The American Association of Immunologists

Working for You!
AAI Membership Benefits

The mission of The American Association of Immunologists (AAI) is to advance the knowledge of immunology and related disciplines, foster interchange of ideas and information among scientists, and promote understanding of the field of immunology. AAI offers regular, trainee, and emeritus membership.

REGULAR MEMBERSHIP BENEFITS

• Membership in the largest and most prestigious professional association of immunologists in the world. Over 6,500 AAI member-scientists are working together to advance immunology research as well as on issues that affect their lives.

• A subscription to The Journal of Immunology; includes print copy and on-line access to every issue from the oldest in the archive to the most recent.

• NO submission fee for manuscripts sent to The Journal of Immunology.

• REDUCED color figure charges! Significant savings for members! New!

• Eligibility to serve on the Editorial Board of The Journal of Immunology.

• Reduced subscription rates to 16 optional journals.

• Membership in the Federation of American Societies for Experimental Biology (FASEB) and in the International Union of Immunological Societies (IUIS).

• Personal copies of the AAI Newsletter and on-line access to the FASEB Directory of Members.

• Eligibility for AAI Awards and service on AAI committees.

• Voting privileges in AAI elections and actions.

• REDUCED registration rates at AAI meetings and courses.

• Effective representation! Your views and concerns on research funding and science policy are brought to Congress and federal agencies by professional staff and member-driven committees.

To receive a membership application and obtain additional information, please contact:

AAI Membership Department
9650 Rockville Pike
Bethesda, MD 20814-3994
Phone: 301-634-7195  FAX: 301-634-7733
E-mail: members@aai.org  AAI Homepage: http://www.aai.org
The American Association of Immunologists (AAI) is a professional organization whose members have a strong interest in, and have made substantial contributions to, the science of immunology. AAI is a member of the Federation of American Societies for Experimental Biology (FASEB) and is responsible for the publication of The Journal of Immunology. To be eligible for election to membership in the AAI, a candidate must meet one of the following criteria:

1. Possess a Ph.D., (or equivalent graduate degree, e.g., D.Sc.) in immunology or related disciplines, or an M.D. (or equivalent medical degree, e.g., D.D.S.) and be the first author of one significant original publication on an immunological topic in a reputable, English language refereed journal. Manuscripts "in press" are acceptable when accompanied by a letter from the publisher or Editor-In-Chief of the journal affirming its acceptance and imminent publication. Abstracts and unpublished papers will not be considered in evaluating whether a candidate meets the publications requirement for membership.

2. Be an established scientist with substantial achievement in a related discipline and have at least one collaborative paper on an immunological topic in a reputable, English language refereed journal.

* These requirements may be waived under exceptional circumstances if a candidate shows evidence of other appropriate training and/or substantial research accomplishment.

This application package must include:

1. A current copy of your curriculum vitae including bibliography.
2. A copy of the title page of a first author publication that meets the criteria.
3. The name and signature of an active AAI member as your reference.

NAME: _____________________________________________________________________________________________
DEGREE (YEAR) & INSTITUTION: _______________________________________________________________________
PUBLICATION: _______________________________________________________________________________________
CURRENT TITLE/ POSITION: __________________________________________________________________________
ADDRESS: __________________________________________________________________________________________
STREET: ____________________________________________________________________________________________
CITY: __________________ STATE: ______ ZIP CODE: ______ COUNTRY: ______________________
E-MAIL ADDRESS: ___________________________________________________________________________________
PHONE NO: __________________ FAX NO: __________________
RESEARCH SPECIALTY: _____________________________________________________________________________

REFERENCE:

NAME OF AAI MEMBER (please print clearly): ___________________________________________________________
SIGNATURE OF AAI MEMBER: ______________________________________________________________________

Applications should be mailed to the AAI office and marked to the attention of the AAI Membership Department. Please DO NOT send payment with your application. You will be invoiced upon approval.

Application Review Deadlines:

Applications are to be received in the AAI office by the first day of each month.

2007 Dues Rates: January 1 - December 31: U.S. - $260.00 Canadian - $367.50 International - $360.00
Name: ___________________________________________ E-mail Address: _______________________________

Address: ______________________________________________________________________________________________________________________

City: __________________________ State: __________________________ Zip Code: __________________________

Phone Number: __________________________ Fax Number: __________________________

Qualified applicants must complete the information below and return this form with the required payment. Trainee members will receive a subscription to *The Journal of Immunology* and the *AAI Newsletter*. Trainee members will also have the privilege of attending and participating (without vote) in the AAI Annual Business Meeting. In addition, they will receive all AAI announcements and correspondence. Checks are to be made payable to *AAI*. All checks must be in U.S. dollars drawn on a U.S. bank and International money orders are accepted.

Individuals may remain Trainee members for a maximum of eight (8) years. Certification must be renewed annually.

**SECTION 1 -- APPLICANT INFORMATION**

☐ I am a *Pre*-doctoral Trainee -- I expect to receive the ____________ (advanced degree) in ____________ (mo/yr)

☐ I am a *Post*-doctoral Trainee -- I hold the following advanced degree(s) (please indicate all advanced degrees held and the month and year conferred): _______________________________________________________

**SECTION 2 -- CERTIFICATION OF APPLICANT’S TRAINEE STATUS**

(to be completed by current AAI member)

As a current member of the AAI, I hereby certify that the applicant identified above is either a regularly matriculated pre-doctoral student or a post-doctoral trainee and, as such, is eligible to remain a Trainee Member of the AAI.

Current AAI Member’s Name (First, MI, Last): ______________________________________________________________

Signature: _____________________________________________________________________________________________

Title (Dean, Dept. Chair, or Professor in Charge): ____________________________________________________________

AAI Member Number: ______________________ Date: ______________________

**SECTION 3 -- APPLICANT PLEDGE AND PAYMENT**

I __________________________, pledge that the copies of *The Journal of Immunology* purchased by me at the special subscription rate to Trainee Members are for my personal use. They will not be placed in a library for general use, sold, or replace a subscription currently purchased by an institution. I also agree that my on-line access to *The JI* will not be shared with others.

**JANUARY 1 - DECEMBER 31, 2007**

AD HOC REVIEWERS

The Journal of Immunology would like to thank the many scientists who reviewed manuscripts in a conscientious and objective manner during the past year. The continued high quality of The JI depends upon the dedicated service by all of these individuals.

AD HOC REVIEWERS

8894/8085

VOL. 177
A proliferation-inducing ligand, BAFF and, production by airway epithelial cells, 7164
Adenosine receptors, in T cell mediated regulation of colitis, 2765
AAD. see Allergic airway inflammatory disease
ACAIID. see Anterior chamber-associated immune deviation
N-Acetylg glucosamine, from core LPS, in ACAID.
Actin, N-Acetylglucosamine, from core LPS, in ACAID.
Adaptive immunity, against West Nile virus, 1835
Activation-induced deaminase, structural gene expression profile, 8348
Activating transcription factor, ATF/CREB
Activated coagulation factor X, antibodies against, interfere with AT inactivation, 8219
Activated coagulation factor X, antibodies against, interfere with AT inactivation, 8219
Activated coagulation factor X, antibodies against, interfere with AT inactivation, 8219
Adenoviruses
Activation-induced deaminase, structural gene expression profile, 8348
AdoIL-4, porcine ECs and iliac arteries
AdoIL-4, porcine ECs and iliac arteries
AdoIL-4, porcine ECs and iliac arteries
AdoIL-4, porcine ECs and iliac arteries
Second generation dmCT, enhanced immune response with, 3045
Adaptive transfer
ex vivo-expanded Treg cells, lupus suppressed by, NZB/NZW mice, 1451
memory induced by CD8a DCs isolated from C. muridarum-infected mice, 7067
vaccine-induced PBMC to metastatic melanoma patients, 6527
Adriamycin nephropathy, complement activation in glomerular and tubulointerstitial damage, 4094
Adult T cell leukemia, reduced HTLV-1-specific CD8 T cell function in, 5718
Advanced intercross lines, fine mapping of QTL in, CIA, 7042
AECS. see Alveolar epithelial cells
Aeromonas sobria, AECs. see AECs.
Advanced intercross lines, fine mapping of QTL in, CIA, 7042
Age/aging
Age-related CD8 T cell clonal expansions express CD122 and CD127, 8348

Anergy
reversed by homeostatic proliferation of CD8 T cells, effect on tumor rejection, 4521

T cell, mediated by monocyte-derived macrophages, 2691

Angiogenesis
IL-1β mediates proangiogenic activity, OPG-activated monocytes, 4267
regulated by CCL2 via activation of Ets-1, 2651

SAA binding to FPR1 induces synovial hyperplasia and, RA, 5585

Angiotensin II, ACE inhibition limits LPS-induced neutrophil recruitment, lung, 7233

Antioxidant defences, sepsis-induced, role of TCRs and AICD, 7990

Apoptosis associated signaling in T cells from mouse model, 6504
induced by 

Autoantibodies
Arginase I, inhibition by RNAi attenuates neutrophil recruitment, macrophages, 2691

Arginine residues, binding of human antithrombopilid mAbs, 1729

Arsenic trioxide, macrophage targets for, 3019

Arthritis
Ag-induced, protection in PKC-θ deficient mice, 1886

Antigen-induced, biophysical signals suppress cartilage pro-inflammatory responses, 8757
autoimmune, Ab responses to mycobacterial and self HSP65, rat, 6634
gene therapy with TCR isolated from inflamed paw, mouse, 8140
inflammation, calcium ion in, 2681
KR in ERK activation by inflammatory and stress responses, arthritis, 6152
LT pathway-directed central tolerance to collagen type II, 290
rheumatoid, SAA binding to FPR1 induces synovial hyperplasia and angiogenesis, 5585

TWEAK as novel arthritogenic mediator, 2610

ASC. see Apoptosis-associated speck-like protein containing a caspase-recruitment domain

ASMs. see Smooth muscle cells, airway

Aspergillus fumigatus
induces innate immune responses via MAPK, alveolar macrophages, 3994
stimulates Th2 biased immune response in CTRF-deficient mice, 5186

Ataxia
Ag-induced, protection in PKC-θ deficient mice, 1886

Autoantibodies
Arginase I, inhibition by RNAi attenuates neutrophil recruitment, macrophages, 2691

Arginine residues, binding of human antithrombopilid mAbs, 1729

Arsenic trioxide, macrophage targets for, 3019

Arthritis
Ag-induced, protection in PKC-θ deficient mice, 1886

Autophagy
Antigen-induced, biophysical signals suppress cartilage pro-inflammatory responses, 8757

Atopy, 4826
premature ovarian failure caused by autoimmunemediated pituitary-ovarian axis disruption, 1988

TLR4 up-regulation pathogenic for lupus-like autoimmune disease, mouse, 6880

Autoimmune hepatitis, CCR5 in T cell-mediated liver diseases, review, 2039

Autoimmune inflammation, lymphoma genesis and, regulation by PDCD4, 8095

Autoimmune myocardiitis, mimicry and Ab-mediated cell signaling, 8234

Autoimmune sensorineural hearing loss, cochlin-specific, increased frequencies in, 4203

Autoimmunity

B cells and DCs in T cell activation, 4481

D-D rearrangements and Vq replacement, B cells, lupus-prone and non-autoimmune mice, 1120

development in IL-14- transgenic mouse, 5676

effect of isoAsp modification, T cells, 4541

escape from RNA surveillance and, SLE, 1698

induction by CD4CD62Llow cell expansion, 4384

melanocytes killed by hsp70 and CD40L expression, 4168

mercury-induced,ameliorated by, 3065

modified by nucleic acid-sensing TLRs, review, 6573

neogenesis and, lymphoid structures, stomach H/K-ATPase-reactive TCR tract mouse, 7858

pathogenic, PTX superior to TLR ligands in enhancing of, 6896

against the prostate gland, pathogenic consequences in senem quality and, 957

systemic, B cell activation and, triggered by Th2 proliferation, LatY136F mutant mouse, 2285

transgenic MC159 expression causes D-D rearrangements and VH replacement, 7873

Autoagrophy

barrier to infection, review, 4945

induction of, growth factor-withdrawal cell death and, CD4 T cells, 5163

B-1a cells, cyclin D3 loss compensated by cyclin D2, 787

Icells

development, review, 2749

initiation of contact sensitivity by iNKT cells and, 3686

B cell-activating factor of TNF family APRIL and, production by airway epithelial cells, 7164

deficiency of, paucity of clinical disease, lupus-prone NZM 2238 mice, 2671

B cell antigen receptors

affinity as determinant of Ag-reactive B cells, 2285

apoptotic signaling by, controlled by human IgE EMPC, B cells, 3597

GAL-1-dependent relocation of, induced by integrin clustering, pre-B cells, 796

IgM chain isotypes and specificities of, zebra fish, 2452

kinetics mapped by phosphospecific flow cytometry, 1581

in regulation of DAG and calcium signaling, B cells, 5405

B cell lymphomas

15-d-PGJ2 and ciglitazone induce apoptosis, 5068

EBV protects against DR-induced apoptosis, 3283

GC transit stages defined by B cell transcription factors, 6930

B cells

15-d-PGJ2 and ciglitazone induce apoptosis, 5068

activation and systemic autoimmunity triggered by Th2 proliferation, LatY136F mutant mouse, 2285

Ag presentation mediated by, in cardiac allograft rejection, 7715

Ag-reactive, BCR affinity as determinant of fate, 7723

autoreactive, activation and TLR hyper-sensitivity, induced by EBV LMP2A, 2793

B220+, characterization, 2072

BCR kinetics mapped by phosphospecific flow cytometry, 1581

BCRs and regulation of DAG and calcium signaling, 5405

bone marrow, contributions of IgG- and IgE-mediated signaling in development, 7913

CCL23CD5, CXCL13 and CCL19 promote resistance to apoptosis, 6713

CD22 ligand binding regulates survival, 3065

CD22-mediated endocytosis of CD22 trans-ligands into, 2994

CD77-, subset comprising centroblasts, CD22-mediated endocytosis of CD22 via CD21, 2056

characterization of epitopes associated with PE38, 8822

characterization of NP-specific germinal center cells and Ag-binding B220+ cells, 2072

CR2-expressing, factor I-mediated complement component fragment and HIV transmission to T cells, 3469

D-D rearrangements and Vq replacement, lupus-prone and nonautoimmune mice, 1120

DCs and, autoimmune T cell activation, 4481

development of, stage-specific expression Crlz and IgG genes, 5420

E2-Z regulates pro-B cell expansion and follicular versus MZ decisions, 6723

EBV-transformed, recognition by EBNA-specific CD4 T cells, 3746

EMPD of human miGE controls BCR apoptotic signaling, 3597

epigenegetic regulation controls CIITA promoter accessibility, 3865

expressing NAA, representation in IgH chain Tg mouse, 2412

genesis within idd5 and idd9/11 affect activity, 2465

ICOS-induced B7a shedding inhibited by TLR7/8 and TLR9, 2356

IgA class switching in subsets of, 6025

IgE production regulated by NE via p38 and CD23, 2926

immune, CD4 activates MAPK pathway via CD166, 1152

immunoregulatory, PAF and serotonin in, 4810

increased survival and activation by ma-larial polyclonal B cell activator, 3035

kinetics of responses to IL-21, 5236

liver, IL-18 restores IgM production by, burn-injured P. aeruginosa-infected mouse, 4627

lysed by xenogenous-activated DN T cells via perforin/granzyme-dependent pathway, 6920

marginal zone, possess enhanced secre-tory apparatus and higher IgM output, 3791

marginal zone, properties regulated by Gq5/11, family G proteins, 2985

memory CD27 IgG, population in peripheral blood, 3728

MHC class II molecules control responsiv-ness to LPS, 4620

MRL-lpr/fld CD4 T cells activated by DCs and, L-chain Tg mice, 45

MZB and B1, FlR3 as immunoregula-tory marker for, 6818

novel mechanism for complement activation following Ag binding, 5155

nuclear factor in, Pillars of Immunology, 7483

nuclear factor interaction with immunoglobulin enhancer sequences, Pillars of Immunology, 7485

OSP epitope specificity of T cells and, EAE and optic neuritis, 7364

phase II enzyme induction blocks DEP-enhanced IgE production, 3477

PKC0 maintains CIITA gene expression, 950

primary, EBV transactivates HERV-K18 via CD21, 2056

progenitor, Spi-C and P.U.1 effects on gene expression, 2195

progenitor, Vq replacement in early development of, 7007

reactivation histoplasmosis regulated by CD4 CD8+ T cells and, 1763

resting, peripheral MBP presentation by, 2097

self-tolerance, role of NFAT1, 1510

STAT3 in resistance to radiation-induced apoptosis, 6593

sumoylation of Daxx regulates IFN-induced growth suppression, B cells, 1160

survival promoted by E2A, 2495

synchronization and cross-talk between HEVs and lymphatic vessels via LTBR and, 3369

T cells and, chemotaxis triggered by CCL21 and CXCL13, 2340

T cells and, primed by DC-LAMP and LAMP-1-HIV-1 Gag chimeras, 2265

tolerant-anti-insulin, calcium mobilization and NFATc1 in, 2234

transcription factors, GC transit stages defined by, 6930

X-1 interaction with miGE in receptor-mediated internalization, 1139

ligation costimulates cell death, DP thymocytes, 6098
p300/CBP mediates T cell coactivation by CD28 costimulatory receptor, 401
resistance to CD95-induced apoptosis mediated by, abolished by CsA, T cells, 7689
T cell costimulation, Grb2 and Gads in, 1085
CD36, RUNX3 regulates expression of, myeloid cells, 2107
CD38, in CD4NKT cell survival, NOD mouse, 2939
CD40 functional duality of, regulates effector T cell functions, 6642
helminth-specific IFN-γ induction requires CD40/CD154 interactions, 3209
ligation of, IgG2a expression induced by, 3209
stimulation by, T cell down-regulation of allergic sensitization via, 5138
stimuli specific to, Wolbachia endosymbionts of B. malayi mediate tolerance to, macrophages, 1240
CD40 gene, IL-10 inhibits LPS-induced expression of, via SOCS-3, 7761
CD40 ligand enhances dengue viral infection of DCs, 6497
hsp70 and expression of, cures melanoma, 4148
soluble, in pathology of African tick bite fever, 2699
CD40 receptor, agonistic mAb against, decreases lymphocyte apoptosis, 557
CD43 effect on in vivo assays of neutrophil and activated T cell recruitment, 6450
glycoforms of, galectin-1 binding to, 5328
CD44 activates NKT cells and conventional T cells, 268
innate immune system expression of, joint inflammation, PG-induced RA, 1932
urothelial, urinary tract E. coli infection and, 7225
CD46 epithelial cell receptor for internalization of uropathogenic E. coli, 2543
Tr1 cell proliferation induced by, aborted due to defective, Akt/survivi-
pathway, 4957
CD47 interactions with SIRP, in semimature DCs, 8559
interactions with TSP, in Treg cell generation in response to inflammation, 3534
role in AEC-directed transepithelial migration of monocytes, 1817
CD48, induced by IL-3, eosphinophils, 77
CD49b, improves memory Th cell functional specialization, 968
CD55, see Decay-accelerating factors
CD70, role in CD4 Th cell-dependent CD8 T cell priming, 2969
CD73, T cells expressing, suppress effector CD4 T cells via AMP to adenosine conversions, 6780
CD74, MIF or, inhibition attenuates growth and invasion, DU-145 prostate cancer cells, 8730
CD80
CD4 T cell-expressed, regulates CNS function, EAE, 2948
CD8 T cells stimulated by CD8Tc-APCs via pMHC, IL-2 and, 2976
ligation of, in CD25 expression by CD8 T cells, 4495
CD81, modulates HIV-1 induced membrane fusion, 5129
CD94 DNA hypomethylation and histone acetyl-
ylation in expression of, NK cells, 414
inhibits NK cell activation at IS, 3590
CD97, mediates CD55 costimulation, CD4 T cells, 1070
CD100, in glomerulonephritis, 3406
CD101, marker for alloantigen-induced CD8 Treg cells, 2775
CD122, age-related D8 T cell clonal expansions express CD127 and, 2784
CD127, age-related D8 T cell clonal expansions express CD122 and, 2784
CD134, IL-18 links immune system IFN-γ and, 234
CD137 ameliorates mercury-induced autoimmunity, 5708
costimulation inhibits Th2-mediated AAD, 814
effector CD8 T cell responses modulated by OX40 and, 4464
CD147, antibody to, inhibition of asthma-mediated lung inflammation by, 4870
CD154, helminth-specific IFN-γ induction requires CD40/CD154 interactions, 3209
CD166, immature thymocytes and T and B cells, 1152
CD169, molecular and functional character-
ization, 2819
Cdc42, activity patterns related to T cell polarization, 1708
CDw78, defines MHC class II-peptide complexes, 5451
Celiac disease, gliadin-specific type 1 Treg cells inhibit pathogenic T cells, 4178
Cell cycle progression of, in cytotoxic granule production by T cells, 1981 prolonged, is defining property of HSCs, 201
Vav1 promotes cycloproliferation via TCR/CD8, FOXP1 and p27Kip1, T cells, 5024
Central nervous system APCs, T cell activation of, inhibited by IFN-γ, 3542
DCs amplify T cell-mediated immune responses in, 7750
DNA vaccine coadministration of constructs with encephalogenic determinant and IL-10 elicits immunity, 8241
LA affects monocyte migration into, regulated by CD4 T cell-expressed CD80, EAE, 2948
Centroblasts, centrocytes, plasmablasts and, CD77 B cell subset comprising, 4341
Centrocyes, centroblasts, plasmablasts and, CD77 B cell subset comprising, 4341
Cerebral listeriosis, TNF in pathogen control and brain damage, 3972
Cerebrospinal fluid, TPI- and GADPH-reactive autoantibodies in, MS, 5652
CFTR, see Cystic fibrosis
Channel catfish, identification and characterization of IgPfxR1, 2505
Chemokine receptor homologous molecule expressed on T2 cells, PGD2 interaction with, allergic inflammation of skin, 2621
Chemokine receptors
CCR2, deletion impairs DVT resolution, 3388
CCR2, role in AEC-directed transepithelial migration of monocytes, 1817
CCR3, functional analysis, airflow epithelial cells, 3344
CCR4, role in Th1 and Th2 granuloma formation, lung, 4149
CCR4 and CCR8, CD4(CD25) Treg cells expressing of CLA and, 4488
CCR4 modulates innate immune responses, 6824
CCR5, structural basis for interaction with selective agonist, 3116
CCR5 in T cell-mediated liver diseases, review, 2039
CCR7, fate of CCL19 and, 2314
CCR7, DC migration and, letter, 2035
CCR7, SILT adaptation to microbioder and, 6824
CCR8, expression identifies subset of CD4 memory T cells, 6940
CCR9- or CXCR3-expressing microglia elicited by neurotrophic pathogens, 2644
CCR10, Treg cells expressing, inflammation associated with CCL28 and recruitment of, 593
CR6, in pulmonary inflammation and emphysema induced by cigarette smoke, 4350
CRX3, CXCL10/IP-10 and, in Dengue virus resistance, 1855
CRX3, IP-10 and, in Pneumocystis pneumonia, 1846
CRX3/1-storing granules, COX regulates cell surface expression of, CD4 T cells, 8806
CRL3 and CXCL11 in endometrium, 8813
CXR4, β defensin 3 antagonist of, HIV-1, 782
CCL21 and CXCL13, B cell and T cell chemotaxis triggered by, 2340
CCL21 expression and DC LN trafficking enhanced by oncostatin M, 7665
CCR7, tolerance induction to inhibited Ag, relies on DC-mediated transduction to bHLNs dependent on, 7346
CX3CL1 effects on migration and adhesion via β1 integrin, neurons, 7599
CXCL8 expression, mediated by cSrc, epithelial cells, 3427
CXCL10 and CCL3, NF-kB and p38 in CpG DNA-induced production of, pDCs, 4848
CXCL10/IP-10, CXCR3 and, in Dengue virus resistance, 1855
CXCL10/IP-10 inhibition of viral binding to heparan sulfate, induced by Dengue virus, 3185
CXCL10 oligomerization in presentation on ECs, 6991
CXCL11 and CXCR3 in endometrium, 8813
CXCL12 limits inflammation by localizing mononuclear infiltrates, EAE, 8053
CXCL13, CCL19 and CCL21 in NALT organogenesis, 4276
CXCL13 and CCL19 promote resistance to apoptosis, CLL CD23CD5 B cell, 6713
CXCL16, influence on Cpg-induced immune activation, 1575
Chemokine receptors
CCR2, deletion impairs DVT resolution, 3388
CCR2, role in AEC-directed transepithelial migration of monocytes, 1817
CCR3, functional analysis, airflow epithelial cells, 3344
CCR4, role in Th1 and Th2 granuloma formation, lung, 4149
CCR4 and CCR8, CD4(CD25) Treg cells expressing of CLA and, 4488
CCR4 modulates innate immune responses, 6824
CCR5, structural basis for interaction with selective agonist, 3116
CCR5 in T cell-mediated liver diseases, review, 2039
CCR7, fate of CCL19 and, 2314
CCR7, DC migration and, letter, 2035
CCR7, SILT adaptation to microbioder and, 6824
CCR8, expression identifies subset of CD4 memory T cells, 6940
CCR9- or CXCR3-expressing microglia elicited by neurotrophic pathogens, 2644
CCR10, Treg cells expressing, inflammation associated with CCL28 and recruitment of, 593
CR6, in pulmonary inflammation and emphysema induced by cigarette smoke, 4350
CRX3, CXCL10/IP-10 and, in Dengue virus resistance, 1855
CRX3, IP-10 and, in Pneumocystis pneumonia, 1846
CRX3/1-storing granules, COX regulates cell surface expression of, CD4 T cells, 8806
CRL3 and CXCL11 in endometrium, 8813
CXR4, β defensin 3 antagonist of, HIV-1, 782
CXC5 identifies IL-4 and IL-10 secreting Vγ9Vδ2 T cell subset, 5290
D6 in T cell responses mediating EAE, 17
Chemokines downregulated by anti-IL-12p40, psoriasis, 4917
Duffy antigen modifies responses following LPS stimulation, 8086
m35K inhibits activity of, 5567
Chemotaxis, triggered by CCL21 and CXCL13, B cells and T cells, 2340
Chitinase-like mammalian proteins, induction in helminth infections and alergies, review, 1393
Chlamydia muridarum, immunity induced by CD8α DCs isolated from infected mice, 7067
Chlamydia trachomatis
Ag-specific CD8 T cell response to, genital mucosa, 7974
HSP60 induces trophoblast apoptosis through TLR-4, 1257
infection alters memory CD8 T cell development, 4021
CHO-131, identifies CLA T cells enriched in P-selectin binding, 4742
Cholera toxin
B subunit, Fosp3CD25 and Fosp3-C
CD25 CD4 Treg cells generated by Ag conjugated to, 7634
double mutant, as second generation adjuvant, enhanced immune response with, 3045
Choroidal neovascularization
chemoattractant-1
GGGAAA
Ciona intestinalis, 4132

2006]
SUBJECT INDEX
8927
COX-2 expression enhanced by IL-13, microglia, rat brain, 1323
COX-2 inhibition attenuates Ab responses against HPV 16 VLPs, 7811
regulates cell surface expression of CXCR3/1-storing granules, CD4 T cells, 8086
Cyclophosphamide, tolerance induced by, (6, 7863), activities during lymphocyte and macrophage HIV-1 infection, 443
Cyclophilin A, CsA and, activities during lymphocyte and macrophage HIV-1 infection, 443
Cytokine-induced neutrophil chemotaxis, 2755
Cytotoxic T lymphocytes, targeted by Umbilicus dioica, 2908
Cytokeratin 10, bound by Lyme arthritis, 8806
CypA and, activities during lymphocyte and macrophage HIV-1 infection, 443
Decay-accelerating factor 1
Dendritic cell-associated CTD-2 domain of
Deguelin, suppresses NF-kB phosphorylation mediated by PKCβII, mast cells, 1492
Deguelin, suppresses NF-kB-regulated gene expression via IKK, 5612
DeltaV, TRP2 epitope, generates high-affinity tumor-specific T cells, 155
Demyelinating diseases, models of, CD8 T cells in, 2403
demyelinating encephalomyelitis, induced by monococytes and DCs, 6871
Dendrites, morphology of, HCMV alters MHC class II localization and, Langerhans cells, 3960
Dendritic cell-associated C-type lectin-1, CD4 T cell responses induced via Ag targeting to, 2276
Dendritic cell-tumor fusion cells, enhanced immunogenicity of HSP70-pc from, 5946
Dendritic cells
1-MT modulates TLR signaling, 2061
activated, phagocytosis of particulate Ags induces lysosomal remodeling, 8493
activation of, reduced by S. typhimurium, CD4 T cells, 3983
Ag-specific CD8 T cells around, promoted by CD4 help, 1406
airway mucosal, accelerated Ag sampling following challenge with heat-killed bacteria, 5861
alternatively activated, effect on IL-10, Foxp3 CD4 T cells and allograft survival, 5868
amplify T cell-mediated immune responses, CNS, 7750
arp2 regulates function of, 7794
B cells and, in autoimmune T cell activation, 4481
BM, DT-pulsed exosomes induce type 1 Ag-specific IgG responses, 3757
calreticulin as receptor for NY-ESO-1, 3582
CCR7 and migration of, letter, 2035
CD1 Ag presentation, target for HSV immune evasion, 6207
CD8, Sirp expression by, 372
CD8a, isolated from C. muridarum-infected mice, immunity induced by, 7067
CD1c, CD4 T cell interaction with, induces osteoclast development, 3314
CD40L enhances dengue viral infection of, 6497
CIGA gene regulated by ERK and p38, 70
cross-dressed with MHC class I-peptide complexes prime CD8 T cells, 6018
cutaneous CD4 T cell-induced, Bid-dependent apoptosis of, regulates T cell expansion, 5956
dC2 phenotype, induced by SOCS-3 transduction, 1679
demyelinating encephalomyelitis induced by monococytes and, mouse, 6871
effect of plexin-A1 on Rho and actin, 4271
effects of siRNA-mediated Notch ligand knockdown in, 885
essential for IL-10 production and resistance to T. gondii, 31
expressing galectin-1, delay autoimmune diabetes, NOD mouse, 5278
Cysteine leukotriene, signaling in IL-4-
prime boost with alternating vaccines generates peptide-specific CD8 T cells, 6626
TCR repertoires expanded by, 7626
against tissue-restricted Ags enhances immunity after allogeneic HSCT, 4159
DOCK2, in integrin αβ- mediated adhesion, T cells, 5215
Dopamine D₄ stimulation induces T cell quiescence via KLF-2, 7525
Doxorubicin. see Adriamycin
15-DPG, see 15-Deoxy-Δ12,14-prostaglandin J₂
DR1*0102, FP-associated, Dsg1 isoform contains T cell epitope binding to, 6517
DRPs. see Defective ribosomal products
Dsgl. see Desmoglein 1
Dual specificity phosphatases, MPKs, role in inflammatory responses, review, 7497
Duffy antigen, modifies chemokine responses following LPS stimulation, 8086
Dust mite allergen, Der p 1 proteolytic
Dual specificity phosphatases, MAPKs, role in inflammatory responses, 629

E2–2, regulates pro-B cell expansion and follicular versus MZ decisions, 6723
E2A promotes B cell survival, 2495
stimulates Ig hypermutation, 395
promotes B cell survival, 2495

EAE. see Experimental autoimmune encephalomyelitis
EAP. see Experimental autoimmune encephalomyelitis
EAT-2, in NTB-A-mediated activation, NK cells, 3170
EAU. see Experimental autoimmune uveoretinitis
Ectromelia virus, CD28 costimulation in resistance mediated by, CD8 T cells, 8027
ECTV. see Ectromelia virus
Egr-1, IL-13-induced, effects of STAT1 and STAT6 on, pulmonary fibroblasts, 4141
Electron transport complex I, in CD8 T cell function, 852
Elk1, in FRA protooncogene transcription, 7193
Elocalcitol, treatment of EAP, NOD mouse, 8504
Embryonic stem cells, C3 controls teratoma formation by, 4803
Emphysema, induced by cigarette smoke, role of CD6 and MIP-3α, 4350
EMT. see Epithelial to mesenchymal transition
Encephalomyocarditis virus, COX-2 expression induced by, MAPK in, 3413
Endocytosis of CD22, trans-ligands into B cells mediated by CD22, 2994
nucleosome, neutrophil activation and recruitment through, SLE, 7740
Endometrium, CXCL11 and CXCR3 in, 8813
Endoplasmic reticulum, Bap31 enhances export and quality control of MHC class I molecules, 6172
Endoplasmic reticulum aminopeptidase 1, class I-restricted tyrosinase epitope processing requires PNGase, proteases and, 5440
Endothelial cells
antiproliferative effect of HO-1 involves p38α degradation, 1894
CCL21 expression and DC LN trafficking enhanced by oncostatin M, by, 7665
cortactin from, affects ICAM-1 clustering and actin remodeling during adhesion and transmigration, PMN, 6440
CXCL10 oligomerization in presentation on, 6991
expression of pULBP1 triggers human NK cytotoxicity via NKG2D, 2146
HIF in coal chloride and hypoxia-mediated IL-8 expression, 7211
liver sinusoidal T cells suppressed by allogeneic cells endocytosing, 3615
porcine, transduced with AdenoIL-4 protected against injury from human complement, 7355
thiocyante-dependent induction of adhesion molecules via phagocyte peroxidases, 8714
VCAM-1 activates PKC via NADPH oxidase, 6379
Endotoxin, tolerance to, RelB induction

Epidermal lysis bullosa acquisita, model
Epidermal growth factor, domain repeats
Eotaxin-1, MAPK pathways in IL-17

Equine infectious anemia virus, CTLs specific for, variant in P. aeruginosa
LPS activation and TLR-hypersensitivity, 7193

Escherichia coli
abdominal sepsis induced by, function of IPA during, 1189
induces GILT via TNF and IL-1β, TH1 cells, 4833
MBL augments uptake by Kupffer cells via SR-A, 5517
pyelonephritis associated with, TLR4 in reaction of renal collecting duct epithelial cells to, 4773
urinary tract infection, facilitated by urothelial CD44, 7225
uropathogenic, CD46 receptor for internalization of, epithelial cells, 2543

Epithelial cells
activated by meso-DAP and meso-lanthionine via NOD1, 1796
airway, monocye/macrophage-derived microparticles regulate inflammatory mediator synthesis, 1975
airway, APRIL and BAFF production by, 7164
airway, MBP and EPO, activate remodeling factor synthesis, 4861
aiway, functional analysis of CCR3, 3344
alveolar, direct monocyte transepithelial migration upon influenza A virus infection, 1817
c-Src mediates thrombin-induced NF-κB activation and IL-8/CXCL8 expression, 3427
CD46 as receptor for internalization of uropathogenic E. coli, 2543
gastric, H. pylori induction of IL-8 dependent on APE-1/Ref-1, 7990
intestinal, IL-1 stimulated, inflammatory molecule regulation in, 5604
lactoferrin modulation of activity against R5- and X4-HIV-1 adsorption by natural Abs, 5540
lung, FRA protooncogene stimulated by TNF-α, c-Jun-driven transcription, 7193
renal collecting duct, react to pyelonephritis-associated E. coli via TLR4, 4773
signal cascade, P. aeruginosa LPS accelerates wound repair via activation of, 8693
Epithelial to mesenchymal transition, immunoeediting and, cancers, 1526
EPO. see Eosinophil peroxidase
Epstein-Barr virus
allogeneic responses of CD4 T cells specific for, 1427
HERV-K18 transactivated by, CD21 in, primary B cells, 2056

LMP2A induces autoreactive B cell activation and TLR-hypersensitivity, 2793
protects against DR-induced apoptosis, B cell lymphomas, 3283
usage of cellular niches by, CD8 T cells, 4998

Epstein-Barr virus nucleic antigen, CD4 T cells specific for, intercellular Ag transfer and EBV-transformed B cell recognition by, 3746
Equine infectious anemia virus, CTLs specific for, variant in α-2 domain of equine MHC I alters Gag and Rev epitope recognition by, 7377
ERAP1. see Endocytic reticulum aminopeptidase
Erythrocyes, Crry-deficient, DAF rescue

Epstein-Barr virus nuclear antigen, CD4 T cells specific for, 1427
HERV-K18 transactivated by, CD21 in, primary B cells, 2056

LMP2A induces autoreactive B cell activation and TLR-hypersensitivity, 2793
protects against DR-induced apoptosis, B cell lymphomas, 3283
usage of cellular niches by, CD8 T cells, 4998

Epstein-Barr virus

Epstein-Barr virus nuclear antigen, CD4 T cells specific for, intercellular Ag transfer and EBV-transformed B cell recognition by, 3746
Equine infectious anemia virus, CTLs specific for, variant in α-2 domain of equine MHC I alters Gag and Rev epitope recognition by, 7377
ERAP1. see Endocytic reticulum aminopeptidase
Erythrocyes, Crry-deficient, DAF rescue from alternative pathway complement attack, 5558

Escherichia coli
abdominal sepsis induced by, function of IPA during, 1189
induces GILT via TNF and IL-1β, TH1 cells, 4833
MBL augments uptake by Kupffer cells via SR-A, 5517
pyelonephritis associated with, TLR4 in reaction of renal collecting duct epithelial cells to, 4773
urinary tract infection, facilitated by urothelial CD44, 7225
uropathogenic, CD46 receptor for internalization of, epithelial cells, 2543
Estradiol, inhibits CD8 T cell responses to paternal Ag-bearing cells during insemination, 7567

Ets-1
CCL2 regulates angiogenesis via activation of, 2651
deficiency, impaired CD8 thymocyte generation, mouse, 905

Evolution
AID, structural phylogenetic analysis of function, 355
C3Ar characterization in C. intestinalis, 4132
CD4 family, analysis in teleost fish, 3939
FcRIII, homologs in nonhuman primate species, 3848
identification and characterization of IgFcR1, channel catfish, 2505
IgL chain isotypes and BCR specificities, zebra fish, 2452
zebra fish Ilarins in T cell and B cell development, 2463

EVT. see Extravillous cytotrophoblast
Experimental autoimmune encephalomyelitis
CD4 T cell-expressed CD80 regulates CNS function, 2948
CD5-Ck2 pathway in, 8542
CXCL12 limits inflammation by localizing mononuclear infiltrates, 8053
D6 in T cell responses mediating, 17
DNA vaccine coadministration of constructs with encephalogenic determinants and IL-10 ciliates immunity, CNS, 8241
IL-10 essential for 1,25(OH)2D3-inhibited D6 in T cell responses mediating, 17
LA affects monocyte migration into CNS and stabilizes BBB, 2630
OSP-induced epitope specificity of T and B cells in, 7364
suppressed by TLR via interferon β, 7505
thymus in oral tolerance, 1500
Experimental autoimmune myasthenia gravis, suppression by GM-CSF with Foxp3 Treg cell expansion, 5296
Experimental autoimmune myocarditis, ameliorated by IL-22-Ig fusion gene, 3635
Experimental autoimmune prostatitis, Elocalcitol treatment of, NOD mouse, 8504
Experimental autoimmune uveoretinitis, sialoadhesin promotes inflammatory response in, 2258
Experimental colitis exacerbated by matrix metalloproteinase-ase-2 ablation, 4103
T cell-dependent, IL-12 regulated by IL-23, 2760
Extracellular matrix, migration through, enhanced in galectin-1-matured DCs, 216
Extracellular protein kinases, macrophage, contributes to protein translation via prevention of JNK-dependent PPI inhibition, 1636
Extracellular signal-regulated kinases
CIITA gene regulated by p38 and, DCs and macrophages, 70
ERK5, activates NF-κB in leukemic T cells, 7607
IL-27 induces Th1 cell differentiation via p38/T-bet- and ICAM1/LFA-1/ERK1/2 pathways, 7579
KSR in inflammatory and stress response activation of, arthritis, 6152
Extravillous cytotrophoblast, IFN-γ in alteration of first trimester migration of, decidual NK cells, 8522
Eyes anterior chamber of, CD11b myeloid cell accumulation and failure to prevent tumor growth, 1599
IL-10 from γδ T cells promotes ACAID and immune privilege, 8331
tumor escape mutants developed within immune-privileged environment, 162

FACS. see Fluorescence-activated cell sorting
Factor B, in complement activation via alternative pathway, laser-induced CNV, 1872
Factor H bound by GNA1870, 501
C-terminal domain in regulating C3b activation, 6308
in complement activation via alternative pathway, laser-induced CNV, 1872
Factor VIII, inactivated by IgG, hemophilia A patients, 1335
Factor Xa, antibodies against, interfere with AT inactivation of FXa, APS, 8219
Fas
Fas/FasL interactions in CD4 T cell-dependent autoimmune against melanocyte neoantigen, 3055
inflammatory DC activation via Fas/Fas induced by Pneumocystis β-glucans, 459
LPS-induced monocyte survival inhibited by CD4CD25 Treg cells via Fas/FasL, 6540
Fas ligand cytoplasmic domain costimulates TCR signals, T cells, 1481
LPS-induced monocyte survival inhibited by CD4CD25 Treg cells via Fas/FasL, 6540
Fatal recall responses, CD8 T cell-mediated, ehrlichia infection, 4644
Fc receptor homolog 3, immune-regulatory marker, MZ and B1 B cells, 6818
FCP33, TCR β-chain-FCP33 complex and FcγRIII in formation of allogeirc HSCs, 1444
FcRn3, see Fc receptor homolog 3
Fgr, Hck and, in β2 integrin-mediated outside-in signaling, neutrophils, 604
Fibroblast-like synoviocytes, RA, protected from apoptosis by VEGF165 interaction with neuropilin-1 via Bcl2 and Bax, 5727
Fibroblasts
OSM induces IL-6 via PKCδ activation, 8740
pulmonary, effects of STAT1 and STAT5B on IL-13-induced Eg3-1 and PIF-1 ligands, 4141
Fibronectin, adhesion to, M. tuberculosis
PIM binds αβ integrin on CD4 T cells and induces, 2959

Filamin A, PKC-θ-mediated T cell activation requires, 1721
Flagellin, humoral immune response to, requires T cells and innate immuinity activation, 2810
Flavivirus, activation and TLR7 signaling, DCs, 7114
FiIC, S. typhimurium regulates location of CD4 T cells, 3983
FLICE-inhibitory protein, cellular, HCMV
IE2 protein mediates apoptosis in retinitis via, 6199
FLN A. see Filamin A
Flotillin-1, regulates IgER-mediated signaling, mast cells, rat basophilic leukaemia, 147
Flow cytometry, phosphospecific, BCR kinetics mapped by, 1581
Fluorescence-activated cell sorting, CTLs with MHC peptide and Ab Fab' conjugates, 3903
Follistatin-like protein-1, novel proinflammatory molecule, 4758
Formyl-met-leu-Phe, localization of recognition complexes for LTB4 and, in lipid rafts, neutrophils, 8177
Formyl peptide receptor, antagonized by CsA via inhibition of cognate ligand binding, 7050
Formyl peptide receptor-like 1
S. aureus FLIpR antagonizes, 8017
SAA binding to, induces synovial hyperplasia and angiogenesis, RA, 5585
4–1BB. see CD137
FOXO1, Vav1 promotes cycloprogression via TCR/CDB8, p27kip1 and, T cells, 5024
FOXp3, functional analysis of, 3133
FFR1. see Formyl peptide receptor-like 1
FRAI protooncogene, TNFα-stimulated, c-Jun-driven transcription, pulmonary epithelial cells, 7193
Francisella novicida, Akt/PK-B modulates macrophage response to infection by, 6317
FSTL-1. see Follistatin-like protein-1
FXα see Activated coagulation factor X
G protein-coupled receptor 83, overexpression in naive CD4+CD25+ T cells induces Foxp3 Treg cells, 209
G proteins
G12/G13 family of, MZB cell properties regulated by, 2985
Gα and Gβ in PAFR activation and regulation, 3242
Gads, Grb2 and, in CD28-mediated costimulation, T cells, 1085
Gag epitope, recognition by EIAV-specific CTL variant in α2 domain of equine MHC I alleles, 7377
Galectin-1
binds to CD43 glycoforms and regulates T cell death, 5328
DCs expressing, delay autoimmune diabetes, 7193

α-GAL interaction with, human monocytes recognize porcine epithelium via, 1289
C. albicans recognition by macrophages requires TLR2 and, 4679
in function maintenance, mast cells, 4991
induces death of Candida albicans expressing β-1,3-linked mannan, 4718
Gamma-IFN-inducible lysosomal thiol reductase induced by E. coli via TNF and IL-1β, THP-1 cells, 4833 role in MHC class II-restricted Ag presentation, 8569 T cell activation inhibited by, 4369 GATA-3 C-terminal region motif in DNA binding and function, 5801 regulates development and function of iNKT cells, 6650 stabilization of, Th2 development regulated by bmi-1 genes via, 7656 GBS. see Streptococcus, group B Gelatinase B, mast cells, cytokine regulation and role in cell migration, 2638 Gelatinases, in pathogenesis, experimental colitis, 4103 Gender differences in airway responsiveness and LPS-induced inflammation, mouse, 621 TLR7 ligands induce higher IFN-α production in women, 2088 Gene electrotransfer, HCV DNA vaccine, immune response modulated by, 7462 Gene expression profiling human monocyte-2-macrophage differentiation, 7303 neonatal and adult CD4CD7 T cells, 3074 pathways associated with, severity of Lyme arthritis, 7930 senescent CD4CD57 T cells from HIV-infected and uninfected subjects, 5145 T cells, age- and vitamin E-induced changes, 6052 Gene-related to anergy in lymphocytes, RhoGDI as substrate of, 7559 retroviral, treatment of complement regulation, SLE model of, 8748
Gene-related to anergy in lymphocytes, RhoGDI as substrate of, 7559

Glucocorticoid-induced TNF receptor-related gene
Glucocorticoid-induced TNF receptor-related gene
Glucocorticoid-induced TNF receptor-related gene
Glucocorticoid-induced TNF receptor-related gene

Germinal centers dynamics, modeling regulation of, 3705 ICOS deficiency associated with reduction of CXCR5 CD4 Th cells, 4927 spleen, function during SHV infection, Rhesus monkeys, 1108 transit stages defined by B cell transcription factors, 6930 GET. see Gene electrotransfer GHR. see Growth hormone receptor Giardia mairi, pglR in intestinal immune defense against, 6281 GILT. see G4D/GmM-inducible lysosomal thiol reductase GITR. see Glucocorticoid-induced TNF receptor-related gene Gliadin, type 1 Treg cells specific for, inhibitory pathogenic T cells, celiac disease patients, 4178 Glomerulonephritis CD100 in, 3406 mast cell-mediated remodeling and fibrinolytic activity, letter, 1377 MIF deficiency attenuates macrophage recruitment and, SLE-model, 5087 P-selectin or P-selectin glycoprotein ligand-1 deficiency causes acceleration, lupus prone mouse, 8748 TLR2 in immune-mediated induction of, 1925 β-Glucan amplifies tumor cell killing by phagocytes via CR3-Syk-PI3K pathway, 1661 C. albicans determinant for adhesion-dependent functions, neutrophils, 8667 Pneumocystis, induce DC inflammatory activation via FasL, 459 Glucocorticoid-induced TNF receptor-related gene, proinflammatory role, acute lung inflammation, 631 Glucose-regulated protein 170, secretion enhances tumor immunity to, melanomas, 1543 Glucuronoxylomannan, immune suppression mediated via FcγRIIB engagement, 6842 Glutamate, release by DCs modulates T cell activation, 6695 Glycan, N-linked, remodeling, CD4 and CD8 T cell activation and, 2431 Glycerolphosphate-3-phosphate dehydrogenase, TPI- and GAPDH-reactive autoantibodies in CSF, 5652 β2-β-Glycoprotein I, immunization with, induces nephritis and autoantibodies, SLE mouse model, 6504 Glycoproteins, gB and gH, HCV, in TLR2 activation, permissive cells, 7094 Glycosphingolipid, impaired trafficking, NPC1-deficient mice, 26 GNA1870, binds factor H and enhances serum resistance, 501 Gout, CD14 mediates inflammatory potential of monosodium urate, macrophages, 6370 gp96, in TLR4 up-regulation pathogenic for lupus-like autoimmune disease, mouse, 6880 GBP3R. see G protein-coupled receptor 83 Graft-versus-host disease acute, Tim3 in hepatic CD8 T cell regulation aGVHD, 4281 CCR5 in T cell-mediated liver diseases, review, 2093 model of SLE, autoimmunity modulated by, TLR9, 7444 GRAIL. see Gene-related to anergy in lymphocytes Granulocyte-macrophage colony-stimulating factor with Foxp3 Treg cell expansion, EAMG suppression by, 5296 HIV-induced defects in chemotaxis restored by, neutrophils, 6405 induction of FceRI by, 4605 intratumoral injection with IL-12 and, induces eradication of established tumors, mouse, 6962 mRNA stability regulated by Pin1, T cells, 6999 Granulomas formation of Th1 and Th2, CCR4 in, lung, 4149 H. capsulatum-induced, characterization of, 3303 TNF-α and IL-1 in inflammatory response to R. avium, 642 Granulocytes G1A, G1B, and Per, CD8 memory T cell subsets expressing, 4330 G1A, serpin3a as inhibitor of, Ser-toi cells, 5051 G1A, leaves ICAD causing DNA fragmentation, 1171 immunoreceptor-grafted CD4 T cells lyse target cells via, 5668 xenotienigen-activated DN T cells lyse B and T cells via perforin/granzyme-dependent pathway, 6920 Gdb2, Gads and, in CD28-mediated co-stimulation, T cells, 1085 Growth, IFN-induced suppression of, regulated by sumoylation of Daxx, B cells, 1160 Growth factors, withdrawal cell death, autophagy induction and, CD4 T cells, 5163 Growth hormone receptor, interaction with common γ-chain and STAT5b activation, X-linked SCID patient, 6889 gp170. see Glucose-regulated protein 170 Gsl. see Glycosphingolipid Guillain-Barré syndrome, MBL and severity of, 4211 gVPLA2. see Phospholipase A2 group V GXM. see Glucuronoxylomannan GzmM. see Granzyme M Haemophilia influenzæ nontypeable, TLR2-binding lipopolysaccharides from, synergizes with IFN-β, macrophages, 673 surface fibrils, contribute to serum resistance via vitronectin interactions, 430 HCC. see Hepatocellular carcinoma Hck, Fgr and, in β2 integrin-mediated outside-in signaling, neutrophils, 604 HDAC 1. see Histone deacetylase 1 Heart allagraft rejection, B-cell-mediated Ag presentation in, 7115 mimicry and Ab-mediated cell signaling, autoimmune myocarditis, 8234 T-bet controls CTL pathogenicity, 5890 Heat shock, up-regulates Imp2 and Imp7, enhances immunoproteasome-dependent epitope presentation, 8393 Heat shock protein 60, C. trachomatis, induces trophoblast apoptosis through TLR-4, 1247 Heat shock protein 65, mycobacterial and self, Ab responses to, autoimmune arthritis, 6634 Heat shock protein 70 CD40L expression and, cures melanomas, 4163 extracellular, induces LPS tolerance, THP-1 cells, 7184 immune responses augmented by HSP70/peptide interactions, CD8 T cells, 1017 peptide complexes of, from DC-tumor fusion cells enhance immunogenicity, 5946 scavenger receptors in binding and internalization, 8604
secreted via lysosomal endosome pathway, tumor cells, 7849
HEBALT, expressed in pro-T cells, enhances T cell precursor generation, 109
*Helicobacter hepaticus*, colitis induced by, inhibition by IL-10 requires NF-κB50/p105 subunit, 7332
*Helicobacter pylori*
HP0175, IL-6 release mediated by, TLR4-dependent NF-κB activation and MSK1, macrophages, 7950 IL-8 induction by, dependent on APE-1/Ref-1, gastric epithelial cells, 7990
Helmint infections and novel effector molecules in type 2 inflammation, review, 1393 IFN-γ specific for, induction requires CD40/CD154 interactions, 3209 intestinal, protect against asthma, murine model, 1628
Hematopoietic stem cells, β-catenin promotes multipotent hematopoietic progenitor expansion, 2294 Heme oxygenase 1 antiapoptotic effect involves p38α degradation, ECs, 1894 CD4CD25+ Treg cells mediated by, suppress allergic airway inflammation, 5936 mediates anti-inflammatory effects of alcohol on IL-10 induction via p38, monocytes, 2592 role in oxidant cytoprotection, liver IRI, 4749
Hemophilia A type A, IgG inactivates FVIII in, 1355
Hemopoietic stem cell transplantation, allogeneic, DNA immunization against tissue-restricted Ags enhances immunity after, 4159
Hemopoietic stem cells allogeneic, FCRγ and TCR β-chain/FCP33 complex in reconstitution of, 1444 integrin β1 correlated with side population phenotype, 7733 prolonged cell cycle is defining property of, 201
Hemorrhage, splenic DC function depressed by, 4514
Heparan sulfate, CXCL10/IP-10 inhibition role in oxidant cytoprotection, liver IRI, 4749
Hepatitis B virus, CD4CD25+ Treg cells mediated by, suppress allergic airway inflammation, 5936 mediates anti-inflammatory effects of alcohol on IL-10 induction via p38, monocytes, 2592 role in oxidant cytoprotection, liver IRI, 4749
Hemophilia A type A, IgG inactivates FVIII in, 1355
Hemopoietic stem cell transplantation, allogeneic, DNA immunization against tissue-restricted Ags enhances immunity after, 4159
Hemopoietic stem cells allogeneic, FCRγ and TCR β-chain/FCP33 complex in reconstitution of, 1444 integrin β1 correlated with side population phenotype, 7733 prolonged cell cycle is defining property of, 201
Hemorrhage, splenic DC function depressed by, 4514
Heparan sulfate, CXCL10/IP-10 inhibition of viral binding to, induced by Dengue virus, 3185
Hepatitis viruses HBV, CD4CD25+ Treg cells, circulating and liver-resident population in infection, 739 HCV, analysis of intrahepatic CD8 T cells in normal and infected liver, 729 HCV, CCR5 in T cell-mediated liver diseases, review, 2039 HCV, core protein reduces IFN-α and causes pDC loss, 6758 HCV, DNA vaccine, immune response modulated by GET, 7462 murine, CCLI10 and T cell antiviral effector function, 8372 Hepatocellular carcinoma, AFP-positive, AFP-specific T cell responses to, 712 Her2/neu peptide, HLA class I complex with, levels predict susceptibility to CTL killing, tumor cells, 5088 Herpes simplex viruses CD1 Ag presentation as target for immune evasion, DCs, 6207 DNA vaccine, immune response modulated by GET, 7462 genital, pDCs provide innate immune protection against, 7510 HSVG1, central memory T cell response to localized infection, 1411 HSV1, DNA immunization based on VEGFR-2 delays development of SK, 4122 HSV1, latent, influences CD8 memory T cell generation and maintenance, 8356 human defenses block multiple steps in life cycle, 8658 γ-Herpesvirus 68, CD4CD25 Treg cell activity limited during, 4670 HERV-K18 envelope protein, Vβ3 and Vβ7 T cell subsets specific targets for, 3718 transactivated by EBV via CD21, primary B cells, 2056 HEVs, see High endothelial venules
High-density lipoprotein, suppresses LBP inhibitory activity, monocytes, 4880 High endothelial venules, lymphatic vessels and, synchronization and cross-talk via B cells and LTβR, 3369
High mobility group B1 protein IFN-γ and NO in release of, poly(IC) or LPS-stimulated RAW 264.7 cells, 3337 nucleocytoplasmic shuttling regulated by phosphorylation, 7889 suppresses pDC response to TLR agonists, 8701
Highly active antiretroviral therapy, for HIV, NK T cell recovery after, 5775
Histone acetylation, DNA hypomethylation and, in NKG2A expression, NK cells, 414
Histone deacetylase 1, CREM represses promoter activity via interaction with, 6159 Histone deacetylases, Suv39h1 inactivation and MSK1, macrophages, 7950
Histones, epigenetic modifications in dual potential cells, 6165
Histoplasma capsulatum, characterization of granuloma induced by, 3303 HIV B cells and T cells primed by DC-LAMP and LAMP-1-HIV-1 Gag chimeras, 2265 β-defensin 3, antagonist of CXCR4, 782 CD4 T cell IFN-γ signature following infection by, 6227 CSα and CypA activities during infection of lymphocytes and macrophages, 443 cytotoxic and migratory potencies, sequestered CD8CD25 T cells, 5145 defects induced by, in neutrophil chemotaxis restored by GM-CSF, 6405 DNA vaccines expressing HIV-1 Env glycoprotein, with IL-21 and IL-15 genes, immune responses induced by, 712 effects of age, thymectomy and, on α and β TREC, naïve T cells, 4391 effects of B*57-KF11 response in, T cells, 3893
HAART for, NKT cell recovery after, 5775 induces MDDC and LC maturation, 7103 infected macrophages, TRAIL-mediated apoptosis and inhibition of Akt-1 phosphorylation, 2304 lactoferrin modulation of activity against R5- and X4-HIV-1 adsorption by natural Abs, DCs, 5540 maintenance of CD8 T cell proliferation and protection from, 7406 MLK3 inhibition prevents Tat-mediated neurotoxicity and monocyte activation, 702 resistance associated with KIR and HLA, African female sex workers, 6588
Selection pressure exerted on, by CTLs targeting identical epitopes, 4699 simian, spleen GC function during infection, Rhesus monkeys, 1108 susceptibility to OPC determined by CD4 T cell phenotypes, transgenic mice, 479 tetraspanins CD9 and CD81 modulate membrane fusion induced by, 5129 transmission to T cells facilitated by factor I-mediated complement fragment processing by CR2-expressing B cells, 3469
HLA-A gene, IFN-γ stimulation via CRM-1-dependent nuclear RNA export, 8612
HLA-A*0101 allele, allorecognition of HLA-A*01/02 allogeneic, 8643
HLA-B44, polymorphisms influence TAP complex binding, 3150
HLA-B*2704, dependent on TAP for maturation and T cell recognition, ankylosing spondylitis, 7015
HLA-C, segregation from ICAM-1 at I, NK cells, 6904
HLA class I, Her2/neu peptide complex with, levels predict susceptibility to CTL killing, tumor cells, 5088
HLA-DM, DMα and DMβ chains in oxidation and folding, 5430
HLA-DP, binds beryllium and tolerizes to localized infection, 1411
HLA-DQ, binds beryllium and tolerizes to localized infection, 1411
HLA-DR1 gene, complexed with collagen type II immunodominant determinant, crystal structure, 3884
HLA-E, expression and release by melanoma cells and melanocytes, 3100
HMGB1, see High mobility group B1 protein
Hodgkin lymphomas, reversion of Ag-specific CD8 T cells following adoptive T cell transfer, 4897
Homoeostasis CD8 T cells, age-related clonal expansions express CD122 and CD127, 2784 pDCs, regulated by DAP12 during MCMV infection, 2908 STAT5 activation and, CD4 T cells, 2216
HP, see Hypersensitivity pneumonitis HPA, see Peptidylprolyl cis-trans-isomerase HSCs, see Hemopoietic stem cells
Hsfs, see Haemophilus influenzae, surface fibrils
5-HT, see 5-Hydroxytryptamine; Serotonin
Human papillomavirus 16 virus-like particles, cyclooxygenase-2 inhibition
SUBJECT INDEX [VOL. 177]
IgE, human, EMPD of, controls BCR apoptotic signaling, 3597
IgE, IFN-γ-mediated IL-21 inhibition of synthesis and IL-21R polymorphism, 5006
IgE, mast cell functions mediated by, STAT5 in, 3421
IgE, mast cells activated by, Cb-1b regulates inflammatory cytokine production, 5980
IgE, membrane-bound, X-1 interaction with, in receptor-mediated internalization, B cells, 1139
IgE, production regulated by NE via p38 and CD23, B cells, 2926
IgE, responses of Th2 cytokines and, to worm Ags, S. mansoni, 5490
IgE, sensitization of responses, Der p 1 proteolytic activity and, 1609
IgG, SOCS3 enhances IgG IC-induced apoptosis, 593
IgG, mast cell functions mediated by, expression and epigenetic regulation, secretory, regulated by Vav proteins, L chain, isotypes and BCR specificities, IgM, MZB cells possess enhanced secretion of, 3757
IgM, MZB cells possess enhanced secretory apparatus and higher output of, 3791
L chain, isotypes and BCR specificities, zebra fish, 2452
secretory, regulated by Vav proteins, 8620
var expression and, epigenetic regulation, review, 5767
VH replacement in early development of B cell progenitors, 7007
Immunoproteasomes, Ab presentation dependent on, enhanced by heat shock up-regulation of Imp2 and Imp7, 8393
Immunoproteasomes role in cross-presentation, 983
role in L monocyctogenes clearance, 6238
submit of, effect of deficiencies on CD8 T cells on influenza virus-specific responses, 7680
Immunotherapy combined IL-15/IL-15Ra immunotherapy maximizes activity of IL-15, 6071
phase-specific inhibition of IL-2-induced IL-10 production in, 4636
Immunotoxin therapy, with IL-2 modulates Treg cells, causes breast cancer rejection, 84
Imp2, heat shock up-regulation of, enhances immunoproteasome-dependant epitope presentation, 8393
Imp7, heat shock up-regulation of, enhances immunoproteasome-dependant epitope presentation, 8393
Inducible costimulator ligand, cell surface oligomeric state and mapping of receptor binding site, 3920
Infections. see also Sepsis autophagy and, review, 4945
memory CD8 T cell conditioning and response to, 3012
various, IFN-1 dependence of T cells in, 1746
Inflammation acute, role of GITR, lung, 631
AIA, biomechanical signals suppress cartilage pro-inflammatory responses, 8757
airway, prenatal stress enhances susceptibility of adult offspring to, mouse, 8484
allergen-induced airway, IL-12 in, experimental asthma, 6460
allergen-induced airway, PARP-1 inhibition prevents eosinophil recruitment, 6489
allergic, PDG-D interaction with CRTH2, skin, 2621
associated with CCL28 and recruitment of Treg cells expressing CCR10, 593
autoimmune, lymphoma genesis of, regulation by PDCD4, 8095
brain, PTX-induced, controlled by MPs in CCL2 overexpression, mouse, 7242
C3a induces C3 and CCL2, keratinocytes, 4444
CD14 mediates inflammatory potential of monosodium urate, macrophages, 6370
in colitis and psoriasis dermatitis, treatment with CR3 antibodies, mouse, 6974
COX-2 gene transcription in model of, macrophages, 8111
DUSP MPKs, role in inflammatory responses, review, 7497
hyperglycemia, zebra fish, predisposes to inflammatory responses and leukocyte dysfunction, Akita mice, 7250
IFN type I modulates host defense and hyperinflammation, septic peritonitis, 5623
immune-mediated, Ag-nonspecific lymphoid cell participation in, 3362
intestinal responses, role of CRHR2, 3355
KSR in ERK activation by, arthritis, 6152
limited by CXCL12 by localizing mono-nuclear infiltrates, EAE, 8053
LPS-induced, gender differences in airway responsiveness and, mouse, 621
LPS-induced, inhibited by extracellular TLR4 domain and MD-2, lungs, 8133
lung, mediated by asthma, inhibited by anti-CD147, 4870
lungs, CINC-1 and MIP-2 in neutrophil recruitment during, 1306
MMPs and inflammatory mediators induced by B. burgdorferi via integrin αβ1, 657
monocyte/macrophage-derived microparticles regulate synthesis of mediators for, airway epithelial cells, 1975
PPARγ modulation of airway remodeling and, TDI-induced asthma, 5248
proteomic identification of substrates for MMP2 and MMP9, 7312
pulmonary, alveolar macrophage apoptosis in, pneumococcal pneumonia, 6480
pulmonary, induced by cigarette smoke, role of CR6 and MIP-3α, 4350
regulation in IL-1-stimulated IELs, 5604
renal, CSF-1 isoforms in, 4055
S. pyogenes M protein as powerful inducer of, 1221
TCRγ regulation mediated by myeloid suppressor cells, 4763
type 2, novel effector molecules, helminth infection and allergies, reviews, 1393
Influenza virus A CD8 T cells specific for, immunodominance hierarchies, 2917
effect of immunoproteasome subunit deficiencies on CD4 T cell responses specific for, 7680
monocyte transepithelial migration upon infection with, directed by AECs, 1817
Influenza viruses CD8 T cells specific for, priming impaired by AHR activation, 5819
epitopes, quantification of CD8 T cell repertoire specific for, 6705
interactions between T cell response to concurrent mycobacterial infections and, 8456
lethal, perforin in CD4 T cell-mediated protection, 2888
SAP in Th cell function and immunity to, 5317
usage of cellular niches by, CD8 T cells, 4998
Ingenol-3-angelate, neutrophils as key component of chemotheraphy with, 8123
Inhibitor of caspase-activated DNase, cleaved by GzmM causing DNA fragmentation, 1171
Innate immune system, CD44 and L-selectin expression in, 1932
Innate immunity in humoral Immune responses to flagellin, 2810
PAR shephers bacterial cell wall into host cells, 6182
regulated by Mib LpRA via TLR2, 422 response to focal necrotic injury inside BBB, 5269
Insemination, estradiol inhibits CD8 T cell responses to paternal Ag-bearing cells during, 7567
Insulin-like growth factor-1, inhibition by, 657
limited by CXCL12 by localizing mono-nuclear infiltrates, EAE, 8053
LPS-induced, gender differences in airway responsiveness and, mouse, 621
LPS-induced, inhibited by extracellular TLR4 domain and MD-2, lungs, 8133
lung, mediated by asthma, inhibited by anti-CD147, 4870
lungs, CINC-1 and MIP-2 in neutrophil recruitment during, 1306
MMPs and inflammatory mediators induced by B. burgdorferi via integrin αβ1, 657
monocyte/macrophage-derived microparticles regulate synthesis of mediators for, airway epithelial cells, 1975
PPARγ modulation of airway remodeling and, TDI-induced asthma, 5248
proteomic identification of substrates for MMP2 and MMP9, 7312
pulmonary, alveolar macrophage apoptosis in, pneumococcal pneumonia, 6480
pulmonary, induced by cigarette smoke, role of CR6 and MIP-3α, 4350
regulation in IL-1-stimulated IELs, 5604
renal, CSF-1 isoforms in, 4055
S. pyogenes M protein as powerful inducer of, 1221
TCRγ regulation mediated by myeloid suppressor cells, 4763
type 2, novel effector molecules, helminth infection and allergies, reviews, 1393
Influenza virus A CD8 T cells specific for, immunodominance hierarchies, 2917
effect of immunoproteasome subunit deficiencies on CD4 T cell responses specific for, 7680
monocyte transepithelial migration upon infection with, directed by AECs, 1817
Influenza viruses CD8 T cells specific for, priming impaired by AHR activation, 5819
epitopes, quantification of CD8 T cell repertoire specific for, 6705
interactions between T cell response to concurrent mycobacterial infections and, 8456
lethal, perforin in CD4 T cell-mediated protection, 2888
SAP in Th cell function and immunity to, 5317
usage of cellular niches by, CD8 T cells, 4998
Ingenol-3-angelate, neutrophils as key component of chemotherapy with, 8123
Inhibitor of caspase-activated DNase, cleaved by GzmM causing DNA fragmentation, 1171
Innate immune system, CD44 and L-selectin expression in, PG-induced RA, 1932
Innate immunity in humoral Immune responses to flagellin, 2810
PAR shepherds bacterial cell wall into host cells, 6182
regulated by Mib LpRA via TLR2, 422 response to focal necrotic injury inside BBB, 5269
Insemination, estradiol inhibits CD8 T cell responses to paternal Ag-bearing cells during, 7567
Insulin-like growth factor-1, inhibition by mAVE1642, CD45+ myeloma cells sensitive to, 4218
Integrin-associated protein, role in AEC-directed transepithelial migration of monocytes, 1817
Integrins αβ1, MMPs and inflammatory mediators induced by B. burgdorferi via integrin αβ1, 657
monocyte/macrophage-derived microparticles regulate synthesis of mediators for, airway epithelial cells, 1975
PPARγ modulation of airway remodeling and, TDI-induced asthma, 5248
proteomic identification of substrates for MMP2 and MMP9, 7312
pulmonary, alveolar macrophage apoptosis in, pneumococcal pneumonia, 6480
pulmonary, induced by cigarette smoke, role of CR6 and MIP-3α, 4350
regulation in IL-1-stimulated IELs, 5604
renal, CSF-1 isoforms in, 4055
S. pyogenes M protein as powerful inducer of, 1221
TCRγ regulation mediated by myeloid suppressor cells, 4763
type 2, novel effector molecules, helminth infection and allergies, reviews, 1393
β1 integrin, CX3CL1 effects on migration and adhesion via, neurons, 7599

β2, adhesion mediated by, induced by gVLA2, eosinophils, 574

β2, Fgr and Hck in outside/in signaling mediated by, neutrophils, 604 clustering induces Gα12/13-dependent BCR relocalization, pre-B cells, 796

integrin β3 correlated with HSC side population phenotypes, 7733

ligation of, SLP-76 links p44/42, podosome distribution, and, DCs, 5177

Interleukin-1 receptor, B and p38 in CpG DNA-induced function via, 8301

T cell subset secreting, identified in Pneumocystis pneumonia, 1846

Interferon-α inhibitory activity via, 6122

exhaustion of response following acute SFV infection, 3235

induction of, NAP1 in TLR and cytokine responses generated by overcoming immune cells, 5785

interference with, macrophages, 7283

T cell death, 7196

T cell dependence on, various infections, 1746

Interferon-β anti-tumor immunity suppressed by T cells producing IL-10 and, 896

DC expression of T-bet and, controlled antitumor immunity suppressed by T

 limits production of, CD4CD25CD25 Foxp3 Treg cell production, 31

type 1, modulate host defense and hyporesponsiveness induced by deprivation of, p1Piα as regulator of caspase 9 in, 2441

CD4CD25 Foxp3 Treg cell production controlled by, 5115

CD4CD25 Treg cell number indexed to IL-2-producing cell number, 192

CDS T cells stimulated by CD8TCMs via pMHC, CD80 and, 2976

DCs essential for resistance to T. gondii and production of, 31

defective PKC and Ras-ERK activation limits production of, CD4CD25

Treg cells, 2186

immunotoxicity with, modulates Treg cells, causes breast cancer regression, 84

inhibition of IL-10 production induced by, phase-specific immunotherapy, 4636

lymphocyte survival dependent on, familial NK cell deficiency associated with, 8835

RA stimulates T cell proliferation mediated by, 2853

T cell function via, 8301

vaccine-elicted CD4 T cell responses enhanced by, enhanced by CpG-ODN and IL-2 synergism, 8860

Interleukin 1β E. coli induces GILT via TNF and, THP-1 cells, 4433

LPC stimulates release from microglia, 8560

mediates proangiogenic activity, OPN-activated monocytes, 4267

regulates BBB permeability via HIF-VEGF reactivation, 5574

regulation of Aβ2, NF-kB in, 7173

Interleukin 2 antitumor efficacy enhanced by anti-IL-2 mAb, 306

apoptosis induced by deprivation of, PI3kinase as regulator of caspase 9 in, 2441

CD4CD25 Foxp3 Treg cell production controlled by, 5115

CD4CD25 Treg cell number indexed to IL-2-producing cell number, 192

CDS T cells stimulated by CD8TCMs via pMHC, CD80 and, 2976

DCs essential for resistance to T. gondii and production of, 31

defective PKC and Ras-ERK activation limits production of, CD4CD25

Treg cells, 2186

immunotoxicity with, modulates Treg cells, causes breast cancer regression, 84

inhibition of IL-10 production induced by, phase-specific immunotherapy, 4636

lymphocyte survival dependent on, familial NK cell deficiency associated with, 8835

RA stimulates T cell proliferation mediated by, 2853

T cell function via, 8301

vaccine-elicted CD4 T cell responses enhanced by, enhanced by CpG-ODN and IL-2 synergism, 8860

Interleukin 2 locus, epigenetic remodeling of, induced by CD4 T cells, memory CD8 T cells, 1062

Interleukin 3, induces CD48, eosinophils, 77
kinase and NF-κB, macrophages, 681
TLR4-induced, modulated by RANTES, peripheral blood monocytes, 5077
TNF-α and, in granulomatous and inflammatory response to R. avan-
tiatus, 642
tolerogenic DC induction by pancreatic cancer cell-secreted, 3448
Interleukin 7, signaling during viral infec-
tion expands effector T cells, 4458
Interleukin 7 receptor
Notch1 interplay with, maintains prolif-
eration of thymic progenitors, 3711
TCRs and, in CD4 T cell clonal dele-
tion, irradiated mice, 8320
Interleukin 7 receptor α, memory CD8 T cell development and, 4247
Interleukin 8
expression, mediated by cSrc, epithelial cells, 3427
H. pylori induction of, dependent on APE-1/Ref-1, gastric epithelial cells, 7990
HIF in cobalt chloride and hypoxia-
mediated expression of, ECs, 7211
TNF-α-independent expression, N. gon-
orrhoeae infected, 1314
Interleukin 8 gene, IFN-β-mediated inhibi-
tion, astroglia cells, 822
Interleukin 10
anti-inflammatory effects of alcohol on induction of, mediated by HO-1 via p38, monocytes, 2592
anti-tumor suppression by T cells producing IFN-β and, 896
CD8 memory T cells enhanced by, L
monocyogotes infection, 2565
deficiency of, increases B. burgderferi
clearance, 7076
DNA vaccine coadministration of con-
structs with encephalogenic deter-
minant and, elicits immunity, CNS, 8241
essential for 1,25(OH)2D3-inhibition of, 6030
from γδ T cells promotes ACAID and immune privilege, 8331
H. hepaticus-induced colitis inhibited by, role of NF-κ B p50/p105 sub-
unit, 7332
inhibition of IL-2-induced production of phase-specific immunotherapy, 4636
inhibits LPS-induced CD40 expression via SOCS-3, 7761
PEG, augments signaling, THP-1 cells, 1092
produced by myeloid DCs and macro-
phages in response to MyD88- and TRIF-dependent TLR signals, 7551
protects from LPS-induced preterm labor, mouse, 4888
resistance to amoebiasis mediated by, C57BL/6 mice, 1208
stochastic monoallelic expression of, T cells, 3538
suppressors of, induced by CD4/CD25
Treg cells via CTLA4, lung trans-
plants, 5631
Th1 cell, inhibits IFN-γ production via Eomes repression, 3721
TLR-induced production, Btk in, macro-
phages, 7203
tolerogenic DC induction by pancreatic cancer cell-secreted, 3448
Treg cells induce B7-H4 on APCs via, 40
V-γ9V82 T cell subset secreting, identi-
fied by CXCR5, 5290
Interleukin 10 promoter, histone phosphor-
ylation during transcription, macro-
phages, 1282
Interleukin 10 receptor, STAT3 and, in,
AIR, 7880
Interleukin 12
in activation and resistance to polymi-
crobial sepsis, neutrophils, 3218
conditioning of, STAT4 in, CD8 T cells, 7618
downregulated by anti-IL-12p40, psoria-
sis, 12
effects on myeloid and lymphoid BM cells, 100
IFN-γ and, in T cell-dependent DC acti-
vation, 3625
IL-12/23p40 in immunostimulatory DC migrants promoting Th1 differenti-
ation, 1618
induced by serum amyloid A, 4072
instructs homing of Th2 cells to skin, 3763
intratumoral injection with GM-CSF
and, induces eradication of estab-
lished tumors, mouse, 4962
regulated by IL-23, in T cell-dependent experimental colitis, 2760
regulates T-bet and Eomes expression during differentiation, CD8 T cells, 7515
role in allergen-induced airway inflam-
mation, experimental asthma, 6460
STAT4 activation in response to IFN-α and, T cells, 5195
Interleukin 12p40, antibody to, downregu-
lates IFN-γ, chemokines and IL-12/
IL23, psoriasis, 4917
Interleukin 13
5-L0 in lung remodeling induced by, 1918
AHR induced by, attenuated by arginase
1 inhibition by RNai, 5595
Egr-1 and PDGF ligands induced by, effects of STAT1 and STAT6 on, pulmonary fibroblasts, 4141
enhances COX-2 expression, microglia, rat brain, 1323
IL-13/1112C>T enhances human IL-13
transcription, Th2 cells, 8633
induces PKCθ/STAT3 association, 3771
Interleukin 13 receptor α2, allergy-driven alternative splicing of, 7905
Interleukin 14α, autocommunity develop-
ment in IL-14α-transgenic mouse, 5676
Interleukin 15
CD28−/−CD8 memory T cell growth mediated by, 7802
combined IL-15/IL-15Ra immunother-
apy maximizes activity, 6072
effects on myeloid and lymphoid BM
cells, 100
lymphocyte survival dependent on, fa-
nal NK cell deficiency associated with, 8835
Interleukin 15 gene, DNA vaccines ex-
pressing HIV-1 Env glycoprotein with IL-15 gene and, immune re-
sponses induced by, 177
Interleukin 16
role in Th1-mediated IL-21 inhibition of,
Inflammation and, 5006
Interleukin 17
CD4 T cells producing, IFN-γ regulates expansion during Mtb infection, 1416
in development of EAE, 566
production by γδ T cells, M. tuber-
culosis infection, 4662
signaling dependent on IL-17RA and
IL-17RC complex, 36
T cells producing, in immunity to B. pertussis, TLR4 role in vaccines, 7980
Interleukin 17α, MAPK pathways in in-
duction of eotaxin-1/CCL11 by, ASMs, 4064
Interleukin 17 receptors, IL-17 signaling
dependent on IL-17RA and IL-
17RC complex, 36
Interleukin 18
chymase cleaves pro-IL-18 to active fragment, mast cells, 8315
links immune system via IFN-γ and
CD134, 234
restores IgM production by liver B cells, burn-injured P. aeruginosa-infected mouse, 4627
Interleukin 21
cellular intermediates and molecular
pathways induced by, B cells, 8381
IFN-γ-mediated inhibition of IgE syn-
thesis by, 5006
kinetics of B cell responses to, 5236
NK cell activation in response to Ab-
coated targets enhanced by, 120
Interleukin 21 gene, DNA vaccines ex-
pressing HIV-1 Env glycoprotein with IL-15 gene and, immune re-
sponses induced by, 177
Interleukin 21 receptor, polymorphisms,
IFN-γ-mediated IL-21 inhibition of
IgE synthesis and, 5006
Interleukin 22, mechanisms of tumor
growth reduction mediated by, 8266
Interleukin 22-Ig fusion gene, EAE ame-
liorated by, 3635
Interleukin 23
down-regulated by anti-IL-12p40, psori-
asis, 4917
IL-12/23p40 in immunostimulatory DC
migrants promoting Th1 differenti-
ation, 1618
IL-12 regulated by, in T cell-dependent
experimental colitis, 2760
in immunity to M. tuberculosis, IL-
12p40-deficient mouse, 8684
induced by serum amyloid A, 4072
Interleukin 23 p19, LPS-induced, regulated
by Rac1, macrophages and DCs, 4550
Interleukin 27
effect on naïve and activated CD T cells
via STAT3, 5377
induces Th1 differentiation via p38/T-
bet- and ICAM1/LFA-1/ERK1/2
pathways, 5759
Internal ribosome entry site, MPD6 trans-
gene, 7579
Intraepithelial lymphocytes, CD8
in development of EAE, 566
Invasin, Yersinia, vaccine efficient against
shigellosis using Shigella mutant expressing, 4709
IP-10. see Chemokine ligands, CXCL10; Interferon-inducible protein 10
**SUBJECT INDEX**

**P. aeruginosa**, accelerates wound repair via activation of epithelial cell signal cascade, 8693
Thymic atrophy induced by, thymopoiesis augmented by, lep-169
Lipopolysaccharide binding protein, HDL suppresses inhibitory activity of, monocytes, 4880
Lipopolysaccharide recognition protein, eGF domain repeats in, 1838
Lipoproteins, as dominant immunobiologically active compounds in *S. aureus*, 3162
Liposomes, CD8 T cell Ag coupled to liposomes induce potent antitumor immunity, 2324
5-Lipoxygenase, role in IL-13-induced remodeling, lung, 1918
Lipoxin A4-modified probiotic components, 6093
Lysozyme-modified probiotic components, 6093
Lysozyme, peptidoglycan-degrading and anti-inflammatory activities, 1223
Macrophage migration inhibitory factor, mice, 2529
Mylco (murine leukemia virus), transduction, 3957
AEE inhibition limits LPS-induced neutrophil recruitment via bradykinin and ATII pathways, 7233
Acute inflammation, role of, 631
AHR activation impairs influenza virus-specific CD8 T cell priming, 5819
Allergic airway inflammation inhibits innate antibacterial host defenses, 1833
caveolin-1 regulates NF-κB activation and response to LPS-induced sepsis, 4853
CCR4 in Th1 and Th2 granuloma formation, 4149
CINC-1 and MIP-2 in neutrophil recruitment during inflammation, 1306
DC responses to CpG ODNs, 2373
endothoxin-induced acute injury, NF-κB activity and severity of, 2038
human, characterization of mDCs and pDC, 7784
inflammation mediated by asthma, inhibited by anti-CD147, 4870
*K. pneumoniae*, TIRAP mediates defenses against, 538
LPS-induced inflammation inhibited by extracellular TLR4 domain and MD-2, 8133
remodeling induced by IL-13, role of 5-LO in, 1918
SOCS3 enhances IgG IC-induced injury, 612
transplantation, CD4CD25 Treg cells induce IL-10 suppressors via CTLA4, 5631
uPA kringle domain in LPS-induced inflammation, 5630
CU57/6 mice, 4102
uPA, kringledomain in LPS-induced injury, 5550
Lupus nephritis induced by β2-GPI immunization, 3369
Lupus immunosuppressant, 5290
expression, 4558
and memory T cells, 4558
and P-selectin glycoprotein ligand-1 deficiency causes acceleration, lupus prone mouse, 8748
role for nephritogenic T cells, 8258
triggered by FcR-bearing myeloid cells trigger, mouse, 7287
Lupus susceptibility interval, 5840
Ly49H, NK cells containing, cytokine receptors prolactin responsiveness, 1689
Lymphopenia, autoimmune inflammation and, 1689
Lymphoid structures, neogenesis and autoimmune inflammation inducer, 1221
Lymphoproliferation, transgenic MC159 lymphoma, 3814
Lymphoid cells, Ag-nonspecific, participation in immune-mediated inflammation, 3362
Lymphoid structures, neogenesis and autoimmunity, stomach H/K-ATPase-reactive TCR tr mouse, 7858
Lymphoma, autoimmune inflammation and genesis of, regulation by PDCD4, 8095
Lymphopetia, naive T cell proliferation induced by, prevented by CD25CD4 Treg cells and memory T cells, 4558
Peripheral T cell, Treg cell enrichment in, 5014
Lymphoproliferation, transgenic MC159 lymphoma, autoimmune inflammation and, 3814
Lymphotoxin, LT pathway-directed central tolerance to collagen type II, 290
Lymphotoxin β receptor signaling-dependent lines from iDCs, 5290
synchronization and cross-talk between HEVs and lymphatic vessels via B cells and, 3369
Lyn, lipid rafts, activation regulated by flotilin-1, 147
Lysophosphatidylcholine, stimulates IL-1β release from microglia, 8560
Lysosomal-associated membrane proteins, B cells and T cells primed by DC-LAMP and LAMP-1-HIV-1 Gag chimeras, 2265
Lysosomes, remodeling of, induced by activated DC phagocytosis of particulate Ags, 8493
Lysozyme, peptidoglycan-degrading and -bactericidal activities, 519
Lysozyme-modified probiotic components, protect against, macrophages and CRAMP, polymicrobial sepsis, 8767
LyzMPC, see Lysozyme-modified probiotic components
M protein, streptococcal, as powerful inflammatory stimulus, 8767
M3, blocks CCL2 and CXCL13 function, 7665
Macrophage migration inhibitory factor, decreased by agonistic mAb against CD40L, 557
CD74 or, inhibition attenuates growth and invasion, DU-145 prostate cancer cells, 8730
Apoptosis of, decreased by agonistic mAb against CD40L, 557
M cell-surface molecule and organ-specific homing, Pillars of Immunology, 533
Circulating, antigen-induced selective recruitment, Pillars of Immunology, 1381
Defective migration in absence of Rho GDIs and Rho GDIs, 8512
HIV-1 infection, CypA and CsA activities during, 443
IL-2- and IL-15-dependent survival, familial NK cell deficiency associated with, 8835
Kidney-infiltrating, characterization in renal IRI, 3380
Population of, effects of leptin receptor deficiency on immune response and, 2899
Lymphocytic choriomeningitis virus, CR3-expressing microglia elicited by, 3644
type 1 IFN deficiency and splenic architecture during infection, 3266
Lymphoid cells, Ag-nonspecific, participation in immune-mediated inflammation, 3362
Lymphoid structures, neogenesis and autoimmunity, stomach H/K-ATPase-reactive TCR tr mouse, 7858
Lymphoma, autoimmune inflammation and genesis of, regulation by PDCD4, 8095
Lymphopenia, naive T cell proliferation induced by, prevented by CD25CD4 Treg cells and memory T cells, 4558
Peripheral T cell, Treg cell enrichment in, 5014
Lymphoproliferation, transgenic MC159 lymphoma, autoimmune inflammation and, 3814
Lymphotoxin β receptor signaling-dependent lines from iDCs, 5290
synchronization and cross-talk between HEVs and lymphatic vessels via B cells and, 3369
Lyn, lipid rafts, activity regulated by flotilin-1, 147
Lysophosphatidylcholine, stimulates IL-1β release from microglia, 8560
Lysosomal-associated membrane proteins, B cells and T cells primed by DC-LAMP and LAMP-1-HIV-1 Gag chimeras, 2265
Lysosomes, remodeling of, induced by activated DC phagocytosis of particulate Ags, 8493
Lysozyme, peptidoglycan-degrading and -bactericidal activities, 519
Lysozyme-modified probiotic components, protect against, macrophages and CRAMP, polymicrobial sepsis, 8767
LyzMPC, see Lysozyme-modified probiotic components
M protein, streptococcal, as powerful inflammatory stimulus, 8767
M3, blocks CCL2 and CXCL13 function, 7665
Macrophage migration inhibitory factor, decreased by agonistic mAb against CD40L, 557
CD74 or, inhibition attenuates growth and invasion, DU-145 prostate cancer cells, 8730
deficiency attenuates macrophage recruitment and glomerulonephritis, SLE-model, 5687

deficiency impairs airway allergic responses, mouse, 5779
induces macrophage recruitment via CCL2, 8072
regulation of IL-1 and TNFR by, 4818

Macrophages
acquire neutrophil granules for antimicrobial activity, 1864
activation of, attenuated by TREM-2, 3520
activin A promotes alternative activation of, 6787
Akt/PK-B regulates response to F. novicida infection, 6317
alveolar, increased apoptosis in pulmonary inflammation, pneumococcal pneumonia, 6480
alveolar, innate immune responses induced by A. fumigatus via MAPK, 3994
apoptotic cell contact and regulation of responses, 4047
B. bronchiseptica modulates phenotype of, 7131
Btk in TLR-induced IL-10 production, 7203
C. albicans Btk in TLR-induced IL-10 production, requires ga-C. albicans Btk in TLR-induced IL-10 production, modulates phenotype
activin A promotes alternative activation of, attenuated by TREM-2, 2691
mutational analysis of SHPS-1 in M. tuberculosis recognition of, 2691

kidney remodeling mediated by, and fibrinolytic activity, GN, letter, 1377
in LN hypotrophy and LC mobilization in PGN response, 1755
mast cell-derived TNF and, in P. berghei ANKA infection, 3294
MHCIIa phosphorylation mediated by PKCβII, 1492
modulation of DCs controls Th1/Th2 balance in responding T cells, 3577
NFAT in cytokine expression, 6667
P. aeruginosa-induced apoptosis associated with Bcl-xL and Bcl-xL, 8000
particulate allergen harboring by, following phagocytosis, 5791
role in type 1 DM development, Bio-Breeding rat, 7275
skin-derived, FcγRIIa expression on, 694
zin in FcεRI-mediated activation, 1296
Matrix metalloproteinase-9, see Gelatinase B
Matrix metalloproteinases
induced by B. burgdorferi via integrin αvβ6, 657
MMP-2 ablation, exacerbates experimental colitis, 4103
MMP2 and MMP9, proteomic identification of substrates for, 7312
mAVE1642, IGF-1 inhibition by, CD45reg melanoma cells sensitive to, 4218
MBD2, see Methyl-CpG-binding domain protein 2
MBL, see Mannose-binding lectin
MBP, see Major basic protein
MC159, transient expression causes lymphoproliferation and autoimmunity, 3814
MCMV, see Cytomegalovirus, murine
MCP-1, C6b-b regulates inflammatory cytokine production, IgE-activated mast cells, 5980
MD-1, Treg cell development regulated by, 1078
MD-2, LPS-induced inflammation inhibited by extracellular TLR4 domain and, lungs, 8133
Melan A peptide, CpG ODN and, circulatory CD8 melanoma-specific T cells induced by vaccine, 1670
Melanocytes
HLA-E expression and release by, 3100
killed by hsp70 and CD40L expression, 4168
neoantigen, CD4 T cell-dependent autoimmunity against, vitiligo induction and, 3055
Melanoma
CD4 T cell responses specific to, characterization of clonality and differentiation of, 1338
uveal, CD11b myeloid cell accumulation and failure to prevent tumor growth of, A.C. of the eye, 1599
vaccine-induced PBMC adoptive transfer to metastatic, 6527
Membranes, nanotubes support long-distance vascular traffic or bacterial surfing, macrophages, 8476
Mercury, autoimmunity induced by, ameliorated by 4–1BB, 5708
Merozoite surface protein-1, P. falciparum, prenatal malaria exposure affects acquisition of inhibitory Abs to, 7139
Mesenchymal stem cells, inhibit DC generation and function, 2080
Metalloproteinases, control FTX-induced brain inflammation in CCL2 overexpression, mouse, 7242
Methyl-CpG-binding domain protein 2, impaired memory CD8 T cell development in absence of, 3821
1-Methyl-tryptophan, modulates TLR signaling, DCs, 2061
Microglia
CCR9- or CXCXR3-expressing, elicited by neurotropic pathogens, 3644
GBS-induced de-generation via TLR2/MyD88 pathway, 5837
IL-13 enhances COX-2 expression, rat brain, 1323
LPC stimulates IL-1β release from, 8560
TLR4, role in leukocyte recruitment into brain, 8103
TRPV1 mediates cell death, 4322
β2 Microglobulin, MHC class I-like molecules associated with, cell surface expression, 3108
Microparticles, monococyte/macrophage-derived, regulate inflammatory mediator synthesis, airway epithelial cells, 1975
Microtubules, dynamics of, DAP10-mediated cytotoxicity, controlled by Vav1 via, NK cells, 2349
MIP-2, CINC-1 and, in neutrophil recruitment during inflammation, lungs, 1306
MIP-3, in pulmonary inflammation and emphysema induced by, cigarette smoke, 4350

caveolin-1 regulates response to LPS-induced sepsis and activation of, lung, 4853
deguolin suppresses gene expression regulated by, 5612
in IL-1β and TNF-α regulation of, AR, 7173
LPS-induced pathways, inhibited by MaxiK blockade, macrophages, 4086
p38 and, in CpG DNA-induced IFN-γ, IRF-7, CXCL10 and CCL3 production, pDCs, 4841
p50/p105 subunit, in H. hepaticus-induced colitis inhibition by IL-10, 7332
PGN-induced IL-6, mediated by, macrophages, 681
thrombin-induced activation, mediated by cSrc, epithelial cells, 3427
TLR4-dependent activation of, in H. pylori HPO175-mediated IL-6 release, 7950
Nuclear factors
in B cells, Pillars of Immunology, 7483
interaction with immunoglobulin enhancer sequences, Pillars of Immunology, 7485
Nuclear factors of activated T cells
activation leads to osteopetrosis and increased osteoclastogenesis, 2384
in cytokine expression, mast cells, 6667
NFAT1 in B cell self-tolerance, 1510
NFATc1, calcium mobilization and, in tolerant-anti-insulin B cells, 2234
PKB prevents CN/NFAT-induced Rag arrest, pre-T cells, 4567
Nucleic acids, TLRs sensing, modifiers of, 6382
Nucleosome antibodies, TLR-9 in anti-DNA Abs and, murine lupus model, 1349
Nucleotide-binding oligomerization domain 1, epithelial cells activated by meso-DAP and meso-lanthionine, 1040
Nucleotide-binding oligomerization domain-like receptors, pattern recognition molecules for pathogens, review, 3507
Nur77, regulation by immature CD4CD8 T cells and DCs, 3582
NY-ESO-1, calreticulin as receptor for, basophils, via, 1796
Obesity, functionality and steady-state number of impaired DCs, obese mice, 5907
Oligodendrocyte-specific protein-1, SARS-CoV-2 infection and, 8777
Oligodendrocytes
CpG-containing, CXCL16 influence on increased osteoclastogenesis, 2384
P-selectin, CLA T cells enriched in binding by, 5024
and macrophages, 70
activity and severity of endotoxin-induced acute lung injury, letter, 2038
C/EBPβ blocks p65 phosphorylation and transcription mediated by, TNF-tolerant cells, 665
caveolin-1 regulates response to LPS-induced sepsis and activation of, lung, 4853
deguolin suppresses gene expression regulated by, 5612
in IL-1β and TNF-α regulation of, AR, 7173
LPS-induced pathways, inhibited by MaxiK blockade, macrophages, 4086
p38 and, in CpG DNA-induced IFN-γ, IRF-7, CXCL10 and CCL3 production, pDCs, 4841
p50/p105 subunit, in H. hepaticus-induced colitis inhibition by IL-10, 7332
PGN-induced IL-6, mediated by, macrophages, 681
Osteoclasts
development, induced by CD4 T cell interaction with CD11c DCs, 3314
precursors, induced by TRANCE/RANKL, 4360
precursors, regulated by SHIP1 via Akt-dependent alterations in D-cyclins and p27, 2877
Osteopetrosis, NFAT activation leads to increased osteoclastogenesis, 2384
Osteopontin, monocytes activated by, IL-1β mediates proangiogenic activity, 4267
Osteoprotegerin, RANKL and, regulates proinflammatory cytokine production, 3795
Outer membrane protein A, from K. pneumoniae, DC migration modulated by, 5912
Ovaries, premature failure and autoimmunemediated pituitary-ovarian axis disruption, 1988
OX40, effector CD8 T cell responses modulated by 4-1BB and, 4464
OX40 ligand, upregulated by neonatal CD4CD8 T cells, 3074
Oxazalone, contact dermatitis induced by, role of CB2 and 2-AG, 8796
P-selectin, CLA T cells enriched in binding of, identified by CHO-131, 4742
P-Selectin glycoprotein ligand-1, deficiency causes GN acceleration and CCL2 expression, lupus prone mouse, 8748
P2Xr receptor role in formation of multinucleated giant cells, 7257
T cell apoptosis during maturation modulated by, 2842
P15, SARS-CoV, identification of specific CTL epitopes, 2138
p19ARF, role in NO-dependent apoptosis, 3327
p27, osteoclast precursors regulated by SHIP1 via Akt-dependent alterations in D-cyclins and, 8777
p27kip1 required for transplantation tolerance, 5169
Vav1 promotes cycloprogression via TCR/CD8, FOXO1 and, T cells, 5024
p38
CIITA gene regulated by ERK and, DCs and macrophages, 70
HO-1 mediates anti-inflammatory effects of alcohol on IL-10 induction via, monocytes, 2592
IL-27 induces Th1 cell differentiation via p38/T-bet and ICAM1/LFA-1/ERK1/2 pathways, 7579
NF-κB and, in CpG DNA-induced IFN-γ, IRF-7, CXCL10 and CCL3 production, pDCs, 4841
in regulation of NF-κB-regulated IgG production, B cells, 2926
Syk mediates HRV-ICAM-1 signaling via, airway epithelial cells, 6859
wound signaling, attenuated via SIRS reduction, 8065
p38α, degradation of, in antiapoptotic effect of HO-1, 1894
p44/42, SLP-76 links integrin ligation with podosome distribution and, DCs, 5177
Peroxisome proliferator-activated receptor γ modulation of airway remodeling and inflammation by, TDI-induced asthma, 5248
promotes T cell survival via effect on cellular metabolic activities, 3737
Pertussis toxin
MPs control brain inflammation induced by, in CCL2 overexpression, mouse, 7242
reduces number of splenic Foxp3 Treg cells, 1552
superior to TLR ligands in enhancing pathogenic autoimmunity, 6896
PF, see Pemphigus foliaceus
PGES-1, see Prostaglandin E synthase-1
PGN, see Peptidoglycan
Phagocytes
peroxidas, thyiocyte-dependent induction of adhesion molecules via, ECs, 8714
yeast β-glucan amplifies tumor cell killing via CR3-Syk-P13K pathway, 1661
Phagoctosis
mutational analysis of SHPS-1 in, macrophages, 3123
particulate allergen harboring by mast cells following, 5791
Phlebovirus, TLR deletion limits mortality and severity in, 6301
Phosphatase and tensin homolog deleted on chromosome 10, role in T cell requirement for CD28 costimulation, 4262
Phosphatidylinositol mannoside
Phosphatidylglycerol
-arginase, class I-restricted tyrosinase epitope processing requires ERAP1, proteases and, 5440
Phenotype
for LRP, 1838
for pathogens, NLRs as, review, 3507
recognition of M. tuberculosis PIMs by macrophage C-type lectins, 1805
PCP, see Pneumocystis pneumonia
PD1, see Protectin D1
PDCD4, see Programmed cell death 4
PE38, characterization of epitopes associated with, B cells, 8822
Pemphigus foliaceus, DRβ1*0102 associated with, Dsg1 isoform contains T cell epitope binding to, 6517
Peptide
N-glycanase, class I-restricted tyrosinase epitope processing requires ERP1A, proteases and, 5440
Pepcidoglycan
-6 induced by, mediated by COX-2, PGE2/PGE2 receptors, PKA, J/β-kinase and NF-κB, macrophages, 681
mast cells in LN hypotrophy and LC mobilization in response to, 1755
Pep tidylprolyl cis-trans-isomerase, H. pylori, IL-6 release mediated by, TLR4-dependent NF-κB activation and MSK1 in, 7950
Perforin
GraA, GraB and, CD8 memory T cell subsets expressing, 4330
immunoreceptor-grafted CD4 T cells lyse target cells via, 5668
in T cell-mediated protection from lethal influenza, 2888
xenogenen-activated DN T cells lyse B and T cells via perforin/granvyme-dependent pathway, 6920
Peripheral blood mononuclear cells
TCRs reactive to, gene transfer confers high avidity and tumor reactivity to TILs and, 6548
vaccine-induced, adoptive transfer to metastatic melanoma patients, 6527
Peritonitis
septic, IFN type I modulates host defense and hyperinflammation, 5623
septic, T cell S0CS-5 overexpression augments innate immunity, 8650
Peroxidas, phagocyte, thiocyanate-dependent induction of adhesion molecules via, ECs, 8714
Pin1, regulates GM-CSF mRNA stability, T cells, 6999
Pituitary-ovarian axis, autoimmune-mediated disruption, premature ovarian failure caused by, 1938
Plasma cells regulated by Yav proteins, 8620
TLR4-driven differentiation, ERK in control of, 5337
Plasmablasts, centrocytes, centroblasts and, CD77 B cell subset comprising, 4341
Plasminogen activator
-1, tissue-type function during E. coli-induced sepsis, 1189
urokinase-type, kringle domain in LPS-induced injury, lung, 5550
Plasminogen activator inhibitor type-1, mice deficient in, enhanced IFN-γ response to LPS and SEB, 8171
Plasmodium berghei ANKA, mast cells and mast cell-derived TNF in, 3294
Plasmodium chabaudi chabaudi AS, infection causes CD8 T cell-mediated MMM loss, 2518
Plasmodium falciparum
blood-stage, heterogenous cytokine responses to, 5736
GPI, JNK2 disruption decreases cytokine responses to, 6344
MSP-1, prenatal malaria exposure affects acquisition of inhibitory Abs to, 7139
Plasmodium yoelii, NK cell responses to, 1229
Platelet-activating factor, serotonin and, role in immunoregulatory B cells, 4810
Platelet-activating factor receptors, Gα and, Gβ in activation and regulation, 3242
impaired migration, polymicrobial sepsis, 1264
sheepdards bacterial cell wall into host cells, 6182
Platelet-derived growth factor ligands, IL-4271
Phosphatidylglycerol
-1 integrin on CD4 T cells, induces FN adhesion, 2959
Phosphatidylinositol mannoside
Phosphatidylglycerol
-3 kinase
CgP DNA activates survival via TLR9 and PI3K-Akt pathways, macrophages, 4473
CR3-Syk-P13K pathway, β-glucan amplifies tumor cell killing via, 1661
Phosphatidylinositol mannoside from M. tuberculosis, binds α2β1 integrin on CD4 T cells, induces FN adhesion, 2959
mycobacterial, characterization of binding to CD1d, 4577
Phosphoinositide 3-kinase
p110δ, role in CD4CD25 Foxp3 Treg cell function, 6598
p110δ isoform, controls clonal expansion, Th cells, 5122
Phospholipase A2, group V, induces β2-integrin-mediated adhesion and LTC4, eosinophils, 574
Phospholipase C, γ1 and γ2 in NK cell terminal maturation, 5365
Piglets
fetal and neonatal, antibody repertoire development, 5459
fetal and neonatal, Ag repertoire development, IgG subclass transcription, 5480
Pillars of Immunology
antibodies and diversity, 4235
homing in on L-selectin, 3
Ly-40 IL-2-activated NK cells, MHC class I allergen specificity, 5761
MHC molecules and binding motifs, 2739
molecular basis of “missing self” hypothesis, 5759
nuclear factor in B cells, 7483
T Cells Stop to Smell the Roses, 1379
PIM. see Phosphatidylinositol mannoside
PIMs. see Phosphatidyl-nio-inositol mannosides
Pin1, regulates GM-CSF mRNA stability, T cells, 6999
Pituitary-ovarian axis, autoimmune-mediated disruption, premature ovarian failure caused by, 1938
Plasma cells regulated by Yav proteins, 8620
TLR4-driven differentiation, ERK in control of, 5337
Plasmablasts, centrocytes, centroblasts and, CD77 B cell subset comprising, 4341
Plasminogen activator
-1, tissue-type function during E. coli-induced sepsis, 1189
urokinase-type, kringle domain in LPS-induced injury, lung, 5550
Plasminogen activator inhibitor type-1, mice deficient in, enhanced IFN-γ response to LPS and SEB, 8171
Plasmodium berghei ANKA, mast cells and mast cell-derived TNF in, 3294
Plasmodium chabaudi chabaudi AS, infection causes CD8 T cell-mediated MMM loss, 2518
Plasmodium falciparum
blood-stage, heterogenous cytokine responses to, 5736
GPI, JNK2 disruption decreases cytokine responses to, 6344
MSP-1, prenatal malaria exposure affects acquisition of inhibitory Abs to, 7139
Plasmodium yoelii, NK cell responses to, 1229
Platelet-activating factor receptors, serotonin and, role in immunoregulatory B cells, 4810
Platelet-activating factor receptors Gα and, in activation and regulation, 3242
impaired migration, polymicrobial sepsis, 1264
sheepdards bacterial cell wall into host cells, 6182
Platelet-derived growth factor ligands, IL-4271
cardiac allograft rejection, B-cell-mediated Ag presentation in, 7715 immunoproteasomes in cross-presentation, 983 of tumors, Q8 locus in, 2123 RbE, induction and endotoxin tolerance, 4080 Renal cancers, mouse, recognized by NKG2D via ICAM1 expression, NK cells, 2575 Renca. see Renal cancers Resistin-like molecules, induction in helminth infections and allergies, review, 1393 ResolvD series, acute kidney injury mitigated by PD1 and, 5902 Respiratory syncytial virus DCs generated by CD11c MHC class II precursors, 2536 pDCs in viral replication and AHR, 6263 Retinitis, HCMV IE2 protein mediates apoptosis in, via c-FLIP, 6199 Retinoic acid, stimulates IL-2-mediated T cell proliferation, 2851 Retroviral gene therapy, treatment of complement regulatory protein deficiency, 4953 Rev epitope, recognition by EIAV-specific CTL variant in α2 domain of equine MHC I alleles, 7377 Rheumatoid arthritis calcineurin in, 2681 clusterin expression in, 6471 PG-induced, CD44 and L-selectin expression in innate immune system, mouse, 1932 PGE, augments IL-10 signaling, THP-1 cells, 1092 SAA binding to FPR1 induces synovial hyperplasia and angiogenesis, 5585 soluble costimulatory molecules regulate synovial T cell activation, 8844 synovial autoreactive T cells resist IDO-mediated inhibition, 8226 TWEAK as novel arthriogenic mediator, 4072 Rho, effect of plexin-A1 on actin and, DCs, 4271 Rho guanine dissociation inhibitor Rho GDPβ and, defective lymphocyte migration in absence of, 8512 as substrate of GRAIL, 7559 Rhodococcus aurantiacus, TNF-α and IL-6 in granulomatous and inflammatory response to, 642 Rickettsia africae, see Rickettsia infections Rickettsia, mouse, recognized by SCR, 2107 Salivary glands, MCMV-induced sialadenitis and dacyroadenitis as model for Sjögren’s syndrome, 7391 Salmonella typhimurium CD8 T cell responses during infection, 1516 DC generated by, prevent DM type I, NOD mouse, 2224 regulates Flt3 location, reduces DC activation and Ag presentation to CD4 T cells, 8650 Salp15, CD4 as receptor for, 6579 SAP. see Signaling lymphocytic activation molecule-associated protein Scavenger receptor A, MLB augments lipid A, S. aureus and E. coli uptake by Kupffer cells via, 5517 Scavenger receptors, in HSP70 binding and internalization, 8604 Schistosoma mansoni, IgE and Th2 cytokine responses to worm Ags, 5490 Schwann cells, CD1d, interactions with inNKT T cells, 5226 Secondary lymphoid tissues, CD8 T cell recall responses and, 6738 Secretory leukocyte protease inhibitor gene, TNF-α tumor-promoting effect involves induction of, CD4, generated via MHC class I-restricted TCRs, 976
CD4, IL-1R1 in, induction of responses to S. pneumoniae and, 6044
TRAIL deficiency delays quality erosion, “helpless” memory CD8 T cells, 999
T cell lg muicin domain 2 inhibits T cell activation, 4966
in regulation of T cell responses and airway inflammation, asthma, 4311
T cell lg muicin domain 3, role in hepatic CD8 T cell regulation, aGVHD, 4281

T cell receptor $\alpha$ genes, direct MHC restriction in responses, T cells, 6804
T cell receptor excision circles, $\alpha$ and $\beta$, effects of age, thymectomy and HIV on, naive T cells, 4391
T cell receptors
CD8$\alpha$ promotes gene transfer, melanoma, 991
FcRy in TCR complex, regulatory function and, DN T cells, 2250
high-affinity, specificity and degeneracy, T cells, 6911
HMGBl suppresses PDC response to agonists of, 8701
IL-7R and, in CD4 T cell clonal deletion, irradiated mice, 8320
isolated from inflamed paw, gene therapy for arthritis, mouse, 8140
LFA-1 function mediated by, regulated by Talin1, T cells, 7707
MHC-class I-restricted, CD4 T cell help generated via, 976
mimics of, targeting to MHC class I-peptide epitope, promotes tumor gene cell death, 4187
model for gene segment use, 3857
NAB2 induced by, enhances T cell function via IL-2, 8301
natural structural variant, receptor function and antigen specificity, 8387
preTCR induces TCR $\gamma$ silencing during development of $\alpha$ $\beta$ T cells, 6038
repertoires expanded by DNA vaccination, 7626

in sepsis-induced apoptosis, T cells, 7968
Shp2 deletion suppresses pre-TCR and TCR signals, thymocytes, 5990
signaling, Ub1c13 in, thymocytes, 7520
signaling costimulated by FasL, cytoplasmic T cells, 1481
TCR $\beta$-chain-KP33 complex and FcRy in reconstitution of allogeneic HSCs, 1444
TCR signaling and CD4 T cell development, role of RasGRP1, 1470
TCR $\zeta$ mRNA, regulation of stability and translation of, SLE, 8248
TCRz CD83 loop audiation regulates positive selection, 2477

TLR4, in mediating the role of IL-17-producing T cells in immunity to B. pertussis, 7980
trigger TGF-$\beta$ processing, CD8 Treg cells, 6991

T cells
A2AAR in regulation mediated by, colitis, 2765
$\alphaB$, preTCR induces TCR $\gamma$ silencing during development of, 6038
activated, effect of CD43 on in vivo assays of recruitment, 6450
activated, role for Notch signaling in cytokine-dependent survival, 5041
activation, modulated by glutamate release by DCs, 6695
activation and localization, modulated by Tc1-mediated antitumor responses, breast cancer, 8191
activation inhibited by GILT, 4369
activation inhibited by TIM-2, 4966
activation of CNS APCs, inhibited by IFN-$\beta$, 3542
AFP-specific, responses to AFP-positive HCC, 712
Ag-experienced, limit naive T cell priming, L. major infection, 925
Ag-specific CD8, around DCs promoted by CD4 help, 1400
CD8, development of central memory during M. tuberculosis infection, 6361
CD8, incomplete differentiation in tumor-draining LNs, 6081
CD8, response to C. trachomatis, genital mucosa, 7974
CD8, reversal following recombiant polypeptide stimulation, Hodgkin lymphoma, 4897
central memory CD4, cytokine production and proliferation in humans, 8185
age- and vitamin E-induced changes in cytokine production profiles, 6052
alloantigen-induced CD8 reg, CD103 marker for, 2775
anergy, mediated by monocyte-derived macrophages, 2691
antigen-induced selective recruitment of circulating memory T cells, 8851
antiviral effector function, CCL10 and, 8372

aP2 regulates priming of, 7794
autoimmune, B cells and DCs in activation, 4481
B cells and chemotaxis triggered by CCL21 and CXCL13, 2340
primed by DC-LAMP and LAMP-1, HIV-1 Gag chimeras, 2265

CD4
activation influenced by mucosal adjuvants and airborne allergens, 913
autoaphagy induction and growth factor withdrawal cell death, 5163
BE-specific, tolerized by HLA- DP2 binding of beryllium, 3874
CD8 and, activation and N-linked glycan remodeling, 2431
CD8 and, reg, induction influenced by environment, tumors, 896
CD8 and, regulated by HIF-1$\alpha$, 4962
CD80 expressed by, regulates CNS function, EAE, 2948
CD97 mediates CD55 costimulation, 1070
conversion into VEGF-carrying cells via NRP1 transfer from DCs, 1460
COX regulates cell surface expression of CXCR3/1-effecting granules, 8806
critical for NK T cell-dependent tumor rejection, 6747
CXCR4$^{+/+}$CD69, accumulation in adenocarcinoma, lung, 6983
death during SIVmac251 infection predicts rate of AIDS progression, 6685
EBNA-specific, intercellular Ag transfer and EBV-transformed B cell recognition by, 3746
EBV-specific, allogeneic responses of, 1427
effects of siRNA-mediated Notch ligand knockdown in, 885 epigenetic remodeling of memory CD8 T cell IL-2 and IFN-$\gamma$ loci influenced by, 1062
Foxp3 development in MHC class II-deficient mice, 8307
HAdV-specific, inhibit viral replication through cognate interaction, 8851
heterogenous memory, multiple precursors for, 869
IFN-$\gamma$ receptor type 1 reg, activated by B7H1-Ig fusion protein, 3606
IFN-$\gamma$ response by, cytotoxic L. monocytogenes localization triggers, 7146
IFN signature following HIV infection, 6227
IL-4 exposure stabilizes IL-4 mRNA via HuR, 4426
IL-17-producing, IFN-$\gamma$ regulates expansion during Mtb infection, 1416
immunity elicited by DC targeting of xenogeneic survivin, 8410
immunoreceptor-grafted, lyse target cells via granzyme/perforin, 5668
interaction with CD11c DCs induces osteoclast development, 3314
Melan A/MART-1-specific, epitope visualization by MHC class II tetramers, 6769
memory, CCR8 expression identifies subset of, 6940
memory, persistence following infection with GI T. muris, 511
memory, recall controlled by CD28/B7, 7698
CD4CD25 Treg cells, 6952
MRL-lpr/lqld, activated by B cells and DCs, L-chain Tg mice, 45
NK cells and, protect against melanoma tumor formation, brain, 8448
paracrine signaling during antiviral response, 4257
perforin in protection from lethal influenza mediated by, 2888
phenotypes of, susceptibility to OPC determined by, HIV-1 transgenic mice, 479
rapamycin mediates Treg cell expansion via, 944
reg, characterization of BB rat model of autoimmune diabetes, 7820
resident in normal skin, letter, 1375
responses against TRAG-3, melanoma and breast cancer patients, 2717
responses induced via Ag targeting to Decin-1, 2276
S. typhimurium regulates Flt1 location, reduces DC activation and Ag presentation to, 3983
STAT4 in P-selectin ligand induction on, 7673
STAT5 activation and homeostasis, 2216
TCR and IL-7R in clonal deletion, irradiated mice, 8320
TCR signaling and development, role of RasGRP1, 1470
vaccine-elicited responses enhanced by CpG-ODN and IL-2 synergism, 8860
CD4 and CD8, defective Th1 cytokine gene transcription, WAS patients, 7451
CD4 CD8’, reactivation histoplasmosis regulated by B cells and, 1763
CD4CD8, Nur77 regulation by immaturity, 6660
CD4CD25 CTLA-4 signaling and TGF-β-mediated suppression by, 2331
Foxp3, and IL-10-secreting CD4CD25 T cells during colitis, 5852
Foxp3 adaptive reg, suppress effector T cells via COX-2 and PGE2, 246
CD4CD25 reg activity limited during γ-herpesvirus 68, 4670
circulating and liver-resident population and progression of HBV-infection, 739
CTLA-4 blockade abrogates function, 4376
defective PKC and Ras-ERK activation limits IL-2 production, 2186
Foxp3, CY-induced DM1 associated with, NOD mouse, 6603
Foxp3, IL-2 controls production of, 5115
Foxp3, PI3K p110δ in function of, 6598
Foxp3, rapamycin in expansion of, healthy and type 1 diabetic subjects, 8335
inactivation by CD25 mAb, 2036
induce IL-10 suppressors via CTLA4, lung transplants, 5631
inhibit LPS-induced monocyte survival via Fas/FasL, 6540
LPS-activated, inhibit neutrophils and promote their apoptosis, 7155
molecular program imposed on CD4 T cells by, 6952
number indexed to IL-2-producing cell number, 192
in polymicrobial sepsis, mouse, 7943
protection requires iNKT cells and, 3695
CD4CD25high Foxp3 reg, expression of CCR4, CCR6 and CLA, mod.
reg, HO-1-mediated, suppress allergic airway inflammation, 5936
reg, levels in prostate cancer patients, 7398
STAT3β deficiency causes decreased regulatory function of, 2770
CD4NK, CD38 in survival of, NOD mouse, 2939
CD8 accumulation following immunization against an immunorecessive epitope, tumors, 255
Ag coupled to liposomes induce potent antitumor immunity, 2324
age-related clonal expansions express CD122 and CD127, 2784
aggression toward β cells mediated by TNF-α controlled by idd9.1 locus, 5105
alternative reading frame epitopes, review, 8283
antigen presentation to, via TAP-independent pathway, L. major, 3525
asynchronous differentiation of, 8466
CD28 costimulation in resistance mediated by ECTV, 8027
CD28null memory, growth mediated by IL-15 and its induced cytokines, 7802
CD70 in CD4 Th cell-dependent priming of, 2969
CD80 ligation in CD25 expression, 4495
effect of immunoproteasome subunit deficiencies on influenza virus-specific responses, 7680
effector, responses expanded by OX40 and 4–1BB, 4464
effector memory, human bone marrow reservoir for, 6730
electron transport complex I in function, 852
estradiol inhibits responses to paternal Ag-bearing cells during insemination, 7567
fatal recall responses mediated by, erlichia infection, 4644
“helpless” memory, TRAIL deficiency delays quality erosion, 999
homeostatic proliferation reverses anergy and promotes tumor rejection, 4521
HTLV-1-specific, reduced function in ATL patients, 5718
human effector, TLR3 expression and function, 8708
IFN-1 dependence in various infections, 1746
IFN-responses generated by overcoming original antigenic sin, 2873
IL-12 conditioning requires STAT4, 7618
IL-12 regulates T-bet and Eomes expression during differentiation, 7515
IL-17 producing, role in CHS responses, 6852
immune responses augmented by HSP70/peptide interactions, 1017
influenza A virus-specific, immunodominance hierarchies, 2917
influenza virus-specific, priming impaired by AHR activation, 5819
intrahepatic, analysis in normal and HCV-infected liver, 729
intrahepatic activation by non-self Ag induces differentiation, 1689
lactomer, unique differentiation program, 777
maintenance of, in protection from HIV-1, 7406
melanoma-specific, circulatory, induced by Melan A peptide and CpG ODN vaccine, 1670
overexpressing telomerase, regulation of proliferation in, 3657
peptide-specific, generated by prime boost with alternating DNA vaccines, 6626
primed by DCs cross-dressed with MHC class I-peptide complexes, 6018
priming by DNA vaccines encoding Hsp-associated TAA, 1534
quantification repertoire diversity of influenza-specific epitopes, 6705
recall responses and secondary lymphoid tissues, 6738
reg, TCR triggers TGF-β processing, 6091
responses against RAB38/5-5-1, melanoma patients, 8212
responses during S. typhimurium infection, 1516
role in model of demyelinating disease, 2403
specific response induced by BCG vaccination, human newborns, 5647
stimulated by CD8Tc-APCs via pMHC, CD80 and IL-2, 2976
stimulated by i.d. delivery of rAd35 transduced skin-emigrated DCs, 2208
Tim3 in hepatic regulation, αGvHD, 4281
tolerance to tissue Ags requires PD-L1/PD-1 interaction, 8291
usage of cellular niches by CMV, EBV and influenza virus, 4998
CD8 memory C. trachomatis infection alters development of, 4021
CCL5 transcription regulated by IL-4, 4451
conditioning and response to infection, 3012
effector, specific for mycobacterial Ags, characterization, 1780
enhanced by IL-10, L. monocytogenes infection, 2565
epigenetic remodeling of IL-2 and IFN-γ loci influenced by CD4 T cells, 1062
IL-7Rα expression in development, 4247
impaired development in MBD2 absence, 3821
latent HSV1 influences generation of, 3821
conditioning and response to infection, 8356
repeated immunization dictates phenotype, 831
response patterns to MCMV, 450
subsets expressing Per, GraA, and GraB, 4330
CD49b reg, CTA suppressed by immature DCs via expansion of, 3806
induced by monocyte-derived macrophages, 2691
induces B7-H4 on APCs via IL-10, 40
MD1 regulates development, 1078
modulated by immunotoxin therapy with IL-2, causes breast cancer re-jection, 84
rapamycin mediates expansion via CD4+ T cells, 944
requirement for CD28 costimulation, PTEN in, 4262
response to C. neoformans infection, ROS in, 5509
response to TCR, major, initiated by LN-resident DCs, 1250
self-specific CD8+ self-Ag maintains innate antibacterial function, 138
senescent CD8+CD57+ cytotoxic and self-Ag maintains self-Ag maintains self-site-mediated snatching of, 4927
HLA-DR7 and HLA-DR11-restricted CD4+, induced by p53+/−, ±, 6795
IL-13Rα1+CD8+T enhances human IL-13 transcription, 8633
memory, CD49b indicates functional specialization, 968
rescued CTLs from AICD, 2862
SP in influenza immunity and function of, 5317
Th1 IL-10 inhibits IFN-γ production via Eomes repression, 3721
IL-12/23p40 in immunostimulatory DC migrants in promoting differentiation of, TCR signals, 1618
IL-27 induces differentiation via p38/βet-bet and ICAM1/LFA-1/ERK1/2 pathways, 7579
responses in Whipple’s disease, 2015
Th2 and, granuloma formation, CCR4 in, lung, 41/49
Th1/Th2 balance in T cells, controlled by mast cell modulation of DCs, 3577
Th2
AAD mediated by, inhibited by CD137 costimulation, 814
B cell activation and systemic auto-immunity triggered by proliferation of, Lαβ1* mutant mouse, 2285
development regulated by bmi-1 genes via GATA3 stabilization, 7656
IL-12 instructs skin homing of, 3763
responses of IgE and, to worm Ags, S. mansoni, 5490
TAA. see Tumor-associated antigen
Talin1, regulates TCR-mediated LFA-1 function, T cells, 7707
TANK-binding kinase 1 (TIRAP).
Tim3.
Toll/IL-1R domain-containing adapter protein
TIR7, inhibits T cell proliferation via CTLA-4, 6833
Tissue factor, C5aR-TF cross-talk in APS, neutrophils, 4794
Tissue-restricted antigens, DNA immunization against, enhances immunity after allogeneic HSCT, 4159
TNF-like weak inducer of apoptosis as novel arthritogenic mediator, 2610
in pathogenesis of CIA, 6433
TNF-related activation-induced cytokine, osteoelastic precursors induced by TRANCE/RANKL, 4360
Tolerance
allospecific, induced by DCs modified to express sTNFR, 2175
central, LT pathway-directed, to collagen type II, 290
CP-induced, NKT cells in induction and maintenance of, 8400
development in the immune system, Presidential Address, 1369
HLA-DP2 binds beryllium and tolerizes BE-specific CD4 T cells, 3874
induction to inhaled Ag, relies on CCR7-dependent dendritic cell-mediated transport to bLN, 7346
initiated by kynurenine pathway enyzmes, DCs, 130
NFAT in B cell self-tolerance, 1510
oral, role of thymus, EAE, 1500
to tissue Ags requires PD-L1/PD-1 in interaction, CD8 T cells, 8291
to TLR- and CD40-specific stimuli, mediated by Wolbachia endosymbionts of B. malayi, macrophages, 1240
transplantation, p27kip1 required for, 5169
Toll/IL-1R domain-containing adapter protein, mediates defense against K. pneumoniae, lung, 538
Toll-like receptor ligands

Thymocytes
CD8, impaired generation, Ets-1-deficient mouse, 905
coceptor signal strength regulates positive selection, 6613
DP, CD28 ligation costimulates cell death, 6098
immature, CD8 activates MAPK pathway via CD166, 1152
immature CD4+CD8+Nur77 regulation by, 6660
leukemogenic Notch1 mutants, effect on development of, 2153
Shp2 deletion suppresses pre-TCR and IgM signals, 5900
SP, CD8/Lck transgene drives differentiation of, 6007
Uhbc13 in TCR signaling, 7520
Thymus
DN Treg cell development outside of, 2803
epithelium, agonist ligands from, enhance Treg cell positive selection, 1101
epithelium, alterations in EphA4-deficient mouse, 804
leptin augments thymopoiesis in leptin-deficient mice, 955
leptin-induced adipocyte atrophy, thymus, 169
proinsulin-2 tolerance due to radiorresistant cells, 53
role in oral tolerance, EAE, 1500
Tm3, see T cell lg mucin domain 3
TIRAP, see Toll/IL-1R domain-containing adapter protein
TIRC7, inhibits T cell proliferation via CTLA-4, 6833
Tissue factor, C5aR-TF cross-talk in APS, neutrophils, 4794
Tissue-restricted antigens, DNA immunization against, enhances immunity after allogeneic HSCT, 4159
TNF-like weak inducer of apoptosis as novel arthritogenic mediator, 2610
in pathogenesis of CIA, 6433
TNF-related activation-induced cytokine, osteoelastic precursors induced by TRANCE/RANKL, 4360
Tolerance
allospecific, induced by DCs modified to express sTNFR, 2175
central, LT pathway-directed, to collagen type II, 290
CP-induced, NKT cells in induction and maintenance of, 8400
development in the immune system, Presidential Address, 1369
HLA-DP2 binds beryllium and tolerizes BE-specific CD4 T cells, 3874
induction to inhaled Ag, relies on CCR7-dependent dendritic cell-mediated transport to bLN, 7346
initiated by kynurenine pathway enzymes, DCs, 130
NFAT in B cell self-tolerance, 1510
oral, role of thymus, EAE, 1500
to tissue Ags requires PD-L1/PD-1 in interaction, CD8 T cells, 8291
to TLR- and CD40-specific stimuli, mediated by Wolbachia endosymbionts of B. malayi, macrophages, 1240
transplantation, p27kip1 required for, 5169
Toll/IL-1R domain-containing adapter protein, mediates defense against K. pneumoniae, lung, 538
Toll-like receptor ligands
**Toll-like receptors**

activation triggers antiviral immune response, LC-like DCs, 298 deletion limits mortality and severity in cytophlebovirus infection, 6301 EAE suppressed by, role of interferon \( \beta \), 7505 extracellular TLR4 domain, LPS-induced inflammation inhibited by MD-2 and, lungs, 8133 FeR and, inhibited by TREM-2 and, LPS, 2051 hyper-sensitivity, EBV LMP2A induces autoraecoitive B cell activation and, 2793 IL-10 production induced by, Btk in, macrophages, 7203 innate immune responses initiated via activation of, testicular tissue, Sertoli cells, 7122 intracellular signaling, role in human disease, review, 11 IRAK-1 gene Q293X mutation detection and characterization of defective post-transcriptional TLR/IL-1R re- monocytic, 8203 LPS-activated gene expression mediated by, mechanisms regulating, 4299 microbial TLR2 agonist induces ApoA-1 ability to activate macrophages, 4826 microglial TLR4 in leukocyte recruitment into brain, 8103 nucleic acid-sensing, modifiers of autoimmunity, review, 6573 ODNs modulate TLR7 and TLR8 activation by imidazopyridines, 8164 in pathology of African tick bite fever, 2699 signaling modulated by 1-MT, DCs, ODNs, 4820 signals dependent on MyD88 and TRIF, IL-10 produced by myeloid DCs and macrophages in response to, 7551 specific profile expressed by human Langerhans cells, 7959 stimuli specific to, Wolbachia endosymbionts of B. malayi mediate tolerance to, macrophages, 1240 TLR-mediated TNF-\( \alpha \) production inhibited by adenosine, human neonates, 1956 TLR2 activates calcium-dependent signaling, airway epithelial cells, 1330 and bradykinin B1R activation in induction of type I immunity to T. cruzi, 6325 C. albicans recognition by macrophages requires galecin-3, 4679 GBS-induces microlial degeneration via TLR2 and TLR8 pathway, 583 human HCV gB and gH in activation of, permissive cells, 7094 hyaluronan acts as endogenous danger signal via engagement of, 1272 in innate response to P. gingivalis, 8296 NTHi binding lipoproteins for, synergize with IFN-\( \beta \), 673 in regulation of innate immunity and APCs by Mtb LprA, 422 role following challenge with S. au-reas and protoplastic ligands, 8154 role in immune-mediated GN induction, 1925 TLR3 expression and function, human effector CD8 T cells, 8708 TLR3 ligation, vepirim/eg5 in antiviral response activated by, fetal astrocytes, 4735 TLR4 analysis of polymorphic variants of, 322 bacteria and, in necrotizing enterocolito- sis, 3273 cell surface expression regulated by PRAA1, 1772 NF-\( \kappa \)B activation dependent on, in H. pylori HPO175-mediated IL-re- lease, 7950 plasma cell differentiation driven by, ERK in control of, 5357 in reaction of renal collecting duct epithelial cells to E. coli-associated pyelonephritis, 4773 SIGIRR promotes resistance to P. aeruginosa keratitis via IL-1R1 and, 548 TNF-\( \alpha \) induced and IL-6 modulated by RANTES, peripheral blood monocytes, 4202 up-regulation pathogenic for lupus-like autoimmune disease, mouse, 6880 TLR4, C. trachomatis HSP60 induces trophoblast apoptosis through, 1257 TLR7, flavivirus activation and, DCs, 7114 TLR7/8 and TLR9, ICOS-induced B7h shedding inhibited by, B cells, 2356 TLR7 ligands induce higher IFN-\( \alpha \) production in women, 2088 TLR8 activation by combination of imidazopyridine IRM and polyT ODNs, 6584 TLR9 agonists activation of pDCs initiates inNKT cell-mediated mDC cross-talk, 1028 in anti-nucleosome and anti-DNA Ab, lupus, mouse, 1349 autoimmunity modulated by TLR9, GVHD model of SLE, 7444 CpG DNA activates survival via, macrophages, 4473 TLR2 and, role in MyD88-dependent parasitism control, T. cruzi, 3515 Toxoplasma gondii CCR9-expressing microglia elicited by, 3644 genotype determines MyD88-dependent signaling, macrophages, 2584 gram negative bacteria aggravate ileal Th1 type pathology, 7855 resistance to, DCs essential for IL-2 production and, 31 TTP11, see Tripeptidyl peptidase II TRAG-3, see Taxol-resistance gene-3 TRAIL apoptosis mediated by, HIV-1-infected macrophages, 2304 deficiency delays quality erosion, “help- less” memory CD8 T cells, 999 TRANCE, see TNF-related activation-in- duced cytokine Transcription profiles, CCL2, new hypoxia-inducible gene, 1941 Transcriptome, modified by hypoxia, primary human monocytes, 1941 Transforming growth factor-\( \beta \) in suppression of CTLA-4 signaling by CD4 CD245 T cells, 2331 TCRs trigger processing of, CD8 Treg cells, 6091 tolerogenic DC induction by pancreatic cancer cell-secreted, 3448 Transforming growth factor-\( \beta \) receptor II, antimitochondrial antibodies and, primary biliary cirrhosis, 1655 Transforming growth factor-\( \beta \)1, membrane-associated, inhibits memory T cell signaling, 4582 Transient receptor potential vanilloid sub- type 1, mediates cell death, microglia, 4322 Translation, contribution of macrophage ERK to, via prevention of JNK-dependent PI3K inhibition, 1636 Translationally controlled tumor protein, M. mycetomatis, marker for myco- toma progression, 1997 Transplantation B7-H1 induces CD8 or CD4 T cell apop- tosis, corneal allografts, 5928 bone marrow, PGE2, and impaired host response following, 5499 cardiac allograft rejection, B-cell-medi- ated Ag presentation in, 7715 effect of alternatively activated DCs on IL-10, Foxp3 CD4 T cells and allograft survival, 5868 immunoproteasomes in cross-presentation, 983 lung, CD4CD25 Treg cells induce IL-10 suppressors via CTLA4, 5631 MyD88 absence promotes inducible al- lograft acceptance, 5307 QTL mapping and resistance to MHC I-deficient BM grafts and, NK cells, perforin-deficient mouse, 7923 targeted lymphoid homing of DCs af- fects allograft survival, 863 tolerance, p27kip1 required for, 5169 Transporter associated with antigen pro- cessing HLA-B*2704 dependent on, for matura- tion and T cell recognition, anky- losing spondylitis, 7015 pathway independent of, L. major anti- gen presentation to CD8 T cells, 3525 Transporter associated with antigen pro- cessing complex, HLA-B44 polymorphisms influence binding, 3150 Trauma, splenic DC function depressed by, 4514 TRECs, see T cell receptor excision circles TREM-2, see Triggering receptor ex- pressed on myeloid cells 2 Trichurus muris, GI, memory CD4 T cell persistence following infection with, 511 TRIF, MyD88 and, TLR signals dependent on, IL-10 produced by myeloid DCs and macrophages in response to, 7551 Triggering receptor expressed on myeloid cells 2 attenuates macrophage activation, 3520 FcR and TLR inhibited by DAP12 and, macrophages, 2051 Triosephosphate isomerase, TPI- and GADPH-reactive autoantibodies in CSF, 5652
Tumor necrosis factors

Trophoblasts, apoptosis of, induced by Th1 responses in Tropheryma whipplei,

Trogocytosis, CD4 T cell conversion into vanilloid subtype 1 Trypanosoma cruzi

IFN-γ-ISO mediated by, macrophages, 6271

IFN type I stimulates NO and resistance to, 3193

TLR-dependent induction of IFN-β mediates defense against, 7059

TLR2 and bradykinin B1R activation in type I immunity induction, 6325

TLR9 and TLR2 in MyD88-dependent parasitemia control, 3515

Tumor-associated antigen, Hsp-associated, CD8 T cell priming by DNA vaccines encoding, 1534

Tumor cells, Her2/neu peptide-HLA class I complex levels predict susceptibility to CTL killing, 5088

Tumor-infiltrating lymphocytes inhibition by CEA-CA1, 6062

TCRs reactive to, gene transfer confers high avidity and tumor reactivity to PBMCs and, 6548

Tumor necrosis factor-α

Cbl-b regulates inflammatory cytochrome production, IgE-activated mast cells, 5980

CD8 T cell aggression toward β cells mediated by, controlled by id91.1 locus, 5105

CD28CD8 memory T cell growth mediated by IL-15 and, 7802

FRAI protooncogene stimulated by, C-Jun-driven transcription, pulmonary epithelial cells, 7193

gelatinase B regulation of, mast cells, 2638

IL-6 and, in granulomatous and inflammatory response to R. aurantonius, 642

IL-8 expression independent of, N. gonorrhoeae infection, 1314

regulation of Aβ1-40, NF-κB in, 7173

TLR-mediated production inhibited by adenosine, human neonates, 1956

TLR4-induced, modulated by RANTES, peripheral blood monocytes, 5077

Tumor-promoting effect involves induction of SLPI gene, 8046

Tumor necrosis factor receptors regulation by MIF, 4818

soluble, DCs expressing, induce allospecific tolerance, 2175

Tumor necrosis factors

Ab-derived fusion proteins, structure-activity profiles, 2423

E. coli induces GILT via IL-16 and, THP-1 cells, 4833

mast cell-derived, mast cells and, in P. berghei ANKA infection, 3294

in pathogen control and brain damage, cerebral liristerosis, 3972

Tumors

anti-tumor immunity suppressed by IL-10 and TGF-β-producing T cells, 896
IL-1β regulates BBB permeability via HIF-VEGF reactivation, 5574
VEGF165 interaction with neuropilin-1 protects FLS from apoptosis via Becl2 and Bax, RA, 5727
Vascular leakage, blood pressure lowering and, via kinin release by ASP, septic shock, 8723
Vasoactive intestinal peptide, inhibits INF-α and modulates immune phenotype, pDCs, 5920
Vav proteins
in Fcγ R-mediated signaling to Rac and NADPH oxidase p40 component, neutrophils, 6388
regulate Blimp-1, plasma cells and secretory Ig, 8620
Vav1 controls DAP10-mediated cytotoxicity via actin and microtubule dynamics, NK cells, 2349
Vav1 promotes cycloprogresion via TCR/CD8, FOXO1 and p27kip1, T cells, 5024
Vi(D)J recombinase, coding junction processing mediated by, at CRSS, T cells, 5393
VH family genes, Ag repertoire development, fetal and neonatal pigs, 5459
Vimentin, expressed on M. tuberculosis-infected monocytes, role in NKp46 receptor binding, 6192
Viperin, in antiviral response activated by TLR3 ligation, fetal astrocytes, 4735
VPR genes, MCMV, inhibit CTL lysis, 3225
Viral therapy, induction of antitumor immunity by SeV-activated DCs, 3564
Viruses
APOBEC3G regulation by IFN-α, 4530
CCL10 and T cell antiviral effector function, 8372
DCs in antiviral immunity and viral clearance, 492
IL-7 signaling during infection expands effector T cells, 4458
IRF3 in innate responses to, 8008
paracrine signaling during antiviral response by CD4 T cells, 4257
pDCs homeostasis regulated by DAP12 during infection, 2908
TLR activation triggers antiviral immune response, LC-like DCs, 298
Vitiligo, produced by CD4 T cell-dependent autoimmunity melanocyte neoantigen, 3055
Vitronectin, interactions, Hsfs contribute to serum resistance via, 430
VLA-5. see Integrins, α5β1
West Nile virus, γδ T cells facilitate adaptive immunity against, mouse, 1825
Whipple’s disease, Th1 responses in, 2015
Wisconsin-Albino syndrome, defective Th1 cytokine gene transcription, CD4+ and CD8 T cells, 7451
Vollbordia, endosymbionts of B. malayi mediate tolerance to TLR- and CD40-specific stimuli, macrophages, 1240
Wound healing accelerated by P. aeruginosa LPS via activation of epithelial cell signal cascade, 8693
divergent responses in BD and healthy subjects, 6415
X-1, interaction with mIgE in receptor-mediated internalization, B cells, 1139
Xenografts
EC expression of pULBP1 triggers human NK cytotoxicity via NKG2D, 2146
human monocytes recognize porcine epithelium via galectin 3 and α-GAL interaction, 1289
xenoantigen-activated DN T cells lyse B and T cells via perforin/granzyme-dependent pathway, 6920
Yersinia invasin, vaccine efficient against shigellosis using Shigella mutant expressing, 4709
z-FA-MFK, inhibits T cell proliferation and modulates pneumococcal infection response, 3827
Zebra fish
IgL chain isotypes and BCR specificities, 2452
Ikaros, role in T cell and B cell development, 2463
Zinc, in FcεRI-mediated activation, mast cells, 1296
