THE JOURNAL OF IMMUNOLOGY®

Contents for January

CELLULAR IMMUNOLOGY

Characterization of Chemotactic Activity Produced in Vitro by a Cell-Mediated Immune Reaction in the Guinea Pig. ARNOLD E. POSTLETHWAITE AND RALPH SNYDERMAN ......................................................... 274

Nizidazole. II. A Potent Long-Acting Supressant of Cellular Hypersensitivity. ADEL A. F. MAHMOUD, MARK A. MANDEL, KENNETH S. WARREN, AND LESLIE T. WEBSTER, JR. ............................................................ 279

Antibody Synthesis in Synchronized Mouse Spleen Cells during the Secondary Response to Sheep Erythrocytes in Vitro. DAVID W. THOMAS, WALDEN K. ROBERTS, AND DAVID W. TALMAGE ........................................... 343

Blast Transformation of Rabbit B-Derived Lymphocytes by a Mitogen Extracted from Nocardia. C. BONA, L. CHEED, C. DAMAIS, R. CIOBARRU, P. N. SHEK, S. DUBISKI, AND B. CINADER ........................................................................................................... 348

Migration Inhibitory Factor and Type II Interferon in the Circulation of Mice Sensitized with Mycobacterial Components. S. B. SALVIN, E. RIBI, D. L. GRANGER, AND J. S. YOUNGER ........................................................................ 354

Effects of Concanavalin A on the in Vitro Responses of Mouse Spleen Cells to T-Dependent and T-Independent Antigens. DIANE M. JACOBS ........................................................................ 374

Induction of Theta-Positive Lymphocytes and Lymphoblasts in Mouse Bone Marrow by Mitogens. J. JOHN COHEN AND CONNIE K. PATTSON ................................................................................ 375

Activation of Guinea Pig Macrophages by Bacterial Lipopolysaccharide Requires Bone Marrow-Derived Lymphocytes. J. MARK WILSON, DAVID L. ROSENSTREICH, AND JOOST J. OPPENHEIM ....................................................................................... 388

The Role of Antibody Feedback Inhibition in the Regulation of the Secondary Antibody Response after High and Low Dose Priming. WILLIAM G. GRANTHAM AND FRANK W. FITCH .......................... 394

Rosette Formation by Canine Peripheral Blood Lymphocytes. CHARLES A. BOWLES, GORDON S. WHITE, AND DIANE LUCAS ........................................................................................................ 399

Inhibition of the Primary in Vitro Antibody Response by Interferon Preparations. HOWARD M. JOHNSON, BENNETT G. SMITH, AND SAMUEL BARON ................................................................. 403

An Immunofluorescent Demonstration of Autoantibodies Directed to a Buried Membrane Structure Present in Lymphocytes and Erythrocytes. R. J. WINCHESTER, SHU MAN FU, J. B. WINFIELD, AND H. G. KUNKEL ................................................. 410

Effects of Bacterial Lipopolysaccharide on the Induction and Expression of Cell-Mediated Immunity. I. Depression of the Afferent Arc. PHILIPPE H. LAGRANGE, GEORGE B. MACX.~NESS, THOMAS E. MILLER, AND PIERRE PARDON ...................................................... 410

Effects of Bacterial Lipopolysaccharide on the Induction and Expression of Cell-Mediated Immunity. II. Stimulation of the Efferent Arc. PHILIPPE H. LAGRANGE AND GEORGE B. MACX.~NESS ...................................................... 447

Thymic Regeneration after Lethal Irradiation: Evidence for an Intrathymic Radioreistant T Cell Precursor. JULIAN L. KADISH AND ROSS S. BASCH ........................................................................................ 452

Characterization of Human B Lymphocyte Specific Antigens. YOSHIHJMI ISHI, HIROFUMI KOSHIBA, HIROU UENO, IWAKI MARAYAMA, TSUYOSHI TAKAMI, FUMITOSHI ISHIBASHI, AND KOKICHI KUKUCHI ........................................................................................................ 466

A Lectin Model for Unresponsiveness. I. Reversible Effects of High Doses of Concanavalin A on Spontaneous and Induced DNA Synthesis. ALLEN R. CHAUVENET AND DAVID W. SCOTT .............................................................................. 470

Inhibition of Mitogen Stimulation of Human Peripheral Blood Leukocytes by V. cholerae Enterotoxin. DAVID A. HART AND RICHARD A. FINKELSTEIN ................................. 476

Immunoglobulin D Bearing Lymphocytes in Primary Immunodeficiencies. JEAN-LOUIS PREUD'homme, JEAN-PIERRE CLAUVEL, AND MAXIME SELIGMANN ...................................................................................... 481

Rabbit Peyer's Patches, Appendix, and Pulpitela Lymph Node B Lymphocytes: A Comparative Analysis of Their Membrane Immunoglobulin Components and Plasma Cell Precursor Potential. SUSAN W. CRAIG AND JOHN J. CEVERA ................................................................................. 492

Strain Differences in Ease of Tolerance Induction to Bovine γ-Globulin: Dependence on Macrophage Function. MIODRAG L. LUKEC, CAROL COWING, AND SIDNEY LESKOWITZ .................................................................................. 503

Specificity on Basophils and Lymphocytes in Cutaneous Basophil Hypersensitivity. HAROLD F. DVOBAR, ROBERT B. COLVIN, AND WINTHROP H. CHURCHILL ........................................................................... 507

IMMUNOCHEMISTRY

An Expression for the Calculation of Relative Affinities of Antibody-Ligand Interactions. WILLIAM E. PAUL AND GERALD J. ELPENBEIN ....................................................................................... 261

Identification and Some Properties of Rat Secretory Component. JEAN-PIERRE VAERMAN, JOSEPH F. HEREMANS, AND ANDRÉE BECKERS ................................................................................. 265

Phylogeny of Complement Components in Non-Human Primates. PETER H. SCHRUB, ANNE CONNELLY, AND T. C. JONES .............................................................................................................. 270
Increased Resistance of Immunoglobulin A Dimers to Proteolytic Degradation after Binding of Secretory Component. 

Quantitative Comparison of Techniques Used to Measure Complement-Mediated Cytotoxicity of Nucleated Cells. 

Complement Biosynthesis in Vitro by Rat Hepatoma Cell Strains. 

The Primary Structure of a Human Lambda II Chain. 

Enhancement of Nitroblue Tetrazolium Dye Reduction by Leukocytes Exposed to a Component of Complement. 

Increased Resistance of Immunoglobulin A Dimers to Proteolytic Degradation after Binding of Secretory Component. 

Thyroiditis. 

Effective Immunity to Dental Caries: Protection of Gnotobiotic Rats by Local Immunization with Streptococcus mutans. 

Early Anamnestic Antibody Response by Exogenous Cholera Enterotoxin and Cyclic AMP. 

Allotissue Cytotoxic T Cells: Evidence That They Recognize Serologically Defined Antigens and Bear Clonally Restricted Receptors. 

Mixed Leukocyte Culture Reactivity in Operationally Tolerant Rats: Relationship of Lymphocyte-Mediated Reactivity and Serum-Blocking Activity. 

Increased Immunologic Reactivity between Human Glomerular Basement Membrane and Group A Type 12 Streptococcal Cell Membrane after Carbohydrase Treatment. 

Macrophages Activated in Vitro with Lymphocyte Mediators Kill Neoplastic but Not Normal Cells. 

Spleen Cell-Mediated Cytotoxicity of Hamster Cells Transformed by Herpes Simplex Virus: Evidence for Virus-Specific Membrane Antigen. 

Immunochemistry of an Acidic Antigen Isolated from a S. aureus Staphylococcus aureus. 

Early Anamnestic Antibody Response by Exogenous Cholera Enterotoxin and Cyclic AMP. 

Adoptive Transfer of Experimental Allergic Encephalomyelitis (EAE): Prevention of Successful Transfer by Treatment of Donors with Myelin Basic Protein. 

Increased Immunologic Reactivity between Human Glomerular Basement Membrane and Group A Type 12 Streptococcal Cell Membrane after Carbohydrase Treatment. 

Effective Immunity to Dental Caries: Protection of Gnotobiotic Rats by Local Immunization with Streptococcus mutans. 

Immunohistochemical demonstration of activated cytotoxic T lymphocytes in human malignant tumors. 

Increased Resistance of Immunoglobulin A Dimers to Proteolytic Degradation after Binding of Secretory Component. 

Quantitative Comparison of Techniques Used to Measure Complement-Mediated Cytotoxicity of Nucleated Cells. 

Increased Resistance of Immunoglobulin A Dimers to Proteolytic Degradation after Binding of Secretory Component. 

Thyroiditis. 

Effective Immunity to Dental Caries: Protection of Gnotobiotic Rats by Local Immunization with Streptococcus mutans. 

Early Anamnestic Antibody Response by Exogenous Cholera Enterotoxin and Cyclic AMP.
