The Interference of T Cell Activation by Calcium Channel Blocking Agents
Mechanism of 8-Mercaptoguanosine-Mediated Adjuvanticity: Roles of Clonal Expansion and Cellular Recruitment
Differential Effects of Two Anti-Apo-Cytochrome c-Specific Monoclonal Antibodies on the Function of Apo-Cytochrome c-Specific Murine T Cell Clones
Phylogeny of Lymphocyte Heterogeneity: The Cellular Requirements for In Vitro Mitogenic Responses of Channel Catfish Leukocytes
T Cell Repopulation from Functionally Restricted Splenic Progenitors: 10,000-Fold Expansion Documented by Using Limiting Dilution Analyses
The Effect of Natural Killer Cells on the Development of Syngeneic Hematopoietic Progenitors
Thy-1 Antigen Expression by Murine High-Proliferation Capacity Hematopoietic Progenitor Cells. I. Relation Between Sensitivity to Depletion by Thy-1 Antibody and Stem Cell Generation Potential
H-41, a New Minor Histocompatibility Locus. I. Histonogenetic Analysis of Thy-1 Antibody and Stem Cell Generation Potential
Lymphocyte Recognition of Lymph Node High Endothelium. VI. Evidence of Distinct Structures Mediating Binding to High Endothelial Cells of Lymph Nodes and Peyer's Patches

CLINICAL IMMUNOLOGY • IMMUNOPATHOLOGY

Newborn and Wiskott-Aldrich Patient B Cells Can Be Activated by TNP-Brucella abortus: Evidence that TNP-Brucella abortus Behaves as a T-Independent Type 1 Antigen in Humans
Defective Natural Killer Cytotoxicity and Polymorphonuclear Leukocyte Antibody-Dependent Cellular Cytotoxicity in Patients with LFA-1/OKM-1 Deficiency
Modulation Induction of the T3 Antigen by OKT3 Antibody Is Monocyte Dependent
Accessory Cell Requirement for Activation Antigen Expression and Cell Cycle Progression by Human T Lymphocytes
Immunohistologic Localization and Immune Phenotypes of Lymphocytes Expressing Tac Antigen in Human Lymphoid Tissues
A Human Hybrid Myeloma for Production of Human Monoclonal Antibodies
B Cell Lines as Models for Inherited Phagocytic Diseases: Abnormal Superoxide Generation in Chronic Granulomatous Disease and Giant Granules in Chediak-Higashi Syndrome
Resistance to Tolerance Induction Is Not Prerequisite to Development of Murine SLE
A Public Idiotypic Determinant Is Present on Spontaneous Cationic IgG Antibodies to DNA from Mice of Unrelated Lupus-Prone Strains
Ly-2+ T Cell Enlargement and Null Cell Proliferation Occur at the Onset of Splenomegaly and Autoantibody Production in New Zealand Black Mice
Susceptibility and Resistance to Experimental Autoimmune Encephalomyelitis and Neuritis in the Guinea Pig Correlate with the Induction of Procoagulant and Anticoagulant Activities
Redistribution of Lyt-Bearing T Cells in Acute Murine Experimental Allergic Encephalomyelitis: Selective Migration of Lyt-1 Cells to the Central Nervous System Is Associated with a Transient Depletion of Lyt-1 Cells in Peripheral Blood
Modulation of Collagen-Induced Arthritis in Rats by Non-RT1-Linked Genes
Immunoregulation after Thermal Injury: Sequential Appearance of I-J+, Ly-1 T suppressor Inducer Cells and Ly-2 T Suppressor Effector Cells Following Thermal Trauma in Mice
