibition of Forssman, Reversed Passive Arthus, and PCA Reactions by Fumaropimaric Acid. M. Michael Glovsky, Peter A. Ward, Elmer L. Becker and Noah J. Halbrook ................................................................. 1

Protein-Carbohydrate Interaction. XVII. The Effect of Polysaccharide Molecular Weight on the Concanavalin A-Polysaccharide Precipitation Reaction. Lucy L. So and I. J. Goldstein ................................................................. 53

Physicochemical Properties of Human Reaginic Antibodies. VIII. Effect of Reduction and Alkylation on \( \gamma \)E Antibodies. Kimishige Ishizaka and Teruko Ishizaka ......................... 69

Purification of Two Protein Antigens by Dissociation from Thiolated Antibody. Benjamin Wolf and Harriet Izenberg ........................................................................ 123

Hereditary Deficiency of the Second Component of Complement in Man: An Immunochemical Study. Martin R. Klemperer ......................................................................................... 168

Two Antigenic Subtypes of Human Lambda Immunoglobulin Chains. Frank W. Tischendorf and Elliott F. Osserman ........................................................................ 172

Studies on the Chemical Structure and the Antigenic Determinant of Type II Antigen of Group F Streptococci. Marc F. Michel, Jeanette van Voono and Richard M. Krause .................... 215

The Specificity of a Monoclonal Macroglobulin (\( \gamma M \)) Antibody: Reactivity with Primate \( \gamma G \) Immunoglobulins. Marvin J. Stone and Henry Metzger ........................................ 222

Immunoglobulins of the Rhesus Monkey (Macaca mulatta). II. Properties of Rhesus IgG and IgM Antibody in Hemagglutination, Precipitation and Skin Sensitization. James D. Lakin, Roy Patterson and Jacob J. Puzansky .............................................. 253

CELLULAR IMMUNOLOGY

Water Soluble Guinea Pig Transplantation Antigen from Carcinogen-Induced Sarcomas. B. D. Kahan, E. C. Holmes, R. A. Reisfeld and D. L. Morton ......................................................... 28

Delayed Hypersensitivity to Purified Streptococcal M Protein in Guinea Pigs and in Man. Edwin H. Beachey, Humberto Alberti and Gene H. Stollerman ..................................................... 42

Antibody Elicited by Brucella abortus Antigen in Vitro: Prolonged Production by Cell Suspensions. Marvis Richardson .................................................................................. 77

Reversal of Post-Thymectomy Wasting in Mice with Immunocompetent Cells: Influence of Histocompatibility Differences. O. Stutman, E. J. Yunis and R. A. Good ........................................ 87

A Neutrophil Chemotactic Factor from Human C5. Peter A. Ward and Larry J. Newman .................. 93

The Effects of Single Low Antigen Doses on Immunologic Responsiveness in Adult Rabbits. Sumner C. Kraft and Richard M. Rothenberg ......................................................... 100

Mixed Lymphocyte Blastogenesis in Response to Multiple Histocompatibility Antigens. Daniel G. Colley and Charles W. DeWitt .................................................................................. 107

A Cytotoxic Antiglobulin Technique for Assay of Antibodies to Histocompatibility Antigens. Leroy Faiss and Ronald B. Herberman ................................................................. 140

Effect of Antilymphocytic Serum on Rat Lymphocytes. Ruth W. Tyler, N. B. Everett and M. Roy Schwarz .................................................................................. 179

The Effect of Immunologically Induced Lymphopenia on Antibody Formation. John Baum, George Liebermann and Eugene P. Frenkel ......................................................... 187

Immunologic Tolerance to Sulfanilic Acid Assessed by the Hapten-Specific Hemolytic Plaque Technique. Tomáš Šraba and Bruce Merchant ......................................................... 229

IMMUNOPATHOLOGY

CONTENTS

Facilitatory and Inhibitory Effects of Phytohemagglutinin on Experimental Allergic Encephalomyelitis in Guinea Pigs. Cheng-Mei Shaw ................................................ 63

Characterization of a Soluble Cytoplasmic Antigen Reactive with Sera from Patients with Systemic Lupus Erythematosus. Geoffrey Clark, Morris Reichlin and Thomas B. Tomasi, Jr. .... 117

Two Mechanisms of Immunologically-Induced Injury to Rabbit Platelets. Roger M. des Prez and Richard E. Bryant ................................................ 241

MICROBIAL AND VIRAL IMMUNOLOGY

Poliovirus Antibody Response in Serum and Nasal Secretions following Intranasal Inoculation with Inactivated Poliovaccine. Pearay L. Ogra and David T. Karzon ..................... 15

Effect of DEAE-Dextran on Interferon Production and Protective Effect in Mice Treated with the Double-Stranded Polynucleotide Complex Polyinosinic-Polyycytidylic Acid. F. Dianzani, G. Rita, P. Cantagalli and S. Gagnoni .................................................... 24

Immune Response of Cattle to Different Serotype Antigens in Monovalent and Trivalent Foot-and-Mouth Disease Vaccines. J. H. Graves .............................................. 58

Endotoxin-Induced Modification of Plasmodium berghei Infection in Mice. Rob Roy MacGregor, John N. Sheagren and Sheldon M. Wolff .................................................. 131

Induction of Ocular Resistance to Vaccinia Virus by Typhoid Vaccine: Role of Interferon. Jang O. Oh and Chieko Yoneda ................................................................ 145

COMMUNICATIONS

Preparation of Rabbit Immune Serum with Neutralizing Activity against a Simian Cytomegalovirus (SA6). D. V. Ablasli, L. M. Martos, R. V. Gilden and B. Hample 263

Induction of Tolerance in Immunologically Competent Primates. Richard J. Howard, John C. Landon, Suane F. Dougherty, Abner L. Notkins and Stephan E. Mergenhagen 266

The Fixation of Guinea Pig Complement by γ1 and γ2 Immunoglobulins. Abraham G. Osler, Benedito Oliveira, Hyua S. Shin and Ann L. Sandberg .................................... 269

NUMBER 2, FEBRUARY 1969

IMMUNOCHEMISTRY

Studies on Human Antibodies. VII. Acrylamide Gel Electrophoresis of Purified Human Antibodies and Myeloma Proteins, Their Heavy and Light Chains. Marianne M. Dorner, William J. Yount and Elvin A. Kabat ................................................................................. 273

The Relationship of the Hemolytic Activity of Active C1’s to Its TAME Esterase Action: A New Method of Purification and Assay. K. Nagaki and R. M. Stroud 421

Comparisons of Reaginic Antibodies from Three Species. Roy Patterson, Mary Roberts and Jacob J. Pruzansky 466

Studies on Cryoprecipitation. II. Immunochemoical Characterization of a Human Cryoglobulin. Anil Saha, Sheldon Sambury, Kenwyn Smart, Douglas C. Heiner, Austin U. Sargent and Bram Rose 476

Cleavage of the Fe Fragment of IgA. Vincent Yakulis, Nicolas Costea and Paul Heller 488

Quantitative Estimation of Antibodies in Different Immunoglobulin Classes. Giorgio Torrigiani and Ivan M. Roitt 492

Molecular Heterogeneity of Immunoglobulin-M (γM-Globulin). Alan Solomon 496

CELLULAR IMMUNOLOGY

Isoantigens Available to Circulating Antibodies. Isaac Witz, Nathan Kalise and David Pressman 283

The Immunologic Memory of LAF1 Mice following a Single Injection of Sheep Red Cells. Jevrosima Radovich, Helen Hemingsen and David W. Talmage 288
Stimulation of Immunoglobulin and Anamnestic Antibody in Vitro. Diane J. Yashphe and Albert H. Coons .............................................. 306
Biologic Properties of Rat Antibodies. III. Histamine Release Mediated by Two Classes of Antibodies. Herbert C. Morse, III, K. Frank Austen and Kurt J. Bloch ................................................................. 327
Mechanism of Immunologic Tolerance. I. Induction of Tolerance to Bovine γ-Globulin by Injection of Antigen into Intact Organs in Vitro. David W. Scott and Byron H. Waksman ........................................... 347
Ontogeny of Circulating Immunoglobulins in Normal, Bursectomized and Irradiated Chickens. Ronae van Meter, R. A. Good and M. D. Cooper ................. 370
A Refractory Period in Adoptive Immunization following Secondary Stimulation of Mice. Frank J. Twarog and Noel R. Rose ................................................................. 375
Studies on the Induction of Immunologic Unresponsiveness. III. Antigen Form and Mouse Strain Variation. Edward S. Golub and William O. Weigle ................................................................. 389
Inhibition of Capillary Migration by Antigen-Antibody Complexes. Lynn Spitzer, Heinz Huber and H. Hugh Fudenberg ................................................................. 404
The in Vitro Release of Leukocyte Histamine by Staphylococcal Antigens. R. Russell Martin and Arthur White ................................................................. 437
In Vitro Antibody Synthesis by Diffusion Chamber Cultures of Spleen Cells. I. Methods and Effect of 10,000 r on Antibody Synthesis. Douglas C. Vann and T. Makinodan ................................................................. 442
In Vitro Antibody Synthesis by Diffusion Chamber Cultures of Spleen Cells. II. Effect of Increased Levels of Free Antibody. Douglas C. Vann ................................................................. 451
Enhancing Antibody. I. Bioassay for Normal Skin Grafts. Barry Zimmerman and Joseph D. Feldman ................................................................. 507
Chromatographic Studies on Spleen and Lymph Node Extracts with Antibody Activity. Frederick I. Tsuji, David L. Davis and David H. Donald ................................................................. 519

IMMUNOPATHOLOGY
Immunoglobulin and Specific Antibody Synthesis in a Chronic Inflammatory Focus: Antigen-Induced Synovitis. Hugo E. Jasim and Morris Ziff ................................................................. 355
Immunologic Response to Altered Encephalitogenic Protein in Guinea Pigs. Robert H. Swanborg ................................................................. 381

MICROBIAL AND VIRAL IMMUNOLOGY
Humoral Immunity in Rodent Malaria. I. Estimation of Parasitemia by Electronic Particle Counting. Carter L. Diggs and Abraham G. Osler ................................................................. 292
Humoral Immunity in Rodent Malaria. II. Inhibition of Parasitemia by Serum Antibody. Carter L. Diggs and Abraham G. Osler ................................................................. 298
Immunosuppression by Leukemia Viruses. II. Cytokinetics of Appearance of Hemolysin-forming Cells in Infected Mice during the Anamnestic Response to Sheep Erythrocytes. Walter S. Ceglowski and Herman Friedman ................................................................. 338
Correlation between the Neutralizing Activity of Human Serum against Herpes Simplex Virus and a Simian Herpesvirus (SA8). B. Hampar, D. A. Stevens, L. M. Martos, D. V. Ablashi, M. A. K. Burroughs and G. A. Wells ................................................................. 397
Anti-Dengue Immunoglobulins and Serum β1 2a Globulin Levels in Dengue Shock Syndrome. Philip K. Russell, Anong Intavivat and Sopana Kanchanapilant ................................................................. 412
Immunofluorescence Assay for Antigen and Antibody in Lactic Dehydrogenase Virus Infection of Mice. David D. Porter, Helen G. Porter and Beverly B. Dehrake ................................................................. 431

COMMUNICATIONS
Antigenic Relationship between the Equine and the Hong Kong Human Variant of Influenza Type A2 Virus. Julius A. Kasel, Robert V. Fulk and Robert B. Couch ................................................................. 530

NUMBER 3, MARCH 1969

IMMUNOCHEMISTRY
C3 Inactivator of Man. I. Hemolytic Measurement by the Inactivation of Cell-Bound C3. Shaun Ruddy and K. Frank Austen ................................................................. 533
### CONTENTS

Immunochemical Study of Hemoglobin-Free Human Erythrocyte Membranes. Calderon Howe and Lucille T. Lee ................................................. 573

A Glycoprotein That Induces Nephrotoxic Antibody: Its Isolation and Purification from Rat Glomerular Basement Membrane. Seiichi Shibata, Yuzo Miyakawa, Takuji Naruse, Toshihiko Nagasawa and Takehide Takuma ........................................ 593

Use of Insoluble Antibody for Quantitative Determination of Small Amounts of Immunoglobulin. Dean Mann, Harriet Granger and John L. Fahey .............................................................. 618

Studies on IgA. I. Fractionation Procedure for Isolation of IgA from Pooled Normal Human Plasma. Rainer H. Zschocke, Hans G. Griebte, Gerhard L. Bach and Truman O. Anderson 625

Hapten-Specific Insoluble Immunoabsorbents Prepared from Hide Powder (Collagen). Bernard B. Levine and Vera Levytska ..................................................... 647

Occurrence and Properties of Rabbit IgG Antibody. L. S. Rodkey and M. J. Freeman ................................................................. 713

Immunogenicity of a Fragment of Human Serum Albumin. Claude Lapresle and Irwin J. Goldstein .............................................................. 733

### IMMUNOGENETICS

Identification and Genetic Control of Three Rabbit γA Immunoglobulin Allotypes. Thomas P. Conway, Sheldon Dray and Edward A. Lichter ............................................................................. 544

Delineation of Two Antigenic Markers, "Non a" and "Non g" Related to the Genetic Antigens of Human Globulin. Jacob B. Natvig, Henry G. Kunkel and Fenneke G. Joslin ............................................... 611

### CELLULAR IMMUNOLOGY

Effect of Serum on Cells Producing Hemolytic Antibodies in Short-Term Experiments In Vitro. H. Strander .......................................................................................... 602

In Vitro and in Vivo Properties of Antimacrophage Sera. M. S. Hirsch, G. W. Gary, Jr. and F. A. Murphy .................................................................................................................. 656

Development and Function of the Immunoglobulin-Producing System. II. Role of the Bursa in the Development of Humoral Immunological Competence. W. A. Cain, M. D. Cooper, P. J. Van Alten and R. A. Good ........................................................................................................ 671

Characteristics of Some "Natural" Autoantibodies in Rabbits. Noel R. Rose and Constance E. Brinckerhoff ........................................................................................................ 682

Myeloplasmaidal Effect of Polymorphonuclear Leukocyte Extract. Adnan S. Dajani and Elia M. Ayoub .................................................................................................................. 698

Isologons and Homologous Lymphoid Transplants. II. Isolation of Three Stages of Immunoglobulin Production in the Differentiation of the Primary Immune Response to Protein Antigen. Newton E. Hyslop, Jr. and Sanford H. Stone ........................................................................................................ 751

Subtypes of Human ABO Blood Groups and Subtype-Specific Antibodies. O. Mäkelä, E. Ruoslahti and C. Ehnholm .......................................................................................... 763

### MICROBIAL AND VIRAL IMMUNOLOGY

Antibody Responses in Nasal Secretions and Serum of Elderly Persons following Local or Parenteral Administration of Inactivated Influenza Virus Vaccine. Julius A. Kasek, Evan B. Hume, Robert V. Fulk, Yasushl Togo, Margret Huber and Richard B. Hornick .................................................................................................................. 555

Relationship between Viremia and Interferon Production of Japanese Encephalitis Virus. Hinae K. Rokutanda ........................................................................................................ 662
Latex Reagent for Determining IgM Levels in Cord and Newborn Sera. John L. Sever, Edward Shanbrom, Robert Steinmeier, Steven A. Schacher, George McCracken and David A. Fuccillo. 679

The Effect of Induced Isohemagglutinin on the Course of Blood-Induced Plasmodium lophurae Infections in Chickens. L. L. Congdon, J. N. Farmer and R. P. Breitenbach. 688

Neutralizing Antibody Complex of Infectious Bronchitis Virus. M. F. Stinski and C. H. Cunningham. 720

Biologic and Immunologic Characteristics of Cold-Adapted Influenza Virus. H. R. Maassab. 728

Lysozyme and β-Lysin Release Stimulated by Antigen-Antibody Complexes and Bacteria. John G. Tew, W. M. Hess and David M. Donaldson. 743

A Mathematical and Experimental Study of the Kinetics of Neutralization of Bacteriophage φX 174 by Antibodies. William M. Krummel and Jonathan W. Uhr. 772

COMmUNICATIONS

Inhibition of the Mixed Leukocyte Culture Reaction (MLC) by Pre-incubation of the Leukocytes with Sucrose. Harold N. Rode and Julius Gordon. 786

DNA-Binding Assay for Detection of Anti-DNA Antibodies of NZB/NZW F1 Mice. Alfred D. Steinberg, Theodore Fineus and Norman Talal. 788

Lack of Skin-Sensitizing Property of γD Myeloma Protein in Guinea Pigs. Zoltan Ovary. 790

SPECIAL ANNOUNCEMENT

A Reference Preparation for Human Serum Immunoglobulins. D. S. Rowe, S. G. Anderson and J. L. Fahey. 792

NUMBER 4, APRIL 1969

IMMUNOCHEMISTRY

Inhibition of the Lytic Effect of Guinea Pig Complement by Rabbit Complement. Raymond A. Kempf, Irma Gigli and K. Frank Austen. 795

Passive Immune Lysis with Chronic Chloride-Treated Erythrocytes. Philip J. Perucca, W. Page Faulk and H. H. Fudenberg. 812

A Comparative Antigenic Study of γE-Globulin and Myeloma-IgND. Hans Bennich, Kimishige Ishizaka, Teruko Ishizaka and S. Gunnar Johansson. 826

A Comparison of Seven Procedures to Detect the Primary Binding of Antigen by Antibody. Percy Minden, Bascom F. Anthony and Richard S. Farr. 832

Presence of L-L Interchain Disulfide Bonds in Reconstituted γG Molecules. Howard M. Grey. 848

Studies on Brain Antigens. II. Water Soluble Antigenic Proteins of Bovine Brain. Victor B. Hatcher and Catherine F. C. MacPherson. 877

Histamine Release from Human Leukocytes by Anti-γE Antibodies. Teruko Ishizaka, Kimishige Ishizaka, S. Gunnar O. Johansson and Hans Bennich. 884

Some Characteristics of the Antigenic Moiety of Calfskin Collagen. E. Carwile LeRoy. 919

Factors Influencing the Production of Early, Heat Labile, Rabbit Anaphylactic Antibody. Nathan J. Zvaifler and Jennifer O. Robinson. 947

Immunoglobulins of the Rhesus Monkey (Macaca mulatta). III. Structure and Activity of Rhesus IgG and IgM Antibodies Synthesized in the Primary Response and in the Hyperimmune State. James D. Lakin, Roy Patterson and Jacob J. Puzansky. 975

Immune Hemolysis: Serial Studies on the Dissociability of IgG and IgM Anti-Forsman Antibodies Using the C′1a Fixation and Transfer Technique. William D. Linscott. 986

The Effects of Ionic Strength, Temperature, and Antibody Class and Avidity on Fixation and Transfer of the First Component of Complement. William D. Linscott. 993

Structural Analysis of a Slowly Sedimenting Proteolytic Fragment of Human Immunoglobulin M. Anne Goodman and F. P. Inman. 1032

**CELLULAR IMMUNOLOGY**

- An Isotopic Antiglobulin Technique for Measuring Antibodies to Cell-Surface Antigens. F. C. Sparks, C. C. Ting, W. G. Hammond and R. B. Herberman .................................................. 842
- The Immune Response of Mice to Keyhole Limpet Hemocyanin Bound to Macrophages. Emil R. Unanue ........................................ 893
- Use of Thymectomized, Irradiated Rats to Study Immunogenicity of Bovine γ Globulin. R. Michael Williams and Byron H. Waksman .................................................. 925
- Studies on Heterologous Antilymphocyte and Antithymocyte Sera. III. Differential Effects of Rabbit Anti-Mouse Sera on Splenic Lymphocytes and Macrophages. Rolf P. Barth, Robert L. Hunter, Joanne Southworth and Alan S. Rabson ........................................ 932
- Do Antibody-Forming Cells Circulate in the Blood? Jeffrey M. Roseman, Lee D. Leserman, Frank W. Fitch and Donald A. Rowley .................................................. 1002
- The Immunosuppressive Effect of Passively Administered Antibody IgG Fragments. Jean-Charles Cerottini, Patricia J. McConahey and Frank J. Dixon .................................................. 1008
- Graft Versus Host Inhibition. I. Incubated Parental Strain Spleen and Liver Cells Administered to F1 Mice. Mortimer M. Bortin, Alfred A. Rimm and Edward C. Saltzstein .......... 1042
- Studies of the Chicken Immune Response. III. Cellular and Humoral Antibody Production in the Splenectomized Chicken. Sister Danile Keily and Peter Abramoff ........................................ 1058
- Delayed Hypersensitivity. III. Effect of Pre-exposure to Antigen upon Macrophage Migration. Eleanor A. Lipsmeyer and Fred S. Kantor .................................................. 1074
- Antigen-Induced Cell Proliferation in Cultures from Antibody-Deficient Chickens. H. J. Meuwissen, P. J. Van Alten and R. A. Good .................................................. 1079
- Differentiation of Antibody-Forming Cells. II. Effect of Antigen Dose on Proliferation of Precursor Cells and Plaque-Forming Cells. Priscilla A. Campbell and Phyllis Kind .................................................. 1084

**IMMUNOPATHOLOGY**

- The Effect of Intravenous Antigen on Circulating Monocytes in Animals with Delayed Hypersensitivity. Takeshi Yoshida, Baruj Benacerraf, Robert T. McCluskey and Pierre Vassalli .................................................. 804
- Lymphocyte in Vitro Cytotoxicity: Mechanism of Lymphotoxin-Induced Target Cell Destruction. Terry W. Williams and Gale A. Granger .................................................. 911
- Wasting Disease Induced with Cortisol Acetate. III. Immunologic Studies. John W. Jutila .................................................. 963

**MICROBIAL AND VIRAL IMMUNOLOGY**

- Extracellular Esterases of Streptococci and the Distribution of Specific Antibodies in Human Sera of Various Age Groups. Aaron H. Stock and Raymond J. Lynn ........................................ 859
- Development of Humoral and Cell-Mediated Immunity to Lymphocytic Choriomeningitis Virus in the Mouse. Jørgen Hannover Larsen .................................................. 941
- Antibodies to *Herpesvirus hominis* Types 1 and 2 in the Rabbit. André J. Nahmias, Walter R. Dowdle, Joel H. Kramer, Carolyn F. Luce and S. Cleo Mansour .................................................. 956
- Physical Characteristics of Rubella Virus. Kendall O. Smith and Thomas E. Hobbs .................................................. 1016
Development of an Attenuated Mumps Virus Vaccine. II. Immune Response of Animals to Vaccination with Inactivated and Live Attenuated Mumps Viruses. Grace Shramek and Friedrich Deinhardt ................................................................. 1093

COMMUNICATIONS

Distribution of Keto-Deoxyoctonic Acid and Sialic Acid in N. meningitidis. Eberhard Hackenthal ........................................... 1099

Antibody Responses in Children and Elderly Persons following Local or Parenteral Administration of an Inactivated Influenza Virus Vaccine, A/Hong Kong/68 Variant. Robert V. Fulk, David S. Fedson, Margret A. Huber, James R. Fitzpatrick, Bruce F. Howar and Julius A. Kasel ........................................................................ 1102

The Subunit Structure of Influenza Virus Envelope Protein. Edward A. Eckert ............. 1105

NUMBER 5, MAY 1969

IMMUNOCHEMISTRY

Immunochemical Relationships of Certain Streptococcal Group and Type Polysaccharides to Pneumococcal Capsular Antigens. Michael Heidelberger, Jan M. N. Willers and Marc F. Michel ................................................................. 1119

Quantitative Precipitin Analysis of Influenza Virus Host Antigen and of Sulfated Mucopolysaccharides of Chicken Embryonic Allantoic Fluid. Lucille T. Lee, Calderon Howe, Karl Meyer and Haing U. Choi ........................................................................ 1144

Anti-Immunoglobulin Control of Immune Hemolysis. J. A. Romeyn and Stephen Rose ........ 1242

Preparation of Fluorescent Antibody Reagents Monospecific to Light Chains of Human Immunoglobulin. Morinobu Takahashi, Yasuo Yagi and David Pressman ......................... 1268

Induction of Immunity and Immunologic Paralysis in Mice against Polyvinyl Pyrrolidone. Birger Andersson ...................................................... 1309

IMMUNOGENETICS

A New Allotypic Antigen of Rabbit Colostral γA Immunoglobulin. Tohru Masuda, Kagemasa Kuribayashi and Masao Hansoka ...................................................... 1156

Detection of Rabbit Pancreas-Specific Isoantibodies by Bis-Diazotized Benzidine Hemagglutination. Constance E. Brinckerhoff and Noel R. Rose ........................................ 1208

CELLULAR IMMUNOLOGY

Isolation and Characterization of Free λ Chain of Immunoglobulin Produced by an Established Cell Line of Human Myeloma Cell Origin. I. λ Chain in Culture Medium. Y. Matsuoaka, Y. Yagi, G. E. Moore and D. Pressman ........................................................................ 1136

Immune-electroresponsiveness in the Adult Guinea Pig. IV. Induction of Unresponsiveness with Aggregated Serum Proteins. Harold F. Dvorak, Blanche A. Simpson and Robert C. Bast, Jr........................................................................ 1163

Ca++-Dependent Binding of Antigen-19 S Antibody Complexes to Macrophages. Waltraut H. Lay and Victor Nussenzweig ...................................................... 1172

The Response of Long- and Short-Lived Small Lymphocytes of the Rat to Pokeweed Mitogen. Larry Stayner and M. Roy Schwarz ...................................................... 1260

Pattern of Immunoglobulin Production in Individual Cells of Human Hematopoietic Origin in Established Culture. Morinobu Takahashi, Yasuo Yagi, George E. Moore and David Pressman ...................................................... 1274

Coccidioidin Delayed Hypersensitivity: Skin Test and in Vitro Lymphocyte Reactivities. Burton Zweiman, Demosthenes Pappagianis, Howard Maibach and Eugene A. Hildreth .................. 1284
IMMUNOPATHOLOGY
Alterations in Immune Responses by Attenuated Venezuelan Equine Encephalitis Vaccine. II. Pathology and Soluble Antigen Localization in Guinea Pigs. Jim W. Airhart, Gilberto S. Trevino and Charles P. Craig ............................................................. 1228

MICROBIAL AND VIRAL IMMUNOLOGY
Antigenic Relationships among the Coronaviruses of Man and between Human and Animal Coronaviruses. Kenneth McIntosh, Albert Z. Kapikian, Kathleen A. Hardison, Janet W. Hartley and Robert M. Chanock ................................................................... 1109
The Detection of Neutralizing Antibody to Lymphocytic Choriomeningitis Virus in Mice. John Hotchin, Lois Benson and Edward Sikora ........................................ 1128
Discrimination between Two Strains (Types) of Herpes Simplex Virus by Various Modifications of the Neutralization Test. Clayton E. Wheeler, Jr., Robert A. Briggaman and Richard R. Henderson ................................................................................ 1179
Alterations in Immune Responses by Attenuated Venezuelan Equine Encephalitis Vaccine. I. Adjuvant Effect of VEE Virus Infection in Guinea Pigs. Charles P. Craig, Scott L. Reynolds, Jim W. Airhart and Edward V. Staab .................................................................................. 1220
Studies of Immune and Normal Opsonins during Experimental Staphylococcal Infection in Rabbits. D. Scott Nickerson, John A. Kazmierowski, John H. Dossett, Ralph C. Williams, Jr. and Paul G. Quie ........................................................................................................................................ 1235
The Antibody Response of Guinea Pigs to Topical and Intramuscular Administration of Trachoma Antigens. Zichria Zakay-Rones, Reuven Levi, Bathia Maythar and Yechiel Becker ........................................................................................................................................ 1290

COMMUNICATIONS
Complement: Heterogeneity of Binding of the First Component of Complement as a Function of Antibody Concentration. William D. Linscott ........................................................................................................ 1322
Density of BAI Strain A Avian Leukosis Virus-Antibody Complexes Relative to Antigen-Antibody Ratio. Robert B. Fritz and J. W. Beard ........................................................................................................ 1326
Cytophlic Antibody in Heterologous Antilymphocytic Serum: Its Presence, Absorption and Possible Biologic Significance. P. G. Gill ........................................................................................................................................ 1329
