THE JOURNAL OF IMMUNOLOGY®

Contents for September

CELLULAR IMMUNOLOGY

Effects of Sublethal Irradiation on the Plaque-Forming Cell Response in Mice. Jon R. Schmidtke and Frank J. Dixon ......................................................... 691

T-Cell Deficiency in Mouse Allogeneic Radiation Chimeras. Paul Unso and Nazareth Gengozi .......................................................... 712

Regulation of Antibody Response in Vitro. VI. Carrier-Specific Helper Cells for IgG and IgE Antibody Response. Tadamitsu Kishimoto and Kimishige Ishizaka .... 720

Characteristics of a Cytotoxin ("Lymphotoxin") Produced by Stimulation of Human Lymphoid Tissues. James B. Parker, Joan A. Stratton, Kerstin E. Stempel, David Yu, and Claire Cardin .............................................. 770

Cellular Events in Tolerance. I. Failure to Demonstrate Activation of Lymphocytes, Blocking Factors, or Suppressor Cells during the Induction of Tolerance to a Soluble Protein. David W. Scott ............................................ 789

Immunoglobulin Production in Synchronized Cultures of Human Hematopoietic Cell Lines. II. Variation of Synthetic and Secretion Activities during the Cell Cycle. Shinichiro Watanabe, Yasuo Yagi, and David Pressman ........... 797

The Homing Pattern of Thymus-Derived Lymphocytes in Calf and Neonatal Mouse Peyer's Patches. Byron H. Waksman ........................................... 878

Reconstitution of T Cell-Depleted Spleen Cell Populations by Factors Derived from T Cells. III. Mechanism of Action of T Cell-Derived Factors. R. M. Gorczyński, R. G. Miller, and R. A. Phillips ........................................ 900

The Number of Reactive Cells in Mouse Lymphocyte Cultures Stimulated by Phytohemagglutinin, Concanavalin A of Histocompatibility Antigen. G. Jones ......................... 914

Antigen Stimulation of 3H Thymidine Incorporation by Subpopulations of Human Peripheral Blood Cells. Seth A. Eisen, Leon R. Lyle, and Charles W. Parker ......................... 962

IMMUNOCHEMISTRY

Purification of the Human Complement Protein C1q by Affinity Chromatography. Carolyn R. Sledge and David H. Bing .................................................. 661

The Role of Complement in Human Immediate Hypersensitivity: Evidence against Involvement of the Alternate Pathway of Complement Activation. J. Andrew Grant and Lawrence M. Lichtenstein .................................................... 733

Detection of Idiotype Determinants on Human Monoclonal Proteins with Specific Rabbit Anti sera and Hemaggglutination-Inhibition. J. Vivian Wells, An-chuan Wang, Charles T. Thornsvard, Melvin S. Schanfield, Jan F. Bleumers, and H. Hugh Fudenberg ......................... 841

Cross-Reactions of Additional Extracellular Polysaccharides. Michael Heidelberger and Guy G. S. Dutton .................................................. 857

Antigenicity of Formaldehyde-Inactivated Staphylococcal Enterotoxin B. John R. Warren, Leonard Spero, and Joseph F. Metzger ........................................ 885

Extraction of Complement Inhibitory Factors from the Erythrocytes of Non-Human Species. E. M. Hoffman and H. M. Etlinger ........................................ 946

Continued

Heart Autoantibodies in Mice: Genetic, Bacterial, and Age Determinants. John H. Schwab and Roger R. Brown. 

Expression of the α, γ, and γ Variable Region Genes of Heavy Chains among IgG, IgM, and IgA Molecules of Normal and a Locus Allotype-Suppressed Rabbits. Byung Suk Kim and Sheldon Dray. 

IMMUNOPATHOLOGY 

Competitive Effect of Homologous IgG or Fe in Sensitization of Rabbits for PCA Mediated by Reaginic Antibody. Roberto Revoltella and Zoltan Ovary. 

TUMOR IMMUNOLOGY 

Further Evidence for the Involvement of Thymus-Processed Lymphocytes in Syngeneic Tumor Cell Cytolysis. Fernando Plata, Elisabeth Gomard, Jean-Claude Leclerc, and Jean-Paul Levy. 

Separation of Lymphocytes from Disaggregated Mouse Malignant Neoplasms by Sedimentation in Gradients of Ficoll in Tissue Culture Medium. Judy G. Zettergren, Douglas E. Luberoff, and Thomas G. Prentlow, II. 

Studies of MOPC 104E Plasmacytoma Cells Forming Rosettes with Autologous and Syngeneic Erythrocytes. Raymond N. Hiramoto and Vithal K. Ghanta. 

VIRAL AND MICROBIAL IMMUNOLOGY 

In Vitro Assessment of Cellular Immunity to Rauscher Leukemia Virus. Richard F. Mortensen, Walter S. Ceglowksi, and Herman Friedman. 

COMMUNICATIONS 

Reversibility of the Immune Depression Due to Ehrlich Ascites Carcinoma. Paoli Mocarelli, Maria Luisa Villa, Gianni Garotta, Carla Porta, Giuseppe Bigi, and Enrico Clerici. 

Xenogeneic Reactivity of Human Fetal Lymphocytes. Tuula Asantila, Tapani Sorvari, Toivo Hirvonen, and Paavo Toivanen. 

ANNOUNCEMENT 

A new section, "Letters," will be added as a regular part of the Journal of Immunology to provide readers and authors a forum for discussion of scientific material appearing in the Journal. The reader will have the opportunity to comment on, add information to, or point out differences from published articles, and the authors will be given the opportunity for response. Letters should be lucid, germaine, and succinct (preferred length, 250 words or less). They will be selected on the basis of their interest, relevancy and importance of subject matter, and will be altered by the Editors if necessary, to improve understanding and style.
