IL-4 Is Required for the IgE and IgG1 Increase and IgG1 Autoantibody Formation in Mice Treated with Mercuric Chloride

Prevention and Treatment of Chronic Relapsing Experimental Allergic Encephalomyelitis by Transforming Growth Factor-β1

Studies on the Induction of Anterior Chamber-Associated Immune Deviation (ACAID). II. Eye-Derived Cells Participate in Generating Blood-Borne Signals that Induce ACAID

Formation of Intrachain Disulfide Bonds gives Rise to Two Different Forms of the Murine IL-1β Precursor

Effects of Cytokine Combinations on Acute Phase Protein Production in Two Human Hepatoma Cell Lines

Inducible Expression of Murine IP-10 mRNA Varies with the State of Macrophage Inflammatory Activity

Involvement of the 55- and 75-kDa Tumor Necrosis Factor Receptors in the Generation of Lympokine-Activated Killer Cell Activity and Proliferation of Natural Killer Cells

IL-4-Dependent Up-Regulation of IL-4 Receptor Expression in Murine T and B Cells

Transforming Growth Factor-β (TGF-β)-Resistant Helper T Lymphocyte Clones Show a Concomitant loss of All Three Types of TGF-β Receptors

IL-7 Maintains the T Cell Precursor Potential of CD3-CD4-CD8- Thymocytes

Cloning of cDNA for Natural Killer Cell Stimulatory Factor, a Heterodimeric Cytokine with Multiple Biologic Effects on T and Natural Killer Cells

The G7 a3 Domain Alters T Cell Recognition of Class I Antigens

Serologic and Chemical Differentiation of Human III1 Light Chain Variable Regions

Conformational Structure of a Monoclonal Anti-Idiotypic Antibody to the Monoclonal Anti-Adenocarcinoma-Associated Carbohydrate Antibody YH206

Fc,RI-Mediated Hydrolysis of Phosphoinositides in Ghosts Derived from Rat Basophilic Leukemia Cells
Annexin III Translocates to the Periphagosomal Region when Neutrophils Ingest Opsonized Yeast

Structural and Functional Analysis of the Human Neutrophil 1-15 Antigen. An M, 65,000 to 70,000 Activation-Associated Membrane Proteinase

Superoxide Responses to Formyl-Methionyl-Leucyl-Phenylalanine in Primed Neutrophils: Role of Intracellular and Extracellular Calcium

Epitopes of Group A Streptococcal M Protein Shared with Antigens of Articular Cartilage and Synovium

Cyclosporin A Modulates the Course of Woodchuck Hepatitis Virus Infection and Induces Chronicity

Functions of the Various Human IgG Fc Receptors in Mediating Killing of Toxoplasma gondii

Mouse Hepatitis Virus 3-Thymic Cell Interactions Correlating with Viral Pathogenicity

Human Monoclonal Antibodies Specific for Capsular Polysaccharides of Klebsiella Recognize Clusters of Multiple Serotypes

Bidirectional Effects of Cytokines on the Growth of Mycobacterium avium within Human Monocytes

Splenic Macrophage Function in Early Syphilitic Infection Is Complex: Stimulation versus Down-Regulation

Characterization of an Immunoreactive 93-kDa Core Protein of Borrelia burgdorferi with a Human IgG Monoclonal Antibody

Sequences Homologous to Class II MHC W, X, and Y Elements Mediate Constitutive and IFN-γ-Induced Expression of Human Class II-Associated Invariant Chain Gene

Cloning of the 1.4-kb mRNA Species of Human Complement Factor H Reveals a Novel Member of the Short Consensus Repeat Family Related to the Carboxy Terminal of the Classical 150-kDa Molecule

NF-X, a Transcription Factor Implicated in MHC Class II Gene Regulation

Precursors of Both Conventional and Ly-1 B Cells Can Escape Feedback Inhibition of Ig Gene Rearrangement

The Ea Promoter: A Linker-Scanning Analysis

Somatic Hypermutation of the JC Intron Is Markedly Reduced in Unrearranged κ and H Alleles and Is Unevenly Distributed in Rearranged Alleles
