THE JOURNAL OF IMMUNOLOGY®

Contents for April

CELLULAR IMMUNOLOGY

Tolerance and Contact Sensitivity to DNFB in Mice. IV. Desensitization as a Manifestation of Increased Proliferation of Sensitized Cells. Praplan Phanuphak, John W. Moorhead, and Henry N. Claman .......................... 1147

Partial Characterization of Leukocyte Inhibitory Factor by Concanavalin A-Stimulated Human Lympocytes (LIFconA). Ross E. Rocklin .......................................................... 1161

Capping of the Lymphocyte C3 Receptor and Temperature-Dependent Loss of C3 Rosettes. Bobby J. Gormus and Joseph W. Shanes, Jr. .......................................................... 1221

Electrophoretic Fractionation of Guinea Pig Lymphocytes: Evidence for Different Subsets of T and B Cells in Spleen and Lymph Node. Leif C. Anderson, Stig Nordling, and Pekka Hayry ....................................................................................... 1226

Characterization of Immunoglobulin-Bearing and Other Small Lymphocytes in Mouse Bone Marrow by Sedimentation and Electrophoresis. D. G. Osmond, R. C. Miller, and H. V. Bohrer .......................... 1230

Activation of T and B Lymphocytes in Vitro. IV. Regulatory Influence on Specific T Cell Functions by a Thymus Extract Factor. Dietrich Armerding and David H. Katz .......................................................... 1248

Non-T Cell-Mediated Cytolysis Required Mg++ but Not a Ca++: An Argument against a Conventional “Stimulus-Secreton” Mechanism for Cytolysis. Pierre Golstein and Bastien D. Gomperts .................................................. 1264

The Role of Macrophages in the Production of Lymphokines by T and B Lymphocytes. Sharon M. Wahl, J. Mark Wilton, David L. Rosenstreich, and Joost J. Oppenheim ............................. 1296

Regulation by Antibody of Phytolens-Induced Lymphocyte Proliferation. I. Evidence for Two Mechanisms of Suppression. Keith L. Banks and Travis C. McGuire .................................................. 1307

Normal Function of Immunologic Stem Cells from Aged Mice. David E. Harrison and John W. Doubldeay .......................... 1314

Mechanism of the Suppressive Effect of Interferon on Antibody Synthesis in Vitro. Bernard R. Brodeur and Thomas C. Merigan .................................................................................. 1323

Functional Heterogeneity among the T-Derived Lymphocytes of the Mouse. IV. Nature of Spontaneously Induced Suppressor Cells. F. Dorr Burns, Philippa C. Marrack, John W. Kappler, and Charles A. Janeway, Jr. ........................................................................ 1345

Induction of Blood Eosinophilia by Pulmonary Embolism of Antigen-Coated Particles: The Relationship to Cell-Mediated Immunity. Robert A. Schriber and Dorothea Zucker-Franklin .......................................................... 1348

Cellular Cooperation during In Vivo Anti-Hapten Antibody Responses. II. The Effect of in Vivo and in Vitro X-Irradiation on T and B Cells. Charles A. Janeway, Jr. .................................................. 1402

Cellular Cooperation during In Vivo Anti-Hapten Antibody Responses. III. The Helper Cell Activity of Activated Thymocytes, of Spleen Cells Treated with Anti-8 Serum, and of Spleen Cells from Anti-Thymocyte Serum-Treated or Adult Thymectomy Donors. Charles A. Janeway, Jr. .................................................................. 1408

IMMUNOCHEMISTRY

Detection of Membrane-Associated Antigens on Lymphoid Cells by Antibody Coupled to Staphylococcal Protein A. Raymond Kearney, Eunice Chia, and Antony Basten .............................................................................. 1143

Complement-Dependent Alterations in the Handling of Immune Complexes by NZB/W Mice. Gary W. Miller, Alfred D. Steinberg, Ira Green, and Victor Nussenweg .................................................................. 1166

Immunologic and Physicochemical Properties of Enhancing Soluble Factors for IgG and IgE Antibody Responses. Tadamitsu Kishimoto and Kimishige Ishizaka ...................................................................... 1177

Non-Random Distribution of Surface Immunoglobulin on Murine B Lymphocytes. Abul K. Abbas, Kenneth A. Adult, Morris J. Karnovsky, and Emil R. Unanue .................................................................................. 1197

Control of J Chain Biosynthesis in Relation to Heavy and Light Chain Synthesis, Polymerization and Secretion. Hideko Kaji and R. M. E. Parkhouse ............................................................................. 1218

The Nature of Murine Immune Response to Nucleic Acids. Sara Fuchs, Edna Mozes, and B. D. Stollar .......................................................................................... 1287

Studies on the Control of Antibody Synthesis. IX. Effect of Boosting on Antibody Affinity. Young Tai Kim, Donald Gershbaum, Paul Davis, Steven A. Fink, Theodore P. Werblin, and Gregory W. Siskind ........................................................................ 1302

A Study of the Association of Human Secretory Component with IgA and IgM Proteins. Jena Weickel and Brian J. Underdown .................................................................................. 1337

Antibody Affinity. VIII. Measurement of Affinity of Anti-Lactose Antibody by Fluorescence Quenching with a DNP-Containing Ligand. F. V. Gopalakrishnan and Fred Karush ............................................................................. 1359

Delayed Clearance of Morphine from the Circulation of Rabbits Immunized with Morphine-6-Hemisuccinate-Bovine Serum Albumin. Jeffrey H. Hill, Bruce H. Wainer, Frank W. Mitch, and Richard M. Rothberg ............................................................................. 1363
Transplantable Immunoglobulin-Secreting Tumors in Rats. VI. N-Terminal Sequence Variability in LOU/C/Wsl Rat Monoclonal Heavy Chains. Pierre Quevillon, Hervé Bazin, J. Michael Kehoe, and J. Donald Capra

Changes in the Immunochemical Properties of Highly Purified Properdin in Human Serum. Joe Oduro Minta

IMMUNOGENETICS AND TRANSPLANTATION

Genetic Control of the Immune Response to the H-2 Associated Slp Alloantigen in the Mouse. Howard C. Passmore and Ted H. Hansen

Serologic and Biochemical Studies of the Ia System of the Mouse H-2 Gene Complex. Further Evidence for an I-C Subregion. Chella S. David, Susan E. Cullen, and Donal B. Murphy

In Vitro Studies on Allotype Suppression. II. Regulation of Antibody Synthesis by Anti-Allotype Serum. Louise T. Adler, Marvin Fishman, and Frank L. Adler

The Allogeneic Effect: M-Locus Differences Substitute for Differences in the H-2 Major Histocompatibility Complex. Martin Röllinghoff and Hermann Wagner

The Frequency of Phosphorylcholine-Specific B Cells in Conventional and Germfree BALB/c Mice. Nolan H. Sigal, Patricia J. Gearhart, and Norman R. Klinman

IMMUNOPATHOLOGY

Effect of Cortisone on the Disappearance Kinetics and Tissue Localization of Soluble Immune Complexes. Alan O. Haa kenstad, Jean B. Case, and Mart Mannik

Pathogenesis of Experimental Allergic Uveitis Induced by Retinal Rod Outer Segments and Pigment Epithelium. Roberta L. Meyers and Thomas H. Pettitt

Presence of Thymic Antigen on Rabbit Basophils. Richard P. Day, Dharam J. Singal, and John Bienenstock

Role of Eosinophil in the Allergic Reactions. I. EDI—an Eosinophil-Derived Inhibitor of Histamine Release. Thomas Hub scher

Role of the Eosinophil in the Allergic Reactions. II. Release of Prostaglandins from Human Eosinophil Leukocytes. Thomas Hub scher

TUMOR IMMUNOLOGY

Antibody-Dependent Lymphocyte Cytotoxicity in the Murine Sarcoma Virus System: Activity of IgM and IgG with Specificity for MLV-Determined Antigen(s). Eddie W. Lam on, Henry M. Skurzak, Birger Andersson, Hal D. Whitten, and Eva Klein

Tumor Development after Polyoma Infection in Athymic Nude Mice. Osias Stutman

Lysis of Tumor Cells by Antibody and Complement. II. Lack of Correlation between Amount of C4 and C3 Fixed and Cell Lysis. Sarkis H. Ohanian and Tibor Borsos

Antibody Production and Interaction with Lymphoid Cells in Relation to Tumor Immunity in the Moloney Sar coma Virus System. Minoru Harada, Gary Pearson, Lena Redmon, Elaine Winters, and Sidney Kasuga

VIRAL AND MICROBIAL IMMUNOLOGY

Malaria (Plasmodium knowlesi) Merozoites: Immunity and the Surface Coat. Louis H. Miller, Masamichi Aikawa, and James A. Dvorak

Humoral Immunity in Rodent Malaria. III. Studies on the Site of Antibody Action. Carter L. Diggs and Abraham G. Osler

COMMUNICATIONS

Release of Cyclic AMP from Macrophages by Stimulation with Prostaglandins. Diethard Gemsa, Ludwig Stegemann, Jörg Menzel, and Gerdt Till

A Vaccination Procedure against Trypanosoma cruzi Infection in Mice by Nonspecific Immunization. Librado Ortiz-Ortiz, Amado Gonzalez-Mendoza, and Edmund Lamoyi

Antibodies to Thymocytes in Sera of Normal Controls and of Patients with Schizophrenia. D. P. Singal, P. Gorf, and D. MacCrimmon

Interference of Anti-Allotype Antibodies with Antigen-Allotype Antibody. Oreste Acuto, Ciro Manzo, Adriana Pane, Silvia Fontana, Serafino Zappacosta, and Roberto Tosi

Amyloid Fibril Protein Related to Immunoglobulin x-Chains. Martha Skinner, Merrill D. Benson, and Alan S. Cohen
