Increased Resistance of Immunoglobulin A Dimers to Proteolytic Degradation after Binding of Secretory Component. Erik Lindh ................................................................. 284
Quantitative Comparison of Techniques Used to Measure Complement-Mediated Cytotoxicity of Nucleated Cells. Barbara Detrick-Hooks, Tibor Boros, and Herbert J. Rapp .................................................. 287
Immunochemical Quantitation of the Third Component of Guinea Pig Complement in Fluid Phase and Bound to Cell Surfaces. Sarkis H. Ohanian and Tibor Boros ........................................ 326
Complement Biosynthesis in Viro by Rat Hepatoma Cell Strains. Robert C. Strune, Armen H. Tashjian, Jr., and Harvey R. Coltman ................................................................. 331
The Primary Structure of a Human Lambda II Chain. Heinz Köhler, Susanna Rudofsky, and Larry Klukens Regulation of the in Viro Early Anamnestic Antibody Response by Exogenous Cholera Enterotoxin and Cyclic AMP. Richard G. Cook, Abram B. Staytisky, and Melvin D. Schoenberg ........ 426
Evidence for the Absence of Noncovalent Bonds in the FC, Region of IgM. Raymond B. Hester, John E. Mole, and Ralph E. Schroenloher .................................................. 486

IMMUNOGENETICS AND TRANSPLANTATION
Alloimmune Cytotoxic T Cells: Evidence That They Recognize Serologically Defined Antigens and Bear Clonally Restricted Receptors. Michael J. Bevan ........................................................................ 316
Mixed Leukocyte Culture Reactivity in Operationally Tolerant Rats: Relationship of Lymphocyte-Mediated Reactivity and Serum-Blocking Activity. I. D. Bernstein, B. L. Hamilton, P. W. Wright, R. Burnstein, and K. E. Heststrom .................................................. 320
Differential Susceptibility of Strain 2 and Strain 13 Guinea Pigs to Induction of Experimental Autoimmune Thyroiditis. Helen Braley-Mullen, Gordon C. Sharp, and Michael Kyriakos .................................................. 371

IMMUNOPATHOLOGY
Adoptive Transfer of Experimental Allergic Encephalomyelitis (EAE): Prevention of Successful Transfer by Treatment of Donors with Myelin Basic Protein. Bernard F. Driscoll, Marian W. Kies, and Ellisworth C. Alvord, Jr. .................................................. 291
Increased Immunologic Reactivity between Human Glomerular Basement Membrane and Group A Type 12 Streptococcal Cell Membrane after Carbohydrate Treatment. William T. Blue and Charles F. Lange .................................................. 306

TUMOR IMMUNOLOGY
Macrophages Activated in Viro with Lymphocyte Mediators Kill Neoplastic but Not Normal Cells. Willy F. Piessens, W. Hallowell Churchill, Jr., and John R. David ........................................ 293

VIRAL AND MICROBIAL IMMUNOLOGY
Immunochemistry of an Acidic Antigen Isolated from a Staphylococcus aureus. W. W. Karakawa and J. A. Kane .................................................. 310
Micro-Radiomunoassay for Antibodies to Newcastle Disease Virus in the Chicken. Glenn B. Cleland, Daniel Y. E. Perry, and Peter B. Dent .................................................. 422
Immune Specific Production of Interferon by Human T Cells in Combined Macrophage-Lymphocyte Cultures in Response to Herpes Simplex Antigen. Marty J. Valle, Arthur M. Bobrove, Samuel Strober, and Thomas C. Merigan .................................................. 435

COMMUNICATIONS
 β-Adrenergic Inhibition of Human T Lymphocyte Rosettes. Stanley P. Galant and Robert A. Remo .......................... 512
Prevention of Calcium Ionophore-Induced Release of Histamine in Rat Mast Cells by Disodium Cromoglycete. Herbert G. Johnson and Michael K. Bach .................................................. 514
Enhancement of Nitroblue Tetrazolium Dye Reduction by Leukocytes Exposed to a Component of Complement in the Absence of Phagocytosis. Ira M. Goldstein, Fred Pett, and Gerald Weissmann .................................................. 516
Complement Receptor in Synchronized Cultures of Human Hematopoietic Cell Lines. Peter Papenhausen, Photini Papageorgiou, and Kurt Hirschhorn .................................................. 519
Serum IgE Levels during the Potentiated Reaın Response to Egg Albumin in Rats Infected with Nippostrongylus brasiliensis. Dennis Carson, Henry Metzger, and Kurt J. Bloch .................................................. 521
Dimeric and Monomeric Forms of HL-A Antigens Solubilized by Detergent. Peter Chesswell and Jeffrey R. Dawson .................................................. 523
