Highly Potent

Rabbit Anti-(Mouse Lymphocyte) Sera and
Rabbit Anti-(Mouse Thymocyte) Sera

To meet the needs of investigators who require highly active immuno-suppression with low toxicity, this sera is now available. Each lot of anti-(lymphocyte) serum (ALS) and anti-(thymocyte) serum (ATS) is assayed by means of skin allograft survival and the assay results are enclosed with each shipment. A typical assay of Rabbit ATS showed a mean survival time (MST) of 24.2 days, while a typical assay of Rabbit ALS had not reached its MST even 33 days post-allotransplantation. Horse Anti-Mouse Lymphocyte Serum also provides significant immuno-suppression and is assayed in the same manner as Rabbit ALS. A typical assay showed a graft survival of 17.2 days (MST)

INFORMATION FOR CONTRIBUTORS

Manuscripts should be sent to

Dr. Joseph D. Feldman
Department of Experimental Pathology
Scripps Clinic and Research Foundation
La Jolla, California 92037

If and when the manuscript is published, it will become the sole property of the journal and all copyright will be taken out in the name of The Williams & Wilkins Company, and all rights in copyright reserved to The Williams & Wilkins Company.

Authors will be charged $58.00 per page for each page exceeding 6 per article.

Reprints must be ordered in advance. A form showing the cost of reprints, together with an order slip, is sent with the galley proof. No more than 1,000 reprints of any article may be purchased. The invoice for reprints will include any charge for excess pages.

INSTRUCTIONS FOR PREPARATION OF MANUSCRIPT

The original and one carbon copy of the manuscript are required. The text and all other material, e.g., footnotes, acknowledgments, and references, must be typed in double space on only one side of 8½" x 11" paper of good quality.

A short title to be used as a running head should be typed alone on the first page. Type the complete title on the second page, and the authors' names and affiliations on the third page. The format of the Journal must be followed in typing the text and the list of references. All material to be set in a type size different from that of the text, such as tables, case histories, quotations, formulas, legends for figures and illustrations, footnotes, and references must be typed on separate pages. Legends should not be attached to or written on figures or illustrations. The position of tables and figures in the text may be indicated on the page margin.

Manuscripts that do not conform to these specifications may not be accepted, at the Editor's discretion.

Illustrations. Photographs of figures and other illustrative material should be on glossy paper; they must be clearly marked on the reverse with the number, author's name and orientation (top). Graphs should be in black ink on unlined or bluelined paper. If graphs exceed 9" x 12" in size, they must be accompanied by glossy photographic reproductions within that size.

Communications. Short papers may at the author's request be printed in the Communications section of the Journal. These papers must not exceed 3 printed pages in length, including summary, references, tables and figures. If accepted they will appear within 3 months of receipt by the Editor's office. Suitability for publication will be judged on the basis of timeliness, novelty and importance by the usual refereeing procedure. The author must bear the complete cost of publication, at the rate of $58.00 per page.

Electron micrographs and photomicrographs. The reproduction of these illustrative materials can be improved by using 150-screen half tones and a better grade of paper. The additional cost depends on the number and kind of illustrations and may be as high as $120.00 for a single page. The cost per page decreases as the number of pages increases. An estimate can be obtained when the manuscript is submitted for publication.
Marcial-Rojas

Here is the first reference compendium that covers all the major human protozoal and helminthic diseases with clinical correlates. Using 910 magnificent photographs, the contributors give microscopic illustration of tissue response to the many diseases studied. All told, this book gives the pathologist a single source for study and diagnostic verification of these types of diseases, along with a good deal of added information about their carrying agents and treatment prognosis.

One of the world’s leading authorities on tropical diseases, Dr. Marcial-Rojas, prepared 10 chapters of the book. The remaining chapters were written by experts especially qualified to examine the pathology of particular disease strains. For the most part each author is writing about a disease he sees and treats on a daily basis.

Pathology of Protozoal and Helminthic Diseases

THE JOURNAL OF IMMUNOLOGY®

Information for Subscribers

Published monthly, beginning January, 1929. (From the 1916-1925, and in 1928 Volumes I-X inclusive, and Vol. XV published bi-monthly.)

The subscription price is $48.00 per year in U.S.A.; $51.00 elsewhere. Single copies, when available, are $5.00 in U.S.A.; $5.75 elsewhere. The subscriptions of members of the American Association of Immunologists are included in the membership dues and are handled by the Association's Treasurer, Dr. Henry Metager, American Association of Immunologists, 9650 Rockville Pike, Bethesda, Md. 20014. All other subscriptions should be sent to the publishers.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the issue scheduled for publication 60 days after receipt of the order, unless otherwise requested.

Subscriptions should be renewed promptly: To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

Back volumes are available in microfilm from University Microfilm, Ann Arbor, Michigan 48106, and Arcata Microfilm Corp., Spring Valley, New York 10977.
