ANNOUNCEMENTS

Meeting of the International Association for Chemo- and Immunotherapy and the International Association for the Promotion of Clinical and Experimental Research in Medicine

The Congress on Immunotherapy of Malignant Diseases will meet in Vienna, Austria on November 9 and 10, 1977.

The International Symposium on Cell Separation and Cryobiology will meet in Vienna, Austria on November 10 to 12, 1977;

For information please write to:
Dr. H. Rainer
c/o Wiener Medizinische Akademie
Alser Strasse 4, A-1090 Wien, Austria
Telephone (0222) 42 13 83
Cable: Medacad, Wien

Preliminary Notice: Course on Clinical Immunology

A course on Clinical Immunology under the auspices of the British Society for Immunology is to be held in Edinburgh, March 21-25, 1977, in Room 8, William Robertson Building, George Square. The object of this 5-day course is to provide a synopsis of modern basic immunology as applied to clinical medicine.

The registration fee up to 31st January, 1977 is £45 (excluding accommodation and meals) and £50 thereafter. Accommodation will be available in the University Halls of Residence.

Inquiries should be addressed to:
Dr. W. J. Irvine
Clinical Immunology
Department of Therapeutics
Royal Infirmary
Edinburgh EH3 9YW.

ADDENDUM

Note Added in Proof
to appear with the article: A Homologue of the Rabbit Kappa Chain Allele b9 on IgG from a Cottontail Rabbit by Simonetta Landucci Tosi, Rose G. Mage, and Roberto M. Tosi appearing on page 679:

Extensive studies of the phylogeny of rabbit immunoglobulin light chain markers have recently been completed by W. van der Loo, C. Hamers-Casterman and R. Hamers, and reported in a brief communication entitled, "Phylogeny of the rabbit immunoglobulin light chain markers: Distribution of determinants associated with rabbit b-locus in different lagomorph families" published in Arch. Internat. Physiol. Biochim. 89, 54, 1976. A detailed report entitled, "Investigations of the origin of the b-locus polymorphism of the rabbit kappa light chain" is contained in the D. Sc. thesis, Vrije Universiteit Brussels by Dr. W. van der Loo, 1975. Their observations are generally in accord with ours.
The extensive NYEGAARD product line for centrifugation studies is now available in the USA from ACCURATE. Featuring:

- Zonal centrifugation
- Isopycnic banding
- Density gradient centrifugation
- Low-speed centrifugation
- Sedimentation/flotation at Ig.

For isolation of leucocytes, thrombocytes, and whole cells by rotation and gradient centrifugation. Available as 32.8% (0~1.200 g/ml) and 75% solution of SODIUM METRIZOATE Meglumine metrizoate.

For discontinuous and linear gradients in the isolation of bacteria, bacterial spores, viruses, spermatozoa as well as subcellular organelles. Available as 76% (containing 10% sodium salt) solution of MEGLUMINE METRIZOATE.

Lymphoprep for preparation of pure lymphocyte suspensions in tissue typing, antilymphocyte sera production and immunological research. A ready-made mixture of SODIUM METRIZOATE and FICOLL® with density 1.077± 0.001 g/ml.

*Metrizamide, a non-ionic, inert and easily water soluble compound forming dense solutions of low viscosity. For gradient isolation of cells, viruses, etc.

Cell Cultures from Microbiological Associates

Integrity
- Cell cultures are prepared in laboratories supplied with absolute filtered air under positive pressure
- Handling of cell cultures is limited to one cell type per room followed by thorough cleaning of room
- The history of each production lot is maintained through rigid protocol control
- Quality assurance on all media products used in cell production is strictly maintained

Quality
- Cell cultures are screened daily for typical cell morphology and growth pattern
- Haploid and diploid stock and production serial line cultures are tested weekly to insure absence of mycoplasma
- Prior to shipping, cultures are examined microscopically for optimal confluency and characteristic cell morphology
- Representative cultures from each lot of cell cultures are monitored for 14 days by the Quality Assurance Department

Reliability
- Excess cell cultures are produced each week to attain maximum shipping reliability
- We are often able to respond to your last minute requirements for routinely produced cell cultures
- Through our air carrier's communication system, we maintain point to point shipping control

A DIVISION OF Whittaker
THE JOURNAL OF IMMUNOLOGY®

INFORMATION FOR CONTRIBUTORS

Manuscripts should be sent to:
Dr. Joseph D. Feldman
Department of Immunopathology
Scripps Clinic and Research Foundation
La Jolla, California 92037

If and when the manuscript is published, it will become the sole property of The Journal and all copyright will be taken out in the name of The Williams & Wilkins Company, and all rights in copyright reserved to The Williams & Wilkins Company.

Contributions may be short or long; the length should be commensurate with the scientific content. The chief criteria for acceptance are quality, originality, and clarity.

INSTRUCTIONS FOR PREPARATION OF MANUSCRIPT

The original and two (2) copies of the manuscript, including references, legends, figures and illustrations, must be submitted. The text and all other material, e.g., footnotes, references, and acknowledgments, must be typed in double space (at least 3/16-inch or 5-mm spacing from the bottom of one line to the top of a succeeding line) on one side of 8½ inch x 11 inch paper of good quality. The two (2) copies may be legible carbon or mimeographed copies or photocopies.

A short title to be used as a running head (not more than 50 characters) should be typed alone on the first page. Type the complete title on the second page, and the authors' full names (first name, middle initial(s), surname) and affiliations on the third page. The format of The Journal must be followed in typing the text and the list of references. References will be numbered as they appear in the text and will be listed in the format:

Only papers that have been accepted for publication should be listed in the references (i.e., articles that are already paginated or in press). Manuscripts in preparation, unpublished observations, and personal communications should be referred to as such in text; completed manuscripts that have been submitted for publication may be cited as a footnote to the text. If such information is in press when the author receives his galley proofs he may make appropriate citations in the text at that time.

All material to be set in a type size different from that of the text, such as tables, case histories, quotations, formulas, legends for figures and illustrations, footnotes, and references must be typed on separate pages. If abbreviations are to be used in the paper, the abbreviations and their meanings should be typed double spaced, in one paragraph, on a separate sheet. Legends should not be attached to or written on figures or illustrations and must be typed double spaced. The position of tables and figures in the text may be indicated on the page margin.

Illustrations and Photomicrographs. Photographs of figures and other illustrative material must be on glossy paper (in triplicate); they must be clearly marked on the reverse side with the number, author's name, and orientation (top) and should be unmounted. Graphs should be in black ink on unlined or bluelined paper. If graphs exceed 9 x 12 inches in size, they must be accompanied by glossy photographic reproductions within that size.

Communications. Short papers, at the author's request, may be printed in the Communications section of The Journal. These papers should not exceed two (2) printed pages in length, including summary, references, tables and figures. The text of a full printed page contains about 1000 words. If accepted, their publication will be accelerated, usually within two (2) months of acceptance. For this reason, proofs are not sent to the authors, but rather to the Office of the Editor. Suitability for publication will be judged on the basis of timeliness, novelty, and importance by the usual refereeing procedure.

MANUSCRIPTS THAT DO NOT CONFORM TO THESE SPECIFICATIONS MAY NOT BE ACCEPTED, AT THE EDITOR'S DISCRETION.

Page Charges. Authors will be charged $30.00 for each printed page of an article or a Communication. All manuscripts, if accepted, will be published only after commitment by the author(s) or financial officer of their institution to pay a charge of $30.00 per published page. No exceptions can be made.

Reprints. Reprints must be ordered in advance. A form showing the cost of reprints, together with an order slip, is sent with the galley proof. No more than 1000 reprints of any article may be purchased. The invoice for reprints will include the charges for pages.
