IMMUNOCHEMISTRY

Formation of Antibody in Rabbit Spleen Cell Cultures Stimulated with Immuno-
genetic RNA. HARRIET K. MEISS AND MARVIN FISHMAN ........................................... 1172

Hemolytic Efficiencies of Genetic Variants of Human C3. HARVEY R. COLTEN AND CHESTER A. ALPER. .......................................................... 1184

Glycans from Streptococcal Cell Walls: Structural Features of a Diheteroglycan Isolated from the Cell Wall of Streptococcus bovis. JUDITH A. KANE, WALTER W. KARAKAWA AND JOHN H. PAZUR ............................................ 1218

Studies on Human Antibodies. IX. Interaction of 1-(m-Nitrophenyl)-Flavazoles of Isomaltose Oligosaccharides with Purified Antidextrans: Quantitative Hapten-Inhibition and Fluorescence Quenching Studies. VALEE HARISDANGKUL AND ELVIN A. KABAT .......................................................... 1232

A Protein in Normal Nurse Shark Serum Which Reacts Specifically with Fructosans. I. Purification and Immunochimical Characterization. VALEE HARISDANGKUL, ELVIN A. KABAT, ROBERT J. McDoNOUGH AND M. MICHAEL SIGEL ........................................................................................................ 1244

A Protein in Normal Nurse Shark Serum Which Reacts Specifically with Fructosans. II. Physicochemical Studies. VALEE HARISDANGKUL, JUDITH A. KANE, WALTER W. KARAKAWA AND JOHN H. PAZUR ............................................ 1259

Persistence and Characterization of Idiotypes in Pedigreed Rabbits Producing Antibodies of Restricted Heterogeneity to Pneumococcal Polysaccharides. JOHN B. WINFIELD, JACK H. PINCUS AND ROSE G. MAGE .............................................................................. 1278

Induction of Antiidiotype Antibodies Directed to Antibenzamide Antibody in Rabbits Actively Synthesizing High Titers of Antibenzamide Antibody. SUSAN SPRING-STEWART, BRUCE W. BRENT AND ALFRED NISONOFF .............................................................................. 1288

Elicitation of Rabbit Antiidiotype Antibodies by Immunization with the IgG Fraction of Hyperimmune Antiserum. SYLVIA Z. SCHADE AND ALFRED NISONOFF .............................................................................. 1295

The Effects of an Immunoenhancing Bacterial Product on the Adenyl Cyclase Activity of Mouse Spleen Cells. RICHARD WINCHURCH AND PAUL ACTOR .............................................................................. 1305

Specificity of the in Vitro Binding of IgG and Rabbit Serum Albumin (RSA) to Rabbit Yolk Sac Membrane. SHUNRO SONADA AND MAX SCHLAMOWITZ .............................................................................. 1345

Serologic Specificities of Brain Subcellular Organelles. I. Antisera to Synaptosomal Fractions. H. R. HERSHEY, C. COTMAN AND D. A. MATTHEWS .............................................................................. 1362

Association of Synthetic Polypeptides with Ribonucleic Acid of Immunocompetent Tissues. II. Effects of Optical Configuration of Polypeptides—In Vitro and in Vivo. ANTONIUS J. VAN BREDA VRIESMAN, ROBERT D. SMYTH AND PAUL H. MAVRER .............................................................................. 1390

Peptides from the Site of Rabbit Antibody: Anti-Azophenyltrimethylammonium Antibody. YASUSHI TAKEDA, BERNARD FRIEDENSON, OLIVER A. ROHOLT AND DAVID PRESSMAN .............................................................................. 1431

IMMUNOGENETICS AND TRANSPLANTATION

γ M Alloantibody Elicited by First-Set Renal Allografts: In Vivo and In Vitro Studies. PETER J. VAN BREDA VRIESMAN, JOSEPH E. FELDMAN AND JAMES W. BAXTER .............................................................................. 1188

In Vivo Activity of In Vitro Immunized Rabbit Immunoglobulin. I. Tumor Allograft Rejection Mediated by In Vitro Activated Mouse Thymocytes. BARRY T. ROUSE, HENRY WAGNER AND ALAN W. HARRIS ..... 1353

CELLULAR IMMUNOLOGY

Immunoglobulin and θ-Bearing Murine Leukemias and Lymphomas. ETHAN M. SHEVACH, JOHN D. STOBO AND IRA GREEN .............................................................................. 1146

Antibody Islet Forming-Cells: Localized Hemolysis Inhibition in Gel. JOHN S. HEGER AND WALLACE V. EPSTEIN .............................................................................. 1162

The Influence of Calcium, Magnesium and Cyclic Adenosine 3',5'-Monophosphate on the Mixed Lymphocyte Reaction. RICHARD B. WHITNEY AND ROBERT M. SUTHERLAND .............................................................................. 1179

Characterization of a Factor Required for the Differentiation of Myeloid and Lymphoid Cells In Vitro. JAMES WATSON AND JOHN PRICHARD .............................................................................. 1299

Electron Microscopic Localization of Rabbit Immunoglobulin Allotype b4 on Blood Lymphocytes by an Indirect Ferritin Immune Complex Labeling Technique. TEISA AN, KATSURO MIYAI AND STEWARD SELL .............................................................................. 1271

A Receptor for Fc on Mouse B-Lymphocytes. F. PARASKEVAS, BETSY D. LEWIS, K. B. O'ReILLY AND L. G. ISRAELS .............................................................................. 1319

Promethazine-HCl As an Immunosuppressant. JOHN P. GUSDON, JR., VERNON L. MOORE, QUENTIN N. MYRKV AND PAUL A. HOLYFIELD .............................................................................. 1340

Continued
Contents continued

An Improved Primary Response from Mouse Spleen Cells Cultured in Diffusion Chambers. S. A. GOODMAN, M. G. CHEN AND T. MAKINODAN ........................................................................ 1387

Delayed Hypersensitivity to Polysaccharides from Nocardia. L. ORTIZ-ORTIZ, L. F. BOJALIL AND M. F. CONTRERAS .......................................................... 1409

Specificity and Nature of the Antigen-Combining Sites on Fetal and Mature Thymus Lymphocytes. JOHN M. DWYER, NOEL L. WARNER AND IAN R. MACKAY .... 1439

Antibody Cytophilic for Lymphocytes. F. MODABBER AND A. H. COONS.. 1447

IMMUNOPATHOLOGY

Biologic Role of Complement Products: Complement-Derived Leukotactic Activity Extractable from Lesions of Immunologic Vasculitis. PETER A. WARD AND JEFFREY H. HILL .............................................................................................. 1137

Production of Chemotactic Activity by Guinea Pig Immunoglobulins following Activation of the C3 Complement Shunt Pathway. A. L. SANDBERO, R. SNYDERMAN, M. M. FRANK AND A. G. OSLER ................................................................. 1227

Further Purification of Perchlorate-Soluble Antigens from Human Colon carcinoma. MICHAEL D. TURNER, TELBA A. OLIVARES, LEE HARWELL AND MARTIN S. KLEINMAN .............................................................................. 1328

Incidence of Delayed Mortality (Secondary Disease) in Allogeneic Radiation Chimeras Receiving Bone Marrow from Aged Mice. M. G. CHEN, G. B. PRICE AND T. MAKINODAN ........................................................................... 1370

Immunoglobulin-Containing Cells in Lungs of Hamsters Infected with Mycoplasma pneumoniae. WALLACE A. CLYDE, JR., AND JOHN BIENENSTOCK .................................................................................. 1400

The Effect of Complement Depletion on Neutrophil Migration in Acute Immunologic Arthritis. CLAude V. DeSHAZO, MAUREEN T. McGRADE, PETER M. HENSON AND CHARLES G. COCHRANE.................. 1414

MICROBIAL AND VIRAL IMMUNOLOGY

An Electron Microscopic Study of the FTA-ABS “Bending” Phenomenon with Lupus Erythematosus Sera, Using Ferritin-Conjugated Anti-Human IgG. PHYLLIS L. STROBEL AND STEPHEN J. KRAUS .................................................................................. 1152

Characterization of the Surface Antigens of Staphylococcus aureus, Strain K-93M. WALTER W. KARAKAWA AND JUDITH H. KANE .................................................................................. 1199

Effects of Pyran Copolymer on Oncogenic Virus Infections in Immunosuppressed Hosts. MARTIN S. HIRSCH, PAUL H. BLACK, MARY L. WOOD AND ANTHONY P. MONACO .............................................................................. 1312

COMMUNICATIONS

Enhancing Effect of Bacterial Endotoxins on Bone Marrow Cells in the Immune Response to SRBC. J. MIRIAM JONES AND PHYLLIS D. KInd .................................................................................. 1453

Tissue Localization of Two Populations of Human Lymphocytes Distinguished by Membrane Receptors. NELSON P. A. SILVEIRA, NELSON F. MENDES AND MARINA E. A. TOLNAI .............................................................................. 1456

Dichotomy and Improved Specificity of Immunosuppressive Effect of Anti-Thymocyte Globulin. K. F. JUDD, C. J. BRYANT AND J. J. TRENTIN .............................................................................. 1461

Changes of γ Globulin-Carrying Cells in NZB Mice before Autoimmune Disease. B. WEINERMAN AND F. PARASKEVAS .............................................................................. 1465

Synthesis of a Photo-Activated Menadione (VIT K3) Affinity Label and Its Reaction with a Menadione-Binding Myeloma Protein. ROBERT W. ROSENSTEIN AND FRANK F. RICHARDS .............................................................................. 1467

Antibody Response to Escherichia coli Lipopolysaccharide and Type III Pneumococcal Polysaccharide by Congenitally Thymusless (Nude) Mice. JUDITH K. MANNING, NORMAN D. REED AND JOHN W. JUTILA .............................................................................. 1470

ERRATUM

In footnote c of the same table, “anti-azobenzoate” should read “anti-streptococcal carbohydrate.”
