THE JOURNAL OF IMMUNOLOGY®

Contents for September

CELLULAR IMMUNOLOGY

Effects of Sublethal Irradiation on the Plaque-Forming Cell Response in Mice. Jon R. Schmidtke and Frank J. Dixon ........................................... 691

Cellular Deficiency in Mouse Allogeneic Radiation Chimeras. Paul Uno and Nazareth Gengoian .......................................................... 712

Regulation of Antibody Response in Vitro. VI. Carrier-Specific Helper Cells for IgG and IgE Antibody Response. Tadamitsu Kishimoto and Kimishige Ishizaka . 720

Characteristics of a Cytotoxin ("Lymphotoxin") Produced by Stimulation of Human Lymphoid Tissues. James B. Peter, Joan A. Strutton, Kerstin E. Stempel, David Yu, and Claire Cardin .............................................. 770

Cellular Events in Tolerance. I. Failure to Demonstrate Activation of Lymphocytes, Blocking Factors, or Suppressor Cells during the Induction of Tolerance to a Soluble Protein. David W. Scott ............................................ 789

Immunoglobulin Production in Synchronized Cultures of Human Hematopoietic Cell Lines. II. Variation of Synthetic and Secretion Activities during the Cell Cycle. Shinichiro Watanabe, Yasuo Yagi, and David Pressman ........... 797

Technical Aspects of the Rosette Tests Used to Detect Human Complement Receptor (B) and Sheep Erythrocyte-Binding (T) Lymphocytes. Nelson F. Mendes, Marina E. A. Tolnai, Nelson P. A. Silva, Richard B. Gilbertson, and Richard S. Metzgar ........................................................... 860

The Homing Pattern of Thymus-Derived Lymphocytes in Calf and Neonatal Mouse Peyer's Patches. Byron H. Waksman .............................................. 878

Reconstitution of T Cell-Depleted Spleen Cell Populations by Factors Derived from T Cells. III. Mechanism of Action of T Cell-Derived Factors. R. M. Gorczyński, R. G. Miller, and R. A. Phillips ........................................................... 900

The Number of Reactive Cells in Mouse Lymphocyte Cultures Stimulated by Phytohemagglutinin, Concanavalin A of Histocompatibility Antigen. G. Jones .............................................. 914

Antigen Stimulation of 'H Thymidine Incorporation by Subpopulations of Human Peripheral Blood Cells. Seth A. Eisen, Leon R. Lyte, and Charles W. Parker ........................................................... 962

IMMUNOCHEMISTRY

Purification of the Human Complement Protein Clq by Affinity Chromatography. Carolyn D. Slodoe and David H. Bing .............................................. 661

The Role of Complement in Human Immediate Hypersensitivity: Evidence against Involvement of the Alternate Pathway of Complement Activation. J. Andrew Grant and Lawrence M. Lichtenstein ........................................................... 733

Detection of Idiotype Determinants on Human Monoclonal Proteins with Specific Rabbit Antisera and Hemagglutination-Inhibition. J. Vivian Wells, An-Chuan Wang, Charles T. Thornsvard, Melvin S. Schanfield, Jan F. Bleumers, and H. Hugh Fudenberg ........................................................... 814

Cross-Reactions of Additional Extracellular Polysaccharide Haptens. Michael Heidelberger and Guy G. S. Dutton .............................................. 857

Antigenicity of Formaldehyde-Inactivated Staphylococcal Enterotoxin B. John R. Warren, Leonard Spero, and Joseph F. Metzger ........................................................... 946

Continued
Contents continued

IMMUNOGENETICS AND TRANSPLANTATION

The Responsiveness of Tolerant Lymphocyte Populations after Transfer to Normal Recipients. D. D. McGregor ......................................................... 672
Heart Autoantibodies in Mice: Genetic, Bacterial, and Age Determinants. John H. Schwab and Roger R. Brown .................................................. 682
Expression of the α, x, and y Variable Region Genes of Heavy Chains among IgG, IgM, and IgA Molecules of Normal and a Locus Allotype-Suppressed Rabbits. Byung Suk Kim and Sheldon Dray .............................................. 750
Extraction and Purification of Soluble HL-A Antigens from Exhausted Media of Human Lymphoid Cell Lines. Michele A. Pellegrino, Anna Pellegrino, Soldano Ferrone, Barry D. Kahan, and Ralph A. Reisfeld ........................................ 783

IMMUNOPATHOLOGY

Competitive Effect of Homologous IgG or Fe in Sensitization of Rabbits for PCA Mediated by Reaginic Antibody. Roberto Revoltella and Zoltan Ovary ................. 698
A Neutrophil Immobilizing Factor Derived from Human Leukocyte. II. Specificity of Action on Polymorphonuclear Leukocyte Mobility. Edward J. Goetzl, Irma Gigli, Stephen Wasserman, and K. Frank Austin .................................................. 938
Regulation of Homocytotropic Antibody Formation in the Rat. VIII. An Antigen-Specific T Cell Factor That Regulates Anti-Hapten Homocytotropic Antibody Response. Tomio Tada, Ko Okumura, and Masaru Taniguchi ...................... 952

TUMOR IMMUNOLOGY

Further Evidence for the Involvement of Thymus-Processed Lymphocytes in Syngeneic Tumor Cell Cytolysis. Fernando Plata, Elisabeth Gomard, Jean-Claude Leclerq, and Jean-Paul Levy .................................................. 667
Alterations in Lymphocyte Populations in Tumorogenesis. I. Lymphocyte Trapping. Marion M. Zatz, Abraham White, and Allan L. Goldspink .................................................. 706
Separation of Lymphocytes from Disaggregated Mouse Malignant Neoplasms by Sedimentation in Gradients of Ficoll in Tissue Culture Medium. Judy G. Zettergren, Douglas E. Luberoff, and Thomas G. Pretlow, II .................................................. 836
Studies of MOPC 104E Plasmacytoma Cells Forming Rosettes with Antologous and Syngeneic Erythrocytes. Raymond N. Hiramoto and Vital K. Ghanta .................................................. 893
Selective Cytotoxicity in a Hapten-Substituted Cell Culture Model System. Gordon W. Philpott, Richard J. Bower, and Charles W. Parker .................................................. 930

VIRAL AND MICROBIAL IMMUNOLOGY

In Vitro Assessment of Cellular Immunity to Rauscher Leukemia Virus. Richard F. Mortensen, Walter S. Ceglowksi, and Herman Friedman .................................................. 657

COMMUNICATIONS

Reversibility of the Immunodepression Due to Ehrlich Ascites Carcinoma. Paolo Mocarelli, Maria Luisa Villa, Gianni Garotta, Carla Porta, Giuseppe Bigi, and Enrico Clerici .................................................. 973
Xenogeneic Reactivity of Human Fetal Lymphocytes. Tuula Asantila, Tapani Sorvari, Toivo Hirvonen, and Paavo Toivanen .................................................. 984

ANNOUNCEMENT

A new section, "Letters," will be added as a regular part of the Journal of Immunology to provide readers and authors a forum for discussion of scientific material appearing in the Journal. The reader will have the opportunity to comment on, add information to, or point out differences from published articles, and the authors will be given the opportunity for response. Letters should be lucid, germane, and succinct (preferred length, 250 words or less). They will be selected on the basis of their interest, relevance and importance of subject matter, and will be altered by the Editors if necessary, to improve understanding and style.
