## Cellular Immunology

- Induction of Tolerance to a Hapten. II. Maintenance and Escape of the Tolerant State to TNP. John M. Fidler and Edward S. Golub.......................... 317
- Cooperative Effects in Antibody Formation Produced by Hapten-Specific Delayed Sensitivity. Nabil Hanna and Sidney Leskowitz.......................... 410
- A Sensitive Microassay System for Lymphocyte-Mediated Cytotoxicity Induced by PHA and PPD. Nobuyuki Amino and Leslie J. Degroot 464
- Human Skin Responses to Products of Concanavalin A by Stimulated Cells and Mitogenic Activity. Richard M. Pauli, Louis DeSalle, Patrick Higgins, Earl Henderson, Allen Norin, and Bernard Strauss.................................................. 424
- The Immune Response against Hapten-Autologous Protein Conjugates in the Mouse. IV. Thymus Dependency of the Primary Response to Hapten-Autologous Albumin Conjugates. Bent Rubin, Klaus Heschle, Volker Schirrmacher, and Hans Wigzell 492
- Immune Responses in Vitro. VIII. Analysis of Cell Clusters. John A. McIntyre and Carl W. Pierce.......................................................... 512
- Delayed Hypersensitivity to Beryllium Compounds. James J. Marx, Jr., and Robert Burrell............................................................... 590
- Subpopulations of Human Lymphocytes Defined by β2-Microglobulin. Michael W. Fanger and George M. Bernier........................................... 609
- Immunity to Chlamydial Infections of the Eye. III. Presence and Duration of Delayed Hypersensitivity to Guinea Pig Inclusion Conjunctivitis. Ronald R. Watson, A. Bruce MacDonald, Edward S. Murray, and Farbrook Z. Modabber 618

## Immunocytochemistry

- Characterization of an Immunosuppressive Factor Present in Mouse Serum. Bruce Veit and J. Gabriel Michael .................................................. 341
- Synthesis, Assembly and Secretion of γ-Globulin by Mouse Myeloma Cells. V. Balanced and Unbalanced Synthesis of Heavy and Light Chains by IgG-Producing Tumors and Cell Lines. Reuben Baumal and Matthew D. Scharff................. 448
- Role of Intracellular and Extracellular Cationic Composition in Immune Lysis of Mammalian Erythrocytes. Agustin P. Dalmasso, Elda B. Giavedoni, Rosalind Lelchuk, and Maria M. E. deBracco........................................ 527
- Interactions between Human C5, C6, and C7 and Their Functional Significance in Complement-Dependent Cytolysis. Carlos M. Arroyave and Hans J. Muller-Eberhard.............................................. 536
- A New Serum Factor in Normal Rabbits. IX. Association with Group b Immunoglobulin Allotypic Specificities. K. Hagen, S. S. Kulkarni, and W. J. Mandy....... 546
- Use of an Aqueous Polymer Phase System as an Assay for Antibodies to Escherichia coli Alkaline Phosphatase. R. T. Reese and H. P. Treffers............. 624
- Effects of Bursectomy and Thymectomy on Ontogeny of Fowl IgA, IgG, and IgM. Daniel Y. E. Peret and John Bienvenstock................................. 633

## Immunogenetics and Transplantation

- Genetic Control of Immune Responses to Synthetic Polypeptides in Mice: Cellular Analysis of the Phenotypic Correction of the Ir-3 Gene Defect by Polyadenylic-Polyuridylic Acid. E. Mozès, G. M. Shearer, M. Selz, and W. Braun............. 439
**IMMUNOPATHOLOGY**

On the Nature of the Presumed Receptor for IgE on Mast Cells. II. Demonstration of the Specific Binding of IgE to Cell-Free Particulate Preparations from Rat Peritoneal Mast Cells. MICHAEL K. BACH AND JOHN R. BRASHLER ........................................... 324

Characterization of IgE-Induced Systemic Anaphylaxis in the Rabbit. Lack of Correlation between the Intravascular Release of Histamine and Anaphylactic Sensitivity. MARILYN HALONEN, R. NEAL PINCKARD, AND ANIKO L. MENG .............................................................. 331

Mechanisms of Passive Sensitization. III. Number of IgE Molecules and Their Receptor Sites on Human Basophil Granulocytes. TERUKO ISHIZAKA, CARMEN S. SOTO, AND KIMISHIGE ISHIZAKA .............................................. 500

Immune Negativity and Arthritogenicity in the Rat of an Antigen from Mycobacterium tuberculosis Wax D. TOSHITAKA KOGA AND CARL M. PEARSON ...................................................... 599

**TUMOR IMMUNOLOGY**

**VIRAL AND MICROBIAL IMMUNOLOGY**

Pulmonary Host Defenses. I. Analysis of Protein and Lipids in Bronchial Secretions and Antibody Responses after Vaccination with *Pseudomonas aeruginosa*. HERBERT Y. REYNOLDS AND RUSSELL E. THOMPSON ............................................................... 358

Pulmonary Host Defenses. II. Interaction of Respiratory Antibodies with *Pseudomonas aeruginosa* and Alveolar Macrophages. HERBERT Y. REYNOLDS AND RUSSELL E. THOMPSON ............................................................... 369

Recognition of Hepatitis B Antigen Determinants by a Double Label Radioimmun assay: A Sensitive Means of Subtyping Hepatitis B Antigen. RICHARD D. AACH, EDWIN J. HACKER, AND CHARLES W. PARKER ............................................................... 381

Protection against Enteric Bacterial Infection by Secretory IgA Antibodies. ERNEST S. FUBARA AND ROLF FRETER ............................................................... 395

Preferential Radioassay of Influenza-Specific 7S (IgG) Over 19S (IgM) Class of Antibodies. HARRY DAUGHARTY ............................................................... 404

Treatment of *E. coli* and Klebsiella Bacteremia in Agranulocytic Animals with Antiserum to a UDP-Gal Epimerase-Deficient Mutant. ELIZABETH J. ZIEGLER, HERNDON DOUGLAS, JAMES E. SHERMAN, CHARLES E. DAVIS, AND ABRAHAM I. BRAUDE ............................................................... 433

A Latex Agglutination Test for Measuring Antibodies to Streptococcal Mucopeptides. BEING HEYMAN, WALTER SCHACHENMAYR, BURKHARD BULTMANN, REINHARD SPANEL, OTTO HAFERKAMP, AND WILLARD C. SCHMIDT ............................................................... 478

Application of Electroimmunodiffusion and Crossed Electroimmunodiffusion to the Comparative Serology of a Microorganism (*Histoplasma capsulatum*). GEORGE H. SWEET AND DONNA E. WILSON ............................................................... 554

**COMMUNICATIONS**

A Third Non-Adherent Cell Required for the in Vitro Immune Response to Sheep Erythrocytes. DAVID W. TALMAGE AND HELEN HEMMINGSEN ............................................................... 641

Interferon Induction in New Zealand Black Mice by Murine Leukemia Virus. BENJAMIN V. SIEGEL, MCKAY BROWN, AND JANE I. MORTON ............................................................... 644

Homocytotropic Autoantibodies in Rabbits Subjected to Cryosurgery. CLELIA M. RIERA, MARIA G. PAILLACI, AND CARLOS YANTORNO ............................................................... 647

Suppressor Cells in the Graft-Versus-Host Reaction. JOHN A. HARDIN, THOMAS M. CHUSED, AND ALFRED D. STEINBERG ............................................................... 650

Retention of Graft-vs-Host Activity in Non-Adherent Spleen Cells after Depletion of Cytotoxic Activity by Incubation on Allogeneic Target Cells. MICHAEL G. MAGE AND LOUISE L. MCHUGH ............................................................... 652

**ANNOUNCEMENT**

A new section, “Letters,” will be added as a regular part of the *Journal of Immunology* to provide readers and authors a forum for discussion of scientific material appearing in the Journal. The reader will have the opportunity to comment on, add information to, or point out differences from published articles, and the authors will be given the opportunity for response. Letters should be lucid, germaine, and succinct (preferred length, 250 words or less). They will be selected on the basis of their interest, relevancy and importance of subject matter, and will be altered by the Editors if necessary, to improve understanding and style.
