**Contents for August**

### CELLULAR IMMUNOLOGY

- Antagonism of B Lymphocyte Mitogenesis by Anti-Immunoglobulin Antibody. **John W. Schrader** ............................................ 323
- Thymus Influence on the Conversion of 19S to 7S Antibody Formation in the Response to TNP-Brucella. **Thomas J. Romano and G. Jeanette Thorbecke** .................. 322
- Pretreatment of Murine Thymocytes by Phytohemagglutinin Inhibits the Binding of H-Concanavalin A. **Keiko Ozato, James D. Ebert, and William H. Adler** ................. 339
- Peyer’s Patches, Gut IgA Plasma Cells and Thymic Function: Study in Nude Mice Bearing Thymic Grafts. **Delphine Guy-Grand, Claude Griselli, and Pierre Vassalli** ........... 361
- Restoration of in Vitro Immune Responsiveness of Mastocytoma-Suppressed Splenocytes by Activated T Cells. **Isao Kamo, Chande Patel, Navin Patel, and Herman Friedman** ....... 382
- Receptors for Antigen on Lymphoid Cells. II. The Nature of the Molecule Responsible for Plaque-Forming Cell Adherence. **Elizabeth A. Greeley and David W. Scott** ........ 409
- Macrophage-Lymphocyte Interaction: Antigen-Independent Binding of Antigenic Pig Lymph Node Lymphocytes by Macrophages. **Peter E. Lipsky and Alan S. Rosensthal** ............. 440
- Regulation of Lymphocyte Trapping: The Negative Trap. **Marion M. Zatz and Richard K. Gershon** ........................................ 450
- T Cell Activation and Cellular Co-operation in Autoimmune NZB/NZW F1 Hybrid Mice. **John C. Roden, David A. Bell, and Shalwan K. Singhal** ........................................ 466
- Inhibition of in Vitro Lymphokine Synthesis by Glucocorticosteroids. **S. M. Wahl, L. C. Altman, and D. L. Rosenstreich** ............................ 476
- Antigenic Selection of IgG Precursor Subpopulations. **L. H. Elliott and T. L. Roszman** ................................ 495
- T Cell Products Activating Stem Cells: Further Studies on the Origin and Action of the Factor(s). **Jan Cerny, Elizabeth B. Waner, and Arnold S. Rubin** ............... 513
- Interaction between Lymphocytes and Inflammatory Exudate Cells. I. Enhancement of Thymocyte Response to PHA by Product(s) of Polymorphonuclear Leukocytes and Macrophages. **Masaru Yoshinaga, Shuji Nakamura, and Hideo Hayashi** ........................................ 533
- The Enhancing Effect of Mitogens on the in Vitro Immune Response of Rabbits. **Carole G. Romball and William O. Weigle** ........................................ 556
- The Effect of Staphylococcal Enterotoxins on the Primary in Vitro Immune Response. **Bennett G. Smith and Howard M. Johnson** ........................................ 575

### IMMUNOCHEMISTRY

- The Molecular Basis of Self-Association of IgG-Rheumatoid Factors. **Richard M. Pope, David C. Teller, and Mart Mannik** ............................ 365
- Synthesis of Surface H-2 Alleantigens in Murine Splenocytes. **Ellen S. Vitetta and Jonathan W. Uhr** .......................... 374
- Structural Studies on Induced Antibodies with Defined Idiotype Specificities. II. The Light Chains of Anti-p-Azophenylarsonate Antibodies from A/J Mice Bearing a Cross-Reactive Idiotype. **J. Donald Capra, Amar S. Tung, and Alfred Nisonoff** .......................... 414
- Specific Suppression of the Antibody Response in Vitro by Serum from Paralyzed Mice. **Paul B. Brown, Heinz Köhler, and Donald A. Rowley** ........................................ 419
- Differential Susceptibility of Rabbit IgA Subclasses to Trypsin Cleavage: Characterization of the Fragments Obtained from the g Subclass. **Jeenan Tseung and Katherine L. Knight** .......................... 454
- The Identification of a Previously Unrecognized Subcomponent of the First Component of Complement. **Seth N. Assimeh and Robert H. Painter** .......................... 482
- The Macromolecular Structure of The First Component of Complement. **Seth N. Assimeh and Robert H. Painter** .......................... 488
- The Antigens and Autoantigens of the Seminal Vesicle. II. Immunoechemical Studies on Rabbit Vesicular Fluid. **Sidney Shulman and Frank R. Obsini** .......................... 549
- A Simple Radioimmunoassay for the Measurement of Human and Rat IgE Levels by Ammonium Sulfate Precipitation. **Dennis Carson, Henry Metzger, and Hervey Bazin** .......................... 561
- Cytoplasmic Immunofluorescence of Bone Marrow Plasma Cells Producing Immunoglobulins of the Four IgG Subclasses. **Andreas Morell, Frantisek Skvaril, Willy Humans, and Rudolf Scherez** .......................... 579
- Distribution of Covalently Bound and Non-Covalently Bound Secretory Component on Subclasses of Rabbit Secretory IgA. **Katherine L. Knight, Marsha L. Vetter, and Thomas R. Malek** .......................... 595
IMMUNOGENETICS AND TRANSPLANTATION

A Method for Detection of Ia Antigens in the Absence of Appropriate H-2 Recombinants. Miroslav Hauptfeld, Vera Hauptfeld, and Jan Klein .......................................................... 351

The Induction and Abolition of Specific Immunosuppression of Heart Allografts in Rats by Use of Donor Blood and Cyclophosphamide. Richard Marquet and Gerard Heystek ........................................................................... 405

Genetic Control of Susceptibility to Experimental Allergic Encephalomyelitis and the Ag-B Locus of Rats. David L. Gasser, Joy Palm, and Nicholas K. Gonatas ........................................................................... 431

Class Differences in the Antibody Response of HLC and LLC Mice to Sheep Red Blood Cells. Donald M. Silver and Chi K. Chai ........................................................................... 462

Ia Alloantigen(s) Detected on Thymocytes by Use of a Fluorescence-Activated Cell Sorter. C. G. Fathman, J. L. Cone, S. O. Sharrow, H. Tyrer, and D. H. Sachs ........................................................................... 584

Cellular Distribution of Rabbit IgA Allotypes. W. Carey Hanly and Katherine L. Knight .......................................................... 590

IMMUNOPATHOLOGY

Induction of Mouse Homocytotropic Antibodies to Timothy Pollen Antigens. Sally S. Fairchild and Arthur Malley ........................................................................... 446

Intravascular Effects of IgE Antibody upon Basophils, Neutrophils, Platelets, and Blood Coagulation in the Rabbit. Marilyn Halonen and R. Neal Pinckard ........................................................................... 519

IgE-Induced Blood Coagulation Alterations in the Rabbit: Consumption of Coagulation Factors XII, XI, and IX in Vitro. R. Neal Pinckard, Cheryl Tanigawa, and Marilyn Halonen ........................................................................... 525

TUMOR IMMUNOLOGY

Secondary Cell-Mediated Cytotoxic Response to Syngeneic Mouse Tumor Challenge. Howard T. Holden, Holger Kirchner, and Ronald B. Herberman ........................................................................... 327

Spleen Regulation of Lymphocyte Trapping in Lymph Nodes Draining Tumor Grafts. Richard S. Fightlin, Bernard Lyttton, and Richard K. Gershon ........................................................................... 345

Cytotoxic Activity of Lymphocytes. V. Role of Soluble Toxin in Macrophage-Inhibited Cultures of Tumor Cells. William P. Reed and Zoltan J. Lucas ........................................................................... 395

X Chromosome-Linked Defect of CBA/HN Mice in Production of Tumor-Reactive Naturally Occurring IgM Antibodies. Sue Ellen Martin and W. John Martin ........................................................................... 502

VIRAL AND MICROBIAL IMMUNOLOGY

IgG Antibody Suppression of the IgM Antibody Response to Toxoplasma gondii in Newborn Rabbits. Fausto G. Araujo and Jack S. Remington ........................................................................... 335

Host Defenses against Influenza Virus: The Role of Anti-Hemagglutinin Antibody. Jean-Louis Vielhzier ........................................................................... 434

Immunohistochemical Analysis of a Smith-Like Antigen Isolated from Two Human Strains of Staphylococcus aureus. Walter W. Karakawa and Judith A. Kane ........................................................................... 564

Analysis of Specificity of Polyvirus Inhibitors with Inhibitor-Resistant Mutants of a Strain of Type 1 Poliovirus. Nobuo Hashimoto ........................................................................... 569

COMMUNICATIONS

Concanavalin A Preparations with Activities Related to Bacterial Lipopolysaccharide. Kenneth W. Brunson and Dennis W. Watson ........................................................................... 599

Cell Surface Immunoglobulin. XIV. Synthesis, Surface Expression, and Secretion of Immunoglobulin by Peyer's Patch Cells in the Mouse. Ellen S. Vittetta, Michael McWilliams, Julia M. Phillips-Quagliata, Michael E. Lamm, and Jonathan W. Uhr ........................................................................... 603

Radioresistance of Cells Responsible for Delayed Hypersensitivity Reactions in the Mouse. J. Kettman and M. C. Mathews ........................................................................... 606

SPECIAL REPORTS

Clinical Immunology: Meeting Report of the Committee on Hospital-Based Laboratory and Clinical Immunology of the American Association of Immunologists, 1975 ........................................................................... 609
