THE JOURNAL OF IMMUNOLOGY®

Contents for May

IMMUNOCHEMISTRY

Formation of Antibody in Rabbit Spleen Cell Cultures Stimulated with Immunoegenic RNA. HARRIET K. MEISS AND MARVIN FISMAN .......................................................... 1172

Hemolytic Efficiencies of Genetic Variants of Human C3. HARVEY R. COLTEN AND CHESTER A. ALPER .......................................................................................... 1184

Glycans from Streptococcal Cell Walls: Structural Features of a Diheteroglycan Isolated from the Cell Wall of Streptococcus bovis. JUDITH A. KANE, WALTER W. KARAKAWA AND JOHN H. PAZUR ........................................... 1218

Studies on Human Antibodies. IX. Interaction of 1-(m-Nitrophenyl)-Flavazoles of Isomaltose Oligosaccharides with Purified Antidextrins: Quantitative Hapten-Inhibition and Fluorescence Quenching Studies. VALEE HARISDANGKUL AND ELVIN A. KABAT ........................................................................... 1232

A Protein in Normal Nurse Shark Serum Which Reacts Specifically with Fructosans. I. Purification and Immunoochemical Characterization. VALEE HARISDANGKUL, ELVIN A. KABAT, ROBERT J. McDoNoUOH AND M. MICHAEL SIGEL ............................................. 1244

A Protein in Normal Nurse Shark Serum Which Reacts Specifically with Fructosans. II. Physicochemical Studies. VALEE HARISDANGKUL, W. KABAN, ROBERT J. McDoNoUOH AND M. MICHAEL SIGEL ........................................................................ 1259

Persistence and Characterization of Idiotypes in Pedigreed Rabbits Producing Antibodies of Restricted Heterogeneity to Pneumococcal Polysaccharides. JOHN B. WINFIELD, JACK H. PINSCH AND ROSE G. MAGE .............................................................................. 1278

Induction of Antiidiotypic Antibodies Directed to Antibenzoate Antibody in Rabbits Actively Synthesizing High Titters of Antibenzoate Antibody. SUSAN SPRING-STEWART, BRUCE W. BRENT AND ALFRED NISONOFF ............................................... 1288

Elicitation of Rabbit Antiidiotypic Antibodies by Immunization with the IgG Fraction of Hyperimmune Antiserum. SYLVIA Z. SCHADE AND ALFRED NISONOFF .............................................................................. 1295

The Effects of an Immunoenhancing Bacterial Product on the Adenyl Cyclase Activity of Mouse Spleen Cells. RICHARD WINECHURG AND PAUL ACTOR ........................................................................ 1305

Specificity of the in Vitro Binding of IgG and Rabbit Serum Albumin (RSA) to Rabbit Yolk Sac Membrane. SHUNRO SONADA AND MAX SCHLAMOWITZ ........................................................................ 1345

Serologic Specificities of Brain Subcellular Organelles. I. Antiserum to Synaptosomal Fractions. H. R. HERSCMAN, C. COTMAN AND D. A. MATTHEWS ........................................................................ 1362

Association of Synthetic Polypeptides with Ribonucleic Acid of Immunocompetent Tissues. II. Effect of Optical Configuration of Polypeptides—in Vitro and in Vivo. VALEE HARISDANGKUL, ROBERT D. SMYTH AND PAUL H. MAVRER ............................................................................. 1420

Peptides from the Site of Rabbit Antibody: Anti-Azophenyltrimethylammonium Antibody. YASUSHI TAKEDA, BERNARD FRIEDENSON, OLIVER A. ROHOLT AND DAVID PRESSMAN ............................................................................. 1431

IMMUNOGENETICS AND TRANSPLANTATION

γ M Alleloantibody Elicited by First-Set Renal Alllografts: In Vivo and in Vitro Studies. PETER J. C. VAN BREDA VRIESMAN AND JOSEPH D. FELDMAN .................................................. 1188

In Vivo Activity of In Vitro Immunized Rabbit Immunoglobulin: Allogeneic Tumor Allograft Rejection Mediated by In Vivo Activated Mouse Thymocytes. BARRY T. ROUSE, HERMANN WAGNER AND ALAN W. HARRIS ............................................................................. 1353

CELLULAR IMMUNOLOGY

Immunoglobulin and θ-Bearing Murine Leukemias and Lymphomas. ETHAN M. SHEVACH, JOHN D. STOBO AND IRA GREEN .............................................................................. 1146

Antibody Islet Forming-Cells: Localized Hemolysis Inhibition in Gel. JOHN S. HEGE AND WALLACE V. EPSTEIN ..................................................................................... 1162

The Influence of Calcium, Magnesium and Cyclic Adenosine 3′,5′-Monophosphate on the Mixed Lymphocyte Reaction. RICHARD B. WHITNEY AND ROBERT M. SUTHERLAND ............................................................................. 1179

Characterization of a Factor Required for the Differentiation of Myeloid and Lymphoid Cells in Vitro. JAMES WATSON AND JOHN PRICHARD ............................................................................. 1209

Electron Microscopic Localization of Rabbit Immunoglobulin Allotype b4 on Blood Lymphocytes by an Indirect Ferritin Immune Complex Labeling Technique. TEISA AN, KATSUMA MIYAI AND STEWART SELL ............................................................................. 1271

A Receptor for Fc on Mouse B-Lymphocytes. F. PARASKEVAS, S-T. LEE, K. B. O RR AND L. G. ISRAELS ...................................................................................... 1319

Promethazine-HCl As an Immunosuppressant. JOHN P. GUSDON, JR., VERNON L. MOORE, QUENTIN N. MYRVIK AND PAUL A. HOLYFIELD ............................................................................. 1340

Continued

An Improved Primary Response from Mouse Spleen Cells Cultured in Vivo in Diffusion Chambers. S. A. GOODMAN, M. G. CHEN AND T. MAKINODAN ........................................ 1387

Delayed Hypersensitivity to Polysaccharides from Nocardia. L. ORTIZ-ORTIZ, L. F. BOJALIL AND M. F. CONTRERAS .................................................. 1409

Specificity and Nature of the Antigen-Combining Sites on Fetal and Mature Thymus Lymphocytes. JOHN M. DWYER, NOEL L. WARNER AND IAN R. MACKAY .... 1439

Antibody Cytophilic for Lymphocytes. F. MODABBER AND A. H. COONS.. 1447

IMMUNOPATHOLOGY

Biologic Role of Complement Products: Complement-Derived Leukotactic Activity Extractable from Lesions of Immunologic Vasculitis. PETER A. WARD AND JEFFREY H. HILL .................................................................................. 1137

Production of Chemotactic Activity by Guinea Pig Immunoglobulins following Activation of the C3 Complement Shunt Pathway. A. L. SANDBERG, R. SNYDERMAN, M. M. FRANK AND A. G. OSLER .......................................................... 1227

Further Purification of Perchlorate-Soluble Antigens from Human Colonie Carcinomata. MICHAEL D. TURNER, TELBA A. OLIVARES, LEE HARWELL AND MARTIN S. KLEINMAN .................................................................................. 1328

Incidence of Delayed Mortality (Secondary Disease) in Allogeneic Radiation Chimeras Receiving Bone Marrow from Aged Mice. M. G. CHEN, G. B. PRICE AND T. MAKINODAN ............................................................ 1370

Immunoglobulin-Containing Cells in Lungs of Hamsters Infected with Mycoplasma pneumoniae. WALTER W. FERNALD, WALLACE A. CULVER, JR., AND JOHN BIENENSTOCK .................................................................................................................. 1400

The Effect of Complement Depletion on Neutrophil Migration in Acute Immunologic Arthritis. CLAUDE V. DESHAZO, MAUREEN T. McGRADE, PETER M. HENSON AND CHARLES G. COCHRANE ........................................................................................................ 1414

MICROBIAL AND VIRAL IMMUNOLOGY

Characterization of the Surface Antigens of Staphylococcus aureus, Strain K-93M. WALTER W. KARAOKAWA AND JUDITH H. KANE .................................................................................................................. 1199

Effects of Pyran Copolymer on Oncogenic Virus Infections in Immunosuppressed Hosts. MARTIN S. HIRSCH, PAUL H. BLACK, MARY L. WOOD AND ANTHONY P. MONACO .................................................................................................................. 1312

COMMUNICATIONS

Enhancing Effect of Bacterial Endotoxins on Bone Marrow Cells in the Immune Response to SRBC. J. MIHAN JONES AND PHYLLIS D. KIND .................................................. 1453

Tissue Localization of Two Populations of Human Lymphocytes Distinguished by Membrane Receptors. NELSON P. A. SILVEIRA, NELSON F. MENDES AND MARINA E. A. TOLNAI .......................................................... 1456

Dichotomy and Improved Specificity of Immunosuppressive Effect of Anti-Thymocyte Globulin. K. P. JUDD, C. J. BRYANT AND J. J. TRENTIN ........................................................................ 1461

Changes of γ Globulin-Carrying Cells in NZB Mice before Autoimmune Disease. B. WEINERMAN AND F. PARASKEVAS .......................................................................................... 1465

Synthesis of a Photo-Activated Menadione (VIT K3) Affinity Label and Its Reaction with a Menadione-Binding Myeloma Protein. ROBERT W. ROSENSTEIN AND FRANK F. RICHARDS ........................................................................ 1467

Antibody Response to Escherichia coli Lipopolysaccharide and Type III Pneumococcal Polysaccharide by Congenitally Thymusless (Nude) Mice. JUDITH K. MANNING, NORMAN D. REED AND JOHN W. JUTILA .................................................................................. 1470

ERRATUM

In footnote c of the same table, "anti-azobenzoate" should read "anti-streptococcal carbohydrate."
