# Lymphoprep

The *only* ready made Metrizoate based Solution for Lymphocyte Isolation according to Bøyum's original work.

**NYEGAARD'S Lymphoprep**  
available through:

**ACCURATE CHEMICAL &  
SCIENTIFIC CORPORATION**

28 Tec Street, Hicksville, N.Y. 11801. (516) 433-4900

Other countries, contact: NYEGAARD & CO. A/S  
Post Office Box 4220, Oslo 4, Norway.

Your North American  
distributor for  
Lymphoprep

**Immunofluorescent:** Localization of gonadotropin receptors in ovarian cells by indirect immunofluorescence. Granulosa cells were incubated with human chorionic gonadotropin (HCG) and subsequently with anti-HCG, followed by fluorescein-conjugated second antibody. Discrete patches of fluorescence (*arrowheads*) indicate the hormone receptor sites at the circumference of the cell. (Amsterdam A, et al: *Proceedings of the Workshop on Follicular and Corpus Luteum Function*, New York, Plenum, in press.)

## Points of view

At Miles, Research we are continually developing reagents for better visualization of specific antigenic substances in cells and tissues. Our extensive line includes reagents suitable for a broad range of immunohistochemical techniques used in the clinical and research laboratory.

The Miles Research Products line of conjugated antisera—designed to meet the needs of the biomedical research scientist or the clinical scientist in cytology, serology, immunology, microbiology, and histology—is

### Comprehensive...

Offers antisera for visualization of antigenic substances through UV and/or visible light microscopy, photometry, and electron microscopy.

### Extensive...

Includes FITC (fluorescein) conjugates, ferritin conjugates, alkaline phosphatase conjugates of antisera to human proteins, animal proteins, and second antibodies... plus an exceptionally wide selection of peroxidase conjugates for light or electron microscopy.

### Practical...

Each vial of finished product is accompanied by a Product Credential giving general and lot-specific product information, antibody titer, and label-to-protein ratio.

## Conjugated Antisera from Miles Research Products.

### Immunoferritin:

Electron microscopic localization of the nicotinic acetylcholine receptor in membrane vesicles from *Torpedo California* (electric ray) organ tissue with Fab<sub>2</sub> fragments of antiacetylcholine receptor and subsequently with ferritin-conjugated second antibody. The section was stained for 20 sec with lead citrate. Ferritin molecules (*arrowheads*) cover the outer surface of closed membrane profiles. (Tarrab-Hazdai R, et al: *Proc Natl Acad Sci USA* 75:2497-2501, 1978.)

### Immunoperoxidase:

Localization of neuraminidase in the crypt bases of polymorphs in the stroma of human small intestine. The tissue section was incubated with antineuraminidase, followed sequentially with second antibody and peroxidase antiperoxidase. Peroxidase was demonstrated with 3, 3', 5, 5' diaminobenzidine. (Courtesy of MJ O'Brien, G.I. Research Laboratory, Mallory Institute of Pathology, Boston.)
