Announcement of Changes in Publishing Schedule and Rates for The Journal of Immunology

As of January 1, 1986, the following changes will become effective:

The Journal of Immunology will publish twice each month, with 12 issues per volume and two volumes per year.

Subscriptions for domestic members of the American Association of Immunologists will be $75 per year; for foreign members, $85 per year plus postal charges of $55. Nonmember subscriptions for U.S. institutions will be $170 per year; foreign institutions, $170 plus postal charges of $55. Nonmember personal subscriptions will be $150 per year; nonmember personal foreign subscriptions will be $150 per year plus postal charges of $55.

Single copies will be $8 each. Foreign postage will be an additional $3 per single copy.

Page charges to authors will be $66 per page.

THE JOURNAL OF IMMUNOLOGY (ISSN 0022-1767) is published monthly by The American Association of Immunologists, 3770 Tansy Street, San Diego, CA 92121. Second class postage paid at Baltimore, MD and at additional mailing offices. POSTMASTER: Send address changes (Form 3579) to The Journal of Immunology, 428 E. Preston St., Baltimore, MD 21202. Indexed by Current Contents and Index Medicus. Subscription rates 8130 (8156 foreign); institutions 8150 (8176 foreign); single copy 814 (817 foreign). Copyright © 1985 by The American Association of Immunologists.
Analysis of a $T_{H1} + T_{H2}$ Helper Cell Circuit

Specificity, Phenotype, and Precursor Frequency of Primary Cytolytic T Lymphocytes Specific for Class II Major Histocompatibility Antigens: Studies on the Induction and Expression of T Cell-Mediated Immunity. XV. Role of Non-MHC Papain-Sensitive Target Structures and Lyt-2 Antigens in Allogeneic and Xenogeneic Lectin-Dependent Cellular Cytotoxicity (LDCC)

T. Cell Activation Via CD2 [T, gp50] Molecules: Accessory Cells Are Required to Trigger T Cell Activation Via CD2-D66 + CD2-9.6/Tll Epitopes

The Distribution of the Qa-2 Alloantigen on Functional T Lymphocytes

GVH Elicited by Products of Class I or Class II Loci of the MHC: Analysis of the Response of Mouse T Lymphocytes to Products of Class I and Class II Loci of the MHC in Correlation with GVHR-Induced Mortality, Medullary Aplasia and Enteropathy

Graft-vs-Host Reactions (GVHR) across Minor Murine Histocompatibility Barriers. II. Development of Natural Suppressor Cell Activity

Strong Suppression by Monocytes of T Cell Mitogenesis in Chicken Peripheral Blood Leukocytes

Antigen Presentation by Hapten-Specific B Lymphocytes. II. Specificity and Properties of Antigen-Presenting B Lymphocytes, and Function of Immunoglobulin Receptors

Molecular Associations of Class I MHC Antigens in Mitogen-Stimulated B Cells

Molecular Events in B Cell Activation. I. Signals Required to Stimulate Go-G1 Transition of Resting B Lymphocytes

Failure of PFC or PFC Inhibition Assays to Distinguish Idiotypically between Clonotypes That Are Readily Distinguishable by RIA Analysis

Antibody Response of BALB/c Mice to Dextran B1355S: Alterations in the Expression of an Idiotype Associated with the Depletion of Idiotype-Binding Cells

Inhibition of Humoral Immunity In Vivo by Monoclonal Antibody to L3T4: Studies with Soluble Antigens in Intact Mice

Lymphokine-Activated Killer Cells Are Generated before Classical Cytotoxic T Lymphocytes after Bone Marrow Transplantation in Mice

Association between the Ro and La Antigen Determinants: Immunodiffusion Analysis of Human Spleen Extract

Requirements for T Cell Activation by OKT3 Monoclonal Antibody: Role of Modulation of T3 Molecules and Interleukin 1

Activation of Resting T Lymphocytes by Anti-CD3 (T3) Antibodies in the Absence of Monocytes

Antigen-Specific Suppressor T Lymphocytes in Man Make Use of the Same Set of Surface Molecules as Do Cytolytic T Lymphocytes: Roles of Leu-2/T8, Leu-4/T3, Leu-5/T11, and LFA-1 Molecules

Lymphokine-Activated and Natural Killer Cell Activity in Human Intestinal Mucosa

Reactivity of Anti-Mitochondrial Autoantibodies in Primary Biliary Cirrhosis: Definition of Two Novel Mitochondrial Polypeptide Autoantigens
