IMMUNOCHEMISTRY

Common Structural and Antigenic Properties of Human γM Anti-γ Globulins. EDWARD C. FRANKLIN AND BLAS FRANGIONE .................................................. 1527

The Specificity and Cross-Reactivity of Antisynaptosome Antibodies as Determined by Sequential Adsorption Analysis. DON D. MICKEL, PAUL N. McMillan, STANLEY H. APPEL AND EUGENE D. DAY ........................................... 1599

The Specificity and Cross-Reactivity of Antimyelin Antibodies as Determined by Sequential Adsorption Analysis. PAUL N. McMillan, DON D. Mickey, BERNARD KAUFMAN AND EUGENE D. DAY ........................................ 1611

Immunoglobulins in Intact, Immunized, and Contaminated Axenic Mice: Study of Serum IgA. J. BENVENISTE, G. LESEINATS, C. ADAM AND J.-C. SALOMON .............. 1647

Secret and Secretory IgA in Axenic and Holocenic Mice. JACQUES BENEVENISTE, GENEVIEVE LESPINATS AND JEAN-CLAUDE SALOMON ............................................ 1656

Isolation of the Anticomplementary Protein from Cobra Venom and Its Mode of Action on C3. HANS J. MÜLLER-EBERHARD AND KARL-FRIK FJELLSTRÖM ........................................ 1666

Bence Jones Proteins and Light Chains of Human Globulins. VI. Immunochemical Detection of Interclass Similarities among γ-Chains. CARLA L. McLACHLAIN AND ALAN SOLOMON ......................................................... 1699

The Use of Polyacrylamide Gel as an Immunoadsorbent for Anti-2,4-Dinitrophenyl Antibodies. H. JUDET AND H. FRANCIS HARRIS .................................................................. 1729

Immunogenic Specificity of Bacillus subtilis Phage SP01-DNA. N. A. BRAUDE AND L. A. ZACHARY ........................................................................................................ 1766

IMMUNOGENETICS

Relation of the Human Antibody Response to Flagellin to Gm Genotype. J. VIVIAN WELLS, H. HUGH FUDENBERG AND JAN R. MACKay .................................................. 1505

CELLULAR IMMUNOLOGY

The Importance of θ and Ig Bearing Cells in the Immune Response to Various Antigens. T. TAKAHASHI, J. J. MOND, E. A. CARSWELL AND G. J. THORNECKER .................................................................................. 1520

Quantitation of the Cell-Mediated Immune Response. I. The Number of Cytolytically Active Mouse Lymphoid Cells Induced by Immunization with Allogeneic Mastocytoma Cells. CHRISTOPHER S. HENNEY .................................................................. 1558

Regulation of Antibody Response in Vitro. I. Suppression of Secondary Response by Anti-Immunoglobulin Heavy Chains. TAMITSU KISHIMOTO AND KIMISHIGE ISHIKATA .......................................................................................................... 1567

Role of Basophilic Leukocytes in Cellular Immunity to Vaccinia Virus Infection. HAROLD F. DVORAK AND MARTIN S. HIRSCH .................................................................................. 1576

Cell Surface Associated Gamma Globulins in Lymphocytes. II. The Pluripotentiality of Mouse Spleen Lymphocytes. S.-T. LEE, F. PARASKEVAS AND L. G. ISRAELS. ISOLATION OF ILIG) RECEPTORS ON HUMAN PERIPHERAL LYMPHOCYTES. II. CLASS RESTRICTION OF LIGHT CHAINS. NAHIM I. ARDOU ........................................................................................................ 1637

The Effect of Excision of the Site of Application on the Induction of Delayed Contact Sensitivity. H. P. GODFREY AND HAROLD BAER ............................................................................. 1643

Antigen Binding Cells. II. Effect of Highly Radioactive Antigen on the Immunologic Function of Bone Marrow Cells. E. R. UNANUE ........................................................................ 1663

Regulation of Homocytotropc Antibody Formation in the Rat. VI. Inhibitory Effect of Thymocytes on the Homocytotropic Antibody Response. KO OOKUMURA AND TORU TADA ........................................................................................................ 1682

Antibody against Neoplastic Plasma Cells. II. Suppressive Effect on Antibody-Producing Cells. TAKESHI WATANABE, YASUO YAGI AND DAVID PRESSMAN ............................................................................. 1706

The DNA Synthetic Response of Adoptively Transferred Thymocytes in the Splenies of Lethally Irradiated Mice. I. Effects of Varying Antigen and Thymocyte Doses. RICHARD K. GERSON AND RONALD S. HENCIN .................................................................................. 1723

Suppression of In Vitro Antigen-Induced Lymphocyte Transformation by Cartagennan, A Macrophase-Toxic Agent. W. WAYNE LAKE, DAVID BICE, HOWARD J. SCHWARTZ AND JOHN SALVAGGIO ............................................................................. 1745

Cellular Formation of Vibriolytic Antibody by Mouse Immunocytes: Cytokinetics and Specificity. ROBERT F. McALACK, JAN CERNY AND HERMAN FRIEDMAN ............................................................................. 1752

IMMUNOPATHOLOGY

The Preparation of Human Kinogen. II. Further Characterization of Purified Human Kinogen. JOCelyn SPRAGG AND K. FRANK AUSTEN ............................................................................. 1512

Continued
The Immunologic Release of Constituents from Neutrophil Leukocytes. I. The Role of Antibody and Complement on Nonphagocytosable Surfaces or Phagocytosable Particles. PETER M. HENSON ............................................... 1535

The Immunologic Release of Constituents from Neutrophil Leukocytes. II. Mechanisms of Release During Phagocytosis, and Adherence to Nonphagocytosable Surfaces. PETER M. HENSON ............................................... 1547

Murine Amyloidosis: Immunologic Characterization of Amyloid Fibril Protein. CHAVIVA ISERSKY, DAVID L. PAGE, PEDRO CUATRECASAS, RONALD A. DELELLIS AND GEORGE G. GLENNER .................................................... 1690

Immune Adherence Reactions of Human Erythrocytes Sensitized with Complement in Vitro and in Vivo. LAWRENCE PETZ, H. HUGH HUDFENBERG AND DIANE FINK ...................................................... 1714

The Complement-Fixation Reaction in Equine Infectious Anemia: Demonstration of Inhibition by IgG(T). T. C. MCGUIRE, G. L. VAN HOOSIER, JR., AND J. B. HENSON ............................................................... 1738

MICROBIAL AND VIRAL IMMUNOLOGY

Latent Measles Virus Infection of the Hamster Central Nervous System. DOUGLAS J. WEAR AND FRED RAPP ............................................................... 1593

Complement-Requiring Neutralizing Antibodies in Hyperimmune Sera to Human Cytomegaloviruses. BETTIE J. GRAHAM, YOICHI MINAMISHIMA, GORDON R. DREESMAN, HAROLD G. HAINES AND MATILDA BENYESH-MELNICK ...................................................... 1618

Anthrax Indirect Microhemagglutination Test. THOMAS M. BUCHANAN, JAMES C. FEELLY, PROGY S. HAYES AND PHILIP S. BRACHMAN ...................................................... 1631

Leukemia Virus-Induced Immunosuppression. VIII. Rapid Depression of in Vitro Leukocyte Migration after Infection of Mice with Friend Leukemia Virus. HERMAN FRIEDMAN AND WALTER S. CEGLOWSKI ............................................................... 1673

COMMUNICATIONS

Evolution of Delayed Hypersensitivity Reactions in Man. MICHAEL W. BRANDRISS ...................................................... 1771

Immune Response in Vitro to Salmonella H-Antigens, Not Affected by Anti-Theta Serum. E. DIENER, FRANCES O’CALLAGHAN AND N. KRIFT ...................................................... 1775

Potentiation of Cultured Mouse Thymocyte Responses by Factors Released by Peripheral Leucocytes. I. GERY, R. K. GERSON AND B. H. WARKSMAN ...................................................... 1778

Amino Terminal Sequences of Heavy and Light Chains of Chicken Anti-Dinitrophenyl Antibody. RALPH KUBO, IRWIN Y. ROSENBLUM AND ALBERT A. BENEDICT ...................................................... 1781

A Polypeptide Chain from Leopard Shark 19S Immunoglobulin Analogous to Mammalian J Chain. G. G. B. KLASS, M. S. HALPERN, M. E. KOSHMAN AND J. W. GOODMAN ...................................................... 1785

Nonequivalent Interaction between Immunoglobulin (Ig) Polypeptide Chains. II. Absence of Hybrid Molecule Formation between Ig Classes. BARRY ZIMMERMAN AND HOWARD M. GREY ...................................................... 1788

Lympophoproliferative Cycles in the Thymus Cortex. R. J. BRYANT ...................................................... 1791

Immunoglobulin Receptors on Mouse Mast Cells. II. Mast Cells of Different Strains and Mastocytomas. ZOLTAN Ovary ...................................................... 1795

BIOLICAL STANDARDIZATION

Measurements of Concentrations of Human Serum Immunoglobulins ...................................................... 1798
