**Relationship among Function, Phenotype, and Specificity in Primary Allospecific T Cell Populations: Identification of Phenotypically Identical But Functionally Distinct Primary Cell Subsets that Differ in Their Recognition of MHC Class I and Class II Allodeterminants**

**A Study on Proliferative Responses to Host Ia Antigens in Allogeneic Bone Marrow Chimeras in Mice: Sequential Analysis of the Reactivity and Characterization of the Cells Involved in the Responses**

**Retention of T Cell Reactivity to Mitogens and Alloantigens By Peyer's Patch Cells of Aged Mice**

**Aging and Lymphocyte Cytoskeleton: Age-Related Decline in the State of Actin Polymerization in T Lymphocytes from Fischer F344 Rats**

**The Immunostimulatory Effect of T Cells and T Cell Lymphokines on Murine Fetally Derived Placental Cells**

*Continued on page 4*

**EDITORIAL OFFICE CHANGE**

*Beginning April 13, 1987, all new manuscripts will be sent to the new Editor-in-Chief:*

Dr. Ethan Shevach  
The American Association of Immunologists  
9650 Rockville Pike  
Bethesda, MD 20814

*Manuscripts, correspondence, and matters relating to manuscripts submitted to The Journal of Immunology prior to April 13, 1987 will continue to be processed in the San Diego editorial office:*

Dr. Joseph Feldman  
The Journal of Immunology  
3770 Tansy Street  
San Diego, CA 92121
Antigen-Presenting T Cells. II. Clonal Responses of Alloreactive and Virus-Specific Self-Restricted Human Cytotoxic T Cell Responses Stimulated by T Lymphoblasts

Lethal Graft-vs-Host Disease Across Major Histocompatibility Barriers: Requirement for Leucyl-Leucine Methyl Ester Sensitive Cytotoxic T Cells

Spontaneous In Vitro Evolution of Lytic Specificity of Cytotoxic T Lymphocyte Clones Isolated from Murine Intestinal Epithelium

Demonstration of a Calcium Influx in Cytolytic T Lymphocytes in Response to Target Cell Binding

Allo-I-J Determinants Participate in Maintenance of Neonatal H-2 Tolerance

Suppressor T Cell Growth and Production of a Suppressor T Cell Differentiation Factor by the Murine Thymoma BW5147

Recognition of the β-2 Microglobulin-B Molecule by a CTL Clone

Stimulation of T Cells Via the Tap Molecule, a Member in a Family of Activating Proteins Encoded in the Ly-6 Locus

Amplification of Human B Cell Activation by a Monoclonal Antibody to the B Cell-Specific Antigen CD22, Bp 130/140

Human Monoclonal Anti-T Cell Antibody from a Patient with Juvenile Rheumatoid Arthritis

HLA-Linked Nonresponsiveness to Cryptomeria japonica Pollen Antigen. I. Nonresponsiveness Is Mediated by Antigen-Specific Suppressor T Cell

2'-Deoxycoformycin and Deoxyadenosine Affect IL 2 Production and IL 2 Receptor Expression of Human T Cells

A Monoclonal Antibody to a Cross-Reactive Idiotypic Idiotype on Cationic Human Anti-DNA Antibodies Expressing λ Light Chains: A New Reagent to Identify a Potentially Differential Pathogenic Subset

The NZB × SWR Model of Lupus Nephritis. I. Cross-Reactive Idiotypes of Monoclonal Anti-DNA Antibodies in Relation to Antigenic Specificity, Charge, and Allotype: Identification of Interconnected Idiotype Families Inherited from the Normal SWR and the Autoimmune NZB Parents

The NZB × SWR Model of Lupus Nephritis. II. Autoantibodies Deposited in Renal Lesions Show a Restricted Idiotypic Diversity

Interleukin 2 Responses of lpr and Normal L3T4+/Lyt-2+ T Cells Induced by TPA Plus A23187

CS-A Therapy in MRL-lpr/lpr Mice: Amelioration of Immunopathology Despite Autoantibody Production

Identification of IL 2R+ T Cells and Macrophages within Rejecting Rat Cardiac Allografts, and Comparison of the Effects of Treatment with Anti-IL 2R Monoclonal Antibody or Cyclosporin

Effect of Surgical Stress on Murine Natural Killer Cell Cytotoxicity

Experimental Allergic Encephalomyelitis Mediated by Murine Encephalitogenic T Cell Lines Specific for Myelin Proteolipid Apoprotein
