Contents for November

IMMUNOCHEMISTRY

Reconstitution from Subunits of the Hapten Binding Sites and Idiotypic Determinants of Mouse Anti-Phosphorylcholine Myeloma Proteins. ALAN SHER, EDITH LORD AND MELVIN COHN .................................................... 1226

Purification of the First Component of Human Complement by Afinity Chromatography on Human γ-Globulin Linked to Sepharose. DAVID H. BING ............................................................ 1243

Dual Pathways of Complement Interaction with Guinea Pig Immunoglobulins. ANN L. SANDBERG AND ABRAHAM G. OSLER ........................................................... 1268

Characterization of a Soluble Nuclear Ribonucleoprotein Antigen Reactive with SLE Sera. MARTHA MATTIOLI AND MORRIS REICHLIN .................................................. 1281

Isolation of H-2 Allotagons Solubilized by the Detergent NP-40. BENJAMIN D. SCHWARTZ AND STANLEY G. NATHENSON ........................................ 1363

Isolation of 7S IgM and Kappa Chains from the Surface Membrane of Tissue Culture Cells Derived from a Burkitt Lymphoma. TROND ESKELAND AND EVA KLEIN ............................................ 1368

Cytophilic Binding of Antigen-Conjugated Erythrocytes: A Sensitive Assay. SUSAN G. THRASHEE, NADIA DOBIECZAK AND STANLEY COHEN ......................... 1259

The Reactions of Pepsin and Pepsin-Trypsin Digestion Products of Bovine Serum Albumin with Antiserum from Rabbits Ingesting this Protein. RUEL N. WRIGHT AND RICHARD M. ROTHEBERG ........................................ 1317

Immunoglobulin Classes in Aquatic Mammals. Characterization by Serologic Cross-Reactivity, Molecular Size and Binding of Human Secretory Component. DONALD R. NASH AND JEAN-PIERRE MACH ...................................................... 1401

Immunoglobulin E Antibodies in Guinea Pigs: Characterization of Monomeric and Polymeric Components. COLIN DORSON, JOHN H. ROCKET AND E. J. L. SOULSBY ........................................ 1349

 IMMUNOGENETICS

Inheritance and Strain Distribution of a Rat Immunoglobulin Allotype. GEORGE A. GUTMAN AND IRVING L. WEISSMAN .................................................. 1376

CELLULAR IMMUNOLOGY

Direct Observations on the Effect of "Proliferation Inhibitory Factor" on the Clonal Growth of Target Cells. ALISON M. BADGER, SIDNEY R. COOPERBAND AND JON A. GREEN ........................................................... 1250

Antibody Response in Genetically Thymus-less Nude Mice Injected with Normal Thymus Cells. BERENICE KINDRED ........................................................... 1300

A Factor in Maternal Plasma during Pregnancy that Suppresses the Reactivity of Mixed Leukocyte Culture. SUGIYRO KASAKURA ........................................................... 1296

Studies on Rabbit Lymphocytes in Vitro. XIV. Fractionation of Rabbit Peripheral Blood Lymphocytes by Antibody-Coated Polyacrylamide Beads. STEWART SELL AND TEIKA AN .............................................................. 1302

Effect of Blocking Cell Receptors on An Immune Response Resulting from in Vitro Cooperation between Thymocytes and Thymus-Independent Cells. G. DOHIA, G. AGARROSSI AND S. DI PIETRO .................................................. 1314

Effect of Antigen Variation on Production of Antibody in Canine Tracheal Secretions. PHILLIP LIERMAN, ROY PATTERSON, VERLYN PETRersen, LAWRENCE W. CHARKIN, ROE R. WARDZELL, JR., AND JOHN RICKS .............................................................. 1349

Effect of Age upon Primary Allotagon Recognition by Mouse Spleen Cells. WILLIAM H. ADLER, TOMO TAKIGUCHI AND RICHARD T. SMITH .................................................. 1357

Immunobiology of Human Lymphoid Cell Lines. I. Immunoglobulin Biosynthesis in Cultures from Hypogammaglobulinemias and Paraproteinemias. DANIEL P. SITDES, ALAN S. LEVIN, KAY E. AUSTIN AND H. HUGH FUDENBERG ........................................... 1376
Contents continued

Transformation of Lymphocytes from Animals Sensitized to *Trichinella spiralis*. C. W. Kim, M. P. Jamuar and L. D. Hamilton ................................................. 1382

Bone Marrow-Derived Cells as Target Cells for Polynucleotide Adjuvants. P. A. Campbell and P. Kind ........................................................... 1419

Antibody Production in Normal Children Receiving Penicillin at Birth. Michael J. Feilner, Maria V. Klaus, Rudolf L. Baer and Aaron R. Rauben .......................... 1440

IMMUNOPATHOLOGY

Acute Viral Infection: Tissue Injury Mediated by Anti-Viral Antibody Through a Complement Effector System. Michael B. A. Oldstone and Frank J. Dixon 1274

Induction of Thyroiditis in the Rabbit by Intravenous Injection of Papain-Treated Rabbit Thyroglobulin. Charles L. Anderson and Noel R. Rose ................. 1341

MICROBIAL AND VIRAL IMMUNOLOGY

Herpesvirus Neutralization: The Role of Complement. Craig Wallis and Joseph L. Melnick ................................................................. 1235

Immunosuppression by Leukemia Viruses. VII. Stimulatory Effects of Friend Leukemia Virus on Pre-Existing Antibody-Forming Cells to Sheep Erythrocytes and *Escherichia coli* in Non-Immunized Mice. Shinji Hirano, Herman Friedman and Walter S. Ceplowski ....................................................... 1400

Effect of Selected Lipids and Surfactants on Immunogenicity of Several Bacterial Antigens. Manjul K. Agarwal and E. Neter ........................................... 1448

COMMUNICATIONS

Schistosomal Egg Antigen-Induced Lymphocyte Blastogenesis in Experimental Murine *Schistosoma mansoni* Infection. Daniel G. Colley ................................. 1477

Aleutian Disease of Mink: Detection of Large Quantities of Complement-Fixing Antibody to Viral Antigen. T. C. McGuire, T. B. Crawford, J. B. Henson and J. R. Gorham ................................................................. 1481

Release of Macrophage Migration Inhibitory Factor by Virus-Infected Spleen Cells. David G. Tuberger and Michael B. A. Oldstone .............................. 1483

7S IgM and IgA Influenza Fluorescent Antibodies in Serum. Gordon C. Brown and Theresa P. O'Leary ................................................................. 1486

Inhibition of Lymphocyte Stimulation by Cyclic and Non-Cyclic Nucleotides. Gene Estes, Solomon S. Solomon and Walter L. Norton ................................. 1489

Enhancement of Hemolytic Complement Activity by Treatment of Human Serum with Iodide. Margaret J. Polley ....................................................... 1493

Neoantigenic Expressions Engendered by Plasmin Cleavage of Fibrinogen. Edward P. Flow, Cecil Hougie and Thomas S. Edgington ........................................... 1496

Membrane Immunoglobulins of Lymphocytes in NZB Mice. Nirmala Bhopalam, Vincent J. Yakulis, Nicholas Costea and Paul Heller ................................. 1501

ERRATUM

In “Macrophage-Antigen Interaction: Uptake, Metabolism and Immunogenicity of Foreign Albumin” by Jon R. Schmidtke and Emil R. Unanue in the August 1971 issue of the Journal of Immunology, Volume 107, Number 2, page 336, Figure 3, the description on each side of the graph should read nHSA rather than Δ HSA.
