COMMUNICATIONS

J. A. Hoxie, L. E. Flaherty, B. S. Haggarty, and J. L. Rakowksi

Infection of T4 Lymphocytes by HTLV-III Does Not Require Expression of the OKT4 Epitope

J. S. Hunt and G. W. Wood

Interferon-\(\gamma\) Induces Class I HLA and \(\beta_2\)-Microglobulin Expression by Human Amnion Cells

D. Zharhary and N. R. Klinman

A Selective Increase in the Generation of Phosphorylcholine-Specific B Cells Associated with Aging

CELLULAR IMMUNOLOGY

N. Shastri, A. Miller, and E. E. Sercarz

Amino Acid Residues Distinct from the Determinant Region Can Profoundly Affect Activation of T Cells Clones by Related Antigens

J. R. Yannelli, J. A. Sullivan, G. L. Mandell, and V. H. Engelhard

Reorientation and Fusion of Cytotoxic T Lymphocyte Granules after Interaction with Target Cells as Determined by High Resolution Cinemicrography

C. J. Aldrich, R. N. Jenkins, and R. R. Rich

Clonal Analysis of the Anti-Qa-I Cytotoxic T Lymphocyte Repertoire: Definition of the Qa-1\(^k\) and Qa-1\(^d\) Allotigens and Cross-Reactivity with H-2 High Frequency and Nonrandom Distribution of Allorreactivity in T Cell Clones Selected for Recognition of Foreign Antigen in Association with Self Class II Molecules

H. Braley-Mullen

Requirements for Activation of Contrasuppressor T Cells by Type III Pneumococcal Polysaccharide

G. Pawelec, E. M. Schneider, and P. Wernet

Acquisition of Suppressive Activity and Natural Killer-like Cytotoxicity by Human Alloproliferative "Helper" T Cell Clones

J. B. Turpen and P. B. Smith

Analysis of Hemopoietic Lineage of Accessory Cells in the Developing Thymus of Xenopus laevis

K. Dorshkind

In Vitro Differentiation of B Lymphocytes from Primitive Hemopoietic Precursors Present in Long-Term Bone Marrow Cultures

D. DeLuca

IA-Positive Nonlymphoid Cells and T Cell Development in Murine Fetal Thymus Organ Cultures: Monoclonal Anti-IA Antibodies Inhibit the Development of T Cells

D. T. Umetsu, D. Katzen, H. H. Jabara, and R. S. Gehr

Antigen Presentation by Human Dermal Fibroblasts: Activation of Resting T Lymphocytes

R. H. Dekruyff, H. Cantor, and M. E. Dorf

Activation Requirements of Cloned Inducer T Cells. II. The Failure of some Clones to Respond to Antigen Presented by Activated B Cells

S. Buus and O. Werdelin

A Group-Specific Inhibitor of Lysosomal Cysteine Proteinasmes Selectively Inhibits both Proteolytic Degradation and Presentation of the Antigen Dinitrophenyl-poly-L-lysine by Guinea Pig Accessory Cells to T Cells

S. Buus and O. Werdelin

Oligopeptide Antigens of the Angiotensin Lineage Compete for Presentation by Paraformaldehyde-Treated Accessory Cells to T Cells

A. A. Freitas, B. Rocha, and A. A. Coutinho

Two Major Classes of Mitogen-Reactive B Lymphocytes Defined by Life Span

A. A. Freitas, B. Rocha, and A. A. Coutinho

Life Span of B Lymphocytes: The Experimental Basis for Conflicting Results

Continued on page 4
Expression of a Cross-Reactive Idiotype on Rheumatoid Factor in Patients with Sjögren's Syndrome

Cell Surface Expression of Invariant γ-Chain of Class II Histo compatibility Antigens in Human Skin

Immunoglobulin Light and Heavy Chain Isotypes in Skin Diseases: Restricted Distribution in Bullous Pemphigoid and Linear IgA Bullous Dermatosis

Human Alveolar Macrophages: HLA-DR-Positive Macrophages that Are Poor Stimulators of a Primary Mixed Leukocyte Reaction

Leu-1+ (CD5+) B Cells: A Major Lymphoid Subpopulation in Human Fetal Spleen: Phenotypic and Functional Studies

Experimental Autoimmune Encephalomyelitis Mediated by T Lymphocyte Lines: Genotype of Antigen-presenting Cells Influences Immunodominant Epitope of Basic Protein

Identification of an Antigenic Determinant within the Phylogenetically Conserved Triprolyl Region of Myelin Basic Protein

Increased Tγ and Tμ Cells in BALB/c Mice with IgG and IgM Plasmacytomas and Hybridomas

Spontaneous Interstitial Nephritis in kkdb Mice. II. Characterization of a Tubular Antigen-Specific, H-2K-restricted Lyt-2- Effector T Cell that Mediates Destructive Tubulo-interstitial Injury

A Transferrin Receptor Antibody Represents One Signal for the Induction of IL 2 Production by a Human T Cell Line

Supernatant from a Cloned Helper T Cell Stimulates most Small Resting B Cells to Undergo Increased I-A Expression, Blastogenesis, and Progression through Cell Cycle

Human T4+ Lymphocytes Produce a Phagocytosis-Inducing Factor (PIF) Distinct from Interferon-α and Interferon-γ

Partial Purification and Characterization of a Factor from a Cloned Thymic Epithelium Cell Line

Activation of Cation Transport by Lymphokines in B Cells without Induction of DNA Synthesis or Immunoglobulin Gene Transcription

Effects of Bacterial Lipopolysaccharide on the Binding of Lymphocytes to Endothelial Cell Monolayers

Modulation of Mouse Anti-SRBC Antibody Responses by Placental Extracts. II. Antigen Specificity and Regulatory Role of B and T Cell Populations Affected by Two Distinct Placental Fractions

Hypervariable Region Peptides Variably Induce Specific Anti-Idiotype Antibodies: An Approach to Determining Antigenic Dominance

Relationships between Epitopes on IgE Recognized by Defined Monoclonal Antibodies and by the FC, Receptor on Basophils

Biochemical Characterization of the Murine Activated Lymphocyte Alloantigen Ly-6E.1 Controlled by the Ly-6 Locus
Human T Cell Lines Differing in Phenotype and Specificity Are Reactive with the Same Anti-Idiotype Antibody

Production and Characterization of a Bovine T Cell-Specific Monoclonal Antibody Identifying a Mature Differentiation Antigen

IMMUNOPHARMACOLOGY

M. Kurosawa and C. W. Parker

A Phosphatidylinositol Kinase in Rat Mast Cell Granules

J. Rivera, J. M. Mullins, K. Furuchi, and C. Isersky

Endocytosis of Aggregated Immunoglobulin G by Rat Basophilic Leukemia Cells: Rate, Extent, and Effects on the Endocytosis of Immunoglobulin E Ionic Requirements and Subcellular Localization of Tubulin Tyrosinolation in Human Polymorphonuclear Leukocytes

S. J. Weiss, J. T. Curnutte, and S. Regiani

Neutrophil-Mediated Solubilization of the Subendothelial Matrix: Oxidative and Nonoxidative Mechanisms of Proteolysis Used by Normal and Chronic Granulomatous Disease Phagocytes

Generation of Leukotrienes by Human Monocytes Pretreated with Cytochalasin B and Stimulated with Formyl-Methionyl-Leucyl-Phenylalanine

R. P. Schleimer and B. K. Rutledge

Cultured Human Vascular Endothelial Cells Acquire Adhesiveness for Neutrophils after Stimulation with interleukin 1, Endotoxin, and Tumor-Promoting Phorbol Esters

MICROBIAL IMMUNOLOGY

M. D. Sadick, R. M. Locksley, C. Tabbs, and H. V. Raff

Mume Cutaneous Leishmaniasis: Resistance Correlates with the Capacity to Generate Interferon-γ in Response to Leishmania Antigens In Vitro

F. Kierszenbaum, F. Villalta, and P. C. Tai

Role of Inflammatory Cells in Chagas’ Disease. III. Kinetics of Human Eosinophil Activation upon Interaction with Parasites (Trypanosoma cruzi)

R. A. Strugnell, W. F. Williams, G. Raines, J. S. Pedersen, L. P. Drummond, B. H. Toh, and S. Faine

Autoantibodies to Creatine Kinase in Rabbits Infected with Treponema pallidum

D. L. Granger, J. R. Perfect, and D. T. Durack

Macrophage-Mediated Fungistasis In Vitro: Requirements for Intracellular and Extracellular Cytotoxicity

S. G. Norley, L. Huang, and B. T. Rouse

Targeting of Drug Loaded Immuno liposomes to Herpes Simplex Virus Infected Corneal Cells: An Effective Means of Inhibiting Virus Replication In Vitro

G. E. Grau, D. Morrow, S. Izui, and P. H. Lambert

Pathogenesis of the Delayed Phase of Rauscher Virus-Induced Thrombocytopenia

E. Celis, R. W. Miller, T. J. Wikt or, B. Dietzschold, and H. Koprowski

Isolation and Characterization of Human T Cell Lines and Clones Reactive to Rabies Virus: Antigen Specificity and Production of Interferon-γ

J. A. Byrne and M. B. A. Oldstone

Bi ology of Cloned Cytotoxic T Lymphocytes Specific For Lymphocytic Choriomeningitis Virus. VI. Migration and Activity In Vivo in Acute and Persistent Infection

W. C. Koff and M. A. Dunegan

Neuroendocrine Hormones Suppress Macrophage-Mediated Lysis of Herpes Simplex Virus-Infected Cells

C3 Binds Preferentially to Long-Chain Lipopolysaccharide during Alternative Pathway Activation by Salmonella montevideo

MOLECULAR GENETICS

J. Ghiso, A. Solomon, and B. Frangione

Association of Human λ Light Chain V/J/C Segments: Serologic Analysis and Primary Structure of the λVI Bence Jones Protein THO

Continued on page 6
P. V. O'Donnell and F. Traganos

R. O. Dillman, D. E. Johnson, and D. L. Shawler

E. Lotzova, C. A. Savary, M. Lowlachi, and D. M. Murasko

P. Q. Patek, Y. Lin, J. L. Collins, and M. Cohn
