NEW!
improved plastic labware for cell culture use

From the Lux Scientific Corporation, exclusive with Microbiological Associates, comes a new line of plastic labware: tissue culture dishes, plastic cover slips, and the Multiplate®. Special feature: PERMANOX® dishes, made of a special plastic with low oxygen absorption and a high effusion rate.

SEND TODAY FOR COMPLETE CATALOG!

SUBSIDIARY OF DYNASCIENTES CORPORATION

4733 Bethesda Avenue, Bethesda, Maryland 20014 (301) 654-3400
West Coast Offices: 503 San Pablo Avenue, Albany, California 94706 (415) 526-6228
619 E. Washington Blvd., Los Angeles, California 90015 (213) 747-5484

Serving The Biomedical Field Since 1947
EUROPEAN DISTRIBUTION CENTER: Am Hang 10, 6380 Ober-Eschbach, Frankfurt, Germany
## CONTENTS

**NUMBER 1, JANUARY 1972**

### IMMUNOCHEMISTRY

- Continued Production of a Single Light Chain Population of Rabbit Antibody during Repeated Immunization: Amino Acid Composition and Sequence. B.-K. Seon, O. A. Roholt and D. Pressman ........................................... 86
- Maturation of the Immune Response to Soluble Rat Collagen: Late Appearance of Antibodies Directed to N-Terminal Sites of the α2-Chain. R. Timpl, H. Furthmayr and W. Beil 119
- Carboxy-Terminal Amino Acid Sequences of Canine Immunoglobulin G Subclasses. J. Andrew Grant, John T. Harrington and John S. Johnson ........................................ 165
- Correlations between the Concentrations of the Four Subclasses of IgG and Gm Allotypes in Normal Human Sera. Andreas Morell, Frantisek Skvaril, Arthur G. Steinberg, Erna van Loghem and William D. Terry .................................................. 195
- Stimulation in Vivo and in Vitro of Anti-Dinitrophenyl Antibodies with Homologous Protein Carriers Devoid of Hapten. Paul H. Strausbaugh, Rebecca Tarrab, Andrei Sulica and Michael Sela .......................................................... 236

### IMMUNOGENETICS

- Genetic and Cellular Factors in the Immune Response. IV. The Effect of Aggregation on Antibody Formation and on Delayed Hypersensitivity in the Inbred ACI and F344 Strains of Rats. Bruce P. Sloan and Thomas J. Gill, III ........................................ 26
- Blocking of Autologous and Homologous Leukocyte Responses by Human Alloimmune Plasmas: A Possible in Vitro Correlate of Enhancement. Rebecca H. Buckley, Richard I. Schif and D. Bernard Amos ........................................ 34
- Genetic Control of Immune Response to Glutamic Acid, Alanine, Tyrosine Copolymers in Mice. I. Association of Responsiveness to H-2 Genotype and Specificity of the Response. Carmen F. Merryman and Paul H. Maurer ........................................ 135
- A Study of Tumor Allograft Sensitized Lymph Nodes in Mice. II. In Vitro Immunoglobulin Synthesis, Immunofluorescence and Morphology. George L. Irvin, III, John C. Eustace, James A. McAleer and Donald F. Levi ........................................ 207
- Genetic Control of Immune Response to θ-AKR Alloantigen. H. Fuji, M. Zaleski and F. Milgrom .......................................................... 223

### CELLULAR IMMUNOLOGY

- Differential Stimulation of Precursor Cells and Carrier-Specific Thymus-Derived Cell Activity in the in Vivo Response to Heterologous Erythrocytes in Mice. Reuben Falkoff and J. Kettman ........................................ 54
- Genetically Determined Immune Responses: in Vitro Studies. Marvin L. Tyan .......................................................... 65
- In Vitro Cooperation of Cells of Bone Marrow and Thymus Origins in the Generation of Antibody-Forming Cells. Douglas C. Vann and John R. Kettman ........................................ 73
- Depression of Established Delayed Hypersensitivity by Mumps Virus. Caroline B. Hall and Fred S. Kantor .......................................................... 81
- Cyclophosphamide-Induced Tolerance to Equine γ Globulin and to Equine-Anti-Mouse-Thymocyte Globulin in Adult Mice. I. Studies on Antigen and Drug Requirements. Gail D. Stockman and John J. Trentin ........................................ 112
- Synthesis, Assembly, and Secretion of γ Globulin by Mouse Myeloma Cells. IV. Assembly of IgA. A. Bargellesi, P. Periman and M. D. Scharff ........................................ 126
The Differential Localization of Antibody Synthesis and of Immunologic Memory in Lymph Nodes Draining and Not Draining the Site of Primary Immunization with Hemocyanin. A. B. Stavitsky and J. D. Folds ................................................................. 152

Quantitative Estimation of Antibody in the Immunoglobulin Classes of the Mouse. II. Thymic Dependence of the Different Classes. Giorgio Torrigiani .............................. 161

Response of Peripheral Blood Lymphocytes from Normal, Hypogammaglobulinemic and Chronic Lymphocytic Leukemic Patients. G. E. Rodey, T. Davis and P. G. Quie .......................... 178

Delayed Hypersensitivity to SK-SD: in Vitro Lymphocyte Study with an Active Component. Russell H. Tomar, Fletcher B. Taylor, Jr., and George R. Green ................................................................. 231

In Vitro Immunity to TNP and Penicillin: Specific Inhibition with Hapten-Conjugated Isologous Red Cells. David Naor and Robert Mishell .............................................. 246

Alteration in Graft vs Host Reactivity and in Hematopoietic Stem Cells of Spleen Cell Inocula from Donor Mice Pretreated with Pertussis Antigen. Edward A. Eikman and Robert T. Bowser ................................................................................... 253

IMMUNOPATHOLOGY

MICROBIAL AND VIRAL IMMUNOLOGY

The Immunosuppressive Effects of Rauscher Leukemia Virus (RLV) upon Spleen Cells Cultured in Cell-Impermeable Diffusion Chambers. III. Inhibition of RLV-Induced Cell Pathways by Antigenic Stimulation with Hemocyanin. Luis Borella .............................. 45

Titration and Typing of Serum Antibodies in TRIC Infections by Immunofluorescence. Lavelle Hanna, Ernest Jawetz, Bechir Nabli, Issao Hoshiwara, Bruce Ostler and Chandler Dawson .......... 102

Use of Chicken Tracheal Organ Cultures for Studying Resistance of Respiratory Epithelium to Viral Infection. Martin S. Finkelstein, Michael McWilliams and Charles G. Huizenga ........ 183

Naturally-Occurring Antibodies to Bacillary Teichoic Acids. Gene P. Decker, Frank W. Chorpenning and G. Thomas Frederick ........................................................... 214

COMMUNICATIONS

The Antigen Specificity of Thymus-Derived Helper Cells. Michael Hoffmann and John W. Kappeler .................................................................................. 261

Presence of the Fc-Fragment Allotypic Determinant, A15, on IgG from an Allotype-Suppressed Aa2-Homozygous Rabbit Lacking the Aa2 Determinants of the Fd Fragment. S. Landucci Tosi, R. G. Mage, A. Gilman-Sachs, S. Dray and K. L. Knight ................................................................. 264

Enhancing Activity of Thymocyte Culture Cell-Free Medium on the in Vitro Immune Response of Spleen Cells from Neonatally Thymectomized Mice to Sheep RBC. G. Doria, G. Agarossi, and S. Di Pietro ......................................................................... 268

Radioimmunoochemical Studies on Nucleoside-Specific Antibodies Using Iodinated DNA. Burton J. Rosenberg, Bernard F. Erlanger and Sam M. Beiner ............................................................................ 271

Complement-Dependent Opsonization of Incompatible Erythrocytes by Human Secretory IgA. Manuel E. Kaplan, Agustin P. Dalmaso and Mildred Woodson ................................................................. 275

Immunosuppression in Mice Injected with Heterologous Anti-Immunoglobulin Antiserum. Dean D. Manning and John W. Jutila ............................................................................ 282

In Vitro Inhibition of Plaque and Rosette Formation by a Globulin. Moshe Glaser, Isaac Cohen and David Nelken ................................................................. 286
IMMUNOCHEMISTRY

Immunoglobulin M: Identification of an Unusual Fragment following High Temperature Trypsin Proteolysis. Andrew G. Plaut, Nickolas Calvanico and Thomas B. Tomasi, Jr. ........................................ ........ 289
Antigen-Binding IgA Myeloma Proteins in Mice: Specificities to Antigens Containing β-1→6 Linked Galactose Side Chains and a Protein Antigen in Wheat. Michael Potter, Elizabeth B. Mushinski and C. P. J. Glaudemans ................................................................. 295
Precipitin Reactions between Polyribonucleotides and Heat Labile Serum Factors. Pier Giorgio Natali and Eng M. Tan ............................................................. 297
Receptors for Immunoglobulin and Complement on a Mouse Leukemias and Lymphomas. E. Shevach, R. Herberman, R. Lieberman, M. M. Frank and I. Green .............................. 325
The Localization of Oligosaccharides in a Human IgM Protein. William Niedermeier, Ralph E. Schrodenoer and Mary Hurst .................................................. 346
False Positive Tests for Hepatitis-Associated Antigen in Blood Donors Caused by Antibodies to Ruminant Serum Proteins. Harvey J. Alter, Herbert F. Polesky and Paul V. Holland .... 358
Fractionation of the Antigens of Canine Prostatic Fluid. Umrana Ahmed and Sidney Shulman .. 432
A Study of the Cell-Mediated and Antibody Responses to Synthetic Ribonucleic Acids in Guinea Pigs. John A. van Boxel, Alfred D. Steinberg and Ira Green ........................................ 446
Studies on Immunoglobulins of Mink: Definition of IgG, IgA and IgM. J. E. Coe and W. J. Hadlow ................................................................. 530
The Secondary Humoral Response: The Specificity of Lymph Node Cells and Antibody. Howard A. Levin, Judith Herman, Herbert Levine and Stuart F. Schlossman ..................... 538

IMMUNOGENETICS AND TRANSPLANTATION

Binding in Vivo of Enhancing Antibodies to Skin Allografts and Specific Allogeneic Tissues. Joe M. Jones, Hans-Hartmut Peter and Joseph D. Feldman ........................................ 301
The Antibody Response of Rabbits to Soluble Mouse H-2 Antigens. Ian F. C. McKenzie and M. Elisabeth Painter ................................................................. 352
A Model System for Study of Subcellular Distribution of Cell Surface Antigens. Lawrence A. Wilson and William Boyle .................................................. 460
Immune Hemolysis. I. Differing Susceptibility of Three Genetic Types of Sheep Red Cells. David A. Bell, Pierre F. Leblond, John P. Leddy, Peter K. Lauf, Paul L. LaCelle and Robert I. Weed. 467

CELLULAR IMMUNOLOGY

Immunologic Deficiencies in Senescence. II. Characterization of Extrinsic Deficiencies. G. B. Price and T. Makinodan ................................................................. 413
Cell Interactions in Antibody Formation in Vivo. I. Role of the Third Cell in the in Vivo Response of Spleen Cells to Erythrocyte Antigens. Humberto Cosenza and Lee D. Leserman ......................... 418
Migration Inhibitory Effect of Cell-Free Supernatants from Mixed Human Lymphocyte Cultures. Jens Erik Clausen ................................................................. 453
Production and Characterization of Migration Inhibitory Factor(s) (MIF) of Established Lymphoid and Non-Lymphoid Cell Lines. Photini S. Papageorgiou, Walter L. Henley and Philip R. Glade ................................................................. 494
IMMUNOPATHOLOGY

Transfer of Experimental Allergic Orchitis with Peritoneal Exudate Cells. Gary L. Kantor and Frank J. Dixon .............................................................. 329
Cytochalasin B. IV. Inhibition and Stimulation of Chemotaxis of Rabbit and Human Polymorphonuclear Leukocytes. Elmer L. Becker, A. Todd Davis, Richard D. Estensen and Paul G. Quie ...................................................................................... 396
Passive Immunization against the Local Shwartzman Reaction. Abraham I. Braude and Herndon Douglas ........................................................................... 505
Release of Histamine and Slow Reacting Substance of Anaphylaxis (SRS-A) by IgE-Anti-IgE Reactions on Monkey Mast Cells. Teruko Ishizaka, Kimishige Ishizaka and Hisao Tomioka ......................................................... 513
Clearance of Equine Antitoxin-Toxin Complexes by the Reticuloendothelial System. Sigurd J. Normann .............................................. 521

MICROBIAL AND VIRAL IMMUNOLOGY

Hemagglutination-Inhibiting (HI) Antibody Response against Rubella Virus in Non-Pregnant and Pregnant Rabbits and Transmission of Antibody to Young. Sakae Inouye and Reisaku Kono ..................................................................................... 370
The Use of Killed Vaccines in Immunization against an Intracellular Parasite: Toxoplasma gondii. James L. Krahenbuhl, Joel Ruskin and Jack S. Remington ......................................................... 425
The Immunogenicity of Adenovirus Type 5 Structural Proteins. A.T. Haase, V. Mautner and H. G. Pereira .............................................. 483

COMMUNICATIONS

Immunologic Response Restored by Macrophages in Mice with Immunosuppression Due to Normal RNA. M. V. Loudner, J. C. Morini, Nelly Amerio, María Teresa Font and S. L. Rabasa .............................................................. 552
Antigen and Antibody in Aleutian Disease in Mink. I. Precipitation Reaction by Agar-Gel Electrophoresis. Hyun J. Cho and D. G. Ingram .............................................................. 555
Specifically Cytotoxic Lymphocytes Produced by Preincubation with Antibody-Complexed Target Cells. Peter Perlmann, Hedvig Perlmann and Peter Biberfeld ......... 558
The Secondary Response to High and Low Dose Priming in Mice. William G. Grantham .............................................................. 562
Endocytosis by Lymphocytes of Complexes of Anti-Ig with Membrane-Bound Ig. Emil R. Unanue, William D. Perkins and Morris J. Karnovsky .............................................................. 569
Release of Cell Surface Immunoglobulin by Mouse Splenic Lymphocytes. Ellen S. Vitetta and Jonathan W. Uhr .............................................................. 577

NUMBER 3, MARCH 1972

IMMUNOCHEMISTRY

The IgA System of the Guinea Pig. J. P. Vaerman and J. F. Heremans .............................................................. 637
C3b Inactivator of Man. III. Further Purification and Production of Antibody to C3b INA. Shaun Ruddy, Lawrence G. Hunsicker and K. Frank Austen .............................................................. 657
Activation of the First Component of Complement. Evidence for an Internal Activation Step. M. Loos, T. Borsos and H. J. Rapp .............................................................. 683
PCA Reactions in Guinea Pigs: Elicitation by Antigens of Related Structure and Inhibition by Haptens. Panayotis Liacopoulos, Sara Harel and Israël Schechter .............................................................. 689

The Influence of Calcium, Magnesium and Cyclic Adenosine 3',5'-Monophosphate on the Mixed Lymphocyte Reaction. Richard B. Whitney and Robert M. Sutherland .......... 1179
Characterization of a Factor Required for the Differentiation of Myeloid and Lymphoid Cells in Vitro. James Watson and John Prichard .............................................. 1209
Electron Microscopic Localization of Rabbit Immunoglobulin Allotype b4 on Blood Lymphocytes by an Indirect Ferritin Immune Complex Labeling Technique. Teisa An, Katsuma Miyai and Stewart Sell .................................................. 1271
A Receptor for Fc on Mouse B-Lymphocytes. F. Paraskevas, S-T. Lee, K. B. Orr and L. G. Israels .................................................. 1319
Promethazine-HCl as an Immunosuppressant. John P. Gusdon, Jr., Vernon L. Moore, Quentin N. Myrvik and Paul A. Holyfield .................................................. 1340
An Improved Primary Response from Mouse Spleen Cells Cultured in Vitro in Diffusion Chambers. S. A. Goodman, M. G. Chen and T. Makinodan .............................................. 1387
Delayed Hypersensitivity to Polysaccharides from Nocardia. L. Ortiz-Ortiz, L. F. Bojalil and M. F. Contreras .............................................. 1409
Specificity and Nature of the Antigen-Combining Sites on Fetal and Mature Thymus Lymphocytes. John M. Dwyer, Noel L. Warner and Ian R. Mackay ...................... 1439

IMMUNOPATHOLOGY

Biologic Role of Complement Products: Complement-Derived Leukotactic Activity Extractable from Lesions of Immunologic Vasculitis. Peter A. Ward and Jeffrey H. Hill .................. 1137
Production of Chemotactic Activity by Guinea Pig Immunoglobulins following Activation of the C3 Complement Shunt Pathway. A. L. Sandberg, R. Snyderman, M. M. Frank and A. G. Osler .................................................. 1227
Incidence of Delayed Mortality (Secondary Disease) in Allogeneic Radiation Chimeras Receiving Bone Marrow from Aged Mice. M. G. Chen, G. B. Price and T. Makinodan .............................................. 1370
Immunoglobulin-Containing Cells in Lungs of Hamsters Infected with Mycoplasma pneumoniae. Gerald W. Fernald, Wallace A. Clyde, Jr., and John Bienenstein .............................................. 1400
The Effect of Complement Depletion on Neutrophil Migration in Acute Immunologic Arthritis. Claude V. DeShazo, Maureen T. McCabe, Peter M. Henson and Charles G. Cochrane ...................... 1414

MICROBIAL AND VIRAL IMMUNOLOGY

Characterization of the Surface Antigens of Staphylococcus aureus, Strain K-93M. Walter W. Karakawa and Judith H. Kane .................................................. 1199
Effects of Pyran Copolymer on Oncogenic Virus Infections in Immunosuppressed Hosts. Martin S. Hirsch, Paul H. Black, Mary L. Wood and Anthony P. Monaco ...................... 1312

communications

Enhancing Effect of Bacterial Endotoxins on Bone Marrow Cells in the Immune Response to SRBC. J. Miriam Jones and Phyllis D. Kind .................................................. 1453
Tissue Localization of Two Populations of Human Lymphocytes Distinguished by Membrane Receptors. Nelson P. A. Silveira, Nelson F. Mendes and Marina E. A. Toldai .............................................. 1456
Dichotomy and Improved Specificity of Immunosuppressive Effect of Anti-Thymocyte Globulin. K. P. Judd, C. J. Bryant and J. J. Trentin .................................................. 1461
Changes of γ Globulin Carrying Cells in NZB Mice before Autoimmune Disease. B. Weinerman and F. Paraskevas .......................................................... 1465

Synthesis of a Photo-Activated Menadione (VIT K₃) Affinity Label and Its Reaction with a Menadione-Binding Myeloma Protein. Robert W. Rosenstein and Frank F. Richards .................... 1467

Antibody Response to Escherichia coli Lipopolysaccharide and Type III Pneumococcal Polysaccharide by Congenitally Thymusless (Nude) Mice. Judith K. Manning, Norman D. Reed and John W. Jutila ........................................ 1470

Number 6, June 1972

IMMUNOCHEMISTRY

Appearance of an Early “Primed State” in Mice following the Concomitant Injections of Antigen and Specific Antiserum. Geronimo Terres, Sherie L. Morrison, Gail S. Habicht and Richard D. Stoner ............................................................................... 1473

The Production of Anti-DNP Antibody in the Bullfrog, Rana catesbiana. Grace L. Rosenquist and Ronald Z. Hoffman ........................................................................ 1499

Complementarity of H and L Chains from Antihapten Antibodies of Different Classes. A. Eden, M. E. Lamm and V. Nussenzweig .......................................................... 1605

Production of the Second (C2) and Fourth (C4) Components of Guinea Pig Complement by Single Peritoneal Cells: Evidence That One Cell May Produce Both Components. Harold Vivian Wyatt, Harvey R. Colten and Tibor Borsos .............................................. 1609

Studies on Human Secretory Immunoglobulin A. IV. Carbohydrate Composition. Milan Tomana, Jiri Mestecky and William Niedermeier ................................................................. 1631

The Purification and Immunochemical Characterization of a New Specific Antigen, Differentially Expressed on the Surface Membranes of Mouse Lymphoid Cells. Roland von Fellenberg and Elisabeth Guggisberg ............................................ 1647

Phylogeny of Immunoglobulin Structure and Function. VI. 17S, 7.5S and 5.7S Anti-DNP of the Turtle, Pseudamys scripta. Gerrie A. Leslie and L. William Clem .................................... 1656

The Influence of Carriers on the Immune Response of Rabbits to the Synthetic Homopolymer Poly(γ-2-N-Morpholinoethyl-L-Glutamamide) (PAMEG). Hugh C. McDonald, Gerald Odstrechel and Paul H. Maurer ........................................................................ 1690

Half-Life of Guinea Pig γ₁ Globulin and γ₂ Globulin Antibodies. Jane D. LeFever and Kimishige Ishizaka ............................................................................................ 1698

The Evolution of the Immune Response. XIII. The Characterization of Purified Erythrocyte Agglutinins from Two Invertebrate Species. C. L. Finstad, G. W. Litman, J. Finstad and R. A. Good .................................................................................. 1704

IMMUNOGENETICS AND TRANSPLANTATION

Masking of Human Transplantation Antigens by Diverse Substances. Arthur A. Hirata and Paul I. Terasaki .................................................................................. 1542

Immunodeficiency of the Thymus-Dependent System of the Ames Dwarf Mouse. René J. Duquesnoy .................................................................................. 1578

CELLULAR IMMUNOLOGY

The Role of Cyclic 3′,5′ Adenosine Monophosphate in the Specific Cytolytic Activity of Lymphocytes. Christopher S. Henney, Henry R. Bourne and L. M. Lichtenstein .............................................. 1526

Regulation of Homocytotropic Antibody Formation in the Rat. VII. Carrier Functions in the Anti-Hapten Homocytotropic Antibody Response. Tomio Tada, Ko Okumura and Masaru Taniguchi ........................................................................... 1535

CONTENTS

The Functional Capacity of X-Irradiated Macrophages. Jon R. Schmidtke and Frank J. Dixon 1624

Ultrastructure and Immunofluorescence of Mouse Spleen Cells Obtained by Discontinuous Alummin Gradient Centrifugation. Elaine Daimont Waldo and Dorothea Zucker-Franklin 1665

Delayed Hypersensitivity in the Marsupial Setoniz brachyurus (Quokka). Keven J. Turner, Michael P. Alpers and Margaret Wight 1675

Inhibition by Anti-μ Chain Sera of the Cellular Transfer of Antibody and Immunoglobulin Synthesis in Mice. Henry G. Herrod and Noel L. Warner 1712

IMMUNOPATHOLOGY

Antigenic Specificity of Anti-Erythrocyte Autoantibody Responses by NZB Mice: Identification and Partial Characterization of Two Erythrocytes Surface Autoantigens. Ewert Linder and Thomas S. Edgington 1615

Interaction in Vivo of Homocytotropic Antibodies Belonging to Two Different Rat Immunoglobulin Classes: Effect of IgE on the Passive Cutaneous Anaphylactic Reaction Mediated by IgGa Antibodies. John L. Ohman, Jr., and Kurt J. Bloch 1637

MICROBIAL AND VIRAL IMMUNOLOGY

Development of Tissue Viral Resistance in Chickens following Administration of Interferon Inducers. Martin S. Finkelstein 1506

An Escherichia coli Antigen Cross-Reactive with the Capsular Polysaccharide of Haemophilus influenzae Type b: Occurrence among Known Serotypes, and Immunochemical and Biologic Properties of E. coli Antisera toward H. influenzae Type b. Rachel Schneerson, Major Bradshaw, John K. Whisnant, Richard L. Myerowitz, J. C. Parke, Jr., and John B. Robbins 1551

Inhibition of Antichlamydial IgM Antibody by IgG Antibody in Immunofluorescence Tests. S. Vern Juchau, William D. Linscott, Julius Schachter and Ernest Jawetz 1563

Leishmania donovani; Partial Characterization of Some Flagellate Cytoplasmic Immunogens. Bruce A. Clinton, Nicholas C. Palezuk and Leslie A. Stauber 1570

COMMUNICATIONS

Close Linkage of the Genes for Rabbit IgA Allotypes, AF71 to AF75, to the Chromosomal Region Controlling Immunoglobulin Heavy Chain Allotypes. W. C. Hanly, K. L. Knight, A. Gilman-Sachs, S. Dray and E. A. Lichter 1723

Formation of an Antibody with Serologic Specificity for N4-(Δ2-Isopentenyl)Adenosine. Bruce Hacker, Helen VanVunakis and Laurence Levine 1726

The Biologic Significance of Fe Receptor on Mouse B-Lymphocytes. F. Paraskevas, K. B. Orr, E. D. Anderson, S-T. Lee and L. G. Israels 1729

NOMENCLATURE

Recommendations for the Nomenclature of Human Immunoglobulins 1733
INFORMATION FOR CONTRIBUTORS

Manuscripts should be sent to

Dr. Joseph D. Feldman
Department of Experimental Pathology
Scripps Clinic and Research Foundation
La Jolla, California 92037

If and when the manuscript is published, it will become the sole property of the Journal and all copyright will be taken out in the name of The Williams & Wilkins Company, and all rights in copyright reserved to The Williams & Wilkins Company.

Contributions may be short or long; the length should be commensurate with the scientific content. The chief criteria for acceptance are quality, originality and clarity.

INSTRUCTIONS FOR PREPARATION OF MANUSCRIPT

The original and two (2) copies of the manuscript, including references, legends, figures and illustrations, should be submitted. The text and all other material, e.g., footnotes, references, acknowledgments, must be typed in double space on one side of 8½" × 11" paper of good quality. The two (2) copies may be legible carbon, mimeographed or xerox copies.

A short title to be used as a running head should be typed alone on the first page. Type the complete title on the second page, and the authors’ names and affiliations on the third page. The format of the Journal must be followed in typing the text and the list of references. All material to be set in a type size different from that of the text, such as tables, case histories, quotations, formulas, legends for figures and illustrations, footnotes, and references must be typed on separate pages. Legends should not be attached to or written on figures or illustrations. The position of tables and figures in the text may be indicated on the page margin.

Manuscripts that do not conform to these specifications may not be accepted, at the Editor’s discretion.

Illustrations and Photomicrographs. Photographs of figures and other illustrative material should be on glossy paper; they must be clearly marked on the reverse side with the number, author’s name and orientation (top). Graphs should be in black ink on unlined or bluelined paper. If graphs exceed 9" × 12" in size, they must be accompanied by glossy photographic reproductions within that size.

For photomicrographs a better grade of paper may be used at additional cost, up to $75.00 for a single page. Estimates can be obtained when the manuscript is submitted for publication.

Communications. Short papers, at the author's request, may be printed in the Communications section of the Journal. These papers must not exceed three (3) printed pages in length, including summary, references, tables and figures. The text of a full printed page contains about 800 words. If accepted, their publication will be accelerated, usually within three (3) months of receipt by the Editor’s office. For this reason, proofs are not sent to authors, but rather to the office of the Editor. Suitability for publication will be judged on the basis of timeliness, novelty and importance by the usual refereeing procedure. The author must bear the complete cost of publication, at the rate of $58.00 per page.

Page Charges. Authors will be charged $58.00 per page for each page exceeding six (6) per article and $58.00 per page for each page of a Communication.

Reprints. Reprints must be ordered in advance. A form showing the cost of reprints, together with an order slip, is sent with the galley proof. No more than 1,000 reprints of any article may be purchased. The invoice for reprints will include any charge for excess pages.
