Contents for January

IMMUNOCHEMISTRY

γA Half Molecules: Defective Heavy Chain Mutants in Mouse Myeloma Proteins. J. FREDERIC MUSHINSKI .................................................... 41

The Interaction of Human IgM and Clq. MALCOLM R. MACKENzie, NANCY CRESEY AND MONA HEH ........................................................ 65

Immunochemistry of Capsular Glucans Isolated from Streptococcus bovis. JUDITH A. KANE AND W. W. KARAKAWA .................................................. 103

Bence Jones Proteins and Light Chains of Immunoglobulins. IV. Immunochimical Differentiation among Proteins within Each of the Three Established κ-Chain Classes. ALAN SOLOMON AND CARLA L. MCLAUGHLIN .................................................. 120

Immunoglobulin E-Type Antibodies Induced by Ascaris suum Infections in Guinea Pigs. C. DODSON, D. J. MORSETH AND J. E. NORSAN ......................... 128

Delayed Hypersensitivity to Cathechols. V. Absorption and Distribution of Substances Related to Poison Ivy Extracts and Their Relation to the Induction of Sensitization and Tolerance. H. P. GODFREY, HAROLD BAER AND ROY C. WATKINS .......................................................... 91

Use of 115 or in Studies of Cellular Immunity to Mycobacterium tuberculosis, Brucella melitensis and Poliovirus, Type I. HERTA M. VICKRAY AND SANFORD S. ELBERG.......................................................... 191

Delayed Hypersensitivity to Cathechols. V. Absorption and Distribution of Substances Related to Poison Ivy Extracts and Their Relation to the Induction of Sensitization and Tolerance. H. P. GODFREY, HAROLD BAER AND ROY C. WATKINS .......................................................... 91

Antibody Inhibition of the Immune Response: Experimental Analysis of the Site of Action in Vivo. R. A. EISENBERG AND I. L. WEISSMAN .... 143

Lymphocyte Transformation in Rickettsioses. J. DONALD COONROD AND CHARLES R. SHEPARD .......................................................... 209

Depressed Cellular and Humoral Hemolysin Responses of Rabbits Injected Intraperitoneally with Mineral Oil before Immunization. MARY IDA-JO HUARD AND R. J. SIEBELING .......................... 266

CONTINUED
Con tents Continued

IMMUNOPATHOLOGY

The Production of Hapten-Specific Reaginic Antibodies in the Guinea Pig. Bernard B. Levine, Henry Chang, Jr., and Nelson M. VaZ ................................................................. 29

Rabbit Platelet Injury by Soluble Antigen and Antibody. I. Inhibitory Action of Citrate, TAME and ACTEE. Samuel R. Marney, Jr. and Roger M. Des Prez ................................................................. 74

Rabbit Platelet Injury by Soluble Antigen and Antibody. II. Platelet Aggregation in Heparinized Plasma and Citrated Plasma, Relationship to ADP and Inhibition by Cobra Factor. Samuel R. Marney, Jr. ................................................................. 82

Corneal Hypersensitivity. II. Specific Binding of Antigen in Sensitized Corneas. Theodore W. Sery and Rose Marie Nagy ................................................................. 226

The Significance of the Mast Cell Response to Bee Venom. R. D. Higginsborth and S. Karnella ................................................................. 233

The Inhibitory Effect of Vitamin A on Complement Levels and Tolerance Production. Miguel M. Azar and Robert A. Good ................................................................. 241

MICROBIAL AND VIRAL IMMUNOLOGY

Opsonic Activity of Agammaglobulinemic Human Sera. Ralph C. Williams, Jr. and Paul G. Que ................................................................. 51

The Interferon Refractory State: In Vivo and in Vitro Studies of its Mechanism. Ernest C. Borden and Frederick A. Murphy ................................................................. 134

COMMUNICATIONS

Enhanced Antibody Response in the Offspring of Immunized Rats. Thomas J. Gill, III and Heinz W. Kunz ................................................................. 274

Specificity of Tolerance to Antigens the Immune Response of Which is Controlled by the PLL Gene. Helena Selawry, Ira Green and Baruj Benacerraf ................................................................. 276

Role of the Basophilic Leukocyte in Allograft Rejection. Harold F. Dvorak ................................................................. 279

Two Complement Interaction Sites in Guinea Pig Immunoglobulins. Ann L. Sandberg, Benedito Oliveira and Abraham G. Osler ................................................................. 282

Localization of b Markers, a-Chain and SC of SIgA in Epithelial Cells Lining Lieberkühn Crypts. Jose A. O'Daly, Susan W. Craig and John J. Cebra ................................................................. 286

Mouse Blood Leukocytes: In Vitro Primary and Secondary Responses to Two Synthetic Polypeptides. Marvin L. Tynd and Dolly B. Ness ................................................................. 289

Studies of Antinmuscule Factor in Myasthenia Gravis. II. Reactions of Fragments Produced by Enzymatic Digestion. Dale E. McFarlin and John S. Johnson ................................................................. 292
