COMMUNICATION

P. Perez, J. A. Titus, M. T. Lotze, F. Cattitella, D. L. Longo, E. S. Groves, H. Rabin, P. J. Durda, and D. M. Segal

Specific Lysis of Human Tumor Cells by T Cells Coated with Anti-T3 Cross-Linked to Anti-Tumor Antibody

CELLULAR IMMUNOLOGY

P. J. Wettstein

Immunodominance in the T Cell Response to Multiple Non-H-2 Histocompatibility Antigens. III. Single Histocompatibility Antigens Dominate the Male Antigen

H. Ishikawa, T. Hino, H. Kato, H. Suzuki, and K. Saito

Cytotoxic T Lymphocyte Response to Minor H-42b Alloantigen in H-42b Mice: Clonal Inactivation of the Precursor Cytotoxic T Lymphocytes by Veto-Like Spleen Cells That Express the H-42b Antigen

K.-I. Isobe, G. Kollias, A.-B. Kolsto, and F. Grosveld

T Cell Independent Thy-1 Allo-Antibody Response with the Use of Transgenic Mice

S. T. Ishizaka, C. Carnaud, and G. Kollias

Differential Susceptibility of Cytotoxic and Helper T Cell Precursors to Neonatal Tolerization to Histocompatibility Antigens

C.-C. Ting, J. A. Bluestone, M. E. Hargrove, and N.-N. Loh

Expression and Function of Asialo GM1 in Alloreactive Cytotoxic T Lymphocytes

M. A. Bookman, E. S. Groves, and L. A. Matis

Expression of MEL-14 Antigen Is Not an Absolute Requirement for Dissemination to Lymph Nodes after Adoptive Transfer of Murine T Lymphocyte Clones

C. Penit

In Vivo Thymocyte Maturation: BUDR Labeling of Cycling Thymocytes and Phenotypic Analysis of Their Progeny Support the Single Lineage Model

V. E. Kelley, D. Naor, N. Tarcic, G. N. Gaulton, and T. B. Strom

Anti-Interleukin 2 Receptor Antibody Suppresses Delayed-Type Hypersensitivity to Foreign and Syngeneic Antigens

R. L. Fairchild and J. W. Moorhead

Soluble Factors in Tolerance and Contact Sensitivity to DNFB in Mice. VI. Cellular and Lymphokine Requirements for Stimulating Suppressor Factor Production in Vitro

R. A. Sobel and R. B. Colvin

Responder Strain-Specific Enhancement of Endothelial and Mononuclear Cell la in Delayed Hypersensitivity Reactions in (Strain 2 X Strain 13)F1 Guinea Pigs

C. T. Morita, W. L. Godfrey, J. W. Goodman, and G. K. Lewis

Arsonate-Specific Murine T Cell Clones. III. Correlation between Clonotype Expression and Fine Specificity for Analogs of L-Tyrosine-p-Azobenzene-arsonate

H. Kawasaki, C. A. Martin, T. Uchida, M. Usui, T. Noma, M. Minami, and M. E. Dorf

Functional Analysis of Cloned Macrophage Hybridomas. V. Induction of Suppressor T Cell Responses

Hybrid Resistance to Parental Mast Cell Precursors in the Skin of (WB X C57BL/6)F1-W/W+ Mice

P. Sarthou, D. Primi, and P. A. Cazenave

B Cell Triggering Properties of a Nontoxic Derivative of Amphotericin B

J. Mizuguchi, W. Tsang, S. L. Morrison, M. A. Beaver, and W. E. Paul

Membrane IgM, IgD, and IgG Act as Signal Transmission Molecules in a Series of B Lymphomas

Continued on page 4
Continued from page 3

CLINICAL IMMUNOLOGY • IMMUNOPATHOLOGY

H. L. Coppin and H. O. McDevitt 2168 Absence of Polymorphism between HLA-B27 Genomic Exon Sequences Isolated from Normal Donors and Ankylosing Spondylitis Patients
R. C. Gupta, A. K. Badhwar, A. L. Bisno, and X. Berrios 2173 Detection of C-Reactive Protein, Streptolysin O, and Anti-Streptolysin O Antibodies in Immune Complexes Isolated from the Sera of Patients with Acute Rheumatic Fever
M. A. Agius and D. P. Richman 2195 Suppression of Development of Experimental Autoimmune Myasthenia Gravis with Isogeneic Monoclonal Antidiotopic Antibody

CYTOKINES • MEDIATORS • REGULATORY MOLECULES

S. R. Mehta, S. R. Grant, and A. L. Maizel 2210 Characterization of the Cell Surface Receptors for Human B Cell Growth Factor of 12,000 Molecular Weight
J. Mizuguchi, M. A. Beaven, J. Ohara, and W. E. Paul 2215 BSF-1 Action on Resting B Cells Does Not Require Elevation of Inositol Phospholipid Metabolism or Increased [Ca^{++}]
A. O’Garra, D. J. Warren, M. Holman, A. M. Popham, C. J. Sanderson, and G. G. B. Klaus 2220 Effects of Cyclosporine on Responses of Murine B Cells to T Cell-Derived Lymphokines
J. P. Jakway, W. R. Usinger, M. R. Gold, R. I. Mishell, and A. L. DeFranco 2225 Growth Regulation of the B Lymphoma Cell Line WEHI-231 by Anti-Immunoglobulin, Lipopolysaccharide, and Other Bacterial Products
J. G. Cannon, J. B. Tatro, S. Reichlin, and C. A. Dinarello 2232 α-Melanocyte Stimulating Hormone Inhibits Immunostimulatory and Inflammatory Actions of Interleukin 1
P. M. Flood, C. Waltenbaugh, T. Tada, B. Chue, and D. B. Murphy 2237 Serologic Heterogeneity in I-J Determinants Associated with Functionally Distinct T Cell Regulatory Factors
A. Kemp, L. Mellow, and E. Sabbadini 2245 Inhibition of Interleukin 1 Activity by a Factor in Submandibular Glands of Rats
F. D. Finkelman, T. R. Malek, E. M. Shevach, and J. J. Mond 2252 In Vivo and In Vitro Expression of an Interleukin 2 Receptor by Murine B and T Lymphocytes
R. Ceredig 2260 Proliferation in Vitro and Interleukin Production by 14 Day Fetal and Adult Lyt-2^-L3T4^- Mouse Thymocytes
T. Kalland 2268 Interleukin 3 Is a Major Negative Regulator of the Generation of Natural Killer Cells from Bone Marrow Precursors
M. Tsujimoto, R. Feinman, and J. Vilček 2272 Differential Effects of Type I IFN and IFN-γ on the Binding of Tumor Necrosis Factor to Receptors in Two Human Cell Lines
M. Kirstein, W. Fiers, and C. Baglioni 2277 Growth Inhibition and Cytotoxicity of Tumor Necrosis Factor in L929 Cells Is Enhanced by High Cell Density and Inhibition of mRNA Synthesis
M. K. Warren and P. Ralph 2281 Macrophage Growth Factor CSF-1 Stimulates Human Monocyte Production of Interferon, Tumor Necrosis Factor, and Colony Stimulating Activity

Continued on page 5
Distinct Epitopes on the T Cell Antigen Receptor of HPB-All Tumor Cells Identified by Monoclonal Antibodies

Cross-Linking of Insulin Receptors to MHC Antigens in Human B Lymphocytes: Evidence for Selective Molecular Interactions

Monoclonal Antibodies Raised against Denatured HLA-B Locus Heavy Chains Permit Biochemical Characterization of Certain HLA-C Locus Products

The Valence for Ligand of the Human Mononuclear Phagocyte 72kD High-Affinity IgG Fc Receptor Is One

Alleantigenic Sites on Class I Major Histocompatibility Complex Antigens: 61-69 Region in the First Domain of the H-2kb Molecule Induces Specific Antibody and T Cell Responses

Monoclonal Anti-α (1 → 3) Dextran Antibodies of Igha BALB/c and Ighb C.B20 Mice Display Striking Similarities

Structure and Expression of Fcγ Receptors on Mouse Suppressor T Cell Hybridomas

The Interaction of Monomeric and Complexed Mouse Monoclonal IgG with Rat Basophilic Leukemia Cells: A Subset of IgG Molecules Can Bind to RBL Cell Fc Receptors for IgG

Epitopic and Paratopically Directed Anti-Idiotypic Factors in the Regulation of Resistance to Murine Schistosomiasis Mansoni

L3T4⁺ T Lymphocytes Play a Major Role in Pathogenesis of Murine Cerebral Malaria

Susceptibility/Resistance to Mouse Hepatitis Virus Strain 3 and Macrophage Procoagulant Activity Are Genetically Linked and Controlled by Two Non-H-2-Linked Genes

Characterization of Shigella flexneri-Specific Murine Monoclonal Antibodies by Chemically Defined Glycoconjugates

Gene Transfer of Immunoglobin Light Chain Restores Heavy Chain Secretion

Role of Protein Kinase C and Intracellular Calcium Mobilization in the Induction of Macrophage Tumoricidal Activity by Interferon-γ

Lymphokine-Activated Killer Cells (LAK). I. Differential Recovery of LAK, Natural Killer Cells, and Cytotoxic T Lymphocytes after a Sublethal Dose of Cyclophosphamide

Monoclonal Antibody 45-2D9 Recognizes a Cell Surface Glycoprotein on a Human c-Ha-ras Transformed Cell Line (45-342) and a Shared Epitope on Human Tumors
