C. Huber, H. Rodt, S. Thierfelder, and H. Braunsteiner

J. B. Smith and R. P. Knowlton

C. W. Distelhorst and J. C. Rogers

S. M. Friedman, O. Irigoyen, J. Kuhns, and L. Chess

405 Surface Properties and in Vitro Functional Capacities of Human T Lymphocyte Subsets Separated by Linear Density Gradients

419 Activation of Suppressor T Cells in Human Autologous Mixed Lymphocyte Culture

487 Glucocorticoids Inhibit Trypsin-Induced DNA Release from Phyto-hemagglutinin-Stimulated Blood Lymphocytes

496 Cell-Mediated Lympholysis of Fluorescein Isothiocyanate-Conjugated Autologous Human Cells: Evidence for Hapten-Specific Altered-Self Reactive Human Cytotoxic T Lymphocytes

---

IMMUNOCHEMISTRY

J. L. Ebersole, M. A. Taubman, and D. J. Smith

M. D. P. Boyle and T. Borsos

M. D. P. Boyle, A. P. Gee, and T. Borsos

W. W. Freimuth, H. C. Miller, and W. J. Esselman

M. Fujiwara and S. Kishimoto

J. D. Capra and A. Nisonoff

E. L. Alexander, J. A. Titus, and D. M. Segal

G. H. Strejan, P. M. Smith, C. W. Grant, and D. Surlan

J. Schilling, D. Hansburg, J. M. Davie, and L. Hood

E. C. de Macario and A. J. L. Macario

W. P. Arend and J. C. Sturge

19 Thymic Control of Secretory Antibody Responses in the Rat

71 Studies on the Terminal Stages of Immune Hemolysis. V. Evidence That Not All Complement-Produced Transmembrane Channels are Equal

77 Studies on the Terminal Stages of Immune Hemolysis. VI. Osmotic Blockers of Differing Stokes’ Radii Detect Complement-Induced Transmembrane Channels of Differing Size

201 Soluble Factors Containing Thy-1 Antigen Shed from Lymphoblastoid Cells Modulate in Vitro Plaque-Forming Cell Response

263 IgE Antibody Formation and Aging. I. Age-Related Changes in IgE Antibody Formation and Avidity for the DNP-Determinant in Mice

279 Structural Studies on Induced Antibodies with Defined Idiotypic Specificities. VII. The Complete Amino Acid Sequence of the Heavy Chain Variable Region of Anti-p-azophenylarsenate Antibodies from A/J Mice Bearing a Cross-Reactive Idiotype

295 Human Leukocyte Fc (IgG) Receptors: Quantitation and Affinity with Radiolabeled Affinity Cross-Linked Rabbit IgG

370 Naturally Occurring Antibodies to Liposomes. I. Rabbit Antibodies to Sphingomyelin-Containing Liposomes before and after Immunization with Unrelated Antigens

384 Analysis of the Diversity of Murine Antibodies to Dextran B1355: N-Terminal Amino Acid Sequences of Heavy Chains from Serum Antibody

421 Specific Inhibition of the Antibody-Mediated Activation of a Defective Beta-D-Galactosidase by Circulating Activating Epitope-Binding Molecules

447 Composition and Biologic Properties of Soluble IgG-Anti-IgG Immune Complexes: Effects of Variations in the Specificity of Rabbit Antibodies to Different Structural Components of Human IgG

---

IMMUNOGENETICS AND TRANSPLANTATION

Y-C. M. Kong, C. S. David, A. A. Giraldo, M. Elrehewy, and N. R. Rose

W. C. DeWolf, P. G. Carroll, C. R. Mehta, S. L. Martin, and E. J. Yunis

J. A. Kapp, D. S. Strayer, P. F. Robbins, and R. M. Perlmutter

T. L. Delovitch and U. Sohn

J-E. Ryser and H. R. MacDonald

K. Okuda, S. S. Twinning, C. S. David, and M. Z. Atassi

W. J. Urba and W. H. Hildemann

M. E. Dorf, S. H. Stimpfling, and B. Benacerraf

15 Regulation of Autoimmune Response to Mouse Thyroglobulin: Influence of H-2D-End Genes

37 The Genetics of PLT Response. II. HLA-DRw is a Major PLT-Stimulating Determinant

109 Insulin-Specific Murine Antibodies of Limited Heterogeneity. I. Genetic Control of Spectrotypes

121 In Vitro Analysis of Allogeneic Lymphocyte Interaction. IV. Dual Recognition of B Cell-Associated Mls Locus and I-Region Determinants by a Helper Allogeneic Effect Factor (AEF) Generated across a Minor H Locus Disparity

128 Limiting Dilution Analysis of Alloantigen- Reactive T Lymphocytes. III. Effect of Priming on Precursor Frequencies

182 Genetic Control of Immune Response to Sperm Whale Myoglobin in Mice. II. T-Lymphocyte Proliferative Response to the Synthetic Antigenic Sites

209 Functional Analysis of H-2-Linked Genetic Control of Immune Responsiveness to TNP-MSA

216 Allotypes of C3 in Laboratory and Wild Mouse Distinguished by Alloantisera

269 Gene Dose Effects in Ir Gene-Controlled Systems

Continued on page 4
Continued from page 3

R. H. Schwartz, C. F. Merryman, and P. H. Maurer  
P. Parham, C. J. Barnstable, and W. F. Bodmer  
M. Gottlieb, S. Strober, and H. S. Kaplan  
A. Dessein, R. N. Germain, M. E. Dorf, and B. Benacerraf  
L. J. Rosenwasser, M. A. Barcinski, R. H. Schwartz, and A. S. Rosenthal  
I. Scher, A. K. Berning, and R. Asofsky  

Gene Complementation in the T Lymphocyte Proliferative Response to Poly(1-Glu2Lys38Tyr5): Evidence for Effects of Polymer Handling and Gene Dosage Use of a Monoclonal Antibody (W6/32) in Structural Studies of HLA-A,B,C Antigens  
Allogeneic Marrow Transplantation after Total Lymphoid Irradiation (TLI): Effect of Dose/Fraction, Thymic Irradiation, Delayed Marrow Infusion, and Presensitization  
IgE Responses to Synthetic Polypeptide Antigens. I. Simultaneous Ir Gene and Isotype-Specific Regulation of IgE Responses to L-Glutamic Acid6°-L-Alanine3°-L-Tyrosine1° (GAT)  
Immune Response Gene Control of Determinant Selection. II. Genetic Control of the Murine T Lymphocyte Proliferative Response to Insulin  
X-Linked B Lymphocyte Defect in CBA/N Mice. IV. Cellular and Environmental Influences on the Thymus-Dependent IgG Anti-sheep Red Blood Cell Response

IMMUNOPATHOLOGY

P. J. Meredith, J. A. Christie, and R. L. Walford  
J. M. Johnston and N. M. Kredich  
J. H. Passwell, J-M. Dayer, and E. Merler  
J. C. Foreman, A. K. Sobotka, and L. M. Lichtenstein  
J. Uberti, J. J. Lighthoby, and R. M. Johnson  
D. G. Wright and J. I. Gallin  

Aging Increases Expression of LPS-Induced Autoantibody-Secreting B Cells  
Increased Prostaglandin Production by Human Monocytes after Membrane Receptor Activation  
The Action of Strontium on Basophil Leukocytes and Its Use to Probe the Relationship between Immunologic Stimulus and Secretory Response  
The Effect of Nucleosides and Deoxycoformycin on Adenosine and Deoxyadenosine Inhibition of Human Lymphocyte Activation  
Secretory Responses of Human Neutrophils: Exocytosis of Specific (Secondary) Granules by Human Neutrophils during Adherence in Vitro and during Exudation in Vivo

TUMOR IMMUNOLOGY

T. Taniyama and H. T. Holden  
J. O. Shaw, S. W. Russell, M. P. Printz, and R. A. Skidgel  
D. G. Hafeman and Z. J. Lucas  
J. M. Zarling, L. Eksra, E. C. Borden, J. Horoszewicz, and W. A. Carter  
W. W. Young, Jr., S-I. Hakomori, and P. Levine  
S. I. Schlager and S. H. Ohanian  
J. M. Sharma, R. B. Herberman, J. Y. Djeu, and M. E. Nunn  
M. O. de Landazuri, A. Silva, J. Alvarez, and R. B. Herberman  
M. Small, M. Lasser-Weiss, and V. Daniel  
S. Hickman and Y. P. Wong-Yip  

Requirement of Histocompatible Macrophages for the Induction of a Secondary Cytotoxic Response to Syngentic Tumor Cells in Vitro  
Macrophage-Mediated Tumor Cell Killing: Lack of Dependence on the Cyclooxygenase Pathway of Prostaglandin Synthesis  
Polymorphonuclear Leukocyte-Mediated, Antibody-Dependent, Cellular Cytotoxicity against Tumor Cells: Dependence on Oxygen and the Respiratory Burst  
Activation of Human Natural Killer Cells Cytotoxic for Human Leukemia Cells by Purified Interferon  
Characterization of Anti-Forssman (Anti-Fs) Antibodies in Human Sera: Their Specificity and Possible Changes in Patients with Cancer  
A Role for Fatty Acid Composition of Complex Cellular Lipids in the Susceptibility of Tumor Cells to Humoral Immune Killing  
Production of Migration Inhibition Factor by Spleen Cells of Normal Rats upon Culture in Vitro with Tumor Cells and Cells Expressing Endogenous Virus  
Evidence That Natural Cytotoxicity and Antibody-Dependent Cellular Cytotoxicity are Mediated in Humans by the Same Effector Cell Populations  
Release of Immature Cells from the Thymus during Solid Tumor Growth: Identification by Assay of TdT Activity  
Re-expression of Nonglycosylated Surface IgA in Trypsin-Treated MOPC 315 Plasmacytoma Cells
