Real insurance. We're so convinced that our quality control is absolutely the best you'll find for liquid media, we're backing it with an unprecedented warranty. If the liquid medium you purchase isn't everything you expected, we'll make it doubly right.

In plain English what we're saying is: if any of our liquid media arrives damaged or the quality is unacceptable, we'll replace each bottle on a 2:1 basis.

This applies to all our catalog liquid media. Over 40 different top quality products including BME, BME stock concentrates, MEM, Dulbecco's MEM, Medium 199, and RPMI Medium 1640.

With this type of insurance—what are you waiting for?

We prove our confidence.
CONTENTS

NUMBER 1, JULY 1976

CELLULAR IMMUNOLOGY

40 Generation of Specific Helper Cells and Suppressor Cells in Vitro for the IgE and IgG Antibody Responses. Kimishige Ishizaka and Toshihiro Adachi

66 Antibodies to Guinea Pig Lymphokines. II. Suppression of Delayed Hypersensitivity Reactions by a “Second Generation” Goat Antibody against Guinea Pig Lymphokines. Carolyn L. Geczy, Andrew F. Geczy, and Alain L. de Weck

103 Mouse Lymphotoxin. Glennwood Trivers, Dale Braungart, and Edward J. Leonard

130 Studies on the Maturation of Immune Responsiveness in the Mouse. II. Role of the Spleen. Carol A. Landahl, Ashim Chakravarty, Miriam Sulman, Louis Kubal, and Robert Auerbach

155 Inhibition of Antigen-induced B Lymphocyte Activation in Vitro by Cytochalasin B. Robert L. Roberts, Jr., and Mariano F. La Via

174 Relationship of CIF, LT, and PIF Released in Vitro by Activated Human Lymphocytes. II. A Further Functional Comparison of LT and PIF Activities on HeLa and L-292 Target Cells. Edward W. B. Jeffes III and Gale A. Granger

216 Antibody-mediated Basophil Accumulations in Cutaneous Hypersensitivity Reactions of Guinea Pigs. Philip W. Askenase, J. David Haynes, and Betty J. Hayden

274 The Xenogeneic Effect. II. Requirement for Unactivated Murine T Cells during Restoration of Immune Responsiveness with Xenogeneic Reconstitution Factor. John J. Farrar and Janet Fuller-Bonar

283 Regulatory Factors Produced by Lymphocytes. I. The Occurrence of Multiple α-Lymphotoxins Associated with Ribonuclease Activity. Sheng-Chung Lee and Zoltan J. Lucas

313 Induction of Specific Suppressor T Cells in Vitro. Diane D. Eardley and Richard K. Gershon

319 Suppressor Cells in Spleens from “Nude” Mice: Their Effect on the Mitogenic Response of B Lymphocytes. J. Bruce Smith and Gordon J. Eaton

359 In Vitro Production of IgE by Human Peripheral Blood Lymphocytes: Effect of Cholera Toxin and Adrenergic Stimulation. Roy Patterson, Irena M. Suszko, W. James Metzger, and Mary Roberts

367 Identification of T and B Cell Subpopulations in Human Peripheral Blood: Electrophoretic Mobility Distributions Associated with Surface Marker Characteristics. Joel H. Kaplan and E. E. Uzgiris

386 Chemotactic Responses of Normal Human Basophils to C5a and to Lymphocyte-derived Chemotactic Factor. Michael A. Lett-Brown, David A. Boetcher, and Edward J. Leonard

IMMUNOCHEMISTRY

7 Structural Studies on Induced Antibodies with Defined Idiotypic Specificities. III. N-Terminal Amino Acid Sequence of the Heavy and Light Chains of Mouse Anti-Streptococcal Antibodies—A5A, S8, and S117. J. Donald Capra, Claudia Berek, and Klaus Eichmann

180 Fine Structure of Three Different Anti-fluorescein-Combining Sites: Induced Circular Dichroism of Hapten Bound to Autologous and Heterologous Recombinants. John R. Gollogly and Renata E. Cathou
CONTENTS

Analysis of Immunoglobulin Genes: DNA/RNA Hybridization with Immunoglobulin \(\kappa\)-Chain mRNA and Isolation and Translation of Hybridized RNA. Ursula Storb and Stephanie Marvin

Characterization of an Antiserum Specific for Cell Surface Antigens of Rat Mast Cells. Suk Hing Yiu and Arnold Froese

Visualization of Type I and II Collagens in Tissue Sections by Immunohistologic Techniques. Georg Wick, Hans Nowack, Eckhart Huhn, Rupert Timpl, and Edward J. Miller

Clq (C1) Receptor on Human Platelets: Inhibition of Collagen-Induced Platelet Aggregation by Clq (C1) Molecules. Eva A. Suba and Gyorgy Csako

Studies on Glycopeptide Released by Trypsin from Sheep Erythrocytes. Takeshi Kitao, Masazumi Takeshita, and Kenichi Hattori

IMMUNOGENETICS AND TRANSPLANTATION

Isolation and Partial Characterization of AgF-1-A Rat Lymphocyte Membrane Antigen. Phillip B. C. Williams and Charles W. DeWitt

Identification of a Butanol-Extractable Human Placenta-Specific Antigen with Alkaline Phosphatase Activity. Chin-Hai Chang and Dennis Angellis

Allotype Suppression with Anti-V\(_\kappa\) Allotype Antibody: Concurrent Suppression of V\(_\kappa\) and G\(_\kappa\) Allotypes among IgG, IgM, and IgA Molecules in Multi-heterozygous Rabbits. Daniel P. Eskinazi, Alice Gilman-Sachs, Katherine L. Knight, and Sheldon Dray

An Improved Method for Isolation of H-2 and Ia Allotigens with Immunoprecipitation Induced by Protein A-Bearing Staphylococci. Susan E. Cullen and Benjamin D. Schwartz

Blocking of MLC Stimulation by Anti-Ia Sera: Studies with the Virus Plaque Assay. Shogo Kano, Barry R. Bloom, and Donald C. Shreffler

Hybridization Kinetics of Ribonucleic Acid and Deoxyribonucleic Acid from Antigen-Stimulated Mouse Spleen Cells. Neomi Moav, Drora Goldblatt, Boaz Moav, and Asher Frensdorf

IMMUNOPATHOLOGY

Interaction between Lymphocytes and Inflammatory Exudate Cells. II. A Proteolytic Enzyme Released by PMN as a Possible Mediator for Enhancement of Thymocyte Response. Shuji Nakamura, Masaru Yoshinaga, and Hideo Hayashi

The Requirement for Esterase Activation in the Anti-immunoglobulin-Triggered Movement of B Lymphocytes. Elmer L. Becker and Emil R. Unanue

Protection against Experimental Allergic Encephalomyelitis with Peptides Derived from Myelin Basic Protein: Presence of Intact Encephalitogenic Site is Essential. Bernard F. Driscoll, Marian W. Kies, and Ellsworth C. Alwod, Jr.

Inflammatory Process in Murine Lymphocytic Choriomeningitis Is Maximal in H-2K or H-2D Compatible Interactions. Peter C. Doherty, Malcolm B. C. Dunlop, Christopher R. Parish, and Rolf M. Zinkernagel

Immunosuppression of Experimental Autoimmune Myasthenia Gravis by Hydrocortisone and Azathio-prine. Oded Abramsky, Rebeca Tarrab-Hazdai, Aharon Aharonov, and Sara Fuchs

Eosinophil Chemotactic Factor (ECF). I. Release from Polymorphonuclear Leukocytes by the Calcium Ionophore A23187. Beate M. Czarnetzki, Wolfgang Koenig, and Lawrence M. Lichtenstein

Eosinophil Chemotactic Factor (ECF). II. Release from Human Polymorphonuclear Leukocytes during Phagocytosis. Wolfgang Koenig, Beate M. Czarnetzki, and Lawrence M. Lichtenstein

TUMOR IMMUNOLOGY

Characterization of Effector Lymphocytes Associated with Immunity to Murine Sarcoma Virus (MSV)-Induced Tumors. I. Physical Properties of Cytolytic T Lymphocytes Generated in Vitro and of Their Immediate Progenitors. Fernando Plata, H. Robson MacDonald, and Howard D. Engers

Separation of Populations of Sensitized Lymphoid Cells into Fractions Inhibiting and Fractions Enhancing Syngeneic Tumor Growth in Vivo. Myra Small and Nathan Trainin

VIRAL AND MICROBIAL IMMUNOLOGY

Detection of Antibodies to Bacterial Cell Wall Peptidoglycan in Human Sera. Berno Heymer, Karl-Heinz Schleifer, Stanley Read, John B. Zabriskie, and Richard M. Krause

The Course of Schistosoma mansoni Infection in Thymectomized Rats. Donato Cioli and Gunther Dennert

102 Association of Dane Particles with e Antigen in the Serum of Asymptomatic Carriers of Hepatitis B Surface Antigen. Kazuaki Takahashi, Mitsunobu Imai, Fumio Tsuda, Takashi Takahashi, Yuzo Miyakawa, and Makoto Mayumi

168 Antigenic Analysis of the Major Structural Protein of the Mason-Pfizer Monkey Virus. G. Schochetman, M. Boehm-Truitt, and J. Schlam

191 Humoral Immunity in Experimental Syphilis. I. The Demonstration of Resistance Conferred by Passive Immunization. Nancy H. Bishop and James N. Miller

197 Humoral Immunity in Experimental Syphilis. II. The Relationship of Neutralizing Factors in Immune Serum to Acquired Resistance. Nancy H. Bishop and James N. Miller

208 Analysis of Complement-Dependent Antibody-Mediated Lysis of Target Cells Acutely Infected with Measles. John T. Hicks, Michael J. Klutch, Paul Albrecht, and Michael M. Frank

253 Appearance of IgG (Fc) Receptor(s) on Cultured Human Fibroblasts Infected with Human Cytomegalovirus. Adel A. Rahman, Marion Teschner, Krishan K. Sethi, and Henning Brandis

COMMUNICATIONS

350 Antibody to Murine Leukemia Virus: Genetic Control Linked to the H-2 Locus in PL Mice. Robert C. Nowinski and Theresa Doyle

352 LETTERS TO THE EDITOR

355 ANNOUNCEMENTS

356 AUTHOR INDEX

NUMBER 2, AUGUST 1976

CELLULAR IMMUNOLOGY

381 Induction of Resistance to Toxoplasma Gondii in Human Macrophages by Soluble Lymphocyte Products. Seth E. Anderson, Simeon Bautista, and Jack S. Remington

388 Function of 2-Mercaptoethanol as a Macrophage Substitute in the Primary Immune Response in Vitro. Hilmar Lemke and Hans-Georg Opitz

396 Regulation of Antibody Response in Different Immunoglobulin Classes. I. Selective Suppression of Anti-DNP IgE Antibody Response by Preadministration of DNP-Coupled Mycobacterium. Tadamitsu Kishimoto, Yoshikatsu Hira, Masaki Suemura, and Yuichi Yamamura

419 Immunogen Structure and Cell Selection. I. Cellular Requirements for the In Vitro Response to Moderately Haptenated Forms of the Solid-Phase Immunogen DNP-O-Bio-Gel-P. Gary N. Trump

423 Regulation of the Immune System by Synthetic Polynucleotides. VII. Amplification of the Immune Response in Young and Aging Mice. Ihn H. Han and Arthur G. Johnson

463 B Lymphocytes in the Guinea Pig Thymus are Specifically Localized in the Central Area. Jan P. A. Baak, Chris J. L. M. Meijer, Arie C. Nieuwenhuyzen Kruseman, Henk L. Langevoort, and Louis Kater

467 Structure and Biologic Functions of Human IgD. X. Enhancement of PHA Responsiveness by Anti-b-Activated Lymphocytes. Vali Kermani-Arab, Denis R. Burger, and Gerrie A. Leslie

490 Requirements for Induction of T Cell Tolerance to DNF: Efficiency of Membrane-Associated DNF. Henry N. Claman and Stephen D. Miller

504 Generation of Cytologic T Lymphocytes in Vitro. VIII. Failure of Anti-RS Antisera to Inhibit the Generation of Cytolytic T Lymphocytes or Cytolytic T Lymphocyte Activity. Frank W. Fitch and Hansruedy Ramseier

548 Lymphokine-Like Factors Produced by Human Lymphoid Cell Lines with B or T Cell Surface Markers. Takeshi Yoshida, Tadatoshi Kuratsuji, Akikazu Takada, Yumiko Takada, Jun Minowada, and Stanley Cohen

608 Recruitment of Effector Lymphocytes by Initiator Lymphocytes: Circulating Lymphocytes are Trapped in the Reacting Lymph Nodes. Shmuel Livnat and Irun R. Cohen

614 Recruitment of Effector Lymphocytes by Initiator Lymphocytes: Recruited Lymphocytes are Immunospecific and Include Graft-versus-Host-Reactive Lymphocytes. Shmuel Livnat and Irun R. Cohen

666 In Vitro Activation of Mouse Macrophages by Rat Lymphocyte Mediators. Isaiah J. Fidler, John H. Darnell, and Marilyn B. Budmen

690 Radioimmunoassay for Thymopoietin. Gideon Goldstein

CLINICAL IMMUNOLOGY

IMMUNOCHEMISTRY

364 Isolation and Preliminary Characterization of Two Varieties of Low Molecular Weight Immunoglobulin in the Bullfrog, Rana Catesbeiana. Christopher Green and Lisa A. Steiner
375 Low Molecular Weight Immunoglobulins in Rana Catesbeiana Tadpoles. Christopher Green and Lisa A. Steiner
405 Purification of Native Properdin by Reversed Affinity Chromatography and its Activation by Proteolytic Enzymes. Joe O. Minta
447 Cross-Reactive T Cell Antigens among Mammalian Species. C. M. Balch, M. K. Dagg, and M. D. Cooper

IMMUNOGENETICS AND TRANSPLANTATION

413 Measurement of H-2 and Non-H-2 Antigens in the Mouse with the Footpad Swelling Test. Neal D. Kon and Paul A. Klein
477 Studies on the Genetic Control of Antibody Affinity: The Independent Control of Antibody Levels and Affinity in Biozzi Mice. Fay E. Katz and Michael W. Steward
491 Lack of Association of Human "B Cell" Antigens and Fc Receptor Activity of Antibody-Dependent Cytotoxic Lymphocytes. June L. Miller, Robert E. Humphreys, and Dean L. Mann
531 T Lymphocyte-Enriched Murine Peritoneal Exudate Cells. III. Inhibition of Antigen-Induced T Lymphocyte Proliferation with Anti-Ia Antisera. Ronald H. Schwartz, Chella S. David, David H. Sachs, and William E. Paul
555 Specificity of Allogeneic and Xenogeneic Cell Recognition in the Fetal Lamb. Tuula Asantila and Paavo Toivanen
679 A Homologue of the Rabbit Kappa Chain Allotype b9 on IgG from a Cottontail Rabbit. Simonetta Landucci Tosi, Rose G. Mage, and Roberto M. Tosi

IMMUNOPATHOLOGY

433 The Inhibitory Effect of Chemotactic Factors on Erythrophagocytosis by Human Neutrophils. Robert A. Musson and Elmer L. Becker
471 Duodenal Immunoglobulin Deficiency in Graft-versus-Host Disease (GVHD) Mice. Jerome A. Gold, Jon Kosek, Nancy Wanek, and Sonia Baur
523 Mechanisms Involved in Elimination of Organisms from Experimental Cutaneous Candida albicans Infections in Guinea Pigs. Peter G. Sohnle, Michael M. Frank, and Charles H. Kirkpatrick
576 T Cell Requirement for Experimental Allergic Ecephalomyelitis Induction in the Rat. Librado Ortiz-Ortiz, Robert M. Nakamura, and William O. Weigle
594 Histamine Release by Chemotactic, Formyl Methionine-Containing Peptides. William A. Hook, Elliott Schiffmann, Srinivasabhat Aswaniem, and Reuben P. Siraganian
TUMOR IMMUNOLOGY

440 Two Functionally Distinct Anti-tumor Effector Cells Isolated from Primary Murine Sarcoma Virus-Induced Tumors. Howard T. Holden, J. Stephen Haskill, Holger Kirchner, and Ronald B. Herberman

541 Murine Plasma Cells Secreting More than One Class of Immunoglobulin Heavy-Chain. I. Frequency of Two or More M-components in Ascitic Fluids from 788 Primary Plasmacytomas. Herbert C. Morse, III, Janet G. Pumphrey, Michael Potter, and Richard Asofsky

563 Cellular Specificity of Plasmacytoma-Induced Immunosuppression. Susan Zolla-Pazner, Bessie Sullivan, and Deborah Richardson

580 Strain-, Age-, and Tumor-Dependent Distribution of Terminal Deoxynucleotidyl Transferase in Thymocytes of Mice. Nelson H. Pazmino and James N. Ihle

597 Enzymatic Degradation of Tumor Cells Damaged by Antibody Plus Complement. Arnold E. Reif and Cynthia M. Robinson

620 Altered Lymphocyte Functions in Rats Bearing Syngeneic Moloney Sarcoma Tumors. I. Mitogen Responses, Mixed Lymphocyte Reactions (MLR), and Mixed Lymphocyte-Tumor Reactions (MLTR). Bruce C. Veit and Joseph D. Feldman

655 Altered Lymphocyte Functions in Rats Bearing Syngeneic Moloney Sarcoma Tumors. II. Suppressor Cells. Bruce C. Veit and Joseph D. Feldman

VIRAL AND MICROBIAL IMMUNOLOGY

357 Cellular Immunity in Chronic Theiler's Virus Central Nervous System Infection. Stanley G. Rabino-witz and Howard L. Lipton

602 Inhibition by Rheumatoid Factor, Anti-Fc, and Staphylococcal Protein A of Antibody-Dependent Cell-Mediated Cytolysis against Herpes simplex Virus-Infected Cells. R. Marshall Austin and Charles A. Daniels

635 Neonatal Infection with Mouse Thymic Virus: Differential Effects on T Cells Mediating the Graft-versus-Host Reaction. Sue S. Cross, Herbert C. Morse, III, and Richard Asofsky

693 Immune Response of the Mouse to the Major Core Protein (p30) of Ecotropic Leukemia Viruses. Robert C. Nowinski and Andrew Watson

COMMUNICATIONS

701 Deficient Production of a Thymus-Dependent High Affinity Antibody Subset in Mice (CBA/N) with an X-Linked B Lymphocyte Defect. Richard K. Gershon and Kazunari Kondo

703 In Vivo Activation of Properdin Factor B in Normotensive Bacteremic Individuals. Alan G. Palestine and Martin R. Klemperer

711 Soluble Antigens and Antibodies in Sera from Baboons Infected with Schistosoma mansoni. Vaclav Houba, Dacy K. Koech, Robert F. Starrock, Anthony E. Butterworth, John R. Kusel, and Adel A. F. Mahmoud

713 Genetic Control of the Immune Response in Guinea Pigs to the Known Sequence Polymer (Tyr-Ala-Glu-Gly)n. Allen R. Zeiger and Paul H. Maurer

715 Addendum

717 Author Index

NUMBER 3, SEPTEMBER 1976

CELLULAR IMMUNOLOGY

741 Cutaneous Basophil Hypersensitivity Uncovered in the Cell Transfer of Classical Tuberculin Hypersensitivity. Philip W. Ashenase

802 Tolerance and Contact Sensitivity to DNFB in Mice. VI. Inhibition of Afferent Sensitivity by Suppressor T Cells in Adoptive Tolerance. John W. Moorhead

818 Studies on Human Brain-Thymus Cross-Reactive Antigens. T. P. Maznina and S. G. Kushner

835 Immune Response in the Hamster. VIII. Ig Class Differences in Susceptibility to Tolerance Induction. J. L. Portis and J. E. Coe

865 Leukocyte Migration Inhibitory Factor (LMIF) Production in Unidirectional Mixed Lymphocyte Cultures. Andrzej J. Górski, Bo Dupont, John A. Hansen, and Robert A. Good

926 Circadian Rhythmic Plaque-Forming Cell Response of Spleens from Mice Immunized with SRBC. Gabriel Fernandez, Franz Halberg, Edmond J. Yunis, and Robert A. Good

967 Site of Action of a Soluble Immune Response Suppressor (SIRS) Produced by Concanavalin A-Activated Spleen Cells. Takushi Tadakuma and Carl W. Pierce

1045 The Kinetics of Interferon Production by Mouse Lymphocytes and Its Modulating Effect on the Virus Plaque-Forming Cell Assay as a Quantitative Method to Determine Activated Lymphocytes. Jochen W. Heine and William H. Adler

Characterization of Ia Antigens in Mouse Serum. Gerald N. Callahan, Soldano Ferrone, M. David Poulik, Ralph A. Reisfeld, and Jan Klein

IMMUNOPATHOLOGY

Demonstration of Human Nephritogenic Tubular Antigen in the Serum and Organs by Radioimmunoassay. Yuzu Miyakawa, Kiyoshi Kitamura, Seiichi Shibata, and Takaji Naruse

Comparison of the Pyrogenicity, Limulus Activity, Mitogenicity, and Complement Reactivity of Several Bacterial Endotoxins and Related Compounds. Ronald J. Elin, Ann L. Sandberg, and David L. Rosenstreich

Independent Effects of IgG and Complement upon Human Polymorphonuclear Leukocyte Function. Ira M. Goldstein, Howard B. Kaplan, Allen Radin, and Matthew Frosch

Generation of a Neutrophil Chemotactic Agent by Spermatozoa: Role of Complement and Regulation by Seminal Plasma Factors. Robert A. Clark and Seymour J. Klebanoff

TUMOR IMMUNOLOGY

Inhibition of Normal Allogenic Lymphocyte Mitogenesis by a Soluble Inhibitor Extracted from Human Colonic Carcinoma. Maryse M. Remacle-Bonnet, Gilbert J. Pommier, Solange Kaplanski, Roselyne J. Rance, and Raymond C. Depieds

Depression of Macrophage Function by a Factor Produced by Neoplasms: A Mechanism for Abrogation of Immune Surveillance. Marilyn C. Pike and Ralph Snyderman

Characterization of Ia8 Antigen, Thy-1.2 Antigen, Complement Receptors, and Virus Production in a Group of Murine Virus-Induced Leukemia Cell Lines. Bruce Chesebro, Kathy Wehrly, Kevin Chesebro, and John Portis

Reversal of Cell Surface Abnormalities of T Lymphocytes in Hodgkin’s Disease after in Vitro Incubation in Fetal Sera. Zvi Fuks, Samuel Strober, Donna P. King, and Henry S. Kaplan

Nonspecific Inhibition of Tumor Growth in Vivo by Admixed Allogeneic Tumor-Sensitized Lymphoid Cells and Identical Inactivated Allogeneic Tumor Cells. F. Sendo, M. Nakayama, E. Gotohda, and H. Kobayashi

VIRAL AND MICROBIAL IMMUNOLOGY

1127 Hypergammaglobulinemia in Chickens Congenitally Infected with an Avian Leukosis Virus. Louis F. Quattile and Paul Meyers

1250 Xenogenization of Rat Erythroid Cells by Lymphatic Leukemia Virus: Its Role in Induction of Autoimmune Hemolytic Anemia. Noboru Kuzumaki, Tetsuya Moriuchi, Takao Kodama, and Hiroshi Kobayashi

1392 Large-Scale Isolation of Dane Particles from Plasma Containing Hepatitis B Antigen and Demonstration of a Circular Double-Stranded DNA Molecule Extruding Directly from Their Cores. Takashi Takahashi, Susumu Nakagawa, Takashi Hashimoto, Kanzaki Takahashi, Mitsunobu Imai, Yuzo Miyakawa, and Makoto Mayumi

1398 Primary In Vitro Sensitization of Murine Lymphocytes against Isogeneic and Allogeneic Cells Transformed by Simian Virus 40. Takashi Maki and Michael L. Howe

COMMUNICATIONS

1402 Autologous Human Cellular Cytotoxicity Induced by Mitogenic and Nonmitogenic Lectins. Richard P. MacDermott, Geoffrey S. Nash, John G. Saint, Eloise A. Clark, Alexander G. Zaras, and David Boldt

1408 Partial Separation of Human Blood Leukocytes by Density Gradient Electrophoresis: Different Mobilities of Lymphocytes with IgG, Those with IgM and IgD, T Lymphocytes, and Monocytes. Kenneth A. Ault, Ann L. Griffith, Christos D. Platsoucas, and Nicholas Catsimpoolas

1413 Presidential Address

CELLULAR IMMUNOLOGY

1429 Characterization of Lymphocyte Inhibition by Supernatants of Crowded Lymphoblasts. Stanley S. Green and Richard Wistar, Jr.

1430 A Human T-Independent B Lymphocyte Mitogen Extracted from Nocardia opaca. Jean Brochier, Constantin Bona, Rita Ciobaru, Jean-Pierre Revillard, and Louis Chedid

1434 Interaction of K Lymphocytes with Myeloma Proteins of Different IgG Subclasses. Hans L. Spiegelberg, Hedvig Perlmann, and Peter Perlmann

1504 Identification of Multiple Cytolytic Components Associated with the β-LT Class of Lymphotoxins Released by Mitogen-Activated Human Lymphocytes in Vitro. John C. Hiserodt, Daryl S. Fair, and G. A. Granger

1538 The T Cell Dependence of B Cell Differentiation Induced by Pokeweed Mitogen. Richard G. Keightley, Max D. Cooper, and Alexander R. Lawton

1594 The Induction and Regulation of Guinea Pig B Lymphocyte Proliferation in Vitro. Peter E. Lipsky and Alan S. Rosenthal

1603 Analysis of the Cross-reactive Immune Suppression Induced by the Random Copolymers l-Glutamic Acid-l-tyrosine (GT), l-Glutamic Acid-l-Alanine (GA), and l-Glutamic Acid-l-Alanine-l-Tyrosine (GAT). Carl Witenbaugh, Patrice Debré, and Baruj Benacerraf

1608 Regulation of the Primary Immune Response in Vivo by Parathyroid Hormone. S. H. H. Swierenga, J. P. MacManus, B. M. Braceland, and T. Youdale

1618 Ontogeny of the Antibody-Forming Cell Line in Mice. II. Maturation of B Cells during Fetal Development. Yvonne J. Rosenberg and Alastair J. Cunningham

1622 Hapten-Specific IgE Antibody Responses in Mice. V. Differential Resistance of IgE and IgG B Lymphocytes to X-Irradiation. David A. Fox, Nicholas Chiorazzi, and David H. Katz

1629 Hapten-Specific IgE Antibody Responses in Mice. VI. Selective Enhancement of IgE Antibody Production by Low Doses of X-Irradiation and by Cyclophosphamide. Nicholas Chiorazzi, David A. Fox, and David H. Katz

1644 Suppression of In Vitro Lymphocyte Stimulation in Mice by Uterine and Placental Extracts. Nicola M. Kouttab, Arnold K. Fowler, James E. Strickland, and Alfred Hellman

1651 Guinea Pig Lymphocyte-Derived Macrophage Aggregation Factor: Its Separation from Macrophage Migration Inhibitory Factor. Arnold E. Postlethwaite and Andrew H. Kang

1656 The Involvement of Cyclic Nucleotide Metabolism in the Initiation of Lymphocyte Proliferation Induced by Mitogens. James Watson

1711 Carrier-Dependent Selection of Antibody Clones and Classes during the Immune Response. H. Kolb
Characterization of Macrophage Migration Inhibitory Factor Activity Produced in Vivo by a Cell-Mediated Immune Reaction in the Guinea Pig. Arnold E. Postlethwaite, Alexander S. Townes, and Andrew H. Kang

Antibody-Mediated Basophil Accumulations in Cutaneous Hypersensitivity Reactions of Guinea Pigs. Philip W. Askenase, J. David Haynes, and Betty J. Hayden

CLINICAL IMMUNOLOGY

The Effector Cells in Human Peripheral Blood Mediating Mitogen-Induced Cellular Cytotoxicity and Antibody-Dependent Cellular Cytotoxicity. David L. Nelson, Bonita M. Bundy, Howard E. Pitchon, R. Michael Blaese, and Warren Strober

Abnormalities of Cellular Immune Response in Arthritis Induced by Rubella Vaccination. Yasuo Chiba, Esmee Sadeghi, and Pearay L. Ogra

The Inhibition of Initial Steps of Lymphocyte Transformation by Cytochalasin B. Klaus Resch, Marlot Prester, Ernst Ferber, and Erwin W. Gelfand

Identification of T and B Cell Subpopulations in Human Peripheral Blood: Electrophoretic Mobility Distributions Associated with Surface Marker Characteristics. Joel H. Kaplan and E. E. Uzgiris

IMMUNOCHEMISTRY

Cell Membrane Antigen Isolation with the Staphylococcal Protein A-Antibody Adsorbent. Steven W. Kessler

Investigations of the Complement-Fixing Sites of Immunoglobulins. Brian J. Johnson and Kenneth E. Thames

B Cell Differentiation Induced by Lipopolysaccharide. IV. Development of Immunoglobulin Class Restriction in Precursors of IgG-Synthesizing Cells. John F. Kearney, Max D. Cooper, and Alexander R. Lawton

Disparity of IgE Binding between Normal and Tumor Mouse Mast Cells. Guillermo R. Mendoza and Henry Metzger

Cell Surface Immunoglobulin. XIX. Susceptibility of IgD and IgM on Murine Splenocytes to Cleavage by Papain. Ellen S. Vitetta and Jonathan W. Uhr

Contrasting Effects of BCG on Spleen and Lymph Node Antibody Responses in Nude and Normal Mice. Bernard H. Doft, Bruce Merchant, Lynne Johannessen, Sotiros D. Chaparas, and Neal A. Sher

Immunogenicity of Fab Fragment of Protein-315 for BALB/c Mice. Rachaneepas Tungkanak and Stitaya Sirisinha

Partial Characterization of Human C5a Anaphylatoxin. I. Chemical Description of the Carbohydrate and Polypeptide Portions of Human C5a. Horacio N. Fernandez and Tony E. Hugli

Hapten-Sandwich Labeling. III. Bifunctional Reagents for Immunospecific Labeling of Cell Surface Antigens. Salvatore Cammisuli and Leon Wofsy

IMMUNOGENETICS AND TRANSPLANTATION

Genetic Control of Ligand-Induced Events in B Lymphocytes. Robert J. Fram, Charles L. Sidman, and Emil R. Unanue

Characterization of a Constitutive Variant of the Murine Serum Protein Allotype, Slp. Ted H. Hansen and Donald C. Shreffler

Mapping of the Genetic Control of Murine Response to Low Doses of the Dinitrophenyl Conjugates of Ovomucoid and Bovine γ-Globulin. John H. Freed, Beverly D. Deak, and Hugh O. McDevitt

Relationship between β, Microglobulin and Cell-Surface Alloantigens of the Mouse. Roy Geib, Miroslav D. Poulik, Ellen S. Vitetta, J. F. Kearney, and Jan Klein

Relationship of Functional Levels of Early Components of Complement to the H-2 Complex of Mice. Margaret B. Goldman and John N. Goldman

Isolation and Characterization of Human B Cell Alloantigens. Ronald J. Billing, Madjid Safafi, and Patricia Peterson

IgA Half Molecules. II. Genetic Variants of IgA Detected in Normal Mouse Intestinal Contents. J. Frederic Mushinski and Miranda M. Dungan

IMMUNOPATHOLOGY

Thyroid Antibodies in Spontaneous Autoimmune Thyroiditis in the Buffalo Rat. Bernice Noble, Takeshi Yoshida, Noel R. Rose, and Pierluigi E. Bigazzi
1545 Serotonin-Induced Production of a Monocyte Chemotactic Factor by Human Peripheral Blood Leukocytes. Kenneth A. Foon, Sharon M. Wahl, Joost J. Oppenheim, and David L. Rosenstreich

TUMOR IMMUNOLOGY

1612 Synergism between Immune Complexes and Serum from Tumor-Bearing Mice in the Suppression of Mitogen Responses. Douglas G. Kilburn, Maureen Fairhurst, Julia G. Levy, and Richard B. Whitney

ERRATA

1721 Antibody-Mediated Basophil Accumulations in Cutaneous Hypersensitivity Reactions of Guinea Pigs. Philip W. Askenase, J. David Haynes, and Betty J. Hayden

1731 Identification of T and B Cell Subpopulations in Human Peripheral Blood: Electrophoretic Mobility Distributions Associated with Surface Marker Characteristics. Joel H. Kaplan and E. E. Uzgiris

NUMBER 5, PART 2, NOVEMBER 1976

CELLULAR IMMUNOLOGY

1749 Evidence for Separate Subpopulations of B Cells Responding to T-Independent and T-Dependent Immunogens. John J. Jennings and Marvin B. Rittenberg

1750 Membrane Expression of Thy-1.2 and Gm1 Ganglioside on Differentiating T Lymphocytes. Christine Miliwicz, Harold C. Miller, and Walter J. Esselman

1760 Induction or Suppression of B Cell Proliferation and Differentiation by Phytohemagglutinin or Concanavalin A in Mouse Spleen Cell Cultures. Pierre-F. Piguet, Henry K. Dewey, and Pierre Vassalli

1770 Antibodies to Guinea Pig Lymphoid Cells. IV. Suppression of the Mixed Leukocyte Culture Reaction by Anti-lymphokine Globulin. Carolyn L. Geczy, Andrew F. Geczy, and Alain L. de Weck

1780 Cell Interactions between Histoincompatible T and B Lymphocytes. IX. The Failure of Histoincompatible Cells is Not Due to Suppression and Cannot be Circumvented by Carrier-Priming T Cells with Allogeneic Macrophages. David H. Katz, Nicholas Chiorazzi, Jeanne McDonald, and Lee R. Katz

1787 Response of Human Lymphocytes to PHA and Con A, Dependent on and Regulated by THF, A Thymic Hormone. Varda Rotter, Menachem Schlesinger, Rina Kalderon, and Nathan Trainin

1790 Two Types of Antibody-Dependent Cell-Mediated Cytotoxicity, Arming and Sensitization. T. Imir, Eero Saksela, and O. Mäkelä

1800 Antigen-Specific and Nonspecific Mediators of T Cell/B Cell Cooperation: IV. Development of a Model System Demonstrating Responsiveness of Two T Cell Functions to HGG in Vitro. J. Terrell Hoffeld, Philippa Marrack, and John W. Kappler

1805 Antigen-Specific and Nonspecific Mediators of T Cell/B Cell Cooperation: V. Unresponsiveness to HGG in Vitro of these Two T Cell Subpopulations. J. Terrell Hoffeld, Philippa Marrack, and John W. Kappler

1806 Isolation of a Human Lymphocyte Mitogen from Wheat Germ with N-Acetyl-d-Glucosamine Specificity. John M. Brown, Myron A. Leon, and James J. Lightbody

1810 Anti-lymphokine Antibody. II. Specificity of Biological Activity. Tadatoshi Kuratsuji, Takeshi Yoshida, and Stanley Cohen

1815 T and B Lymphocytes in the Regulation of Delayed Hypersensitivity. Ruth Neta and S. B. Salvin

CLINICAL IMMUNOLOGY

1826 Studies of Surface Immunoglobulins on Human B Lymphocytes. II. Characterization of a Population of Lymphocytes Lacking Surface Immunoglobulins but Carrying Fc Receptor (Sig’ Fe’ Cell). Toru Abo, Tai Yamaguchi, Fumio Shimizu, and Katsuo Kumagai

1835 Prearmed Effector Cells and the Target Cell Specificity of Lectin-Induced Cellular Cytotoxicity. Richard P. MacDermott, Geoffrey S. Nash, and David Boldt

1840 Association of Histocompatibility Haplotype HLA-A3-B7 with Multiple Sclerosis. Hans J. Bertrams and Ernst K. Kuewert

1845 Cytomegalovirus Specific IgM and IgG Response in Humans Studied by Radioimmunoassay. Violeta Knez, John A. Stewart, and Donald W. Ziegler
IMMUNOCHEMISTRY

1805 Complement Receptor Lymphocytes in the Rabbit. I. An SIg-Negative Subpopulation in the Appendix. William R. Green and Michael W. Fanger

1812 Complement Receptor Lymphocytes in the Rabbit. II. The Effect of Immunization on the Complement Receptor Lymphocyte Population in the Draining Lymph Node. William R. Green and Michael W. Fanger

1838 Binding of IgE Myeloma Proteins to Human Cultured Lymphoblastoid Cells. Andres Gonzalez-Molina and Hans L. Spiegelberg

1883 Complement-Induced Ultrastructural Membrane Lesions: Requirement for Terminal Components. Charles H. Packman, Stephen I. Rosenfeld, Robert I. Weed, and John P. Leddy

1933 Preparation and Subfractionation of Isologous and Heterologous Anti-idiotypes with FV Fragments. Miriam Helman, Int Shreier, and David Givol

1971 Specific Extraction of Antigen in Vivo by Extracorporeal Circulation over Antibody Immobilized in Collodion-Charcoal. David S. Terman, Donald Petty, Daryl Ogden, Carol Peefley, and George Buffaloe

IMMUNOGENETICS AND TRANSPLANTATION

1913 Reduction of the in Vitro Cytotoxic Lymphocyte Response Produced by in Vivo Exposure to Semiallogeneic Cells: Recruitment or Active Suppression? Richard G. Miller and Robert A. Phillips

1922 Studies on Non-H-2-Linked Lymphocyte-Activating Determinants. II. Nonexpression of Mls Determinants in a Mouse Strain with an X-linked B Lymphocyte Immune Defect. Aftab Ahmed and Irwin Scher

1966 Mutant Lines of Guinea Pig L2C Leukemia. III. The Reaction of an Alloantiserum Detecting Idiotypic Determinants on a Clonally Derived Guinea Pig B Cell Leukemia with IgM and Ina Molecules. T. G. Konen, I. Green, E. M. Shevach, A. M. Kask, and B. D. Schwartz

IMMUNOPATHOLOGY

1762 Relationship between the C5 Peptides Chemotactic for Leukocytes and Tumor Cells. Alberto G. Romualdez, Jr., Peter A. Ward, and Takaatsu Torikata

1894 Immunopathogenesis of Autoimmune Tubulointerstitial Nephritis. II. Role of an Immune Response Gene Linked to the Major Histocompatibility Complex. Lawrence R. Hyman, Alfred D. Steinberg, Robert B. Colvin, and Eugene F. Bernard

TUMOR IMMUNOLOGY

1767 Stimulation of Immune Mechanisms against Mammary Tumors by Incomplete T Cell Depletion. Birgit R. Roubinian, Mary-Ann Lane, Maxwell Slobach, and Phyllis B. Blair

1832 Effect of p-Fetoprotein and Other Serum Factors Derived from Hepatoma-Bearing Rats on the Mixed Lymphocyte Response. Michael J. Parmely and John S. Thompson

1846 Purification and Partial Characterization of a Tumor-Specific Blocking Factor from Sera of Mice with Growing Chemically Induced Sarcomas. Jerry T. Nepom, Ingegerd Hellström, and Karl Erik Hellström

1870 Analysis of Murine Oncocytic Antigens as Tumor-Associated Transplantation Antigens. Stanley E. Chisem, Sally Wally, Robert C. Burton, and Noel L. Warner

1943 Specific Lysis of Human Colon Tumor Cells by Antibodies to CEA and Isoantigens A: Dependence on Rabbit Serum or Neuraminidase. Wayne A. F. Tompkins, Pradeep B. Seth, Dick-Man Yip, Jerry L. Palmer, Sydney R. Gee, and William E. Rawls

1992 Possible Evidence for Antibody-Dependent Macrophage-Mediated Cytotoxicity Directed against Murine Adenocarcinoma Cells in Vivo. J. Stephen Haskell and James W. Fett

VIRAL AND MICROBIAL IMMUNOLOGY

1753 Replication of Herpes Simplex Virus in Mouse Spleen Cell Cultures Stimulated by Lipopolysaccharide. Holger Kirchner, Hans-Martin Hirt, Chaara Kleinicke, and Klaus Munk

1757 Inhibition of Vaccinia Virus Replication in Skin of Tuberculin-Sensitized Animals Challenged with PPD. Donald L. Lodmell, Larry C. Ewalt, and Abner Louis Notkins
1788 Analysis of Parameters Affecting the Solid Phase Radioimmunoassay Quantitation of Antibody to Meningococcal Antigens. Wendell D. Zoller, Joel M. Dalrymple, and Malcolm S. Artenstein

1981 In Vitro Synthesis of Immunoglobulin and Anti-viral Antibody in Aleutian Disease Viral Infection of Mink. Lance E. Perryman, Travis C. McGuire, and Keith L. Banks

2029 Natural Immunity in Cats to Feline Leukemia Viral Antigens. Sandra K. Ruscetti, and Wade P. Parks

COMMUNICATIONS

2038 Induction of Antibody to the "y" Determinant of HB Ag in a Chimpanzee Carrier of HB Ag Subtype "adw". E. Tabor, R. J. Gerety, L. A. Smallwood, and L. F. Barker

2040 Blocking of HLA and B Lymphocyte Alleantigens with F(ab')2 Fragments of Rabbit Antibodies. Ronald J. Billing, Ronald Honig, Patricia Peterson, Madjid Safani, and Paul I. Terasaki

2042 Lack of Antibody Activity Directed Against the Most Common Human Bacteria in Human Myeloma Protein. Jacques Pilott, Nicole Creau-Goldberg, and Yolanda Gonzalez

2274 Announcements

2273 Author Index

2275 Author Index Volume 117

2280 Subject Index Volume 117
1. New... IMMUNOHISTOPATHOLOGY
By YOSHIHIRO HAMASHIMA, M.D.
This is a definitive study of the pathological aspects of the body's immune processes. Explicit microscopic studies of immune reactions, obtained by introducing fluorescent- and enzyme-labelled antibodies into tissues, clearly show morphological changes resulting from immunopathological processes in over 100 full-color photomicrographs. Content ranges from processes and substances basic to all immunological functions to detailed study of the immunopathology of various body systems and disorders. 308 pages / 145 illustrations, 127 in color / 1976 / $62.00

2. New... IMMUNOLOGY OF PARASITIC INFECTIONS
Edited by SIDNEY COHEN, M.D., Ph.D., F.R.C.Path.; and the late ELVIO H. SADUN, Ph.D.
This book promotes greater interchange between parasitologists and immunologists in the hope that serious problems of parasitic infections in many tropical and subtropical countries may eventually be overcome. 498 pages / illustrated / 1976 / $46.00

3. New... PRACTICAL IMMUNOLOGY
By LESLIE HUDSON; and FRANK C. HAY
This is a step-by-step laboratory/classroom guide to experiments demonstrating modern immunological principles and processes. Coverage is from an in-depth examination of basic lymphocyte units through the complete immune system. Includes precise instructions on current experimental techniques including direct and indirect immunofluorescence and radioimmunoassay. 288 pages / 30 illustrations / 1976 / soft cover, $20.00

4. New... INFECTION AND IMMUNOLOGY IN THE RHEUMATIC DISEASES
The knowledge of specialists from around the world is integrated in this book into an exhaustive study of the immunopathological basis of rheumatoid arthritis and allied diseases. It describes the mechanisms of pathological responses to microbial infection and genetic susceptibility to infectious disease. 692 pages / 235 illustrations / 184 tables / 1976 / $95.00

5. New... THE IMMUNE SYSTEM
A Course on the Molecular and Cellular Basis of Immunity
Edited by M. J. HOBART, M.A., Ph.D., Vet.M.B.; and IAN McCONNELL, M.A., Ph.D., B.V.M.S.; with 14 contributors
This is a detailed account of current immunology based on an integrated course of lectures presented at the Royal Postgraduate Medical School, University of London, by a number of leading immunologists. The text includes: Immunochemistry, Immunobiology, Immunogenetics, and Immunopathology. 357 pages / 116 illustrations, 56 tables / 1976 (U.S.) soft cover, $16.50

6. ESSENTIAL IMMUNOLOGY
2nd Edition
By IVAN M. ROITT, M.A., D.Sc., M.R.C.Path.
This updated edition of a concise book offers a modern view on a rapidly changing subject. It establishes the language and essential phenomena of immunology and their implications in disease. Emphasis is on clear exposition of the essential principles and a broad summary of their importance in medicine. 260 pages / 136 illustrations / revised 2nd printing of 2nd edition, 1975 / soft cover, $10.65

HANDBOOK OF EXPERIMENTAL IMMUNOLOGY... 2nd Edition
Edited by D. M. WEIR, M.D.
Available in three soft-cover volumes, this book provides background information and descriptions of procedures of value to those who use immunological methods. 1070 pages / 473 illustrations / 2nd edition, 1973

7. Vol. 1, IMMUNOCHEMISTRY, $32.00
8. Vol. 2, CELLULAR IMMUNOLOGY, $26.50
10. ULTRASTRUCTURE OF LYMPHOID ORGANS
An Electron-Microscopic Atlas
By I. OLAH, M.D., C.Sc.; P. ROHLICH, M.D., C.Sc.; and I. TORO, M.D.
This timely atlas describes and illustrates the microenvironment in which immunocytes are produced, stored and activated, and in which cooperation between the various cell types occurs. 317 pages / 267 illustrations / 1975 / $30.00
THE JOURNAL OF IMMUNOLOGY®

INFORMATION FOR CONTRIBUTORS
Manuscripts should be sent to:
Dr. Joseph D. Feldman
Department of Immunopathology
Scripps Clinic and Research Foundation
La Jolla, California 92037

If and when the manuscript is published, it will become the sole property of The Journal and all copyright will be taken out in the name of The Williams & Wilkins Company, and all rights in copyright reserved to The Williams & Wilkins Company.

Contributions may be short or long; the length should be commensurate with the scientific content. The chief criteria for acceptance are quality, originality, and clarity.

INSTRUCTIONS FOR PREPARATION OF MANUSCRIPT

The original and two (2) copies of the manuscript, including references, legends, figures and illustrations, must be submitted. The text and all other material, e.g., footnotes, references, and acknowledgments, must be typed in double space (at least 3/16-inch or 5-mm spacing from the bottom of one line to the top of a capital of a succeeding line) on one side of 8½ inch x 11 inch paper of good quality. The two (2) copies may be legible carbon or mimeographed copies or photocopies.

A short title to be used as a running head (not more than 50 characters) should be typed alone on the first page. Type the complete title on the second page, and the authors' full names (first name, middle initial(s), surname) and affiliations on the third page. The format of The Journal must be followed in typing the text and the list of references. References will be numbered as they appear in the text and will be listed in the format:

Only papers that have been accepted for publication should be listed in the references (i.e., articles that are already paginated or in press). Manuscripts in preparation, unpublished observations, and personal communications should be referred to as such in text; completed manuscripts that have been submitted for publication may be cited as a footnote to the text. If such information is in press when the author receives his galley proofs he may make appropriate citations in the text at that time.

All material to be set in a type size different from that of the text, such as tables, case histories, quotations, formulas, legends for figures and illustrations, footnotes, and references must be typed on separate pages. If abbreviations are to be used in the paper, the abbreviations and their meanings should be typed double spaced, in one paragraph, on a separate sheet. Legends should not be attached to or written on figures or illustrations and must be typed double spaced. The position of tables and figures in the text may be indicated on the page margin.

List all components of culture medium used in experiments so that sufficient data to reproduce reported results are available. This information may be supplied in the Abbreviations footnote, in a table listing all components, by referring to a published article containing the information, or by identifying the commercial source which supplies the specific medium if components are listed by the supplier.

Illustrations and Photomicrographs. Photographs of figures and other illustrative material must be on glossy paper (in triplicate); they must be clearly marked on the reverse side with the number, author's name, and orientation (top) and should be unmounted. Graphs should be in black ink on unlined or bluelined paper. If graphs exceed 9 x 12 inches in size, they must be accompanied by glossy photographic reproductions within that size.

For photomicrographs a better grade of paper may be used at additional cost, up to $100.00 for a single page. Estimates can be obtained when the manuscript is submitted for publication. Estimates for color photomicrographs are also available.

Communications. Short papers, at the author's request, may be printed in the Communications section of The Journal. These papers should not exceed two (2) printed pages in length, including summary, references, tables and figures. The text of a full printed page contains about 1000 words. If accepted, their publication will be accelerated, usually within two (2) months of acceptance. For this reason, proofs are not sent to the authors, but rather to the Editor. Suitability for publication will be judged on the basis of timeliness, novelty, and importance by the usual refereeing procedure.

MANUSCRIPTS THAT DO NOT CONFORM TO THESE SPECIFICATIONS MAY NOT BE ACCEPTED, AT THE EDITOR'S DISCRETION.

Page Charges. Authors will be charged $30.00 for each printed page of an article or a Communication. All manuscripts, if accepted, will be published only after commitment by the author(s) or financial officer of their institution to pay a charge of $30.00 per published page. No exceptions can be made.

Reprints. Reprints must be ordered in advance. A form showing the cost of reprints, together with an order slip, is sent with the galley proof. No more than 1000 reprints of any article may be purchased. The invoice for reprints will include the charges for pages.

1. Second Edition of Clinical Immunology

Edited by Samuel O. Freedman, M.D., F.R.C.P. (C), F.A.C.P., Professor of Medicine, and Phil Gold, M.D., Ph.D., F.R.C.P. (C), Professor of Medicine and Physiology; both, McGill University Faculty of Medicine, Montreal, Canada. 11 Contributors. 800 pages. 101 illustrations. $32.50

The purpose of this book is to bring recent progress in experimental immunology to the bedside in a manner that is both useful and comprehensible to practicing physicians, investigators and trainees in the various branches of internal medicine, pediatrics, laboratory medicine and surgery. It is also designed to be of assistance to physicians preparing for Board Examinations in Allergy and Immunology and to undergraduate students wishing to acquire specialized knowledge of applied immunology. The intention is to provide the reader with an appreciation of the etiology and pathogenesis of common immunologic disorders as well as with information concerning their clinical manifestations and treatment. New chapters have been added on immunotherapy and immunosuppression, mechanisms of protective immunity, and immunoassays in clinical medicine.

2. Immunology, Immunopathology, and Immunity

By Stewart Sell, M.D., Professor, Department of Pathology, School of Medicine, University of California at San Diego. 384 pages. 45 illustrations. Paperbound. $14.95 SECOND EDITION

The role of immune reactions in protection against infectious diseases and cancer are presented in a concise, highly organized manner. Intended as an introduction to immunology for undergraduates, graduate students, medical students, interns and residents. Includes classical immunologic subjects, such as characteristics of antigens, antibody structure and antibody-antigen reaction, and new information on cellular interactions in induction and expression of immune responses, the consequences of allergic reactions that cause immune mediated diseases.

3. Immunology

By Herman N. Eisen, M.D., Professor of Immunology, Massachusetts Institute of Technology, Cambridge. 624 pages. 260 illustrations. Paperbound. $14.50

Reprinted from the second edition of Davis et al.'s MICROBIOLOGY. This is a comprehensive introductory text which emphasizes the broad range of biochemical, genetic and clinical observations that provide the foundations for current concepts in immunology. Immune responses against foreign cells, microbes, and organic molecules are described in terms of specifically reactive antibodies and lymphoid cells. The molecular properties of antigens and antibodies are also described in detail.
