Announcement of Changes in Publishing Schedule and Rates for The Journal of Immunology

As of January 1, 1986, the following changes will become effective:

The Journal of Immunology will publish twice each month, with 12 issues per volume and two volumes per year.

Subscriptions for domestic members of the American Association of Immunologists will be $75 per year; for foreign members, $875 per year plus postal charges of $55. Nonmember subscriptions for U.S. institutions will be $120 per year; foreign institutions, $170 per year plus postal charges of $55. Nonmember personal subscriptions will be $150 per year; nonmember personal foreign subscriptions will be $150 per year plus postal charges of $55.

Single copies will be $8 each. Foreign postage will be an additional $3 per single copy.

Page charges to authors will be $66 per page.

THE JOURNAL OF IMMUNOLOGY (ISSN 0022-1767) is published monthly by The American Association of Immunologists, 3770 Tansy Street, San Diego, CA 92121. Second class postage paid at Baltimore, MD and at additional mailing offices. POSTMASTER: Send address changes (Form 3579) to The Journal of Immunology, 426 E. Preston St., Baltimore, MD 21202. Indexed by Current Contents and Index Medicus. Subscription rates $120 (foreign); institutions $120 (foreign); single copy $14 (foreign). Copyright © 1985 by The American Association of Immunologists.

1603 Analysis of a T_{H1}+T_{H2} Helper Cell Circuit

1610 Specificity, Phenotype, and Precursor Frequency of Primary Cytolytic T Lymphocytes Specific for Class II Major Histocompatibility Antigens: Studies on the Induction and Expression of T Cell-Mediated Immunity. XV. Role of Non-MHC Papain-Sensitive Target Structures and Lyt-2 Antigens in Allogeneic and Xenogeneic Lectin-Dependent Cellular Cytotoxicity (LDCC)

1616 T. Cell Activation Via CD2 [T, gp50] Molecules: Accessory Cells Are Required to Trigger T Cell Activation Via CD2-D66 + CD2-9.6/Tll Epitopes

1624 The Distribution of the Qa-2 Alloantigen on Functional T Lymphocytes

1632 GVHR Elicited by Products of Class I or Class II Loci of the MHC: Analysis of the Response of Mouse T Lymphocytes to Products of Class I and Class II Loci of the MHC in Correlation with GVHR-Induced Mortality, Medullary Aplasia and Enteropathy

1637 Graft-vs-Host Reactions (GVHR) across Minor Murine Histocompatibility Barriers. II. Development of Natural Suppressor Cell Activity

1644 Strong Suppression by Monocytes of T Cell Mitogenesis in Chicken Peripheral Blood Leukocytes

1652 Antigen Presentation by Hapten-Specific B Lymphocytes. II. Specificity and Properties of Antigen-Presenting B Lymphocytes, and Function of Immunoglobulin Receptors

1661 Molecular Associations of Class II MHC Antigens in Mitogen-Stimulated B Cells

1668 Molecular Events in B Cell Activation. I. Signals Required to Stimulate Go-G1 Transition of Resting B Lymphocytes

1674 Failure of PFC or PFC Inhibition Assays to Distinguish Idiotypically between Clonotypes That Are Readily Distinguishable by RIA Analysis

1678 Antibody Response of BALB/c Mice to Dextran B1355S: Alterations in the Expression of an Idiotype Associated with the Depletion of Idiotype-Binding Cells

1690 Inhibition of Humoral Immunity In Vivo by Monoclonal Antibody to L3T4: Studies with Soluble Antigens in Intact Mice

1702 Lymphokine-Activated Killer Cells Are Generated before Classical Cytotoxic T Lymphocytes after Bone Marrow Transplantation in Mice
