Continued
## IMMUNOPATHOLOGY

**The Production of Hapten-Specific Reaginic Antibodies in the Guinea Pig.** Bernard B. Levine, Henry Chang, Jr. and Nelson M. Vaz .......................................................... 29

**Rabbit Platelet Injury by Soluble Antigen and Antibody. I. Inhibitory Action of Citrate, TAME and ACTEE.** Samuel R. Marney, Jr. and Roger M. Des Prez ........................................................................ 74

**Rabbit Platelet Injury by Soluble Antigen and Antibody. II. Platelet Aggregation in Heparinized Plasma and Citrated Plasma, Relationship to ADP and Inhibition by Cobra Factor.** Samuel R. Marney, Jr. ........................................................................................................................................... 82

**Immunofluorescent Localization of Human Immunoglobulin in Tissues from Cardiac Allograft Recipients.** Roger D. Rossen, William T. Butler, Margaret A. Reisberg, David K. Brooks, Robert D. Leachman, John D. Milam, Kamal K. Mittal, John R. Montgomery, James J. Nora and Donald G. Rochelle .......................................................... 171

**Corneal Hypersensitivity. I. Escape Kinetics of Antigen from Sensitized Corneas.** Theodore W. Sery, Rose Marie Nagy and G. Winston Barber .......................................................... 217

**Corneal Hypersensitivity. II. Specific Binding of Antigen in Sensitized Corneas.** Theodore W. Sery and Rose Marie Nagy ......................................................................................................................... 226

**The Significance of the Mast Cell Response to Bee Venom.** R. D. Higginbotham and S. Karnella .......................................................................................................................... 233

**The Inhibitory Effect of Vitamin A on Complement Levels and Tolerance Production.** Miguel M. Azar and Robert A. Good ......................................................................................................................... 241

## MICROBIAL AND VIRAL IMMUNOLOGY

**Opsonic Activity of Agammaglobulinemic Human Sera.** Ralph C. Williams, Jr. and Paul G. Quie ......................................................................................................................... 51

**The Interferon Refractory State: In Vivo and in Vitro Studies of its Mechanism.** Ernest C. Borden and Frederick A. Murphy ......................................................................................................................... 134

## COMMUNICATIONS

**Anti-TNP Antibody Response in Vitro: Augmented Primary Responses of Carrier-Primed Spleen Cells.** David H. Katz, Harry G. Bluestein, Renée J. Rouques and Carl W. Pierce ......................................................................................................................... 271

**Enhanced Antibody Response in the Offspring of Immunized Rats.** Thomas J. Gill, III and Heinz W. Kunz ......................................................................................................................... 274

**Specificity of Tolerance to Antigens the Immune Response of Which is Controlled by the PLL Gene.** Helena Selawry, Ira Green and Baruj Benacerraf ......................................................................................................................... 276

**Role of the Basophilic Leukocyte in Allograft Rejection.** Harold F. Dvorak ......................................................................................................................... 279

**Two Complement Interaction Sites in Guinea Pig Immunoglobulins.** Ann L. Sandberg, Benedito Oliveira and Abraham G. Osler ......................................................................................................................... 282

**Localization of b Markers, α-Chain and SC of IgA in Epithelial Cells Lining Lieberkühn Crypts.** José A. O'Daly, Susan W. Craig and John J. Cebra ......................................................................................................................... 286

**Mouse Blood Leukocytes: In Vitro Primary and Secondary Responses to Two Synthetic Polypeptides.** Marvin L. Tyner and Dolly B. Ness ......................................................................................................................... 289

**Studies of Antimuscle Factor in Myasthenia Gravis. II. Reactions of Fragments Produced by Enzymatic Digestion.** Dale E. McFarlin and John S. Johnson......................................................................................................................... 292
