THE JOURNAL OF IMMUNOLOGY®

Contents for July

IMMUNOCHEMISTRY

Human Heat Labile Opsonins: Evidence for Their Mediation via the Alternate Pathway of Complement Activation. Hugo E. Jasin .......................................................... 26
Structure and Biologic Functions of Human IgD. I. The Presence of Immunoglobulin D in Human Cord Sera. Gerrie A. Leslie and Tommy E. Swate .............................................. 47
Identification of “J” Chain in a Homogeneous Canine IgA Immunoglobulin. J. Michael Kehoe, Thomas B. Tomasi, Jr., Farrielle Elouz and J. Donald Capra ........................................................................ 59
Determination of Relative Affinity and Heterogeneity of Mouse Anti-DNP Antibodies by a Plaque-Inhibition Technique. Gary W. Miller and Diego Segre ......................... 74
Attempts to Reconstitute Immunoglobulin G from Heavy Chain and Halves of Light Chain. F. A. Karlsson ................................................................................................................. 110
Enzyme-Linked Immunosorbent Assay, ELISA. III. Quantitation of Specific Antibodies by Enzyme-Labeled Anti-Immunoglobulin in Antibiot-Coated Tubes. Eva Engvall and Peter Perlmann .......................................................................................... 129
Role of the Cerebrosides and a Galactodiglyceride in the Antigenic Cross-Reaction between Nerve Tissue and Treponema. P. Dupouey ................................................................. 146

IMMUNOGENETICS AND TRANSPLANTATION

IMMUNOPATHOLOGY

The Pathogenesis of Aleutian Disease of Mink. II. Enhancement of Tissue Lesions following the Administration of a Killed Virus Vaccine or Passive Antibody. David D. Porter, Austin E. Larsen and Helen G. Porter .......................................................... 1
Reversed in Vitro Anaphylaxis Induced by Anti-IgG: Specificity of the Reaction and Comparison with Antigen-Induced Histamine Release. J. Andrew Grant and Lawrence M. Lichtenstein .............................................................................................................. 20
Thymus Dependence of Cells in Peripheral Lymphoid Tissues and in the Circulation Sensitive to Natural Thymocyteautoantibody in NZB Mice. Toshihazu Shirai, Takashi Yoshiki and Robert C. Mellors ............................................................................................................. 32
Opsonic Activity in Human Serum Deficient in C2. Frank R. Johnson, Vincent Agnello and Ralph C. Williams, Jr. ............................................................................................ 141

MICROBIAL AND VIRAL IMMUNOLOGY

Macrophage Accumulation, Division, Maturation and Digestive and Microbicidal Capacities in Tuberculous Lesions. II. Rate at Which Mononuclear Cells Enter and Divide in Primary BCG Lesions and Those of Reinfection. Masayuki Ando, Arthur M. Dannenberg, Jr., and Kiyoshi Shima ................................................................................................. 8
The Isolation and Some Physiochemical and Biologic Properties of the Type III Antigen of Group B. Streptococci. H. Russell and N. L. Norcross ........................................................................ 90

CELLULAR IMMUNOLOGY

Effect of Spleen Cells on Cytotoxicity by Immune Lymph Node Cells: Cell-Mediated Immune Suppression (? Enhancement) in Vitro. William J. Klein, Jr. ....... 51
Regulation of Antibody Response in Vitro. II. Formation of Rabbit Reaginic Antibody. Kimishige Ishizaka and Tadamitsu Kishimoto ................................................................................. 65
Reaginic Antibody Formation in the Mouse. I. Antibody-Mediated Suppression of Reaginic Antibody Formation. Kimishige Ishizaka and Hirokazu Okuda ............................................................................. 84
Ascaris Cuticle Collagen and Mammalian Collagens: Cell Mediated and Humoral Immunity Relationships. Dov Michaeli, George Senyr, Arieh Moaz and Sara Fuchs ......................................................... 103
Migration Inhibition of Peripheral Leucocytes in Human Schistosomiasis. Ronald L. Wolfson, Shirley E. Maddison and I. G. Kagan .................................................................................. 123

Continued
Contents continued

The Effect of Immunoregulatory α Globulin (IRA) upon Lymphocytes in Vitro. Sidney R. Cooperband, Alison M. Badger, Robert C. Davis, Karl Schmid and John A. Mannick ......................................................... 154

COMMUNICATIONS

A Starfish Hemolymph Factor Which Activates Vertebrate Complement in the Presence of Cobra Venom Factor. Noorbibi Day, Hartmut Geiger, Joanne Finstad and Robert A. Good .......................................................... 164

The Distribution of Brain-Associated θ Antigens Cross-Reactive with Mouse in the Brain of Other Species. Edward S. Golub ....................................................................................................... 168

In Vitro Morphine Binding by Sera from Morphine-Treated Rabbits. David A. Ringle and Betty L. Herndon .................................................................................................................. 174

Effect of Haptens on the Reactions of Anti-Idiotype Antibody with a Mouse Anti-Phosphorylcholine Plasmacytoma Protein. Alan Sher and Melvin Cohn ........................................................................ 176

Distinguished Service Awards at the First International Congress of Immunology .......................................................... 184
