Antibody-Dependent Cell-Mediated Cytotoxicity in Humans. III. Effect of Protease Inhibitors and Substrates. GIORGIO TRINCHIERI AND MARIO DE MARCHI ....................................................... 885
Characterization of T and B Antigen-Binding Cells for β-Galactosidase. II. T Antigen-Binding Cells. SUSAN SWAIN, FARROKH MODABBER, AND ALBERT H. COONS ..................................................... 923
Effects of Sodium Periodate Modification of Lymphocytes on the Sensitization and Lytic Phases of T Cell-Mediated Lympholysis. ANNE-MARIE SCHMITT-VERHULST AND GENE M. SHEARER ..................................................... 947
Age-Associated Involution of Cellular Immune Function. I. Accelerated Decline of Mitogen Reactivity of Spleen Cells in Adult Thytemctomized Mice. JUDITH A. PACHCIARZ AND PERRY O. TEAGUE ..................................................... 982
Artifactual Plaque Formation in Vitro and in Vivo Due to Passive Transfer of Specific Antibody. A. V. MUCHMORE, I. KOSKI, N. DOOLEY, AND R. M. BLAESER ..................................................... 1016
Characterization of Cells that Suppress the Cytotoxic Activity of T Lymphocytes. I. Quantitative Measurement of Inhibitor Cells. DAVID A. CLARK, R. A. PHILLIPS, AND R. G. MILLER ..................................................... 1020
Increased Cytolytic T Lymphocyte Activity Induced by 2-Mercaptoethanol in Mixed Leukocyte Cultures: Kinetics and Possible Mechanisms of Action. JOHN W. HARRIS, H. ROBSON MACDONALD, HOWARD D. ENGERS, FRANK W. FITCH, AND JEAN-CHARLES CEROTTINI ..................................................... 1071
Eosinophils and Immune Mechanisms. III. Production of the Lymphokine Eosinophil Stimulation Promoter by Mouse T Lymphocytes. BRUCE M. GREENE AND DANIEL G. COLLEY ..................................................... 1078
Cell-Mediated Immune Response in Vitro. I. The Development of Suppressor Cells and Cytotoxic Lymphocytes in Mixed Lymphocyte Cultures. TOSHIKO HIRANO AND ALBERT A. NORDIN ..................................................... 1115
Regulatory Substances Produced by Lymphocytes. III. Evidence That Lymphotixin and Proliferation Inhibitory Factor Are Identical and Different from the Inhibitor of DNA Synthesis. YUZIRO NAMBA AND BYRON H. WAKSMAN ..................................................... 1140
Studies on Tolerance Induction in Vitro. II. Requirements for the Generation and Transfer of Suppressor Cell Activity. ANNETTE E. SCHAEPER, MARVIN FISHMAN, AND LOUISE T. ADLER ..................................................... 1157
IgM-Mediated, T Cell-Independent Suppression of Humoral Immunity. JOHN ORDAL, SEAN SMITH, DOLLY NESS, RICHARD K. GERSHON, AND F. CARL GRUMET ..................................................... 1182
The Induction of Hapten-Specific Immunologic Tolerance and Immunity in B Lymphocytes. I. The Effect of Delayed Immunization on the Adoptive Response to TNP-LPS. JOHN M. FIDLER ..................................................... 1188

CLINICAL IMMUNOLOGY
Characterization of a Subpopulation of Human T Lymphocytes Reactive with an Heteroantiserum to Human Brain. JEAN-CLAUDE BROUET AND HOWARD TOREN ..................................................... 1041
Synthesis of Gm Allotypes by Human Tonsillar Lymphocytes in Culture: Concordance with Serum Phenotype. STEPHEN D. LITWIN, THOMAS H. HUTTEROTH, AND LINDA BALABAN ..................................................... 1045
Hereditary C2 Deficiency: Diagnosis and HLA Gene Complex Associations. DAVID J. GIBSON, DAVID GLASS, C. B. CARPENTER, AND PETER H. SCHUR ..................................................... 1065
The Active E Rosette Test: Correlation with Delayed Cutaneous Hypersensitivity. PETER J. FELSBURG, ROBERT EDELMAN, AND ROBERT H. G-.MAN ..................................................... 1110

IMMUNOCHEMISTRY
Separate Fc-Receptors for Immunoglobulins IgG2a and IgG2b on an Established Cell Line of Mouse Macrophages. WILLIAM S. WALKER ..................................................... 911
Antibodies Specific to Isoniazid and Isonicotinic Acid. KAM S. TSER, HARI VIJAY, NICHOLAS ATTALLAH, AND ALEC H. SEBON ..................................................... 965
Two Immunochemically and Physicochemically Distinct Secretory Components from Rat Exocrine Secretions. JOHN C. CAMBIER AND J. E. BUTLER ..................................................... 994
Effect of Proteolytic Digestion on the Structure and Function of Human Properdin. JOE O. MINTA AND EDITH S. KUNAR ..................................................... 1099
A Phosphorycholine Idiotype Related to TEPC 15 in Mice Infected with Ascaris suum. ALAN R. BROWN AND CATHERINE A. CRANDALL ..................................................... 1105
The Effect of Serum Inhibitor on the Antigenic and Mitogenic Responses to E. coli bacteria. WANDA J. POE AND J. GABRIEL MICHAEL ..................................................... 1129
Amyloid Fibril Protein AA. Purification and Properties of the Antigenically Related Serum Component as Determined by Solid Phase Radioimmunoassay. JEAN D. SIFE, THOMAS F. IGNACZAK, P. SCOTT POLLOCK, AND GEORGE G. GLENNER ..................................................... 1151
The Induction by Complement of a Change in KSCN-Dissociable Red Cell Membrane Lipids. ELDA B. GIAVEDONI AND AUGUSTIN P. DALMASSO ..................................................... 1163
Cell Membrane IgD: Demonstration of IgD on Human Lymphocytes by Enzyme-Catalyzed Iodination and Comparison with Cell Surface Ig of Mouse, Guinea Pig, and Rabbit.  FRED D. FINKELMAN, JOHN A. van BOXEL, RICHARD ASOFSKY, AND WILLIAM E. PAUL .......................................................... 1173

IMMUNOGENETICS AND TRANSPLANTATION

Inhibition of Stimulation in Murine Mixed Lymphocyte Cultures with an Alloantisem Directes against a Shared La Determinant.  RONALD H. SCHWARTZ, C. GARRISON FATHMAN, AND DAVID H. SACHS .......................................................... 929

Motheaten, an Immunodeficient Mutant of the Mouse. II. Depressed Immune Competence and Elevated Serum Immunoglobulins.  LEONARD D. SHULTZ AND MARGARET C. GREEN .......................................................... 936

Genetic Control of the Immune Response to Nuclease. II. Detection of Idiotypic Determinants by the Inhibition of Antibody-mediated Nuclease Inactivation.  C. GARRISON FATHMAN AND DAVID H. SACHS .......................................................... 959

Specific Positive and Negative Selection of Rat Lymphocytes Reactive to Strong Histocompatibility Antigens: Activation with Allantigens in Vitro and in Vivo.  DARCY B. WILSON, ANN MARSHAK, AND JONATHAN C. HOWARD .......................................................... 1030

The Host Antigen Phenomenon in Experimental Murine Schistosomiasis. II. Failure to Demonstrate Destruction of Parasites Transferred from Hamsters to Mice.  MARKLEY H. BOYER AND DANA G. KETCHEM .......................................................... 1093

IMMUNOPATHOLOGY

Neutrophil Receptors for IgG and Complement: Their Roles in the Attachment and Ingestion Phases of Phagocytosis.  DUNCAN J. SCHNIRER AND DAVID FAHNNY .......................................................... 892

In Vitro Hemolysis of Autologous Erythrocytes Caused by Immune Murine Spleen Cells and Spherules of the Fungus Coccidioides immitis.  DAVID L. DANLEY, DEMOSTHENES PAPPAGANIS, AND ELIEZER BENJAMINI .......................................................... 970

Specific Antigen-Binding and Antibody-Secreting Lymphocytes Associated with the Erythrocyte Autoantibody Responses of NZB and Genetically Unrelated Mice.  DAVID H. DEHEER AND THOMAS S. EDGINGTON .......................................................... 1051

The Host Antigen Phenomenon in Experimental Murine Schistosomiasis. II. Failure to Demonstrate Destruction of Parasites Transferred from Hamsters to Mice.  MARKLEY H. BOYER AND DANA G. KETCHEM .......................................................... 1093

TUMOR IMMUNOLOGY

Separation of Effector Cells Mediating Antibody-Dependent Cellular Cytotoxicity (ADC) to Erythrocyte Targets from the Mediating ADC to Tumor Targets.  SYLVIA B. POLLACK, KAREN NELSON, AND J. D. GRAUZ .......................................................... 944

Immune Mechanisms in Leukemia: Protective Capacity of the Major Lymphoid Cell Compartments.  OMELAN A. LUKASEWYCZ, PAUL S. DUFFEY, AND WILLIAM H. MURPHY .......................................................... 976

Immunologic Reactivity to Soluble Autochthonous Tumor Extracts in Dogs with Spontaneous Malignancies.  MANG-SO TSOI, PAUL L. WEIDEN, AND RAINER STORB .......................................................... 1134

Temporary Inhibition of Antibody-Dependent, Cell-Mediated Cytotoxicity by Pretreatment of Human-Attacking Cells with Ammonium Chloride.  ISRAEL YUST, RICHARD W. SMITH, JOHN R. WUNDERLICH, AND DEAN L. MANN .......................................................... 1170

VIRAL AND MICROBIAL IMMUNOLOGY

Effect of Cross-Immunization on Monotypic Antibody Responses to Herpes Simplex Virus Types 1 and 2.  JERRY W. SMITH AND JOSEPH C. GLORioso .......................................................... 898

Secondary IgG Responses to Type III Pneumococcal Polysaccharide. II. Different Cellular Requirements for Induction and Elicitation.  HELEN BRALEY-MULLEN .......................................................... 904

The Effect of Bordetella pertussis on the Antibody Response in Mice to Type III Pneumococcal Polysaccharide.  AH SWEK KONG AND STEPHEN I. MORSE .......................................................... 989

Local and Systemic Cell-Mediated Immunity against Transmissible Gastroenteritis, an Intestinal Viral Infection of Swine.  G. THOMAS FREDERICK AND EDWARD H. BOHL .......................................................... 1000

Immune Serum-Mediated Cytotoxicity against Trypanosoma rhodesiense.  CARTER DIGGS, BARBARA FLEMMINGS, JAMES DILLON, RALPH SNODGRASS, GARY CAMPBELL, AND KLAUS ESSER .......................................................... 1005

Replication of Measles Virus in Continuous Lymphoid Cell Lines.  MARIE R. GALLAGHER AND THOMAS D. FLANAGAN .......................................................... 1084

Radioimmunoassay for Detection of Antigen and Antibodies of Newcastle Disease Virus.  GAD SPIRA, ILANA SILVIAN, AND ZICHRIA ZARAY-ROSES .......................................................... 1089

Release of Xenotropic Type-C RNA Virus in Response to Lipopolysaccharide: Activity of Lipid-A Portion upon B Lymphocytes.  S. MICHAEL PHILLIPS, JOHN R. STEPHENSON, JOEL S. GREENBURGER, PATRICIA E. LANE, AND STUART A. AARONSON .......................................................... 1123

Mitogen Induction of Murine C-Type Viruses. I. Analysis of Lymphoid Cell Subpopulations.  GEH HARD SCHUANN AND CHRISTOPH MORONI .......................................................... 1145

COMMUNICATION

The Defect in \( \mu \) Heavy Chain Disease Protein GLI.  EDWARD C. FRANKLIN, BLAS FRANGIONE, AND FRANCES PRELLI .......................................................... 1194

LETTERS TO THE EDITOR .......................................................... 1196

ANNOUNCEMENTS .......................................................... 1198
