IMMUNOGLOBULIN FRACTIONS

ANTISERA TO HUMAN PROTEINS PURIFIED BY AFFINITY CHROMATOGRAPHY.

TAGO pioneered the commercial use of affinity chromatography for antisera purification. We offer all of the commonly used antisera for immunoprecipitin techniques such as IEP and double diffusion.

- Lot-to-lot consistency assured by rigorous quality control
- Normal IgG, IgA and IgM serum proteins used for immunization — not paraproteins
- Antisera are made monospecific by affinity chromatography — therefore contain no human serum proteins
- Only the highest titered antisera are fractionated by ion exchange chromatography to obtain high antibody titer and low total protein

Among the antisera to human proteins, produced in goat:

- Anti Kappa & Anti Lambda (Free — Bence Jones)
- Anti Kappa & Anti Lambda (Free and Bound)
- Anti IgG ■ Anti IgA ■ Anti IgM ■ Anti IgE ■ Anti NHS
- Anti Polyvalent (reacts to all immunoglobulins including IgD, IgE, Kappa & Lambda)

For your in-house labeling, we strongly recommend TAGO specific antibodies purified by affinity chromatography. TAGO also offers FITC conjugated specific antibodies.

TAGO, with its long experience in affinity chromatography, is uniquely able to offer products that are unsurpassed on a price/quality basis. Try TAGO quality. You won't be disappointed.

For more information, including complete catalog, write or call TAGO.

INFORMATION FOR CONTRIBUTORS

Manuscripts should be sent to:

Dr. Joseph D. Feldman
Department of Immunopathology
Scripps Clinic and Research Foundation
La Jolla, California 92037

If and when the manuscript is published, it will become the sole property of The Journal and all copyright will be taken out in the name of The Williams & Wilkins Company, and all rights in copyright reserved to The Williams & Wilkins Company.

Contributions may be short or long; the length should be commensurate with the scientific content. The chief criteria for acceptance are quality, originality, and clarity.

INSTRUCTIONS FOR PREPARATION OF MANUSCRIPT

The *original and two (2) copies* of the manuscript, including references, legends, figures and illustrations must be submitted. The text and all other material, e.g., footnotes, references, and acknowledgments, must be typed in double space (at least $\frac{3}{16}$ -inch or 5-mm spacing from the bottom of one line to the top of a capital of a succeeding line) on one side of 8½ inch x 11 inch paper of good quality. The two (2) copies may be legible carbon or mimeographed copies or photocopies.

A short title to be used as a running head (not more than 50 characters) should be typed alone on the first page. Type the complete title on the second page, and the authors' full names (first name, middle initial(s), surname) and affiliations on the third page. *The format of The Journal must be followed by typing the text and the list of references.* References will be numbered as they appear in the text and will be listed in the format:

1. Kindt, T. J., and W. J. Mandy. 1972. Recombination of genes coding for constant and variable regions of immunoglobulin heavy chains. *J. Immunol.* 108: 1110.

Only papers that have been accepted for publication should be listed in the references (i.e., articles that are already paginated or in press). Manuscripts in preparation, unpublished observations, and personal communications should be referred to as such in text; completed manuscripts that have been submitted for publication may be cited as a footnote to the text. If such information is in press when the author receives his galley proofs he may make appropriate citations in the text at that time.

All material to be set in a type size different from that of the text, such as tables, case histories, quotations, formulas, legends for figures and illustrations, footnotes, and references *must be typed on separate pages.* If abbreviations are to be used in the paper, the abbreviations and their meanings should be typed double spaced, in one paragraph, on a separate sheet. Legends should not be attached to or written on figures or illustrations and must be typed double spaced. The position of tables and figures in the text may be indicated on the page margin.

List all components of culture medium used in experiments so that sufficient data to reproduce reported re-

sults are available. This information may be supplied in the Abbreviations footnote, in a table listing all components, by referring to a published article containing the information, or by identifying the commercial source which supplies the specific medium if components are listed by the supplier.

Illustrations and Photomicrographs. Photographs of figures and other illustrative material *must be on glossy paper (in triplicate)*; they must be clearly marked on the reverse side with the number, author's name, and orientation (top) and should be unmounted. Graphs should be in black ink on unlined or bluelined paper. If graphs exceed 9 x 12 inches in size, they must be accompanied by glossy photographic reproductions within that size.

For photomicrographs a better grade of paper may be used at additional cost, up to \$100.00 for a single page. Estimates can be obtained when the manuscript is submitted for publication. Estimates for color photomicrographs are also available.

Communications. Short papers, at the author's request, may be printed in the Communications section of The Journal. These papers should not exceed two (2) printed pages in length, including summary, references, tables and figures. The text of a full printed page contains about 1000 words. If accepted, their publication will be accelerated, usually within two (2) months of acceptance. Suitability for publication will be judged on the basis of timeliness, novelty, and importance by the usual refereeing procedure.

Letters to the Editor. Letters, which will be printed at the Editor's discretion, are responses to articles that have been published in *The Journal of Immunology* and should relate to scientific matters.

Opinion. This is an invited brief summary and commentary of a controversial subject of broad interest to immunologists.

Workshops. The *Journal of Immunology* will publish abstracts of workshops that have been refereed by program committees of the workshops. These will be accepted if each abstract is prepared for photocopy, i.e., typed single spaced on a separate page. Charges will be the full cost of each printed page.

MANUSCRIPTS THAT DO NOT CONFORM TO THESE SPECIFICATIONS MAY NOT BE ACCEPTED, AT THE EDITOR'S DISCRETION.

Page Charges. Authors will be charged \$30.00 for each printed page of an article or a Communication. All manuscripts, if accepted, will be published only after commitment by the author(s) or financial officer of their institution to pay a charge of \$30.00 per published page. Under exceptional circumstances, page charges will be waived if deemed appropriate by an adjudicating member of the Editorial Board.

Reprints. Reprints must be ordered in advance. A form showing the cost of reprints, together with an order slip, is sent with the galley proof. No more than 1000 reprints of any article may be purchased. The invoice for reprints will include the charges for pages.
