RESEARCH AREAS REPRESENTED

Pathology

Pathogenesis
Disease Processes
Clinical Laboratory Research
Laboratory Medicine
Experimental Modalities
Pathobiology
Clinical Medicine
Molecular Mechanisms
Metabolic Dysfunction
Environmental Pathology
Geographic Pathology
Demographic Aspects
Public Health
Problems of World Health
Comparative Pathology
Genetic Aspects
Microbial & Parasitic Pathology
Histochernical Techniques
Plant & Other System Pathology
Medical Biology & Microbiology
Tropical Medicine
Virology
Infection
Immunology
Resistance to Disease
Neoplasms and Oncology
Pharmacological Pathology
Computorization and Automation
Artificial Organs
Medical Statistics

Pharmacology

Drug Actions
Pharmacodynamics
Pharmacokinetics
Pharmacogenetics
Molecular Mechanisms
Medicinal Chemistry
Drug Enzymology
Biochemical Pharmacology
Drug Biotransformation
Comparative Pharmacology
Addiction and Drug Abuse
Narcotics
Therapeutics
Toxicology
Experimental Pharmacology
Clinical Pharmacology
New Drug Reporting
Preclinical Evaluations
Synthesis of Drugs
Pharmacognosy
Pharmacology of Non-human and Lower Organisms
Marine Pharmacology
Agricultural Chemicals
Environment & Drugs
Drugs & Behavior
Drug Allergy and Sensitivity
Incompatibility and Polypharmacy
Clinical Pharmacy
Drug Interactions
