THE JOURNAL OF IMMUNOLOGY[®]

OFFICIAL JOURNAL OF THE AMERICAN ASSOCIATION
OF IMMUNOLOGISTS

PUBLISHED MONTHLY BY THE WILLIAMS & WILKINS COMPANY / BALTIMORE, MD. 21202, U.S.A.
COPYRIGHT © 1972 BY THE WILLIAMS & WILKINS CO. / Made in the United States of America

NEW ECONOMICAL SIZE!

LYOPHILIZED, SPECIALLY PROCESSED, STABLE

20 ml Anti-Human IgA	\$80.00
20 ml Anti-Human IgG	\$80.00
20 ml Anti-Human IgM	\$80.00
20 ml Anti-Human Immunoglobulins	\$80.00
(IgA+IgG+IgM)	
20 ml Anti-Human Serum	\$80.00

PROTOCOLS INCLUDED

20 ml FLUORESCHEIN CONJUGATES OF ABOVE \$140.00

ALSO AVAILABLE

OTHER CAPPEL ANTISERUM IN 20 ml ECONOMICAL SIZE

Specialists in Fluorescein, Rhodamine, Ferritin and Peroxidase Conjugations.

PROGRESS IN HEMATOLOGY

Volume VII

Edited by
Elmer B. Brown, M.D.
and
Carl V. Moore, M.D.

432 pp.
illustrated
\$19.75

The most significant recent contributions in hematology are identified, evaluated, and placed in perspective by leading authorities from the United States and abroad.

In addition, there are reviews of newly acquired practical information important in the management of patients and in the operation of a diagnostic laboratory, as well as illumination of new concepts and research from work at the leading edge of hematology.

Of Vol. VI, the *Archives of Internal Medicine* said, "It is mandatory personal library equipment for anyone interested in hematology, and that includes just about every physician."

IMMUNO- PATHOLOGY

Antigen Cell Interaction and
the Control of Antibody Synthesis
6th International
Symposium

Edited by
Peter A. Miescher, M.D.

448 pp.
illustrated
\$26.00

Intensive scientific work and first reports on pioneering research results in the fields of immunology and immunopathology mark the efforts of this symposium, which will be of interest to the specialist and the clinician.

Distinguished contributors focus on the immunopathologic aspects of virus infections, fundamental research on the cellular and molecular mechanisms of antigen synthesis, the antibody deficiency syndrome, and transplant antigens and inflammatory mechanisms.

Of the fifth volume, the *American Journal of Medical Sciences* said, "... authoritative ... enlightening."

TISSUE TYPING TODAY

Edited by
Felix T. Rapaport, M.D. and
Jean Dausset, M.D.

160 pp.
\$14.75

These proceedings from an international symposium on the role of histocompatibility typing in clinical organ transplantation are a comprehensive review of current progress in the field by leading teams around the world.

This new volume also examines the efficacy of current tissue typing procedures as guidelines for the selection of optimally compatible donors.

GRUNE & STRATTON

New York, N.Y. 10003

Infectious Diseases

Medical and Veterinary

Protozoology

By **K. M. G. Adam**, Lecturer in Protozoology, University of Edinburgh; **J. Paul**, Chief Technician, Department of Medical Photography, University of Edinburgh, and **V. Zaman**, Professor of Parasitology, University of Singapore

This book is designed to assist the medical and veterinary student and practitioner to identify the protozoa which cause disease in man and in domestic animals. It is intended to be complementary to the various textbooks available. Experience has shown that diagrams are of limited value in helping students to recognize the various protozoa. The outstanding feature of this book is the comprehensive depiction of the protozoan parasites in color photography.

1971/208 pp./186 figs./\$19.75

Infection in Hospital

A Code of Practice

Edited by **G. L. Gibson**, M.D., M.R.C.Path, Consultant Bacteriologist, York Hospitals

This book brings together the personal experience of a number of people in various branches of medicine, concerned in the control of infection in hospital and in the community. Simple guidance on the treatment and how best to avoid infection arising and spreading is also provided.

1971/101 pp./\$6.75

Tropical Diseases

4th Edition

By **Frederick Wright**, M.A., M.D., F.R.C.P., D.T.M.&H., Senior Lecturer in Diseases of Tropical Climates, University of Edinburgh, and **James P. Baird**, M.D., F.R.C.P., recently Professor of Military Medicine of the Royal Army Medical College

This book has proved a valuable supplement to Sir Stanley Davidson's "Principles and Practice of Medicine". The conditions covered are grouped largely on an aetiological basis, beginning with important protozoal infections not included in the classic text. Considerable progress has been made in tropical medicine since the printing of the third edition and every endeavour has been made to bring the text up to date by appropriate deletions and additions.

THE JOURNAL OF IMMUNOLOGY[®]

INFORMATION FOR CONTRIBUTORS

Manuscripts should be sent to

Dr. Joseph D. Feldman
Department of Experimental Pathology
Scripps Clinic and Research Foundation
La Jolla, California 92037

If and when the manuscript is published, it will become the sole property of the Journal and all copyright will be taken out in the name of The Williams & Wilkins Company, and all rights in copyright reserved to The Williams & Wilkins Company.

Contributions may be short or long; the length should be commensurate with the scientific content. The chief criteria for acceptance are quality, originality and clarity.

INSTRUCTIONS FOR PREPARATION OF MANUSCRIPT

The original and two (2) copies of the manuscript, including references, legends, figures and illustrations, should be submitted. The text and all other material, e.g., footnotes, references, acknowledgments, must be typed in double space on one side of 8½" × 11" paper of good quality. The two (2) copies may be legible carbon, mimeographed or xerox copies.

A short title to be used as a running head should be typed alone on the first page. Type the complete title on the second page, and the authors' names and affiliations on the third page. *The format of the Journal must be followed in typing the text and the list of references.* All material to be set in a type size different from that of the text, such as tables, case histories, quotations, formulas, legends for figures and illustrations, footnotes, and references must be typed on separate pages. Legends should not be attached to or written on figures or illustrations. The position of tables and figures in the text may be indicated on the page margin.

Manuscripts that do not conform to these

specifications may not be accepted, at the Editor's discretion.

Illustrations and Photomicrographs. Photographs of figures and other illustrative material should be on glossy paper; they must be clearly marked on the reverse side with the number, author's name and orientation (top). Graphs should be in black ink on unlined or bluelined paper. If graphs exceed 9" × 12" in size, they must be accompanied by glossy photographic reproductions within that size.

For photomicrographs a better grade of paper may be used at additional cost, up to \$75.00 for a single page. Estimates can be obtained when the manuscript is submitted for publication.

Communications. Short papers, at the author's request, may be printed in the Communications section of the Journal. These papers must not exceed three (3) printed pages in length, including summary, references, tables and figures. The text of a full printed page contains about 800 words. If accepted, their publication will be accelerated, usually within three (3) months of receipt by the Editor's office. For this reason, proofs are not sent to authors, but rather to the office of the Editor. Suitability for publication will be judged on the basis of timeliness, novelty and importance by the usual refereeing procedure. The author must bear the complete cost of publication, at the rate of \$58.00 per page.

Page Charges. Authors will be charged \$58.00 per page for each page exceeding six (6) per article and \$58.00 per page for each page of a Communication.

Reprints. Reprints must be ordered in advance. A form showing the cost of reprints, together with an order slip, is sent with the galley proof. No more than 1,000 reprints of any article may be purchased. The invoice for reprints will include any charge for excess pages.
