A. A. Freitas, B. Rocha, and A. A. Coutinho

Amino Acid Residues Distinct from the Determinant Region Can Profoundly Affect Activation of T Cells Clones by Related Antigens

Reorientation and Fusion of Cytotoxic T Lymphocyte Granules after Interaction with Target Cells as Determined by High Resolution Cinemicrography

Clonal Analysis of the Anti-Qa-1 Cytotoxic T Lymphocyte Repertoire: Definition of the Qa-1α and Qa-1β Alleles and Cross-Reactivity with H-2

High Frequency and Nonrandom Distribution of Alloreactivity in T Cell Clones Selected for Recognition of Foreign Antigen in Association with Self Class II Molecules

Requirements for Activation of Contrasuppressor T Cells by Type III Pneumococcal Polysaccharide

Acquisition of Suppressive Activity and Natural Killer-like Cytotoxicity by Human Alloproliferative "Helper" T Cell Clones

Analysis of Hemopoietic Lineage of Accessory Cells in the Developing Thymus of Xenopus laevis

In Vitro Differentiation of B Lymphocytes from Primitive Hemopoietic Precursors Present in Long-Term Bone Marrow Cultures

IA-Positive Nonlymphoid Cells and T Cell Development in Murine Fetal Thymus Organ Cultures: Monoclonal Anti-IA Antibodies Inhibit the Development of T Cells

Antigen Presentation by Human Dermal Fibroblasts: Activation of Resting T Lymphocytes

Activation Requirements of Cloned Inducer T Cells. II. The Failure of some Clones to Respond to Antigen Presented by Activated B Cells

A Group-Specific Inhibitor of Lysosomal Cysteine Proteinases Selectively Inhibits both Proteolytic Degradation and Presentation of the Antigen Dinitrophenyl-poly-L-lysine by Guinea Pig Accessory Cells to T Cells

Oligopeptide Antigens of the Angiotensin Lineage Compete for Presentation by Paraformaldehyde-Treated Accessory Cells to T Cells

Two Major Classes of Mitogen-Reactive B Lymphocytes Defined by Life Span

Life Span of B Lymphocytes: The Experimental Basis for Conflicting Results

574 Modulation of Mouse Anti-SRBC Antibody Responses by Placental Extracts. II. Antigen Specificity and Regulatory Role of B and T Cell Populations Affected by Two Distinct Placental Fractions

574 Effects of Bacterial Lipopolysaccharide on the Binding of Lymphocytes to Endothelial Cell Monolayers

569 Activation of Cation Transport by Lymphokines in B Cells without Induction of DNA Synthesis or Immunoglobulin Gene Transcription

562 Partial Purification and Characterization of a Factor from a Cloned Thymic Epithelium Cell Line

555 Effects of Ty and Tp Cells in BALB/c Mice with IgG and IgM Plasmacytomas and Hybridomas

532 A Transferrin Receptor Antibody Represents One Signal for the Induction of IL 2 Production by a Human T Cell Line

539 Supernatant from a Cloned Helper T Cell Stimulates most Small Resting B Cells to Undergo Increased I-A Expression, Blastogenesis, and Progression through Cell Cycle

477 Expression of a Cross-Reactive Idiotype on Rheumatoid Factor in Patients with Sjögren’s Syndrome

484 Cell Surface Expression of Invariant y-Chain of Class II Histoocompatibility Antigens in Human Skin

491 Immunoglobulin Light and Heavy Chain Isotypes in Skin Diseases: Restricted Distribution in Bullous Pemphigoid and Linear IgA Bullous Dermatosis

497 Human Alveolar Macrophages: HLA-DR-Positive Macrophages that Are Poor Stimulators of a Primary Mixed Leukocyte Reaction

505 Leu-1+(CD5+) B Cells: A Major Lymphoid Subpopulation in Human Fetal Spleen: Phenotypic and Functional Studies

511 Experimental Autoimmune Encephalomyelitis Mediated by T Lymphocyte Lines: Genotype of Antigen-presenting Cells Influences Immunodominant Epitope of Basic Protein

516 Identification of an Antigenic Determinant within the Phylogenetically Conserved Triprolyl Region of Myelin Basic Protein

521 Increased Tγ and Tµ Cells in BALB/c Mice with IgG and IgM Plasmacytomas and Hybridomas

526 Spontaneous Interstitial Nephritis in kdkd Mice. II. Characterization of a Tubular Antigen-Specific, H-2K-restricted Lyt-2- Effector T Cell that Mediates Destructive Tubulointerstitial Injury

532 A Transferrin Receptor Antibody Represents One Signal for the Induction of IL 2 Production by a Human T Cell Line

539 Supernatant from a Cloned Helper T Cell Stimulates most Small Resting B Cells to Undergo Increased I-A Expression, Blastogenesis, and Progression through Cell Cycle

546 Human T4 Lymphocytes Produce a Phagocytosis-Inducing Factor (PIF) Distinct from Interferon-α and Interferon-γ

555 Partial Purification and Characterization of a Factor from a Cloned Thymic Epithelium Cell Line

562 Activation of Cation Transport by Lymphokines in B Cells without Induction of DNA Synthesis or Immunoglobulin Gene Transcription

569 Effects of Bacterial Lipopolysaccharide on the Binding of Lymphocytes to Endothelial Cell Monolayers

574 Modulation of Mouse Anti-SRBC Antibody Responses by Placental Extracts. II. Antigen Specificity and Regulatory Role of B and T Cell Populations Affected by Two Distinct Placental Fractions

582 Hypervariable Region Peptides Variously Induce Specific Anti-Idiotypic Antibodies: An Approach to Determining Antigenic Dominance

588 Relationships between Epitopes on IgE Recognized by Defined Monoclonal Antibodies and by the FC, Receptor on Basophils

594 Biochemical Characterization of the Murine Activated Lymphocyte Alloantigen Ly-6E.1 Controlled by the Ly-6 Locus
