Activation of Cytotoxic T Lymphocytes Requires at Least Two Spleen Cell-Derived Helper Factors Besides Interleukin 2

Soluble Factors Involved in B Cell Differentiation: Identification of Two Distinct T Cell-Replacing Factors (TRF)

Positively Selected Lyt-2+ and Lyt-2- Mouse T Lymphocytes Are Comparable, after Con A Stimulation, in Release of IL 2 and of Lymphokines Acting on B Cells, Macrophages, and Mast Cells, but Differ in Interferon Production

Production of Lymphotoxin, IFN-γ and IFN-α, β by Murine T Cell Lines and Clones

Effect of Interferon on Thoracic Duct Lymphocyte Output: Induction with Either Poly I:Poly C or Vaccinia Virus

In Vitro Analysis of Allogeneic Lymphocyte Interaction. VI. I-J-Restricted Self-Reactive and Alloreactive Components of Allogeneic Effect Factor (AEF) are Distinct I-J-Molecules That Interact with I-J+ T Cells and Antigen-Presenting Cells

In Vivo Analysis of Allogeneic Lymphocyte Interaction: Activation of Suppressor T Cells by an I-J-Restricted Allogeneic Effect Factor (AEF)

Lipopolysaccharide Inhibits the Binding of Colony-Stimulating Factor (CSF-1) to Murine Peritoneal Exudate Macrophages

Phorbol Myristate Acetate and in Vitro T Lymphocyte Function. II. Influence of PMA and Supernatants from PMA-Treated P388D1 Cells on the Proliferation of Cloned T Cells

Characterization of a Suppressor Cell-Activating Factor (SCAF) Released by Adherent Cells Treated with M. Tuberculosis

Binding of Phosphatidylethanolamine and Phosphatidylinositol to OKT8+ Lymphocytes Activates Suppressor Cell Activity

Assignment of Antigenic Determinants to Separated I-A<sup>+</sup> Chains

Monoclonal Antibodies to Hamster Class II MHC Molecules Distinguish T and B Cells

IA Mutant Functional Antigen-Presenting Cell Lines

Human Soluble Fc γ-Binding Material. I. Immunochemical Properties of the Material Produced by the T Cell Line KE37

Monoclonal Antibodies for Carcinoembryonic Antigen and Related Antigens as a Model System: Determination of Affinities and Specificities of Monoclonal Antibodies by Using Biotin-Labeled Antibodies and Avidin as Precipitating Agent in a Solution Phase Immunoassay

Monoclonal Antibodies for Carcinoembryonic Antigen and Related Antigens as a Model System: A Systematic Approach for the Determination of Epitope Specificities of Monoclonal Antibodies

Exposure of Human Neutrophils to Chemotactic Factors Potentiates Activation of the Respiratory Burst Enzyme

The Origin of Chemiluminescence Produced by Neutrophils Stimulated by Opsonized Zymosan

Studies of Antigen Binding on Human Basophils. I. Antigen Binding and Functional Consequences

Studies of Antigen Binding on Human Basophils. II. Continued Expression of Antigen-Specific IgE during Antigen-Induced Desensitization

Skin Allografts Generate an Enhanced Production of Histamine and Histamine-Producing Cell-Stimulating Factor (HCSF) by Spleen Cells in Response to T Cell Mitogens
