NEW CONVENIENCE... NEW FLEXIBILITY... IN IMMUNODIFFUSION TESTING

Mix or match any combination of tests with the new Hyland Immuno-Plate Multi-Test Tray

With this new Multi-Test tray you can convert any four Immuno-Plates, six- or twelve-well, into one easily handled combination plate. It not only makes managing tests easier, but gives you a far freer hand in fitting the test system to your exact needs.

With the addition of new plates for quantitation of Alpha-Antitrypsin and IgE, there are now fifteen tests available. This gives you greater flexibility with hundreds of ways to combine tests on a single tray.

Or you can combine four of the same Immuno-Plates to make one large 48-well plate.

Hyland gives you all these advantages, plus precision production controls. Wide-spaced wells, raised plate bottoms and color coding provide accurate readings. Numbered wells allow for positive identification. Short incubation periods and long expiration dates are an added plus.

*The new Multi-Component Reference Serum is a one-bottle control that works 3 ways: for IgG’s, IgA’s and IgM’s. Use it for speed and convenience when quantitating more than one serum protein.

Let us give you a hand. Call Hyland or talk to our representative.

Full instructions for use are included with each package.

HYLAND
THE DISCOVERY PEOPLE
The History of Difco Quality Control...

and what it means to you today

Difco was developed by producing better products through control of quality. Now there is a history of more than seventy years of dedication to accuracy and dependability, specialized equipment, exacting materials control.

It's a history of a unique kind of control. Difco tests each ingredient before it is accepted for use. Testing throughout preparation assures compatibility. The finished product is then tested for dependable performance under the conditions for which the product is intended. Result? Perfectly standardized products that give reproducible results every time.

What does it mean to you?

Assured reliability. Savings in time and money. Dependable microbiological results in your laboratory.
