This information is current as of April 15, 2017.
## IMMUNOCHEMISTRY

**Synthesis of the Second Component of Guinea Pig Complement in Vitro.** Daniel J. Rubin, Tibor Borsos, Herbert J. Rapp, and Harvey R. Colten

**C1q: Rapid Purification Method for Preparation of Monospecific Antisera and for Biochemical Studies.** Kunio Yonematsu and Robert M. Stroud

**Human Secretory Immunoglobulins. V. Occurrence of Secretory Piece in Human Serum.** Per Brandtzaeg

**Properties of the Combining Sites of Rabbit IgM Antibodies.** Tadamitsu Kishimoto and Kaoru Onoue

**The Immune Response of the Pigeon (Columbia livia).** Ralph M. Guttman, Thomas Tebo, John Edwards, Joseph J. Barboriak, and Jordan N. Fink

**Isolation of Rabbit Anti-Rhesus Lymphocyte Antibody Using a Specific Immunoabsorbent.** E. J. Wilson, A. Mulley, M. W. Cook, and B. F. Mackler

**Human Secretory Immunoglobulins. V. Occurrence of Secretory Piece in Human Serum.** Per Brandtzaeg

## IMMUNOGENETICS

**Protein Biosynthesis in the Spleen. I. Effect of Primary Immunization on Microsomal and Ribosomal Function in Vitro.** Helena S. Selawry and Jason L. Stare

**Protein Biosynthesis in the Spleen. II. Effect of Primary Immunization on the Mechanism of Protein Synthesis.** Helena S. Selawry and Jason L. Stare

**Immunoferritin Study of the Distribution of HLA Antigens on Human Blood Cells.** François M. Kourilsky, Danielle Silvestre, Jean Paul Levy, Jean Daussset, Marie Gabrielle Nicolai, and Anna Senik

**Secretory IgA, a Major Immunoglobulin in Most Bovine External Secretions.** Jean-Pierre Mach and Jean-Jacques Pahud

## IMMUNOGENETICS

**Protein Biosynthesis in the Spleen. I. Effect of Primary Immunization on Microsomal and Ribosomal Function in Vitro.** Helena S. Selawry and Jason L. Starr

**Protein Biosynthesis in the Spleen. II. Effect of Primary Immunization on the Mechanism of Protein Synthesis.** Helena S. Selawry and Jason L. Starr

**Immunoferritin Study of the Distribution of HLA Antigens on Human Blood Cells.** François M. Kourilsky, Danielle Silvestre, Jean Paul Levy, Jean Daussset, Marie Gabrielle Nicolai, and Anna Senik

**Observations on a Human Antiglobulin of Intermediate Type.** T. A. Gentle, H. H. Fudenberg, and E. R. Gold

## CELLULAR IMMUNOLOGY

**Development and Distribution of Immunoglobulin-Containing Cells in the Chicken.**

**Enhanced Protein and IgM Antibody Synthesis Following an Early Second Injection of Hemoxyalin into the Rabbit.** James D. Folds and Abram B. Stavitsky

**Studies on the Cellular Basis for Partial Tolerance: Antigen-Specific Suppression of Antigen-Induced Thymidine-2-14C Incorporation in Vitro.** Yves Borel and Stuart Schlossman

*Continued*
The Antigen Receptor in Delayed-Type Hypersensitivity. I. Isolation with an Affinity Label. WILLIAM C. HILL ..................................................... 414
The Antigen Receptor in Delayed-Type Hypersensitivity. II. Passive Sensitization of Guinea Pigs. WILLIAM C. HILL AND BARBARA NISSEN ...................... 421
The Effect of Ellagic Acid on Delayed Hypersensitivity Reactions in Guinea Pigs. HOWARD J. SCHWARTZ AND THEODORE S. ZIMMERMAN ............................... 450
Correlation of Lymphocyte Transformation with the in Vivo Immune Responsiveness of Rabbits. M. A. JEVITZ AND R. D. EKSTEDT ........................................ 494
Passive Transfer of Delayed Hypersensitivity in Guinea Pigs: Role of Conventional Antibody and Antigen. J. M. DUPTY AND R. A. GOOD ....................... 528

IMMUNOPATHOLOGY

Mechanism of Histamine Release from Mast Cells by Cationic Protein (Band 2) from Neutrophil Lysosomes. N. S. RANADIVE AND C. G. COCHRANE ............................ 506

MICROBIAL AND VIRAL IMMUNOLOGY

Immunologic Investigations of Meningococcal Disease. I. Group-Specific Neisseria meningitidis Antigens Present in the Serum of Patients with Fulminant Meningo-coceemia. EARL A. EDWARDS .................................................. 314
Prevention of Death from Endotoxin with Antisera. II. Elimination of the Risk of Anaphylaxis to Endotoxin. KENNETH R. BROWN, HERndon DOUGLAS AND ABRAHAM I. BRAUDE ................................................................ 324
Immunologic Deficiency Associated with Mammary Tumor Virus (MTV) Infection in Mice: Hemagglutinin Response and Allograft Survival. PHYLLIS B. BLAIR, MARGARET L. KRIPE, MARC A. LAPPÉ, ROSE S. BONHAG AND LARRY YOUNG ........ 364
Virus-Specific Immunologic Depression in Mice Following Combined Immunization and Cyclophosphamide-Induced Immunosuppression. LESLIE P. WEINER, GERALD A. COLE AND NEAL NATHANSON ........................................ 427

COMMUNICATIONS

Specific Antibody against the First Component of Guinea Pig Complement. TOMOKA OKUDA AND TAKEHIKO TACHIBANA ........................................ 564
Anti-Antiserum Antibody as a Cause of Double Precipitin Rings in Immunoglobulin Quantitation and Its Relation to Milk Precipitins. ARTHUR J. AMMANN AND RICHARD HONG ....................................................... 567
Cyclophosphamide Inhibition of Experimental Allergic Thyroiditis and Thyroid Antibody Production in Rats. PHILIP Y. PATERSON, DIANE G. DRIBISH AND AUDREY S. BIDDICK .......................................................... 570
A Quantitative Assay for Cell-Bound Antibody Using a Radiolabeled Coombs-Type Antiserum to a γG Myeloma Protein. ARNOLD E. REIF ........................................ 573
DNA Degradation in Mammalian Cells following Complement-Mediated Cytolysis. WILLIAM U. SHIPLEY, ALAN R. BAKER AND HARVEY R. COLTEN ...................... 576
Serologic Classification of Herpes Simplex Viruses. BERGE HAMMAR, KANEATSU MIYAMOTO AND LIDIA M. MARTOS .......................................................... 580
Electron Microscopic Recognition of Surface Antigen by Direct Reaction and Ferritin Capture with Guinea Pig Hybrid Antibody. A. KNÜSEL, TH. BÄCHI, R. GITZELMANN AND J. LINDENMANN .................................................. 583
Modification of Bone Marrow-Induced GVH Disease with Heterologous Antisera to γGlobulin or Whole Serum. MARVIN L. TYAN ........................................ 586
