BIONETICS Laboratory Products

Immunology and Virology Reagents

ANTISERA PRODUCTS

Goat and Rabbit Heavy Chain Specific Antisera to Mouse Immunoglobulins
- γA (IgA)
- γM (IgM)
- γG1 (IgG)
- γG2a (IgG)
- γG2b (IgH)

Goat Heavy Chain Specific Antisera to Guinea Pig Immunoglobulins
- γM (IgM)
- γG (7S)

Anti-theta Sera
- AKR/J Ascites Anti-C3H/HeJ
- AKR/J Serum Anti-C3H/HeJ
- Rabbit Anti-Mouse Brain (C3H)
- Rabbit Anti-Mouse Brain (BALB/c)

OTHER REAGENTS CURRENTLY AVAILABLE

- EBV Antigen Slides
- Concentrated Interferon
- Lymphocyte Separation Medium (LSM® Solution)
- Mouse Immunoglobulins
- Peroxidase-Anti-Peroxidase (PAP)
- Reverse Transcriptase
- RNA Tumor Viruses

SOON TO BE RELEASED

Bionetics Laboratory Products is actively involved in bringing new and useful reagents to the immunology and virology laboratory. Other products soon to be announced include:

- FITC Conjugated Specific Antibody to Mouse Immunoglobulins
- FITC Conjugated Mouse Anti-theta Serum
- Goat Antisera to Human Serum Proteins

BIONETICS Laboratory Products
Litton

5516 Nicholson Lane, Kensington, Maryland 20795 / Telephone: (301) 881-5600
The extensive NYEGAARD product line for centrifugation studies is now available in the USA from ACCURATE.

Featuring:
- Zonal centrifugation
- Isopycnic banding
- Density gradient centrifugation
- Low-speed centrifugation
- Sedimentation/flotation at Ig.

Sodium metrizoate
For isolation of leucocytes, thrombocytes, and other whole cells by flotation and gradient centrifugation. Available as 32.8% (0–1.200 g/ml) and 75% solution of SODIUM METRIZOATE.

Meglumine metrizoate
For discontinuous and linear gradients in the isolation of bacteria, bacterial spores, viruses, spermatozoa as well as subcellular organelles. Available as 76% (containing 10% sodium salt) solution of MEGLUMINE METRIZOATE.

Lymphoprep®
For preparation of pure lymphocyte suspensions in tissue typing, anti-lymphocyte sera production and immunological research. A ready-made mixture of SODIUM METRIZOATE and FICOLL®* with density 1.077 ± 0.001 g/ml. *From Pharmacia Fine Chemicals.

Metrizamide
A non-ionic, inert and easily water soluble compound forming dense solutions of low viscosity. For gradient isolation of cells, viruses, subcellular particles and for isopycnic banding of biological macro-molecules. Available as dry substance in packages of 50g.

The action of Bio/Physics’ instruments ranges from routine blood cell counting to sophisticated, extremely fast flow-through scatter/fluorescent cytophotometry involving the most complex staining reactions on heterogeneous cell populations.

For example, counting immunofluorescent cells. The study of immunological reactions, such as counting T and B lymphocytes, is a significant area in cancer research today. Or monitoring the therapy of leukemic patients, cytographically. Or a study of DNA distribution in rat liver cells that distinguishes cells with diploid, tetraploid and octaploid DNA content. But you’ll have to determine for yourself how the Cytograf and Cytofluorograf can work for you. The best way is to see our instruments in action. We’ll give you a demonstration of our counters’ capabilities—on the cell populations you’re concerned with—at your convenience.

Act now. Call or write: Bio/Physics Systems, Inc., Baldwin Place Road, Mahopac, New York 10541 (914) 628-7451.
SIGMA is pleased to announce an expanding series of

The following additional CANINE Preparations will probably be available soon:

- ADENOSINE DEAMINASE
- GLYCOGEN
- SUPEROXIDE DISMUTASE
- GLOBULIN
- MUCIN
- TRIOSEPHOSPHATE ISOMERASE

If the item you need is not already listed, please inquire.

Affinity chromatography of cells

Cells are isolated on the basis of reactive molecules located in the surface membranes.

CNBr-activated Sepharose® 6MB

- Macrobeads (200–300 μm)
  - excellent flow properties
  - do not physically trap cells
- Pre-activated with cyanogen bromide
  - swell the gel, add ligand, mix to prepare the adsorbent

Orthoplan with fully automatic Leitz 35mm camera and high-intensity light source.

Leitz research microscopes: they change when you change.

Leitz microscopes adapt to every microscopical technique available today. The Leitz building block concept is why. A host of easily-interchangeable accessories: nose-pieces, tubes, stages, cameras, light sources, video monitors, and the Leitz MPV-2 photometer system permit virtually unlimited applications. These microscopes are perfectly suited to your observation methods and easily changeable for new requirements.

Newly developed Leitz planapochromatic objectives assure highest attainable resolution with absolutely flat images even for the super-wide 28mm field.

As the chart shows, the Leitz Ortholux II and Dialux microscopes feature most of the Orthoplan's capabilities at somewhat lower prices. For information call 201-767-1100 or write E. Leitz, Inc., Rockleigh, N.J. 07647. In Canada, Wild Leitz, Ltd., Willowdale, Ont. M2H2C9.

(4) Antiserums to enzymes were produced from enzymes prepared by Worthington Biochemicals Corporation, Freehold, N.J. 07728
This is a new 
P.A.G.E.

Pharmacia Gel Electrophoresis System
for polyacrylamide gradient electrophoresis
and other P.A.G.E. techniques

The complete system
Full capabilities for the new pore gradient electrophoresis technique, two dimensional studies, gel rod electrophoresis.

Polyacrylamide gradient gels PAA 4/30
Convenient ready-to-use gradient gel slabs give extreme resolution over the whole range 50,000–2 million MW. Self-limiting migration concentrates the zones after separation by molecular size.

Gel electrophoresis apparatus GE-4
4 gel slabs, 12 samples on each, or 16 gel rod capacity. Robust moulded construction with built-in cooling system. Full range of accessories for all applications.

Electrophoresis power supply EPS 500/400
Compact, all solid state. 0–400 mA constant current, 0–500 V constant voltage with automatic cross-over. Maximum effect 60 W. Full personnel and instrument protection.

Gel destainer GD-4
Electrophoretic or diffusion destaining of slabs or rods in a single operation. Twin cells. Active dye removal and solvent circulation. Results can be inspected at any time.

Destainer power supply DPS
Compact, reliable, all solid state. Push-button selected constant voltages 12, 24, or 36 V. Timer controls electrophoretic destaining up to 90 minutes.

Find out more about the Pharmacia Gel Electrophoresis System from your usual supplier of Sephadex® and Sepharose®.
We have cultured ferret

...plus the old stand-bys W38, monkey kidney and HeLa, etc. in our catalog. FK60, these and many other items are available to the Cell Raiser. If you don't have our catalog, write.

SUPPRESSOR CELLS IN IMMUNITY

PROCEEDINGS OF AN INTERNATIONAL SYMPOSIUM

Held at the University of Western Ontario, May, 1975. Edited by S. K. Singhal and N. R. Sinclair.

This book brings together into a single volume new information that has emerged over the last several years concerning the roles and mechanisms of suppressor cells in regulation of immune responses including all general and Round Table discussions.

Price $15.00

Order by writing:

LOW COLD

CABINETS You can DEPEND on Scientemp Low Temperature ranges from zero to --140°F (--96°C). Our warranty reflects our commitment to quality engineering and manufacturing.

Available in 16 standard or custom models, Scientemp cabinets are designed to meet laboratory, hospital, university, or industrial needs. Constructed with long-term functional, mechanical, and safety features inside and out, Scientemp cabinets withstand day-to-day demands of research, testing, storage, or processing.

STORAGE CAPSULES You get the most convenient way to organize specimens and the most efficient way to utilize the capacity of your cabinet with Scientemp capsules and accessories.

Scientemp capsules are lightweight, easy to clean and use, multi-purpose storage units designed for use in the laboratory and in low temperature cabinets. A choice of shelves, trays, and racks customizes units to suit your particular needs.

Sets or separate parts are available.
