FEDERATION of AMERICAN SOCIETIES for EXPERIMENTAL BIOLOGY

Benefits for FASEB Society Scientists

The Federation of American Societies for Experimental Biology is an organization of multiple member societies representing tens of thousands of life scientists.

Working closely with member societies, FASEB staff provide strategic intelligence on policy developments, conduct policy research, and engage government and media relations.

HOW FASEB HELPS YOU

In addition to the benefits you receive from being a member in your own professional society, you also receive a variety of important benefits through your society's membership in FASEB including:

- Access to FASEB's Legislative Action Center
- FASEB's Washington Update
- Subscription discounts for *The FASEB Journal*
- Members only online access to the FASEB Directory of Members
- CME at FASEB Summer Research Conferences and society meetings
- Career development resources
- Personal insurance programs
- Credit card and line of credit programs

To learn more about FASEB, visit www.faseb.org and go to "Information for Scientists" to download a brochure.

Call toll-free 800.43FASEB or email memberbenefits@faseb.org.

IN SEARCH OF EXCELLENCE!

Humoral Immune Reactions in Cardiovascular Diseases Ernst Moritz Arndt University Greifswald

The Ernst Moritz Arndt University Greifswald is a traditional German university located in the beautiful region of West Pomerania on the Baltic Sea coastline. Life Sciences constitute one of its major research areas. The university is setting up a new interdisciplinary Centre for Innovation Competence (CIC). Its establishment is supported by the German Federal Ministry of Education and Research through the funding of two research groups. The focus of the CIC is the humoral immune response in cardiovascular diseases. It will elucidate nanostructures of antigens in cardiovascular diseases and the reactions of the immune system upon contact with these complex structures.

For this purpose, two research groups will be established: "Nanostructure" (applying biochemical, biophysical and nanotechnological methods), and "Cell Response" (modern immunological techniques), with both groups collaborating closely. The research group leaders will build a team of 4-5 scientists each. Both groups will be funded initially for five years, with about 3 million euros each. This includes personnel, laboratory set-up and consumables.

Research Group Leader "Nanostructure"

We seek to recruit an outstanding scientist with experience in separation and analysis of proteins, especially in structural changes of proteins and protein aggregates. Candidates should be familiar with nanotechnological techniques such as atomic force microscopy or photon correlation spectroscopy. Knowledge of immunology is considered an advantage.

Candidates should have a PhD in Biochemistry, Chemistry, Biology or Biophysics and should have a strong publication record. They are expected to show a high degree of flexibility and be willing to work in interdisciplinary teams. Ideally, candidates should already have some experience in leading a work group and are team players with very good social skills.

Research Group Leader "Cell Response"

Candidates should possess a PhD, preferentially in Biology, Biochemistry or Medicine (Immunology, Haematology) and should be experienced in advanced immunological techniques with a strong knowledge of molecular biology and biochemistry. Ideally, they should have well-established experience in B-cell immune responses. Experience with transgenic animals and molecular imaging systems is considered an asset.

Interdisciplinary thinking and a high degree of flexibility is expected. Ideally, candidates have had some experience in leading a work group and are team players with very good social skills.

Please send your application by 5 September 2008 to:

Permission?**

Submit copyright requests online at
www.aai.org/ji/copyright.html.

Enter the name and institution contact information. Provide the citation of the original journal article. When adapting a figure or table, submit the request online and FAX the modified figure to 301-634-7829. State where the article will be reproduced and indicate the anticipated date of publication.

IMMUNOLOGY

THE
JOURNAL OF

Sponsoring a Symposium or Conference...

You can place a quarter-, half-, or full-page advertisement in *The Journal of Immunology* for upcoming symposia or conferences. It's a great way to spread the word about forthcoming events! You can include important information, such as registration fees, timetables, speakers, and contact information.

For space availability and pricing, please contact Steve West, Professional Media Group (PMG), at 856-795-5777 ext. 14 or steve@promedgroup.net

The Methodist Hospital Research Institute
THE METHODIST HOSPITAL – HOUSTON, TEXAS

ASSOCIATE PROFESSOR – IMMUNOLOGY

The Methodist Hospital Research Institute located in the world's biggest Medical Center in Houston, Texas, invites applications for full time appointment at the Associate Professor level in Immunology. Applicant must have an active NIH or NSF extramural support, a PhD., M.D, D.V.M. or equivalent degree in the immunological or immuno-biological sciences, and a history of high quality peer reviewed publications. Preference will be given to those individuals whose research studies focus on different aspects of organ transplantation. As a faculty member, the candidate must have an excellent record of mentoring and graduating Ph.D. trainees. Salary and benefits are extremely competitive. Interested individuals should submit their curriculum vitae, names of three references and a summary of accomplishments and research.

Contact: R. Mark Ghobrial, M.D., Ph.D., Chief, Liver Transplantation Surgery and Liver Center Director, and Director of Immunobiology Research Center, 6550 Fannin Street, SM1661, Houston, Texas 77030, E-mail: RMGhobrial@tmhs.org or Malgorzata Kloc, Ph.D., Dr. Sc., Director, Immuno-biology Laboratory, 6550 Fannin Street, SM8. 034, Houston, Texas 77030, E-mail: mkloc@tmhs.org
