## CONTENTS

### NUMBER 1, JANUARY 1970

### IMMUNOCHEMISTRY

The Immunochemistry of Immune Tolerance. II. The Relationship of Chemical Structure to the Induction of Immune Tolerance to Catechols. Harold Baer, Charles R. Dawson, Joseph S. Byck and A. Peter Kurtz .......................................................... 178

Binding Properties of Anti-Dinitrophenylated-Bacitracin A Antibodies Produced in Guinea Pigs. Domenico Mancino, William E. Paul, Baruj Benacerraf, Gregory W. Siskind and Zoltan Ovary ................................................................. 224

The Role of n-Alanine in the Antigenic Specificity of Bacterial Mucopolypeptides. Walter W. Karakawa, Paul H. Maurer, Patricia Walsh and Richard M. Krause ........................................................... 230

Chemical Modification of Human and Rabbit Antistaphylococcal γG Antibodies: Effect of Acetylation, Carboxymethylation and Amidination on Oposonic Activity. R. P. Messner, C. W. Parker and R. C. Williams, Jr ................................................................. 238

### IMMUNOGENETICS

Contribution of the b and c Light Chain Loci to the Composition of Rabbit γG-Immunoglobulins. John L. Vice, William L. Hunt and Sheldon Dray .............................................................. 38

Phylogenetic Insight into Evolution of Mammalian Fc Fragment of γG Globulin Using Staphylococcal Protein. A. Göran Kronvall, Ulysses S. Seal, Joanne Finstad and Ralph C. Williams, Jr ................................................................. 140

### CELLULAR IMMUNOLOGY

Isolation and Characterization of IgA Produced by an Established Human Lymphocytoid Cell Line. Y. Matsunoaka, Y. Yagi, G. E. Moore and D. Pressman .............................................................. 1

Requirement for Cellular Interaction in the Antibody Response to Bacteriophage T4 in Mice. Christopher J. Inselin, Gustavo Cudkowicz and David Pressman ................................................................. 14

Detection of Hemopoietic Allografts by Localization of Radiolabeled Alloantibodies. Isaac Witz, L. Scott Rodkey, Tat K. Choi and Alfred Nisonoff ................................................................. 63

Studies on Rabbit Lymphocytes in Vitro. XII. Augmentation of Anti-allotypic Blast Transformation by a Second Anti-allotypic Serum Directed against the Primary Stimulating Anti-allotypic Serum (Piggy-Back Effect). Stewart Sell, Jennifer A. Lowe and P. G. H. Gell ................................................................. 114

Mode of Action of Adjuvants: Retinol and Other Lysosome-Labiling Agents as Adjuvants. John K. Spitznagel and A. C. Allison ................................................................. 119

The Effect of Antigen Competition on Both the Primary and Secondary Immune Capacity in Mice. M. G. Hanna, Jr. and Leona C. Peters ................................................................. 166

</table>
Synthesis of Secretory IgA in the Rabbit. III. Interaction of Colostral IgA Fragments with T Chain. Alexander R. Lawton, Richard Asofsky and Rose G. Mage .................................................. 397

Immunochemoical Studies of Foot-and-Mouth Disease. VI. Differences in Antigenic Determinant Site Recognition by Guinea Pig 19S and 7S Antibodies. K. M. Cowan .......................................................................................... 423

Transglutaminase Levels during Development of Allergic Orchitis. Johanna M. Lee and Isabelle J. Wajda ........................................................................................................ 448

Antigenic Specificity of γδ Polymers. Michael A. Apicella and James C. Allen ................................................................. 455

Measurement of Antibody against Human IgG by the Neutralization of IgG-Sensitized Herpes Simplex Virus. Charles A. Daniels, Stephan E. Mergenhagen and Abner Louis Notkins .......... 470

A New Serum Factor in Normal Rabbits. V. Induction in Neonatal Rabbits. Marion E. Woolsey and William J. Mandy .................................................................................. 475

CELLULAR IMMUNOLOGY

Evidence for Tolerance to SV40 Tumor Antigen in Hamsters Bearing Para-Adenovirus 12 Tumor Transplants. Robert N. Lausch, Satvir S. Tevethia and Fred Rapp ................................................................. 305

Influence of Thymosin on Cell-Mediated and Humoral Immune Responses in Normal and in Immunologically Deficient Mice. Allan L. Goldstein, Yoshitsugu Asanuma, Jack R. Battista, Mark A. Hardy, Jerome Quint and Abraham White ................................................................. 359

The Measurement of Immunoglobulin Associated with Human Peripheral Lymphocytes. Richard S. Smith, Robert L. Longmire, Robert T. Reid and Richard S. Farr ............................... 367

Studies of Thoracic Duct Lymphocytes of Mice. II. A Quantitative Comparison of the Capacity of Thoracic Duct Lymphocytes and Other Lymphoid Cells to Induce Graft-versus-Host Reactions. Harvey Cantor, Mark A. Mandel and Richard Asofsky ................................................................. 409

Correlation between Ocular Inflammation and Antibody Production. I. Serum Antibody Response following Intravitreal Immunization with Protein Antigens. J. M. Hall and G. R. O'Connor ................................................................. 432

Correlation between Ocular Inflammation and Antibody Production. II. Hemolytic Plaque Formation by Cells of the Uveal Tract. J. M. Hall and G. R. O'Connor ........................................................................ 440

Primary Rejection of Skin Allografts in the Anterior Chamber of the Rabbit Eye. R. M. Franklin and R. A. Prendergast ................................................................................ 463

Immunoglobulin Classes of Antibody-Forming Cells in Mice. II. Class Restriction of Plaque-Forming Cells Demonstrated by Replica Plating. Albert A. Nordin, Humberto Cosenza and Stewart Sell .................................................................................. 495

IMMUNOPATHOLOGY

A Reaginic Type of Antibody Stimulated by Extracts of Bordetella pertussis in Inbred Strains of Mice. C. R. Clausen, J. Munoz and R. K. Bergman ........................................................................... 312

The Capacity of Human Immunoglobulin E to Mediate the Release of Histamine and Slow Reacting Substance of Anaphylaxis (SRS-A) from Monkey Lung. Teruko Ishizaka, Kimishige Ishizaka, Robert P. Orange and K. Frank Austen ............................................................................. 335

Spontaneous Thyroiditis in the Obese Strain of Chickens. V. The Effect of Sublethal Total Body X-irradiation on the Development of the Disease. Georg Wick, Joseph H. Kite, Jr. and Ernest Witebsky .................................................................................. 344

Distribution of γδ-Forming Cells in Lymphoid Tissues of the Human and Monkey. Tomio Tada and Kimishige Ishizaka .................................................................................. 377

MICROBIAL AND VIRAL IMMUNOLOGY

Quantitation of Staphylococcal Protein A: Determination of Equilibrium Constant and Number of Protein A Residues on Bacteria. Göran Kronvall, Paul G. Quie and Ralph C. Williams, Jr. .................................................................................. 273

A Prospective Study of Chronic Herpes Simplex Virus Infection and Recurrent Herpes Labialis in Humans. R. Gordon Douglas, Jr. and Robert B. Couch .................................................. 289

Precipitation and Neutralization of Bacteriophage MS-2 by Rabbit Antibodies. G. F. Rohrmann and R. G. Krueger .................................................................................. 353
CONTENTS

Antibody Formation in Zweegerziekte, a Slow Infection in Sheep. G. F. De Boer ......................... 414
An in Vitro Measure of Cellular Immunity to Fibroma Virus. W. A. F. Tompkins, Cathryn Adams
and W. E. Rawls .......................................................................................... 502

COMMUNICATIONS

Immunosuppressive Potency of Antiserum to Thymus Glands Prepared with Ribosomal Fraction.
H. Nagaya, W. N. McKenzie, Jr., K. H. Kilburn and H. O. Sieker .................................................. 511
Isoelectric Separation of Mouse Immunoglobulins. Robert A. Murgita and Stephen I. Vas........ 514
Release of Fab- and Fe-like Fragments from Human IgM by Reductive Cleavage. William L.
Albritton, Ralph E. Schroenloher and J. Claude Bennett ............................................................... 518
Immunosuppressive Effects of Antilymphocyte Serum in Complement-Deficient Mice:
Evidence that Immune Cytolysis is Not Essential for ALS Activity. Rolf F. Barth and Gary
F. Carroll ......................................................................................................................... 522
Evidence for Conformational Unfolding of Immunoglobulin Heavy Chains in Propionic and Acetic
Acids. Judson C. Harrington and John W. Fenton, II ................................................................. 525
Nonimmunologic Precipitin Lines between Serum and Enteric Contents Giving False-Positive
Evidence of Local Antibody Production. S. C. Kraft, R. M. Rothberg and G. W. Kriebel, Jr... 528
Correlation of Charge Properties of Human Reaginic Antibodies with Charge of the Corresponding
Allergens. Brian J. Underdown and Lawrence Goodfriend ............................................................... 530

NUMBER 3, MARCH 1970

IMMUNOCHEMISTRY

Interaction of Plasma Kallikrein with the CI Inhibitor. Irma Gigli, John W. Mason, Robert W.
Colman and K. Frank Austen ........................................................................................................ 574
Model Systems for the Study of Drug Hypersensitivity. II. Studies on the Acetylation Mechanism
for Aspirin Intolerance. Donald R. Hoffman and Dan H. Campbell ................................................. 582
Studies on Brain Antigens. III. Purification and Characterization of a Water-Soluble Bovine Anti-
gen Specific for Nervous Tissue (a-BASNT). Victor B. Hatcher and Catherine F. C.
MacPherson ................................................................................................................................. 633

IMMUNOGENETICS

Allotype Suppression in a2a2 Homozygous Rabbits Fostered in Uteri of a2-Immunized a2a2 Homozy-
gous Mothers and Injected at Birth with Anti-a2 Antiserum. John L. Vice, Alice Gilman-
Sachs, William L. Hunt and Sheldon Dray .................................................................................... 550
Distribution of Allotypic Specificities A1, A2, A14, and A15 among Immunoglobulin G Molecules. S.
Landucci Tosi, Shinya Inai and Makoto Arata .............................................................................. 728
Palynodal Ig8 Human IgG Immunoglobulin. Ralph Heimer, Jose Martinez and John Abruzzo ...... 738

CELLULAR IMMUNOLOGY

Products of Interaction of Antigen-Sensitized Leukocytes and Antigen: Further Characterization
of the Mitogenic Factor. Lynn E. Spitzer and H. Hugh Fudenberg .................................................. 544
HL-A Antigens from a Continuous Lymphoid Cell Line Derived from a Normal Donor. I. Solu-
bilization and Serologic Characterization. R. A. Reisfeld, M. Pellegrino, B. W. Papermaster
and B. D. Kahan ......................................................................................................................... 550

Immunology of Interferons. I. Immune Response to Protective and Nonprotective Interferons. R. E. Levy-Koenig, M. J. Mundy and K. Paueker ............................................................. 785
Immunology of Interferons. II. Heterospecific Activities of Human Interferons and Their Neutralization by Antibody. R. E. Levy-Koenig, R. R. Golgher and K. Paucker

Measurement of Rubella Antibody by Hemagglutination Inhibition. I. Variables Affecting Rubella Hemagglutination. Harvey Liebhaber

Measurement of Rubella Antibody by Hemagglutination Inhibition. II. Characteristics of an Improved HAI Test Employing a New Method for the Removal of Nonimmunoglobulin HA Inhibitors from Serum. Harvey Liebhaber

The Use of an Immunofluorescence Technique for the Determination of Antibodies to Cytomegalovirus Strains in Human Sera. Wen-Tsuo Chiang, Berttina B. Wentworth and E. Russell Alexander

COMMUNICATIONS

Rapid Detection of Australia Antigen by Counterimmunoelectrophoresis. David J. Gocke and Calderon Howe

Antibodies of Different Specificities in Normal Rabbit Sera. Joseph Haimovich, Rebeca Tarrab, Andre Sulica and Michael Sela

The Effect of Polyninosinic-Polyctydidylic Acid upon Graft-vs-Host Activity in BALB/C Mice. Harvey Cantor, Richard Asofsky and Hilton B. Levy

Anti-Protein Plaque-Forming Cells Detected with High Efficiency by the Use of Red Cells Coupled to Bovine Serum Globulin through Bis-diazo-benzidine. Judith A. Kapp and J. S. Ingraham

NUMBER 5, MAY 1970

IMMUNOCHEMISTRY

A New Immunochemical Assay for the Detection of the First Component of Complement (C1). Harvey R. Colten and Joel S. Spalter

Antigenic Relationships between the First Component (C1) of Human and Guinea Pig Complement. Harvey R. Colten, Tibor Borsos and Herbert J. Rapp

Immunoglobulins of Rat Colostrum. Daniel J. Stechschulte and K. Frank Austen

Reduced Complement Activity in Sera of Patients with Waldenström's Macroglobulinemia. M. Glovsky and H. H. Fudenberg

Quantitative Passive Hemagglutination: Adaptation of the Cell Migration Technique to Measurement of Antibodies to Protein. Howard M. Johnson and James T. Peeler

Immunologic Properties of Glucose Oxidase. Ira Green and John K. Inman

INV Allotypes of Cold Agglutinin Kappa Chains. Aniel G. Cooper and Arthur G. Steinberg

The Nature of the Reaction of Antigen with Lymphocytes from Rabbits Infected with Schistosoma mansoni on the Release of Histamine from Rabbits Platelets. J. F. Barbaro and M. J. Schoenbeckler

Antibodies to Type III and Type VIII Pneumococcal Polysaccharides: Evidence for Restricted Structural Heterogeneity in Hyperimmunized Rabbits. Jack H. Pincus, Jean-Claude Jaton, Kurt J. Bloch and Edgar Haber

Properties of Structurally Restricted Antibody to Type VIII Pneumococcal Polysaccharide. Jack H. Pincus, Jean-Claude Jaton, Kurt J. Bloch and Edgar Haber

Specificity of Antibody Produced in the Bullfrog (Rana catesbeiana). J. E. Coe

Isolation, Chemical and Immunologic Characterization of κ- and λ-Type Light Chains from IgG of Normal Rabbits with b9 Allotype. Alberto Chersi, Rose Mage, Jaroslav Rejněk and Ralph Reisfeld

An Analogue of Guinea Pig CS: In Vitro Generation and Inhibitory Activity. Robert L. Stolfi

Immunoglobulins of the Hamster. I. Antibody Activity in Four Immunoglobulin Classes. John Bienensonstock and Kurt J. Bloch

Immunoglobulins of the Hamster. II. Characterization of the γA and Other Immunoglobulins in Serum and Secretions. John Bienensonstock

Goldfish Immunoglobulins and Antibodies to Bovine Serum Albumin. Gary N. Trump

Relative Concentrations of IgM and IgG Antibodies during the Primary Response. W. M. LeFor and D. C. Bauer

Species Comparison of Antigenic Determinants of the Variable Region of Light Chains of Immunoglobulins. A. Ruffilli and C. Baglioni
CONTENTS

CELLULAR IMMUNOLOGY

Long-Term Skin Allograft Survival Elicited by a Finite Treatment with Antilymphocyte Serum Combined with Cytarabine. R. J. Perper, R. E. Monovich and B. E. Bowersox ........................................... 1063

Cells Involved in the Immune Response. XVIII. Potential Hemolysin-Forming Cells in the Sacculus Rotundus of the Normal Adult Rabbit. Nabil I. Abdou and Maxwell Richter ......................................................... 1087

Impaired Recovery of Plaque-Forming Cells in New Zealand Mice Given Cyclophosphamide. P. J. Staples and N. Talal .................................................................................................................. 1101

Immunosuppressive Effect of the Depletion of Circulating Lymphocytes by Chronic Irradiation of the Rat Spleen. Takeshi Yoshida, Robert L. Hunter and Baruj Benacerraf ........................................... 1111

The Abolition of Tolerance of Skin Homografts in Rats with Isoantiserum. David M. Lubaroff and Willys K. Silver .................................................................................................................. 1236

Studies of Antibody Formation in Xenopus laevis. R. Auerbach and L. N. Ruben .................................................................................................................. 1242

Immunogenicity of Human γ Globulin Bound to Macrophages after Inhibition of RNA Synthesis. A. Cruchaud, J. P. Despont, J. P. Girard and B. Mach .................................................................................................................. 1256

Anti-Pneumococcal Polysaccharide Type III Hemolytic Plaques in Mice: Cellular Response in Immunity and Immunologic Paralysis. Ronald Kerman and Diego Segre .................................................................................................................. 1262

In Vitro Detection of Transplantation Immunity: The Inhibition of Migration of Immune Spleen Cells and Peripheral Blood Leukocytes by Specific Antigen. R. E. Falk, L. Collste and G. Möller .................................................................................................................. 1287

IMMUNOPATHOLOGY

Target Cells of Human Ragweed-Binding Antibodies in Monkey Skin. I. Immunofluorescent Localization of Cellular Binding. Thomas Hubscher, J. Ian Watson and Lawrence Goodfriend .................................................................................................................. 1187

Target Cells of Human Ragweed-Binding Antibodies in Monkey Skin. II. Immunoglobulin Nature of Ragweed-Binding Antibodies with Affinity for Monkey Skin Mast Cells. Thomas Hubscher, J. Ian Watson and Lawrence Goodfriend .................................................................................................................. 1196

MICROBIAL AND VIRAL IMMUNOLOGY

Effect of Antigenic Stimulation on the Specificity of Antibody Produced by Rabbits Immunized with Bacteriophage MS-2. R. G. Krueger .................................................................................................................. 1117

Application of the Paired Radioiodine-Labeled Antibody Technique (PRILAT) to the Detection of Adenovirus 12 Tumor (T) Antigen. M. J. Evans and D. S. Yohn .................................................................................................................. 1132

Selective Effects of Anti-Macrophage Serum, Silica and Anti-Lymphocyte Serum on Pathogenesis of Herpes Virus Infection of Young Adult Mice. B. Zisman, M. S. Hirsch and A. C. Allison .................................................................................................................. 1155

Macrophages and Age-Dependent Resistance to Herpes Simplex Virus in Mice. M. S. Hirsch, B. Zisman and A. C. Allison .................................................................................................................. 1160

The Localized Hemolysis-in-Gel Method Adapted to the Detection of Spleen Cells Releasing Virus-Specific Antibodies. H.-U. Schwenk and F. Lehmann-Grube .................................................................................................................. 1184

COMMUNICATIONS

Effect of Lymphocytosis-Promoting Factor (LPF) on the Appearance of Antibodies in Mice Infected with Influenza Virus. Tatsumi Iwasaki and Tokukichi Nozima .................................................................................................................. 1293

Antigen-Induced Blastogenesis: The Human Cell Determining the Specificity of Response in Vitro. William R. Levis and Jay H. Robbins .................................................................................................................. 1295

Common Antigenic Determinants in Fd Fragments of Guinea Pig γ 1, γ 2 and γ M Immunoglobulins. R. Oriol and R. Binaghi .................................................................................................................. 1300

A Rapid, Quantitative Fluorescence Assay for Cell Damage by Cytotoxic Antibodies. Michael Edidin .................................................................................................................. 1303

An Antigen Density Effect on the Hemolytic Efficiency of Complement. William D. Linscott .................................................................................................................. 1307

The G4 Subclass in IgG Fractions Prepared by Ion-Exchange Chromatography. Frantisek Skvaril and Andreas Morell .................................................................................................................. 1310

Enhancement of the Antibody Response to Type III Pneumococcal Polysaccharide in Mice Treated with Antilymphocyte Serum. Phillip J. Baker, Rolf F. Barth, Philip W. Stashak and Diana F. Amsbaugh .................................................................................................................. 1313

CONTENTS

NUMBER 6, JUNE 1970

IMMUNOCHEMISTRY

Studies on the Specificity and Affinity of α, DNP-Oligolysine Antibody: A Basis for Questioning the Role of Cellbound Antibody in Cellular Recognition of Antigen. Howard A. Levin, Herbert Levine and Stuart F. Schlossman ................................................ 1377
Effect of Physical State and Route of Inoculation of Diphtheria Toxoid on the Formation of Nasal Secretory and Serum Antibodies in Man. William T. Butler, Roger D. Rossen and Reuben D. Wende .................................................................................... 1396
The Effect of Fumaropimarine Acid on Delayed Hypersensitivity and Cutaneous Forssman Reactions in the Guinea Pig. Lawrence Feinman, Stanley Cohen and Elmer L. Becker 1401
A Comparison of PCA Reactive and Hemolytic Rabbit Antibodies to Sheep Red Blood Cells. Noel L. Warner and Zoltan Ovary ............................................................... 1429
Complement Fixation by a Single Molecule of γG Hemolysin. Michael M. Frank and Thelma A. Gaither .............................................................................................................. 1458
Homocytotropic Antibody in Primary Responder and Hyperimmune Rabbits. Thomas J. Kindt and Charles W. Todd .............................................................................................. 1491
Localization of Glycosphingolipids in Human Tissues by Immunofluorescence. Donald M. Marcus and Rossmund Janis ................................................................. 1530

IMMUNOGENETICS

Some Observations on the Phylogeny of Serum Inhibitor of C1 Esterase. Virginia H. Donaldson and Jack Pensky .............................................................................................................. 1388
Alloantibodies Induced by Weaker Histocompatibility Antigens in Rats. G. H. Thoenes, E. White and W. H. Hildemann ................................................................. 1447
Repression of the Synthesis of Immunoglobulins in Newborn Mice by Antibodies Directed against the Variable Region of Light Chains. A. Ruffilli, A. Compere and C. Baglioni ......................................................................................... 1511

CELLULAR IMMUNOLOGY

Effects of Irradiation on Initial and Anamnestic Hemolysin Responses in Rabbits; Antigen Injection before X-Rays. William H. Tilaferro and Lucy Graves Tilaferro ....................... 1364
Transfer with a Plasma Fraction of Delayed Hypersensitivity to PPD in Guinea Pigs. J. M. Dupuy, P. Kalpakagosglou and R. A. Good .............................................................................................. 1384
Electron Microscopic Study of Erythrocyte Receptors with Labeled Antisera to Membrane Components. C. Howe, H. Spiese, F. Minio and K. C. Hsu ................................................................. 1406
Lymphocyte Response in Acute Experimental Renal Failure. Raymond G. Slavin, Joseph F. Kelly and John J. Garrett .............................................................................................. 1424
Dissociation of Antibody Production from Disease Suppression in the Inhibition of Allergic Encephalomyelitis by Myelin Basic Protein. Robert P. Lisak, George A. Falk, Robert G. Heinze, Marian W. Kies and Ellsworth C. Alvord Jr. .............................................................................................. 1435
The Mixed Leukocyte Culture: A Three Component System. Harold N. Rode and Julius Gordon ................................................................. 1453
Immunologic Unresponsiveness following a Single Feeding of Picryl Chloride. Jerome R. Pomeranz .............................................................................................................. 1486
The Effect of X-Irradiation on Delayed Hypersensitivity and Circulating Antibody in the Rat.
Robert T. Bowser, Denise B. Spence and Eurnal D. Exum ........................................... 1497

Transfer of Skin Homograft Immunity with a Plasma Factor. J. M. Dupuy, D. Y. E. Perey and
R. A. Good ........................................................................................................ 1523

IMMUNOPATHOLOGY
Tissue- and Species-Specific Antigens of Normal Human Prostatic Tissue. R. J. Ablin, Paul Bron-
son, Ward A. Soanes and Ernest Witebsky .......................................................... 1329
Antigenic Release of Histamine from Rabbit Leukocytes. Reuben P. Siraganian and Abraham G.
Osler ......................................................................................................................... 1340
The Preparation of Human Kininogen and the Elicitation of Antibody for Use in a Radial Immuno-
Diffusion Assay. Jocelyn Spragg, Edgar Haber and K. Frank Austen .......................... 1348
Transfer of Autoimmune Thyroiditis of the Rat with Lymph Node Cells. Frank J. Twarog and
Noel R. Rose ............................................................................................................ 1467
Observations on the Mechanism of Immune Hemolysis: Importance of Immunoglobulin Class and
and John H. Humphrey ......................................................................................... 1502

MICROBIAL AND VIRAL IMMUNOLOGY
Interferon in Rabbit Brain, Cerebrospinal Fluid and Serum following Administration of Poly-
inosinic-Polycytidylic Acid. Francoise Cathala and Samuel Baron ............................... 1355
Enhancement of Virus Multiplication and Interferon Production by Cortisone in Ocular Herpes-
virus Infection. J. O. Oh ........................................................................................ 1359

COMMUNICATIONS
Comments on the Leucocyte Migration Technique as an In Vitro Method for Demonstrating
Cellular Hypersensitivity in Man. Gunnar Bendixen and Mogens Søborg ...................... 1551
Prevention of Immunologic Deficiency in Pituitary Dwarf Mice by Prolonged Nursing. René J.
Duquesnoy and Robert A. Good ............................................................................... 1553
Concanavalin A: A Reagent for Sensitization of Erythrocytes with Glycoproteins and Polysac-
charides. M. A. Leon and N. M. Young ..................................................................... 1556
An in Vitro Primary Immune Response to 2,4,6-Trinitrophenyl Substituted Erythrocytes: Re-
sponse against Carrier and Hapten. J. Kettman and Richard W. Dutton ...................... 1558
J. M. Stone and Moshe Shifrine ............................................................................... 1562
Comet Plaques: Evidence for Storage of Low Efficiency Hemolysins by Indirect Plaque-Forming
Cells. Bruce Merchant .............................................................................................. 1565
Attempts to Sensitize Mice for PCA Using Pepsin-Digested Mouse Antibody Fragments. Francis
B. Casey, Jr. and Sei Tokuda .................................................................................... 1569
Relationship between Histocompatibility (H-2) Genotype and Immune Responsiveness to Low
Doses of Ovalbumin in the Mouse. Nelson M. Vaz, Eda M. Vaz and Bernard B. Levine ... 1572
