This information is current as of April 20, 2017.
CONTENTS
NUMBER 1, JULY 1969

IMMUNOCHEMISTRY

Development of Human Complement System. Philip Fireman, Dolores A. Zuchowski and Paul M. Taylor ................................................................. 25
Inactivation of Bacteriophage T4, of Poly-D-alanyl Bacteriophage and of Penicillloyl Bacteriophage by Immunospecifically Isolated IgM and IgG Antibodies. Joseph Haimovich and Michael Sela ................................................................. 45
A Simplified Procedure for the Preparation of Immunoglobulin-Class-Specific Antisera. Christopher S. Henney and Kimishige Ishizaka ................................................. 56
Immuno-Precipitates of Some Purified and Unpurified Human Plasma Proteins with Monospecific and Polyvalent Human Plasma Protein Antisera. M. Ceska ................................................................. 100
“Sandwich” Solid Phase Radioimmunoassay for the Quantitative Determination of Human Immunoglobulins. Sydney E. Salmon, Gail Mackey and H. Hugh Fudenberg ............... 129

IMMUNOGENETICS

Genetic Control of the Immune Response in Mice. I. Segregation Data and Localization to the Fifth Linkage Group of a Gene Affecting Antibody Production. David L. Gasser .................. 66
Immunochromy and Genetics of a “New” Allotypic Specificity A214 of Rabbit γG Immunoglobulins: Recombination in Somatic Cells. S. Dubiski ................................................................. 120

CELLULAR IMMUNOLOGY

Genetic Factors in Leucocyte Responses to Endotoxin: Further Studies in Mice. Barnet M. Sultzer ................................................................. 32
Lyososome Stabilization by Leukocyte Granule Membrane Antiserum. Robert H. Persellin ................................................................. 39
Effects of Temperature upon “Naturally Occurring” Blood Group Agglutinins in Fresh Water Catfish. William J. Kuhns, Ross F. Nigrelli and Joseph V. Chuba ................................................................. 62
A Role of Macrophages in the Stimulation of Immune Responses by Adjuvants. Emil R. Unanue, Brigitte A. Askonas and Anthony C. Allison ................................................................. 71
The Effect of Carrageenan on Delayed Hypersensitivity Reactions. Howard J. Schwartz and Sidney Leskowitz ................................................................. 87

IMMUNOPATHOLOGY

Antibody in Nasal Secretions after Intramuscular Injection of Influenza Virus Vaccine in Persons with Chronic Bronchopulmonary Disease. Robert H. Alford ................................................................. 20
Tolerance Induction with Thymus Grafts in Neonatally Thymectomized Mice. O. Stutman, E. J. Yunis and R. A. Good ................................................................. 92
A Graft vs. Host Reaction in a Xenogeneic Combination: The Reaction of Murine Cells in Rats. Wasfy Saleh, Lloyd D. MacLean and Julius Gordon ................................................................. 114

MICROBIAL AND VIRAL IMMUNOLOGY

Delayed Hypersensitivity and Inhibition of Macrophage Spreading: in Vivo and in Vitro Studies of Tuberculin and Streptococcal Hypersensitivities in Guinea Pigs. Dragan Dekaris, Robert M. Fauve and Marcel Raynaud ................................................................. 1
Identification of an Antigen and Specific Antibody in the Sera of Chickens Infected with Plasmodium gallinaceum. A. R. Smith, J. D. Lykins, E. W. Voss and M. Ristic ................................................................. 6
Serologic Activity of Antigen Isolated from the Body Fluid of Ascaris suum. José Oliver-González, Patricia Hurlbrink, Encarnita Conde and Irving G. Kagan ................................................................. 15
The Immunologic Response of the Mouse to Aerosols of an Attenuated Encephalomyocarditis Virus Strain. Catherine M. Prato and Thomas G. Akers ................................................................. 79
A Study of the Neutralization of Rhinoviruses by Means of a Plaque-Reduction Test. Milan Fiala ................................................................. 107
COMMUNICATIONS

“In Vitro” Cell Reactions in Delayed Hypersensitivity. S. B. Salvin and Jane Nishio .......... 138
Specific Antiserum to CIg: Detection of Different Electrophoretic Species of CIg. Kazuyoshi Nagaki and Robert M. Stroud ..................... 141
Identification of IgA in Rat Serum and Secretions. D. R. Nash, J. P. Vaerman, H. Bazin and J. F. Heremans.............................................. 145

NUMBER 2, AUGUST 1969

IMMUNOCHEMISTRY

Antimucopeptide Antibodies and Their Specificity. Mary Rolicka and James T. Park .......... 196
Human IgG and IgA Diphtheria Antitoxins in Serum, Nasal Fluids and Saliva. Richard W. Newcomb, Kimishige Ishizaka and Bonita L. DeVald .......................................................... 215
Immunochemical Studies of the Phytolhagglutinin, Concanavalin A. Donald A. Person and Harold Markowitz ................................................ 225
The Production of Tolerance to Human Erythrocytes in the Rat with Cytosine Arabinoside or Cyclophosphamid. Robert O. Gordon, Madlyn E. Wade and Malcolm S. Mitchell ........ 233
Characterization of Human Precipitating Antibody to Inhaled Antigens. Jordan N. Fink, Thomas Tebo and Joseph J. Barboriak ............................................. 244
Interaction of Concanavalin with Polysaccharides of Histoplasma capsulatum. Harold Markowitz .................................................... 308
Studies on the Antigenicity of Bacterial Ferredoxins. I. The Effect of Modification of Cysteinyl Residues on the Antigenicity of Clostridium perfringens Ferredoxin. Rodney M. Nitz, Barbara Mitchell, Julia Gerwing and John Christensen ......................... 319
Metabolic Studies of a Heavy Chain Disease Protein. Daniel Ein and Thomas A. Waldmann .......... 345

IMMUNOGENETICS

Identification and Genetic Control of Two New Low-Density Lipoprotein Allotypes: Phenogroups at the Lpq Locus. John J. Albers and Sheldon Dray ........................................... 155
Allergic Exclusion and Phenogroup Expression in Individual Molecules of Rabbit Low-Density Lipoprotein Allotypes. John J. Albers and Sheldon Dray .............................................. 163

CELLULAR IMMUNOLOGY

Lymphocyte in Vitro Cytotoxicity: Correlation of Derepression with Release of Lymphotixin from Human Lymphocytes. Terry W. Williams and Gale A. Granger .................................. 170
The Suppressive Effect of Rauscher Leukemia Virus on the Secondary Antibody Response of Spleen Cells Cultured in Cell-Impermeable Diffusion Chambers. Luis Borella .......... 185
Studies on the Mechanisms of Resistance to Phylogenetically Diverse Intracellular Organisms. Joel Ruskin, Jean McIntosh and Jack S. Remington ................................................ 252
The Effect of Dose of Antigen on Protein and DNA Synthesis in Antibody-Forming Cells. Sohei Shinka and Jonathan W. Uhr ................................................................. 300
Leukemia L 1210 Homograft in Swiss Mice: Immunologic, Cellular and Chemotherapeutic Responses. Herbert N. Prince and E. Grunberg .............................................. 324
A Study of the Kinetics of the Anti-Dinitrophenyl Antibody Response at the Cellular Level. H. Francis Havas and Tomáš Hraba ................................................................. 349
Antibody Formation against 2,4-Dinitrophenyl-Hapten at the Cellular Level. Hemolytic Plaque-in-Gel Assay for Lymphoid Cells Producing Anti-2,4-Dinitrophenyl-Hapten Antibody. Hisashi Yamada and Atsuko Yamada ......................................................... 357

IMMUNOPATHOLOGY

Complement (C')-Coated Red Blood Cells following Infection with the Virus of Equine Infectious Anemia. T. C. McGuire, J. B. Henson and D. Burger .......................................................... 293
Studies on Lymphocyte Transformation in Nephrotoxic Serum Nephritis of the Rat. Hermut Warnatz, Friedrich Scheifarth and Friedrich Hagel ............................................... 364

MICROBIAL AND VIRAL IMMUNOLOGY

Cross-Reactions among Group A Streptococci. II. Further Analysis of Antigens Related to Type-Specificity and Protection. Grove G. Wiley and Pauline N. Bruno ................................. 149
Assessment of a Bacterial Adherence Colony (BAC) Method for Enumeration of Antibody-Forming Cells to E. coli Somatic Antigen. Herman Friedman, Jerry Allen and Maurice Landy.... 204
Comparative Immune Response to Amphibian Cytoplasmic Viruses Assayed by the Complement-Fixation and Gel Immunodiffusion Tests. Suzanne Kaminski, H. Fred Clark and David T. Karzon ................................................................................... 260

COMMUNICATIONS

Susceptibility of Chincoteague Ponies to Antigenically Dissimilar Strains of Human Type A2 Influenza Virus. Julius A. Kasel, Robert V. Fulk and Edward W. Harvey .................... 369
Effect of Antimacrophage Serum on Antibody Production and Phagoctysis in Mice. Bertie F. Argyris and Diane H. Plotkin ............................................................. 372
High Efficiency of SAC142e+2e Conversion to S* with EDTA-Treated Rat Serum. Yuro Miyakawa, Teruaki Sekine, Kobikichi Shimada and Kusuya Nishioka ....................... 374
The Use of Affinity Chromatography for the Specific Purification of Antibodies and Antigens. Leon Wofsy and Benjamin Burr ............................................................. 380
Enhancing Antibody. II. Specificity and Heterogeneity. Barry Zimmerman and Joseph D. Feldman .................................................................................. 383

NUMBER 3, SEPTEMBER 1969

IMMUNOCHEMISTRY

The Effect of Carbamylation, Amidination and Benzylation on the Ability of Rabbit γG Antibody to Produce Passive Cutaneous Anaphylaxis in Guinea Pig and Rabbit Skin. Stanley Cohen, Lawrence Feinman and Elmer L. Becker ......................................................... 387
The Latency Requirements and Rate of Evolution of Passive Cutaneous Anaphylactic Reactions Produced by Untreated and Carbamylated Rabbit γG Antibody. Lawrence Feinman, Stanley Cohen and Elmer L. Becker ........................................... 395
Non-Complement-Fixing IgM Antibodies in the Guinea Pig. William D. Linscott and Stephen S. Hansen .................................................................................. 423
The Immunoglobulins of Equine Colostrum and Parotid Fluid. Robert J. Genco, Lewis Yecies and Fred Karush ........................................................................ 437
Immunoglobulin E in the Monkey. Kimishige Ishizaka, Teruko Ishizaka and Tomio Tada ................................. 445
Protein A from Staphylococcus aureus. IX. Complement-Fixing Activity of Protein A-IgG Complexes. J. Sjöquist and G. Stålenheim ..................................................... 467
Complement: Chemical Coupling of a Functionally Active Component to Erythrocytes in the Absence of Antibody. William D. Linscott, W. Page Faulk and Philip J. Perucca .......... 474
Quantitative Studies of the Specificity of Anti-Pneumococcal Antibodies, Types III and VIII. IV. Binding of Labeled Hexasaccharides Derived from S3 by Anti-S3 Antibodies and Their Fab Fragments. Moshe Katz and A. M. Pappenheimer, Jr ......................... 491
Immunologic and Immunochemical Studies on the Gar, Lepisosteus platyrhincus. I. Immune Responses and Characterization of Antibody. Claire M. Bradshaw, L. William Clem and M. Michael Sigel ........................................................................... 496
The Specificity of the Early Immune Response. I. A Comparison of the Specificity of Delayed Hypersensitivity and Humoral Responses following Immunization with Human \( \gamma \)G Globulin. Christopher S. Henney ......................................................... 519

Multi-Compartment Distribution Analysis of Antibrain Radioantibodies in Density Gradients. Eugene D. Day and Sylvester Lassiter ................................................................. 550

Immunoglobulins of the Rhesus Monkey (Macaca mulatta). IV. Characteristics of the Primary and Secondary Responses of the Rhesus Monkey to Heterologous Serum Protein Antigens. James D. Lakin, Roy Patterson and Jacob J. Pruzansky ........................................................................ 577

Immune Mechanisms of Reversed Type Reaginic Hypersensitivity. Kimishige Ishizaka and Teruko Ishizaka ........................................................................ 588

Differentiation of Human IgM Subclasses by the Ability to Interact with a Factor Resembling the First Component of Complement. Malcolm R. Mackenzie, Noel L. Warner, William D. Linscott and H. Hugh Fudenberg ........................................... 607

IMMUNOGENETICS

The Effect of the Amount of Mycobacterial Adjuvants on the Immune Response of Strain 2, Strain 13 and Hartley Strain Guinea Pigs to DNP-PLL and DNP-GL. Ira Green, Baruj Benacerraf and Sanford H. Stone ................................................................. 403

Differences between Populations of Fresh Water Catfish Defined by Blood Group Antigens and Antibodies. William J. Kuhns, Ross F. Nigrelli and Joseph V. Chuba .................................................................. 454

CELLULAR IMMUNOLOGY

Effects of Radiation on the Initial and Anamnestic IgM Hemolysin Responses in Rabbits; Antigen Injection after X-Rays. William H. Taliaferro and Lucy Graves Taliaferro .................................................................. 559

IMMUNOPATHOLOGY

A Neutrophil Chemotactic Factor Derived from C5 upon Interaction of Guinea Pig Serum with Endotoxin. R. Snyderman, H. S. Shin, J. K. Phillips, H. Gewurz and S. E. Mergenhagen ................................................................. 413

Persistence of the Autoimmune Pathogenetic Process in Experimental Autologous Immune Complex Nephritis. Thomas S. Edgington, Sun Lee and Frank J. Dixon .................................................................. 528

Rabbit Autoantibodies to Aorta. Hans W. Intorp and Felix Milgrom .................................................................. 544

Distribution Analysis of Brain-Localrized Radioantibodies after Zonal Ultracentrifugation in a Sucrose Density-Gradient. Eugene D. Day and Lewis C. Rigsbee ................................................................. 556

MICROBIAL AND VIRAL IMMUNOLOGY

Specific Role of Each Human Leukocyte Type in Viral Infections. III. 17D Yellow Fever Virus Replication and Interferon Production in Homogeneous Leukocyte Cultures Treated with Phytohemagglutinin. E. Frederick Wheelock and Robert Edelman .................................................................. 429

Immunosuppression by Leukemia Viruses. III. Adoptive Transfer of Antibody-Forming Cells to Friend Disease Virus-Infected Mice. Walter S. Ceglowski and Herman Friedman .................................................................. 460

Particulate and Soluble Antigens of Rickettsia tsutsugamushi in the Complement Fixation Test. Akira Shishido, Michiko Hikita, Takeshi Sato and Seiya Kohno .................................................................. 480

Mechanism of Bacteriophage T4 Neutralization by Rabbit Immunoglobulin and Its Proteolytic Digestion Fragments. G. W. Stemke .................................................................. 596

COMMUNICATIONS

Production of Anti-Hapten Antibodies by Several Classes of Lower Vertebrates. Gerrie A. Leslie and L. William Clem .................................................................. 613

Ultrastructural Identification of Possible Sites of Antigen Processing in Macrophages. Phillip J. Catanzaro, Richard C. Graham, Jr. and Howard J. Schwartz .................................................................. 618
Insoluble Immunoadsorbents Containing Anti-IgE: Removal of Reaginic Activity and Subsequent Elution. K. Ito, K. Wicher and C. E. Arbesman .......................................... 622

IMMUNOCHEMISTRY

7Sγ1, 7Sγ2 and IgM Immunoglobulins in the Deer Mouse (Peromyscus maniculatus). John E. Coe. 639

Protein-Carbohydrate Interaction. XIX. The Interaction of Concanavalin A with IgM and the Glycoprotein Phytohemagglutinins of the Waxbean and the Soybean. I. J. Goldstein, Lucy L. So, Yvonne Yang and Q. C. Callies ........................ 695

Studies on the Immunochemical Properties of Aggregates and Subunits of Fe of Rabbit γG Globulins. Kenneth Amiraian and Zoltan Ovary ........................................... 716

Immunoenzymology of AMP-Deaminase. Donald Selig and Oscar P. Chilson 725

Effect of 2-Mercaptoethanol on 7S Rabbit Antibodies to Various Homologous and Heterologous Antigens. Constance E. Brinckerhoff, Robert C. Brown and Noel R. Rose ............. 757

IMMUNOGENETICS

Allotype Suppression with Anti-b5 Antiserum in b5b5 Homozygous Rabbits Fostered in Uteri of b5b4 Homozygous Mothers: Compensation by Allotypes at Other Loci. John L. Vice, William L. Hunt and Sheldon Dray ................................................................ 629

Identification and Genetic Control of the f4 and f5 Rabbit γA Immunoglobulin Allotypes. Pheno- groups at the f Locus. Thomas P. Conway, Sheldon Dray and Edward A. Lichter .......... 662

CELLULAR IMMUNOLOGY

Studies on Heterologous Antilymphocyte and Antithymocyte Sera. IV. Further Evidence for a Preferential Effect on Antigen-Sensitive Cells. Rolf F. Barth ........................................ 648

Recruitment and Proliferation of Immunocompetent Cells during the Log Phase of the Primary Antibody Response. Eugene H. Perkins, Toshihiko Sado and T. Makinodan .......... 668

Gamma Globulin Synthesis in Mixed Cultures of Allogeneic Lymphoid Cells. R. V. Petrov and A. A. Mikhailova .............................................................. 679

Ontogenesis of Immune Capability of Murine Bone Marrow Cells and Spleen Cells against Transplantation Antigens. Mortimer M. Bortin, Alfred A. Rimm and Edward C. Saltstein. 683

Enhanced Humoral Immunity in Mice Infected with Attenuated Venezuelan Equine Encephalitis Virus. R. J. Howard, C. P. Craig, G. S. Trevino, S. F. Dougerty and S. E. Mergenhagen . 699
Spontaneous Thyroiditis in the Obese Strain of Chickens. I. Demonstration of Circulating Auto-
antibodies. Ernest Witebsky, Joseph H. Kite, Jr., Georg Wick and Randall K. Cole ........ 708
Immunofluorescence Studies on the Anatomic Distribution of the Soluble Antigen Responsible
for the Production of Nephrotoxic Serum Nephritis. Toshihiko Nagasawa and Seiichi Shibata
Experimental Murine Amyloid. IV. Amyloidosis and Immunoglobulins. James T. Willerson,
Richard Asofsky and Werner F. Barth................................................................. 741
Reaginic Type of Antibody in Mice Stimulated by Extracts of Bordetella pertussis. C. R. Clausen,
J. Munoz and R. K. Bergman ............................................................................. 768
Studies of Cyclophosphamide Suppression of Experimental Allergic Encephalomyelitis in Wistar
Rats. Philip Y. Paterson and Margaret A. Hanson ............................................. 795

MICROBIAL AND VIRAL IMMUNOLOGY
In Vitro Immune Responses of Rabbits with Persistent Adenovirus Type 5 Infection. Rhoda A.
Reddick and Stanley S. Lefkowits ................................................................. 687
Immunosuppression by Antigen-Associated Human Serum Alpha-One Protein. H. Y. Whang,
D. Chun and E. Neter ..................................................................................... 824
Induction of Delayed Hypersensitivity to Influenza and Mumps Viruses in Mice. Stephen M.
Feinstone, Edwin H. Beachey and Michael W. Rytel ....................................... 844
Studies on the Neutralization of Japanese Encephalitis Virus. II. Variations in Reaction Proper-
ties of Virus to Antibody during Replication in PS Cell Cultures. Yoshikatsu Ozaki and
Keiko Kumagai ................................................................................. 850

COMMUNICATIONS
Coproantibodies to Milk: Identification by Radioimmunoelectrophoresis. B. Kletter, S. Freier,
A. M. Davies and I. Gery ................................................................. 857
The Use of Concanavalin A for Distinguishing IgM from IgG Antibody-Producing Cells. Albert
A. Nordin, Humberto Cosenza and Walter Hopkins ........................................ 859
Purification of the First Component of Complement by Zonal Ultracentrifugation. Harvey R.
Colten, Howard E. Bond, Tibor Borsos and Herbert J. Rapp ............................... 862
Chlorphenesin: A New Inhibitor of IgE-Mediated Histamine Release. Lawrence M. Lichtenstein
and N. Franklin Adkinson ............................................................................. 866
Immunologic Cross-Reactivity of Escherichia coli B Envelope Glycoproteins with Some Animal
and Plant Cell Membrane Proteins. Shinichi Okuda and George Weinbaum .......... 869
Myeloma Proteins with Anti-Hapten Antibody Activity: 2,4-Dinitrophenyl Lysine Binding
by the Protein Produced by Mouse Plasmacytoma MOPC-460. Bernard M. Jaffe, Herman N.
Eisen, Ernest S. Simms and Michael Potter ................................................ 872
A Small Molecular Weight Permeability Factor in Guinea Pig Serum: Adsorption to Antigen-
Antibody Aggregates. Henry Z. Movat, Mary P. Treloar and Yuko Takeuchi ......... 875

NUMBER 5, NOVEMBER 1969
IMMUNOCHEMISTRY
Studies on Passive Hemagglutination. I. Titration of “Early” and “Late” Antibodies with
Tanned Red Cells Sensitized with Native or Denatured Bovine Serum Albumin. Gerald
Wolberg, Chi Tan Liu and Frank L. Adler .......................................................... 879
Immunochemical Studies on the Poly-γ-d-Glutamyl Capsule of Bacillus anthracis. VI. The in
Vivo Fate and Distribution in Immunized Rabbits of the Polypeptide in Immunogenic and
Nonimmunogenic Forms. Georges E. Roelants, Laura F. Whitten, Ann Hobson and Joel W.
Goodman ........................................................................................................... 937
Two Anticomplementary Factors in Cobra Venom: Hemolysis of Guinea Pig Erythrocytes by
One of Them. Mark Ballow and Charles G. Cochrane ........................................ 944
Anti-Thymus Cytotoxicity: Identification and Isolation of Rat Thymus-Specific Membrane Anti-
gens and Purification of the Corresponding Antibodies. R. Bachvaroff, F. Galdiero and P.
Grabar ............................................................................................................... 953
Isolation and Characterization of Free λ-Chain of Immunoglobulin Produced by an Established
Cell Line of Human Myeloma Cell Origin. II. Identity of λ-Chains in Cells and in Medium.
Y. Matsuoka, Y. Yagi, G. E. Moore and D. Pressman ........................................ 962
Comparison of Various Avian and Mammalian IgG Immunoglobulins forSalt-Induced Aggregation. Ralph T. Kubo and Albert A. Benedict ............................................. 1022

Distribution of Antigen-Binding Sites on Rabbit IgM Subunits. J. E. Coligan and D. C. Bauer.. 1038

Comparison of the Effects of Divalent Ion Chelating Agents on Complement-Mediated Hemolysis in Rabbit and Human Serum. Samuel R. Marney, Jr. and Roger M. des Prez .............. 1044

Reaginic Antibody against Insulin: Demonstration of Antigenic Distinction between Native and Extracted Insulin. Roy Patterson, Guillermo Lucena, Robert Metz and Mary Roberts ...... 1061

The Antigenic Subunits of Influenza Viruses. II. The Spectrum of Cross Reactions. S. Fazekas de St. Groth .............................................................................. 1107

Inhibitor of Human C3 Associated with Preparations of C3 Dissociated from C3-Zymosan Complex. Livia Blum ......................................................................... 1116

Structural Localization of Isotypic Markers on Mouse Myeloma γG Globulins. G. A. Medgyesi, G. Gorini and G. Doria ................................................................... 1125

Heterogeneity of Mouse Myeloma γG Globulins as Revealed by Enzymatic Proteolysis. G. Gorini, G. A. Medgyesi and G. Doria ................................................................. 1132

IMMUNOGENETICS

Studies on the Polysine Immune Responder Gene: The Rank Order of Immunogenicity of Dinitrophenyl Conjugates of Basic Homopolyamino Acids in Guinea Pigs. Bernard B. Levine.. 931

On Mouse Complement: Genetic Variants. L. T. Rosenberg and D. K. Tachibana ............. 1143

CELLULAR IMMUNOLOGY

Immunosuppression by Antibody: Localization of Site of Action. R. J. W. Ryder and Robert S. Schwartz ................................................................. 970

Assay for the Immunosuppressive Capacity of Antilymphocyte Serum. I. Evidence for Opsonization. William John Martin ................................................................. 979

Assay for the Immunosuppressive Capacity of Antilymphocyte Serum. II. Nature and Specificity of Opsonizing Antibody. William John Martin ................................................................. 990

Assay for the Immunosuppressive Capacity of Antilymphocyte Serum. III. Opsonizing Activity of Anti-Human Lymphocyte Serum. William John Martin ................................................................. 1000

An Immunofluorescence Study of the In Vitro Interaction between Lymphoid Cells and Target Cells. Junius M. Clark and Leon Weiss ................................................................. 1006

In Vitro Studies with “Transfer Factor”: Transfer of the Cell-Migration Inhibition Correlate of Delayed Hypersensitivity in Humans with Cell Lysates from Humans Sensitized to Histoplasmin, Coccidioidin, or PPD. Ronald E. Paque, Peter J. Kniskern, Sheldon Dray and Peter Baram ................................................................. 1014

Evaluation of the Immunosuppressive Properties of Ribonuclease Complexes. Robert C. Davis, Sidney R. Cooperband and John A. Mannick ................................................................. 1029

Surface Antigens on Interspecies Hybrid Cells. Kyoichi Kano, Wanda Baranska, Barbara B. Knowles, Hilary Koprowski and Felix Milgram ................................................................. 1050

Studies of Lymphocyte Culture: Products of Sensitive Lymphocyte-Antigen Interaction. Lynn E. Spitler and H. S. Lawrence ................................................................. 1072

Blastogenesis of Lymphocytes Induced by PPD-Primed X-Irradiated Autologous Lymphocytes. Shinpeki Kasakura ................................................................. 1078

MICROBIAL AND VIRAL IMMUNOLOGY

Immunoglobulin Responses in Serum and Nasal Secretions after Natural Adenovirus Infections. Joseph A. Bellanti, Malcolm S. Artenstein, Brenda L. Brandt, Barbara S. Klutinis and Edward L. Buescher ........................................................................... 891

An Active Interferon Inducer Obtained from Hemophilus influenzae Type B. Erik De Clercq and Thomas C. Merigan ................................................................. 899

The IgM Response of Children to Salmonella typhosa Vaccine. I. Measurements of Anti-Typhoid Concentrations and Their Proportions of Total Serum IgM Globulins. William A. Altemeier, III, Joseph A. Bellanti and Edward L. Buescher ................................................................. 917

The IgM Response of Children to Salmonella typhosa Vaccine. II. Comparison of Amounts of IgM
Specific for the Somatic, Flagellar and Vi Antigens. William A. Altemeier, III, Joseph A. Bellanti and Edward L. Buescher ........................................................ 924
The Toxicity of Meningopneumonitis Organisms (Chlamydia psittaci) at Different Stages of Development. George Christoffersen and G. P. Manire .................................................. 1085
Serologic Classification of Chimpanzee Adenoviruses by Hemagglutination and Hemagglutination Inhibition. William D. Hills and Rosanne Goodman ........................................ 1089
Aerosol Immunization of Humans with Tetanus Toxoid. F. M. Wigley, S. H. Wood and R. H. Waldman ................................................................................. 1096
The Antigenic Subunits of Influenza Viruses. I. The Homologous Antibody Response. S. Fazekas de St. Groth, R. G. Webster and F. M. Davenport ........................................ 1099
COMMUNICATIONS
Further Evidence of the Role of γ1 Guinea Pig Antibodies in Mediating Passive Cutaneous Anaphylaxis (PCA). Victor Nussenzweig, Baruj Benacerraf and Zoltan Ovary .................................................. 1152
Differentiation of Cross-Reacting Simian Cytomegalovirus Strains by Late 19S Rabbit Neutralizing Antibodies. Berge Hampar, Lidia M. Martos, Dharam V. Ablashi, Robert F. Siguenza and Gladys A. Wells ...................................................................... 1155
The Use of Egg Albumin Conjugates for the Purification of Antibody. Halina Szafran, Sam M. Beiser and Barnard F. Erlanger ............................................................ 1157
Erratum ...................................................................................... 1154
NUMBER 6, DECEMBER 1969
IMMUNOCHEMISTRY
Differences in Antigenicity of Human IgG Produced by Three Established Lymphocytoid Cell Lines from a Single Individual. Y. Matsuoka, Y. Yagi, G. E. Moore and D. Pressman .............. 1176
Locally Produced Antibody in Human Gastrointestinal Secretions. George W. Kriebel, Jr., Sumner C. Kraft and Richard M. Rothenberg .................................................. 1268
Reactivity of Polymer (19S) and Monomer (7S) Forms of γM with Anti-γM Serum. Gerald J. Gleich and David A. Loegering ............................................................ 1294
Immunogenicity of Hemocyanins and Their Subunits. Alfred A. Amkraut, Arthur Malley and Donald Begley ............................................................................. 1301
Properties of Purified Mouse Homocytotropic Antibody. Thomas A. McVeigh, Jr. and Edward W. Voss, Jr. .................................................................................. 1349
Structural and Antigenic Relationships between Avian Immunoglobulins. Gerrie A. Leslie and Albert A. Benedict ................................................................. 1356
Different Specificities in Antisera Prepared against Escherichia coli Tryptophan Synthetase a Subunit. Terence M. Murphy and Stanley E. Mills .................................................. 1377
The Reaction of Immunoglobulin-Coated Bentonite and Radioiodinated Antigen as a Basis for Antibody Detection and Antigen Binding. William C. Cheng and David W. Talmage ................. 1385
IMMUNOGENETICS
Identification and Genetic Control of Two Rabbit Immunoglobulin Allotypes at a Second Light Chain Locus, the c Locus. Alice Gilman-Sachs, Rose G. Mage, Glendowlyn O. Young, Cornelius Alexander and Sheldon Dray .................................................. 1159
