1385 Anti-Idiotype Antibodies to the 9.1C3 Blocking Antibody Used to Probe the
Lethal Hit Stage of NK Cell-Mediated Cytolysis

1391 A Novel Antigenic Cell Surface Protein Associated with T200 Is Involved in
the Post-Activation Stage of Human NK Cell-Mediated Lysis

1397 Characterization of the La (SS-B) Antigen from Several Mammalian Sources

1404 Preferential Induction of Specific λ-Isotypic Antibodies in Mice

1410 Changes in the Ir Gene Controlled Response Phenotypes in Mice of the A^a
and A^b Family of Alleles Expressing Naturally Occurring Variant Mole-
cules

1417 Localization of Macrophage Agglutination Factor Activity to the Gelatin-
Binding Domain of Fibronectin

1424 Binding of C-Reactive Protein to the Pneumococcal Capsule or Cell Wall
Results in Differential Localization of C3 and Stimulation of Phagocytosis
Membrane Receptors on Xenopus Macrophages for Two Classes of Immu-
noglobulins (IgM and IgY) and the Third Complement Component (C3)

1431 Isolation and Characterization of the Third Component of Complement in
the Serum of the Clawed Frog, Xenopus laevis

1444 Evidence for Restriction of the Ability of Complement to Lyse Homologous
Erythrocytes

1453 On the Cause and Nature of C9-Related Heterogeneity of Terminal Complement
Complexes Generated on Target Erythrocytes through the Action of
Whole Serum

1464 Inhibition of Immune Precipitation by Complement
