THE JOURNAL OF IMMUNOLOGY®
Contents for September

IMMUNOCHEMISTRY
Immune Hemolysis and the Functional Properties of the Second (C2) and Fourth (C4) Components of Complement. IV. Formation of EAC2 by Treatment of C2 with Trypsin in the Presence of EAC4. MICHAEL LOOS, TIBOR BORSOS AND HERBERT J. RAPP ................................................................. 434
Characterization of Three Feline Paraproteins. J. MICHAEL KEHOE, ARTHUR I. HURVITZ AND J. DONALD CAPRA ............................................. 511
The Effects of Aggregated Immunoglobulins on Human Blood Platelets in Relation to Their Complement-Fixing Abilities. I. Studies of Immunoglobulins of Different Types. SHARRON L. PFUELLER AND ERNST F. LUSCHER .............................................. 526
An Unusual Papain Fragment Containing the Vn Region of an IgG3 Myeloma Protein. FRANCO DAMMACCO, EDWARD C. FRANKLIN AND BLAS FRANGIONE .................................................... 565
Antigenic Properties of the Fab Fragment of Human IgM: Antigenic Determinants Common to IgM and IgG. JAMES P. CHEN AND THOMAS B. TOMASI, JR ................................................................. 623
Hypersensitivity to Ascaris Antigens. VII. Isolation and Partial Characterization of an Allergen. RABIA HUSSAIN, GILL STREIT AND DAN H. CAMPBELL ..................................................... 638

IMMUNOGENETICS AND TRANSPLANTATION
Serologic Cross-Reactivity between H-2 and HL-A Antigens. I. Specific Reactivity of Rabbit Anti-HL-A Sera against Murine Cells. DIETRICH GÖTZE, SOLDANO FERRONE AND RALPH A. REISFELD ..................................................... 439
Histocompatibility-Linked Genetic Control of the Immune Response to Hapten Guinea Pig Albumin Conjugates in Inbred Guinea Pigs. IRA GREEN, WILLIAM M. BROWN AND BATA B. BENACERRAF .................................................. 457
The Clonal Nature of Antibody Formation. II. Characteristics of Antibody Cell Clones Specific for Poly-O-Acetyl-d-Serine and Poly-d-Alanine. M. BOSMA AND G. DAVIS .................................................. 487
The Clonal Nature of Antibody Formation. III. Independence of Antibody Cell Clones to Poly-O-Acetyl-d-Serine and Poly-d-Alanine. M. BOSMA AND G. DAVIS .................................................. 496

CELLULAR IMMUNOLOGY
The Immune Response to Sheep Erythrocytes in the Lizard Calotes versicolor. P. KANAKAMBI AND VR. MUTHUKRUPPAN ............................................. 415
Ontogenesis of the in Vitro Response of Murine Lymphoid Cells to Cellular Antigens and Phytohemagglutinins. MICHAEL L. HOWE AND BRUCE MANZELLO ............................................. 534
The Lack of Thymic Influence in Regulating the Immune Response in Escherichia coli 0127 Endotoxin. BRUCE C. VEIT AND J. GABRIEL MICHAEL ............................................. 547
Characterization of Migration Inhibitory Factor (MIF) from Guinea Pig Lymphocytes Stimulated with Concanavalin A. HEINZ G. REMOLD, ROBERTA A. DAVID AND JOHN R. DAVID ..................................................... 578
Cell Interactions in Antibody Formation in Vitro. II. The Interaction of the Third Cell and Antigen. LEE D. LESERMAN, HUMBERTO COSENZA AND JEFFREY M. ROSEMAN ..................................................... 587
Lymphocyte Subpopulations in NZB Mice: Deficit of Thymus-Dependent Lymphocytes. OSIAS STUTMAN ..................................................... 602
Regulation of Antibody Response in Vitro. III. Role of Hapten-Specific Memory Cells and Carrier-Specific Helper Cells on the Distribution of Anti-Hapten Antibodies in IgG, IgM and IgE Classes. TADAMITSU KISHIMOTO AND KIMUSHI ISHIZAKA ..................................................... 612
The Correlation between the Proliferative and the Cytotoxic Responses of Mouse Lymphocytes to Allogeneic Cells in Vitro. HERMANN WAGNER ..................................................... 630

IMMUNOPATHOLOGY
Simultaneous Induction of Experimental Allergic Encephalomyelitis in Obese Strain (Ob/Ob) Mice with Spontaneous Hereditary Hypothyroidism. WICK AND REJANE STEINER ..................................................... 471
Bactericidal and Opsonic Properties of C4-Deficient Guinea Pig Serum. RICHARD K. ROOT, LEONARD ELLMAN AND MICHAEL M. FRANK ..................................................... 477

Continued
Contents continued

Antigen-Induced Inhibition of Experimental Allergic Encephalomyelitis. I. Inhibition in Guinea Pigs Injected with Non-Encephalitogenic Modified Myelin Basic Protein. ROBERT H. SWANBORG .................................................. 540

The Alternate Complement Pathway in Cell Damage: Antibody-Mediated Cytolysis of Erythrocytes and Nucleated Cells. JOSEPH E. MAY, IRA GREEN AND MICHAEL M. FRANK ............................................................... 595

MICROBIAL AND VIRAL IMMUNOLOGY

Subtyping of Hepatitis-Associated Antigen (HB Ag); Simplified Technique with Counterelectrophoresis. PAUL V. HOLLAND, ROBERT H. PURCELL, HOLLY SMITH AND HARVEY J. ALTER ......................................................... 420

Radioimmunoassay Procedure for Binding Antigens. TADEUSZ J. WIKTOR, HILARY KOPROWSKI AND FRANK DIXON ................................................................. 464

Use of the ¹¹Cr Release Test to Demonstrate Patterns of Antibody Response in Humans to Herpesvirus Types 1 and 2. JERRY W. SMITH, ERVIN ADAM, JOSEPH L. MELNICK AND WILLIAM E. RAWLS ................................................................. 554

Radioimmunoassay of Mammalian Type C Viral Proteins. I. Species Specific Reactions of Murine and Feline Viruses. EDWARD M. SCOLNICK, WADE P. PARKS AND DAVID M. LIVINGSTON ................................................................. 570

COMMUNICATIONS

IgD-Bearing Human Lymphocytes. JOHN A. VAN BOXEL, WILLIAM E. PAUL, WILLIAM D. TERRY AND IRA GREEN ................................................................. 648

Immunohistologic Distribution of the Chicken Immunoglobulins. ANNE-MARIE LEBACQ-VERHEYDEN, J. P. VAERMAN AND J. P. HEREMANS ........... 652

ERRATA

In “Recommendations for the Nomenclature of Human Immunoglobulins” in the June 1972 issue of the Journal of Immunology, Volume 108, Number 6, page 1733, the symbol gamma (γ) was omitted in the fifth line of the first paragraph after the word “symbol.” The sentence should read: “Although it was pointed out that Ig is a logical symbol for immunoglobulins, the symbol γ was retained as an acceptable substitute, mainly in view of the tradition that had long associated it with the immunoglobulins.”

In “Immune Hemolysis. II. Studies on the Mechanism of Enhanced Lysis of Sheep Red Cells in a High K⁺ Medium” by John P. Leddy, Patricia A. Thiem, Pierre F. Leblond, Robert I. Weed and Peter K. Lauf in the February 1972 issue of the Journal of Immunology, Volume 108, Number 2, page 476, second column, under Effect of Ouabain, the first sentence should read: “A 10⁻⁴ M solution of ouabain (Sigma Chemical Co., St. Louis, Mo.) in Tris-NaCl was prepared at 56° and kept at 37°C prior to use.”
