THE JOURNAL OF IMMUNOLOGY®

Contents for May

CELLULAR IMMUNOLOGY

IgM Complex Receptors on Subpopulations of Murine Lymphocytes. E. W. LAMON, B. ANDERSSON, H. D. WHITTEM, M. M. HURST, AND V. GHANTA .................................................. 1199

Induction of Immunologic Tolerance in Nursing Neonates by Absorption of Tolerogen from Colostrum. JOHN F. HALSEY AND D. C. BENJAMIN ........................................................................................................ 1204

Effect of Lipopolysaccharide on the Induction of Tolerance to Polymerized Flagellin. DAVID W. SCOTT AND ERWIN DIENER ........................................................................................................ 1220

Preparation and Effects of an Anti-B Cell Serum. TERUTAKA KAKIUCHI, HIDEO NARIUCHI, AND NOBORU TAMURA ........................................................................................................ 1224

Effects of C-Reactive Protein on the Lymphoid System. II. Inhibition of Mixed Lymphocyte Reactivity and Generation of Cytotoxic Lymphocytes. RICHARD F. MORTENSEN AND HENRY GEWURZ ........................................................................................................ 1244

Spleenic Suppressing Factor: Purification and Characterization of a Factor Suppressing Thymidine Incorporation into Activated Lymphocytes. TADASHI KASAHARA AND KOEI SHIOHII-NAKANO ................................................. 1251

Reaginic Antibody Formation in the Mouse. VII. Induction ofSuppressor T Cells for IgE and IgG Antibody Responses. KIYOSHI TAKATSU AND KIMISHIGE ISHIZAKA ........................................................................................................ 1257

Enumeration and Isolation of Rabbit T and B Lymphocytes by Using Antibody-Coated Erythrocytes. BARRY S. WILSON, MARIUS TEODORESCU, AND SHELDON DRAY ........................................................................................................ 1306

The Suppressive Effect of Immunization on the Proliferative Responses of Rat T Cells in Vitro. II. Abrogation of Antigen-Induced Suppression by Selective Cytotoxic Agents. JERRY A. BASH, ANDREW M. SINGER, AND BYRON H. WAKSMAN ........................................................................................................ 1350

Antigen-Specific and Nonspecific Mediators of T Cell/B Cell Cooperation. II. Two Helper T Cells Distinguished by their Antigen Sensitivities. PHILIPPA MARRACK AND JOHN W. KAPFLE .................................................. 1373

Antigen-Specific and Nonspecific Mediators of T Cell/B Cell Cooperation. III. Characterization of the Nonspecific Mediator(s) from Different Sources. LEE HARWELL, JOHN W. KAPFLE, AND PHILIPPA MARRACK ........................................................................................................ 1379

Role of T Lymphocytes in the Humoral Immune Response. II. T Cell-Mediated Regulation of Antibody Avidity. ROBERT W. WARREN, SUZANNE MURPHY, AND JOSEPH M. DAVIE ........................................................................................................ 1385

The Effects of Antigen Dose and Adjuvant on the Antibody Response: Amplification of Restricted B Cell Lines. CURT I. CIVIN, HERBERT B. LEVINE, ALAN R. WILLIAMSON, AND STUART F. SCHLOSSMAN ........................................................................................................ 1400

Immunglobulin-Positive Mononuclear Cells in Human Peripheral Blood: Detection by Mixed Anti-globulin and Direct Anti-globulin-Rosetting Reactions. DAVID G. HAEGERT AND ROBIN R. A. COOMBS ........................................................................................................ 1426

Macrophage Requirements of CR- and CR+ B Lymphocytes for Antibody Production in Vitro. MICHAEL K. HOFFMANN, ULRICH HAMELING, MARKUS SIMON, AND HERBERT F. OETTGEN ........................................................................................................ 1447

Regulatory Serum Lipoproteins. Regulation of Lymphocyte Stimulation by a Species of Low Density Lipoprotein. LINDA K. CURTISS AND THOMAS S. EDGINGTON ........................................................................................................ 1452

Enhancement of DNA Synthesis and cAMP Content of Mouse Thymocytes by Mediator(s) Derived from Adherent Cells. JOOST J. OPPENHEIM, AMIR SHINOUR, AND ABRAHAM I. KOOK ........................................................................................................ 1466

Studies on T Cell Clonal Expansion. II. The in Vitro Differentiation of Pre-killer and Memory T Cells. RAMESH KAMAT AND CHRISTOPHER S. HENNEY ........................................................................................................ 1490

CLINICAL IMMUNOLOGY

The Significance of Varying SRBC/Lymphocyte Ratio in T Cell Rosette Formation. REX L. CHISHOLM AND DAVID G. TUBERGEN ........................................................................................................ 1397

Isolation and Partial Characterization of SAA—an Amyloid-Related Protein from Human Serum. C. JULIAN ROSENTHAL, EDWARD C. FRANKLIN, BLAS FRANGIONE, AND JOEL GREENSPAN ........................................................................................................ 1415

The Relative Paucity of IgE in Human Milk. BRIAN J. UNDERDOWN, ALLAN KNIGHT, AND FRED R. FAPSIN ........................................................................................................ 1436

IMMUNOCHEMISTRY

Purification and Characterization of a Liver-Specific Antigen. ANASTASIOS A. MIHAS, BASIL I. HIRSCHOWITZ, AND GAETANO SACCOMANI ........................................................................................................ 1228

Biologic Activities of Rabbit Immunoglobulin G in Relation to Domains of the Fc Region. ZOLTAN OAVARY, PAUL H. SALUK, LUIS QUIJADA, AND MICHAEL E. LAMM ........................................................................................................ 1265

Local Immunization in the Mammary Glands of the Rabbit. JEAN HURLIMANN AND MIREILLE LICHAA ........................................................................................................ 1295

An Enzyme-Linked Procedure for the Detection and Estimation of Surface Receptors on Cells. DEBORAH J. CAMERON AND BERNARD F. ERLANGER ........................................................................................................ 1313
Specific Removal of Bovine Serum Albumin (BSA) Antibodies in Vivo by Extracorporeal Circulation over BSA Immobilized on Nylon Microcapsules. David S. Terman, Tracie Tavel, Donald Petty, Arnold Tavel, Ronald Harbeck, and Ronald Carr ................................................................. 1337

Trypsin Increases in Vitro Antibody Synthesis and Substitutes for Helper T Cells. Roland H. Gisler, Thomas L. Vischer, and Peter Dukor ...................................................................................................................... 1354

The Binding of Complexes Formed between a Rabbit Antibody and Oligosaccharides of Increasing Size. Jean-Charles Jaton, Hans Huser, Walter F. Riesen, Joseph Schlessinger, and David Givol ........................................................................................................... 1363

IMMUNOGENETICS AND TRANSPLANTATION

Differentiation of Thymocytes: Evidence that Induction of the Surface Phenotype Requires Transcription and Translation. Brian Storrie, Gideon Goldstein, Edward A. Boyse, and Urliech Hammerling ........................................................................................................... 1358

The Function of Macrophages in Antigen Recognition by Guinea Pig T Lymphocytes. III. Genetic Analysis of the Antigens Mediating Macrophage-T Lymphocytes Interaction. Ethan M. Shevach ......................................................................................................................... 1482

IMMUNOPATHOLOGY

Mechanisms of Resistance against Experimental Trypanosoma cruzi Infection: The Importance of Antibodies and Antibody-Forming Capacity in the Biozzi High and Low Responder Mice. Felipe Kierszenbaum and James G. Howard ........................................ 1208

Changes in C3 Metabolism during Protozoan Infection (Babesia rodhaini) in Rats. William E. Chapman and Peter A. Ward ........................................................................................................................................ 1284

Effects of C-Reactive Protein on Platelet Function. I. Inhibition of Platelet Aggregation and Release Reactions. Barry A. Fiedel and Henry Gewurz ....................................................................................... 1289

Increased Iodine Uptake by Obese Thyroid Glands Transplanted to Normal Chick Embryos. Roy S. Sundick and Georg WicK .................................................................................................................................. 1319

Studies on Autoimmune Encephalomyelitis in the Guinea Pig. II. An in Vitro Investigation on the Nature, Properties, and Specificity of the Serum-Demyelinating Factor. René Lebar, Jeanne-Marie Boutry, Christine Vincent, Roger Robineaux, and Guy André Voisin ........................................................................................................ 1439

TUMOR IMMUNOLOGY

Endodermally-Derived and Neural Crest-Derived Differentiation Antigens Expressed by a Human Lung Tumor. C. Elliott Bell, Jr., Shakuntla Seshathar, and Robert C. McDaniel ........................................................................................................................... 1236

Studies on the Terminal Stages of Antibody-Complement-Mediated Killing of a Tumor Cell. II. Inhibition of Transformation of T* to Dead Cells by 3'5' cAMP. Michael D. P. Boyle, Sarkis H. Ohanian, and Tibor Borsos ........................................................................................................................................ 1276

Release of Tumor-Associated Antigens by Murine Melanoma Cells. Jean-Charles Bystyn ...................................................................................................................................................... 1302

Naturally Soluble Tumor Antigens from Guinea Pig Hepatomas: Isolation and Partial Characterization. Barbara Detrick-Hooks, Howard G. Smith, Robert C. Bast, Jr., Virginia C. Dunkel, and Tibor Borsos ........................................................................................................................................ 1324

Immunologic Cross-Reactivity of Antigen(s) Induced by Drug Treatment in Two Leukemic Sublines. Angelo Bini, Franco Di Padova, and Abraham Goldin ......................................................................................................... 1347

Generation of Cytotoxic Lymphocytes in Vitro: Response of Immune Rat Spleen Cells to a Syngeneic Gross Virus-Induced Lymphoma in Mixed Lymphocyte-Tumor Culture. Irwin D. Bernstein, Peter W. Wright, and Edith Cohen ........................................................................................................................................ 1367

Antibody against the Antigen Receptor of a Plasmacytoma Prolongs Survival of Mice Bearing the Tumor. Patrick G. Beatty, Byung S. Kim, Donald A. Rowley, and Lionel W. Coppleston ........................................................................................................................................ 1391

Shared Antigens between Human Malignant Melanoma Cells and Mycobacterium bovis (BCG). Percy Minden, Thomas R. Sharpston, and J. Kenneth McClatchy ......................................................................................... 1407

Cell-Mediated Immunity to Friend Virus-Induced Leukemia. IV. In Vitro Generation of Primary and Secondary Cell-Mediated Cytotoxic Responses. Chou-Chik Ting and Guy D. Bonnard ...................................................................................... 1419

VIRAL AND MICROBIAL IMMUNOLOGY

Effect of Murine Cytomegalovirus on the in Vitro Responses of T and B Cells to Mitogens. Mary Jane K. Selgrade, Aftab Ahmed, Kenneth W. Sell, M. Eric Gershwin, and Alfred D. Steinberg ..................................................................................................................... 1459
